The Environmental Notice informs the public of environmental assessments and other documents that are available for review and comment per HRS §343-3 and is updated on the 8th and 23rd of each month on the Office of Environmental Quality Control’s website. If you would like to be notified when it is updated, send us your email address and we’ll put you on our mailing list.

Katherine Puana Kealoha, Esq., Director · Office of Environmental Quality Control · 235 South Beretania Street, Suite 702 · Honolulu, HI 96813

OAHU (HRS 343)

1. **Waikiki Beach Maintenance** (FEA)

   Island: Oahu  
   District: Honolulu  
   TMK: (1) 2-6-10:19  
   Proposing Agency: Dept of Land and Natural Resources, 1151 Punchbowl Street, Honolulu, HI 96813. Sam Lemmo, 587-0377  
   Approving Agency: Same  
   Permits: Dept of the Army Permit (Section 10 and Section 404), Clean Water Act Section 401 Water Quality Certification, Coastal Zone Management Act Consistency Determination, Conservation District Use Application  
   Comments: FEA accepted by the Approving Agency. There is no comment period

   The project site is located in the middle of Waikiki Beach. DLNR proposes to restore and maintain the 1,700-foot-long segment of Waikiki Beach between the Kuhio Beach crib walls and the Royal Hawaiian Hotel groin. Approximately 24,000 cubic yards of sand would be recovered from offshore deposits, and pumped to the shoreline where it would be dewatered and placed along the beach. The project would widen the beach by about 40 feet, restoring the beach to its approximate 1982 width. The project would also include an option for a second beach nourishment after approximately 10 years involving approximately 14,000 cubic yards recovered from the same offshore sand deposits. Also included in the project would be the removal of two old deteriorated groin structures at the east end of the project area. The project will not alter or affect presently on-going sand transport and shoreline processes, wave-driven currents, circulation patterns, water quality or offshore wave breaking. Sand recovery operations will be designed so as to avoid and minimize impacts to marine biota so far as practicable, no long term impacts to marine biota are anticipated. Construction BMPs will be used to avoid impacts to the protected green sea turtle. No effects on historic, cultural and archaeological resources are anticipated. Construction may result in some temporary disruption of beach use and recreational uses, and increased noise and short term degradation of air quality from the operation of construction equipment. The Department of Land and Natural Resources has reviewed the final environmental assessment (FEA) for the subject project and has determined that this project will not have significant environmental effects and have therefore, issued a Finding of No Significant Impact (FONSI) determination.

2. **Nanakuli Community Baseyard** (FEIS)

   Island: Oahu  
   District: Waianae  
   TMK: 8-7-09: 02 por  
   Applicant: Tropic Land LLC, 1001 Bishop Street, Suite 2690, Honolulu, HI 96813. Arick Yanagihara, 538-3785, ext. 252  
   Accepting Authority: Land Use Commission, 235 South Beretania Street, Room 406, Honolulu, HI 96813. Dan Davidson, 587-3822  
Pernits: State Land Use Commission, boundary amendment; Waianae Sustainable Communities Plan, amendment; Zoning change; NPDES; Grading and construction
Comments: FEIS accepted by the Accepting Authority. There is no comment period

Tropic Land LLC proposes to develop a light industrial park on 96 acres in upper Lualualei Valley. The project will consist of approximately 41 units, averaging two acres each. An incubator center will include an industrial building with start-up space and open yard space. The project will have a secured entry off of Lualualei Naval Access Road and a secondary emergency access. There will be landscaped buffers on the front and sides of the development. The northwest corner of the property (2.4 acres) will remain undeveloped. A 100-foot wide strip of land mauka of the industrial lots will be used for drainage and rockfall hazard mitigation. The project will be structured under a condominium property regime. Before the project can be implemented, the landowner must obtain an amendment to the State Land Use District (from Agricultural to Urban) and a change in zoning from Preservation (P-2) to Industrial (I-1). Traffic increases on Farrington Highway will worsen congestion and mitigation measures have been identified. All project traffic will be routed on Lualualei Naval Access Road. The landowner has an understanding with the Navy for use of this roadway. The project will convert 13.5 acres of Class B agricultural lands, but addresses a shortage of small-scale industrial space on the Waianae Coast. No adverse impacts to biological, hydrological, archaeological, or cultural, resources are expected. The developer will extend a water line from the municipal system to obtain water and construct an on-site wastewater treatment system. Short-term noise, dust, and erosion impacts will be mitigated through construction BMPs. See also the Appendix.

3. Phycal Algae Pilot Project (DEA)

Island: Oahu
District: Waialua and Ewa
TMK: (1) 7-1-07:11 por. and 31 por. and TMK (1) 9-1-84: 32 por.
Applicant: Phycal Hawaii R&D, LLC, Seven Waterfront Plaza, 500 Ala Moana Blvd., Suite 400, Honolulu, HI 96813. Larry Trumbore, (248) 767-7318
Consultant: Group 70 International, Inc., 925 Bethel Street, 5th Floor, Honolulu, HI 96813. Jeffrey H. Overton, AICP, LEED AP, 523-5866
Permits: Conditional Use Permit (Major)
Comments: DEA 30-day comment period starts from the date of this Notice. Address comments to the Applicant, with copies to the Approving Agency and Consultant

The Phycal Algae Pilot project will help to promote renewable energy production in Hawaii in biofuel. The project will also promote the use of fallow agricultural lands for biofuel crop and aquaculture in Central Oahu. The pilot project facility at the Poamoho site will include shallow ponds for growth of algae, a processing building for extraction of oil, an anaerobic digester for conversion of biomass to methane gas, and water treatment capability. The refining and processing facility will be located at the Tesoro will include a small facility to convert the algal oil into hydrotreated renewable jet fuel, renewable naphtha, and renewable diesel.

The Phycal Algae Pilot project will demonstrate the capability of algae as a biofuel crop, to provide a wide range of energy products. This project will further objectives for U.S. energy security along with significant reductions to greenhouse gas emissions. The goal of the project is to achieve commercial-scale algal oil production, which can deliver algal oil at competitive price for the Hawaii market. This will help Hawaii to move towards achieving the State’s Clean Energy Initiative, which establishes targets for
both the State and local utilities’ development and use of renewable energy (70% of energy needs
supplied by clean energy by 2030 – Department of Business, Economic Development & Tourism). No
significant adverse impacts are anticipated from the proposed biofuel pilot project. Construction-related
traffic, air, and noise impacts will be short-term in nature. A Finding of No Significant Impact (FONSI) is
anticipated.

MAUI (HRS 343)

4. Lahaina Recreation Center (FEA)

Island: Maui
District: Lahaina
TMK: (2) 4-6-12:05 and (2) 4-6-15:04
Proposing Agency: County of Maui, Dept of Parks and Recreation, 700 Halia Nakoa St., Unit 2, Wailuku, HI
96793. Tamara Horcajo, Director, 270-7230

Approving Agency: Same
Consultant: n/a
Permits: n/a
Comments: FEA accepted by the Approving Agency. There is no comment period

The County of Maui Department of Parks and Recreation used federal grant funds from the Land and
Water Conservation Fund (LWCF) Program in 1985, 2000, and 2002 to construct outdoor recreation
facilities at the Lahaina Recreation Center. The use of these funds placed 28.16 acres of the Lahaina
Recreation Center under Section 6(f) protection which requires that the property be retained in public use
for outdoor recreation. The County of Maui now proposes to license the Youth Center within the 6(f)
boundaries of the Lahaina Recreation Center to the West Maui Boys & Girls Club. The membership fees
and age limits of the Boys and Girls Club will restrict the use of the facility and it will no longer be
considered “open to the public” in conformance with the requirements of the LWCF Program, which
triggers a conversion where a property being taken out of 6(f) protection must be replaced with a
property of equivalent recreational and appraised value. The County of Maui proposes to mitigate the
“taking” from the Lahaina Recreation Center with the development of a “replacement” property located
along Front Street in Lahaina. A Finding of No Significant Impact (FONSI) has been determined.

HAWAII (HRS 343)

5. Shafer Residence in the Conservation District, Waawaa (FEA)

Island: Hawaii
District: Puna
TMK: (3rd) 1-4-28:01
Applicant: Joan Shafer, 209 Honeysuckle Lane, Maggie Valley, NC 28751. James Leonard, 808-
896-3459

Approving Agency: Dept of Land and Natural Resources, Office of Coastal and Conservation Lands, PO Box
621, Honolulu HI 96809. Kimberly Mills, 587-0382
Consultant: Geometrician Associates, PO Box 396, Hilo, HI 96721. Ron Terry, 969-7090
Permits: SMA Permit or Exemption; Plan Approval, Grubbing, Grading, Building; CDUP
Comments: FEA accepted by the Approving Agency. There is no comment period
The Environmental Notice
Office of Environmental Quality Control
June 23, 2010

Joan Shafer (the applicant) seeks a Conservation District Use Permit (CDUP) to build a single-family residence and related improvements on a 0.392-acre lot located near the shoreline but mauka of a shoreline reserve property, in Waawaa in the Puna District. The residence would occupy a footprint of 3,488 square feet and would include a garage and lanai. Other features include a driveway, septic system, pond and minimal landscaping using mostly the native or Polynesian species found in the area.

Land clearing and construction activities over about 7,250 square feet (less than half the lot) would produce minor short-term impacts to noise, air and water quality and scenery. These would be mitigated by Best Management Practices that are expected to be required as conditions of the Conservation District Use Permit and grading permit. The applicant will ensure that her contractor performs all earthwork and grading in conformance with applicable laws, regulations and standards. The project has been fully surveyed for threatened and endangered plants and none are present. Archaeological and cultural resources have been avoided through inventory, consultation, and site planning, which has situated the structures as far mauka as feasible. In the unlikely event that additional undocumented archaeological resources, including shell, bones, midden deposits, lava tubes, or similar finds, are encountered during construction within the project site, work in the immediate area of the discovery will be halted and the State Historic Preservation Division will be contacted to determine the appropriate actions.

STATEWIDE (HRS 343)

6. Biocontrol of Strawberry Guava by its Natural Control Agent for Preservation of Native Forests in the Hawaiian Islands (DEA)

Proposing Agency: Dept of Agriculture, Plant Pest Control Branch, 1428 S. King Street, Honolulu, HI 96814. Dr. Neil Reimer, 973-9522. email: hdoa.ppc@hawaii.gov

Approving Agency: Dept of Land and Natural Resources, Division of Forestry and Wildlife, 1151 Punchbowl Street, Room 325, Honolulu, HI 96813. Paul Conry, 587-0166

Consultant: Geometrician Associates PO Box 396, Hilo, HI 96721. Ron Terry, 969-7090

Permits: Plant Protection and Quarantine permits from the USDA, Animal and Plant Health Inspection Service (APHIS); a permit for import and liberation of restricted organisms from the HDOA, Plant Quarantine Branch; and a research permit from DLNR-DOFAW

Comments: DEA 30-day comment period starts from the date of this Notice. Address comments to the Proposing Agency and Consultant

The Hawaii Department of Agriculture proposes to release in Hawaii a scale insect from Brazil, Tectococcus ovatus, for biological control of strawberry guava, Psidium cattleianum. This insect is a highly specific natural control agent producing leaf galls on strawberry guava that reduce its vigor and fruiting in Brazil, where both species are native. In Hawaii, strawberry guava is a fast growing tree without any natural predators. Its ongoing invasion across extensive areas of native forest has devastating consequences for Hawaiian biodiversity, cultural resources, scenic beauty, and watersheds. Rotting strawberry guava fruit are also a significant source of agricultural pest fruit flies.

Extensive host specificity testing and observations in Brazil demonstrate that this natural control agent will affect only strawberry guava in Hawaii. Initial release is proposed on State Forest Reserves. Biological control is expected to increase to effective levels within a few years at release sites, and, eventually, around the entire State. Introducing this control agent is expected to reduce growth and reproduction of strawberry guava, limiting its spread from areas currently invaded but not eliminating it. Existing stands of strawberry guava will remain available for fruit picking and wood gathering. Control of existing thickets by current methods is expected to become more effective with addition of biocontrol. Native plant species will be better able to compete with strawberry guava, improving biodiversity and
ecological values. Protecting rare native plants will also benefit cultural gathering practices. Biocontrol of strawberry guava will help maintain supplies of fresh water, since invasion by this tree reduces water availability to streams and aquifers. Hawaiian agriculture is expected to benefit from improved control of pest fruit flies.

**SUPPLEMENTAL ENVIRONMENTAL IMPACT STATEMENT (HRS 343)**

On September 8, 2003, the Gentry Ewa Makai (FEIS) was accepted and published in this Environmental Notice. The City and County of Honolulu, Department of Planning and Permitting (DPP) has determined that the subject proposal for a two-lot subdivision has not changed the project substantively and/or will have no significant effect. Therefore, DPP has determined that a Supplemental EIS is not required, per Sec. 11-200-27, HAR. If you have any questions, call Mario Siu-Li at 768-8098.

**CONSERVATION DISTRICT USE PERMITS (HRS 183C)**

The following Conservation District Use Application (CDUA) is available for review and comment per HRS 183C and HAR 13-5. Comments and requests for notification of determinations must be submitted within 30 days of the date of this Notice. Please include the following: (1) name and address of the requestor; (2) the permit for which the requestor would like to receive notice of determination; and (3) the date the notice was published in the Environmental Notice. Send comments and requests to: Department of Land and Natural Resources, Office of Conservation and Coastal Lands, P.O. Box 621, Honolulu, HI 96809. DLNR will make every effort to notify those interested in the subject CDUA. However, it is not obligated to notify any person not strictly complying with the above requirements.

**FEDERAL NOTICES**

Various Construction and Management Activities, Makua Implementation Plan, Oahu, Hawaii

In accordance with the National Environmental Policy Act, a Supplemental Environmental Assessment (EA) and draft Finding of No Significant Impact (FNSI) have been prepared for the implementation of proposed natural resource management actions in existing management units (MUs), as well as in new geographic areas in the Waianae and Koolau Mountains. Management activities include: threat abatement actions such as installing ungulate control fencing and conducting ungulate, alien plant, small mammal, and alien invertebrate control measures; genetic collection of endangered plants; reintroductions and augmentation of endangered species into appropriate, protected habitat; fire control; and erosion control. The purpose of the Proposed Action is to meet the objectives of the Makua Implementation Plan by implementing natural resource management actions to control threats to target endangered species and help these species achieve stabilization. The need for the Proposed Action is to meet conditions stipulated in the 1999 and 2007 non-jeopardy Biological Opinions and subsequent amendments issued by the US Fish and Wildlife Service.

Based on the information analyzed, the EA concludes that the proposed action would not result in any unmitigable significant direct, indirect, or cumulative adverse impacts on the natural or human environment.

The EA and draft FNSI are available for public review at the following public libraries: Wahiawa, Mililani, Waianae, Waialua, Kahuku, Aiea, and Hawaii State Library. Copies can also be obtained by contacting Mr. William Rogers at (808) 656-3075 or William.Rogers5@us.army.mil. Written comments will be received and considered up to 30 days from the publication of this notice, and should be directed to the email address above, or mailed to: Directorate of Public Works, Environmental Division (IMPC-HI-PWE), Attn: Mr. William Rogers, 947 Wright Avenue, Wheeler Army Airfield, Schofield Barracks, 96857-5013.
High Performance Computing Modernization Office – Maui Energy Improvement Initiative (DEA)

The comment period for the Draft EA will end July 13, 2010. For information or to make comments, please contact Captain Joseph A. Dratz, MHPCC, Program Manager at 550 Lipoa Parkway, Kihei, Hawaii 96753 or Telephone at (808) 891-7729
The Environmental Notice
Office of Environmental Quality Control

GLOSSARY

Agency Actions
Any department, office, board, or commission of the state or county government which is part of the executive branch of that government per HRS §343-2.

Applicant Actions
Any person who, pursuant to statute, ordinance, or rule, requests approval for a proposed action per HRS §343-2.

Draft Environmental Assessment
When an Agency or Applicant proposes an action that triggers HRS §343, an Environmental Assessment shall be prepared at the earliest practicable time to determine whether an environmental impact statement shall be required per HRS §343-5(b), for Agency actions and HRS §343-5(c), for Applicant actions. For environmental assessments for which a Finding of No Significant Impact is anticipated, a Draft EA (DEA) shall be made available for public review and comment for 30 days and public notice is published in this periodic bulletin per (HRS §343-3), also known as The Environmental Notice.

Final Environmental Assessment and Finding of No Significant Impact
The Agency shall respond in writing to comments received during the review and prepare a Final EA (FEA) to determine whether an environmental impact statement shall be required. The FEA must respond to all public comments. If there are no significant impacts, then the Agency will issue a Finding of No Significant Impact (FONSI). An Environmental Impact Statement will not be required and the project may then be implemented. The public has 30 days from the notice of a FONSI in this bulletin to ask a court to require the preparation of an EIS.

Draft Environmental Impact Statement
After receiving the comments on the EISPN, the Agency or Applicant must prepare a Draft Environmental Impact Statement (DEIS). The content requirements of the DEIS shall contain an explanation of the environmental consequences of the proposed action including the direct, indirect and cumulative impacts and their mitigative measures. The public has 45 days from the first publication date in this bulletin to comment on a DEIS. The DEIS must respond to comments received during the EISPN comment period in a point-by-point manner.

Final Environmental Impact Statement
After considering all public comments filed during the DEIS stage, the Agency or Applicant must prepare a Final EIS (FEIS). The FEIS must respond in a point-by-point manner to all comments from the draft and must be included in the FEIS. See here for style concerns. For Applicant projects, the Approving Agency is authorized to accept the FEIS. For an Agency project, the Governor or the Mayor (or their designated representative) is the Accepting Authority. Only after the FEIS is accepted may the project be implemented.

Acceptability
If the FEIS is accepted, notice of this action is published in this bulletin. The public has 60 days from the date of notice of acceptance to ask a court to vacate the acceptance of a FEIS. For Applicant actions, the Approving Agency must make a determination on acceptance within 30 days of receipt of the FEIS or the FEIS is deemed accepted. For Applicant actions, the law provides for an administrative appeal of a non-acceptance to the Environmental Council.

National Environmental Policy Act
The National Environmental Policy Act (NEPA) requires federal projects to prepare an EA or EIS. In many ways it is similar to Hawaii’s law. Some projects require both a State and Federal EIS and the public comment procedure should be coordinated. OEQC publishes NEPA notices in this bulletin to help keep the public informed of important federal actions.

Conservation District
Any use of land in the State Conservation District requires a Conservation District Use Application (CDUA). These applications are reviewed and approved by the Board of Land and Natural Resources. Members of the public may intervene in the permit process. Notice of permit applications are published in this bulletin.

Special Management Area and Shoreline Setback Area
The Special Management Area (SMA) is along the coastline of all islands and development in this area is generally regulated by HRS 205A, and county ordinance. A special subset of the SMA that is regulated by HRS 343, is the Shoreline Setback Area. Most development in this area requires a Special Management Permit. This bulletin posts notice of these SMA applications to encourage public input.

Shoreline Certifications
State law requires that Hawaii shorelines be surveyed and certified when necessary to clearly establish the shoreline setback from the certified shoreline. The public may participate in the process to help assure accurate regulatory boundaries. Private land owners often petition to have their shoreline certified by the State surveyor prior to construction. This bulletin publishes notice from the Department of Land and Natural Resources of shoreline certification applicants and final certifications or rejections.

Environmental Council
The Environmental Council is a 15-member citizen board appointed by the Governor. They serve as a liaison between the Director of OEQC and the general public concerning ecology and environmental quality. The Council makes the rules that govern the Environmental Impact Statement process (HRS 343). Agendas of their regular meetings are posted on the Internet and the public is invited to attend.

Exemption Lists
Government agencies must keep a list describing the minor activities they regularly perform that are exempt from the environmental review process. These lists and any amendments shall be submitted to the Council for review and concurrence (HAR §11-200-8(d)). This bulletin will publish an agency’s draft exemption list for public comment prior to Council decision making, as well as notice of the Council’s decision on the list.

Endangered Species
This bulletin is required by HRS §343-3(c), to publish notice of public comment periods or public hearings for Habitat Conservation Plans (HCP), Safe Harbor Agreements (SHA), or Incidental Take Licenses (ITL) under the federal Endangered Species Act, as well as availability for public inspection of a proposed HCP or SHA, or a proposed ITL (as a part of an HCP or SHA).
