ANNOUNCEMENTS

The Governor has extended the comment period for the OCCC EISP from 30 days to 60 days. Comments now due 11/22/16.

The Dillingham Ranch Agricultural Subdivision withdrawal applies to the DEA published on 12/23/14, not the EISP of the same name published on 9/23/16.

Status Finding of No Significant Impact (FONSI) determination. Comments are not taken on this action.

This is a re-publishing of the FEA-FONSI for the Kekaha Kai State Parks Phase II Improvements which was originally published in The Environmental Notice on February 23, 2015. This FEA-FONSI was inadvertently published prior to its approval by the Board of Natural Land and Natural Resources and therefore was withdrawn on June 23, 2016. This current FEA-FONSI being submitted for publishing has not been edited or changed from the previous one published on February 23, 2015.

Status Finding of No Significant Impact (FONSI) determination. Comments are not taken on this action.

DLNR plans to decommission Poohohoo Reservoir No. 2, an abandoned earthen structure located on the makai flanks of a cinder cone at 3,800 feet in elevation in the Pu‘uwa‘a‘a Forest Reserve. The reservoir was built in 1968 as part of a system of catchments, tanks and pipelines supplying ranch water, but it was damaged shortly after construction and has not held water since. As it is currently unused and not needed or suitable for future use, it will be decommissioned by removing the liner remnants and excavating and breaching the embankments. No threatened or endangered species or historic sites or cultural practices would be affected by the action. Project plans include precautions to minimize erosion and sedimentation and ensure that the area is geologically stable and can be eventually restored to a native forest condition. Temporary visual impacts from removing the artificial topography will be minor, and after regrowth of koa trees, the scenic character will improve.

Status: Administrative 30-day public review and comment period starts. Comments are due by November 7, 2016. Please send comments to the proposing agency and copy the consultant.

The proposed action is to remove the superstructure of Hāna Pier and access trestle at Hāna Harbor. The concrete pier and its access trestle are condemned due to the deteriorated condition of its superstructure (i.e., deck, beams, pile caps, and trestle guardrails). The existing piles would remain in place to avoid adversely impacting corals that have colonized on the piles. The purpose of the action is to remove the public safety hazard presented by the deteriorated pier. A second purpose is to respect the community’s opposition to commercial use that would be required under DOT-H’s mission if the pier were to be repaired instead of demolished. The action is needed because individuals continue to access the deteriorated pier and place themselves at risk, despite barrier fencing and warning signage that are repeatedly installed, repaired, and replaced by DOT-H. In its current condition, the pier serves as an attractive nuisance—a facility that attracts use by community members despite its condemned status, the hazards posed by its unsafe condition, and the physical barriers and warning signs installed by DOT-H. Continued unauthorized use of the pier places community members at risk of injury and presents DOT with ongoing exposure to liability.

**Status**: Finding of No Significant Impact (FONSI) determination. Comments are not taken on this action.

The Division of Forestry and Wildlife currently operates at an existing baseyard on 3 acres located on Kuleana Street in Kahului. DLNR is proposing the development of a new baseyard on 20.3 acres of a State owned parcel at Pūlehunui. At full buildout, the baseyard will include offices, warehouse, lab, parking and equipment storage, nursery, dryland forest restoration, training field, helicopter landing zone, and other ancillary uses. Buildings will not exceed one-story in height. The main vehicular access will be off of the existing Kama’aina Road with a secondary access off South Firebreak Road.

While the proposed baseyard is DLNR’s preferred alternative for this project, renovation of the existing Kahului Baseyard may be considered if funding is not available to develop the Pūlehunui Baseyard. Therefore, renovation of the Kahului Baseyard is also assessed in this Draft EA as a secondary alternative. The renovation would include upgrading the existing warehouse, employee support facilities, plant nursery, and covered parking, relocation of the existing auto repair shop, and development of additional parking and a new multi-story office building. The Kahului Baseyard renovation project would involve lands designated as TMK (2)3-8-079:018 and (2)3-8-001:019.

The Division of Forestry and Wildlife is proposing to implement trail improvements and related structures on the Waihe’e Ridge Trail located at Kahakuloa, Maui, Hawai‘i. The property is owned by the DLNR.

These trail improvements are intended to update the trail to address public safety concerns as related to hikers and/or other trail users through surface improvements, drainage upgrades, and vegetative management. Related improvements include upgrades to the viewing platforms from the trail, including the construction of two new observation platforms, and associated support structures which are intended to enhance the existing trail system experience and bring the trail up to current trail improvement design standards.

The Maui Department of Public Works proposes drainage improvements, including a new culvert which will connect to the existing culvert at the southeast corner of the intersection of Maunaloa Highway/Kamehameha V Highway and Kaunakakai Place. The new culvert will continue west, along TMK (2)5-3-001:008 (por.) and the rights-of-way. The culvert will turn south adjacent to the County’s sewer lift station and will outlet into an energy dissipation basin to capture sediment and limit erosion as the flow transitions into the natural existing swale. A flood wall is also proposed along the fence line of the County lift station, as well as an earthen berm extending from the eastside of sewer lift station to a location near the Moloka‘i Yacht Club.

The proposed project is a component of the 1992 Kaunakakai Drainage Master Plan, which the Department of Public Works is implementing in phases. The Department of Public Works began construction of Kaunakakai Drainage System “B” in 1998 to address flooding in the Kaunakakai area. The proposed drainage improvements were realigned to avoid contaminated soils discovered during construction.

The Division of Forestry and Wildlife, in collaboration with The Nature Conservancy, Moloka‘i Program and the East Moloka‘i Watershed Partnership, is proposing to construct a protective fence through the upper Pua‘ahala, Ka‘amola, Keawa Nui, West ‘Ōhi’a, East ‘Ōhi’a, Manawai, Kahananui, ‘Ualapu’e, and Kalua‘aha ahupua‘a (land divisions), collectively referred to as the Pāku‘i Unit on the Island of Moloka‘i. The proposed fence will be approximately 5.5 miles in length and protect approximately 2,080 acres of vital watershed. The entire 2,080 acre proposed project is a mixture of public and private lands located in the Conservation and Agriculture Districts. The Pāku‘i Watershed Project is part of a larger vision to care for southeast Moloka‘i’s remaining native Hawaiian forests. These forests sit atop and help recharge the ‘Ualapu’e aquifer - the source of residential water supplied by the County of Maui in Mana’e. Less than 15% of the original native Hawaiian ecosystems are left on Moloka‘i. The protection of this natural, cultural resource is imperative to the health of the island and its residents. The fence will expand the protection of the native forest, which are some of the healthiest remaining in the State.

**Status**
The applicant is withdrawing the DEA published on December 23, 2014.

A DEA-AFNSI for the proposed action was published in *The Environmental Notice* on December 23, 2014. Dillingham Ranch Aina, LLC proposed an Agricultural Subdivision on approximately 934 acres of the 2,742-acre Dillingham Ranch to include 91 lots for sale each with a minimum size of 5.0 acres. Two subdivided lots were intended to be for an agricultural cluster with approximately 15 farm dwellings. Subdivision lot owners were intended to be able to build a farm dwelling and non-agricultural accessory uses with a development area not to exceed 5,000 square feet on a single lot per the Land Use Ordinance. New roads were proposed to be developed to access the subdivided lots and agricultural operations. The remaining acreage of 1,808 acres were to be resubdivided into seven bulk parcels to serve the pasturage and equestrian operations, agricultural and ranch operations, and protected open space. After review of the DEA with the City Department of Planning and Permitting, Dillingham Ranch Aina will now proceed with an EIS for a reconfigured project.

Modernize the Kalani High School campus with construction of a new Girl's Athletic Locker Room building, a new Judo/Wrestling building, and renovation of the existing Girl's P.E. Locker/Shower Area. An additive alternative to demolish the existing field restrooms and construct a new field restroom building is included. This project will address gender inequality in athletic facilities as well as substandard building area conditions.
**OʻAHU (CONTINUED)**

- **Status**: Finding of No Significant Impact (FONSI) determination. Comments are not taken on this action.

The Department of Education proposes improvements at Waiʻanae High School Athletic Field. The action will remove existing wood and steel bleachers on the Visitor’s side of the field and replace them with new aluminum bleachers featuring 15-tier seating, space for 17 wheelchairs, ADA accessibility, and seating for up to 2,065 spectators.

The project also proposes constructing a new accessible walkway from the Mākaha end of the field (in the vicinity of a concession stand) to the Visitor’s bleachers and to a performance stage behind the Visitor’s bleachers and replacing two concrete athletic field light poles with two new steel poles of the same nominal height in back of the new bleachers.

The cost of the project is estimated at $1.66 million. Construction will commence after all approvals are received and should take 12 months to complete.

The City and County of Honolulu has prepared a master plan for the renovation of Thomas Square Park. The purpose of the renovation is to:
- Honor the past, especially the Restoration of the Hawaiian Monarchy on July 31, 1843.
- Embody art, history, and culture at the center of the Thomas Square/Honolulu Academy of Arts Special District.
- Revitalize and reactivate the Park to make it a fun place for passive, self-directed outdoor recreation.

The Renovation Plan includes but is not limited to: elements to honor Kauikeauoli (King Kamehameha III) and the restoration of the Hawaiian Kingdom on July 31, 1843; upgraded connections to surrounding arts and institutional uses; an allée of trees along widened sidewalks on Victoria Street and Ward Avenue; renovation of comfort station and maintenance buildings to include space for serving food or event preparations; performance space for the Royal Hawaiian Band; seating terraces to face the performance space; temporary food truck parking area parallel to Victoria Street; repairs of the central fountain; security lighting; and, new landscape beds, benches, and trash receptacles.

The Department of Land and Natural Resources, through the Division of State Parks and the Engineering Division, proposes to install a 4-foot wide, 82-foot long aluminum truss pedestrian bridge across Hanakāpīʻai Stream and construct approximately 50 feet of new trail to connect the bridge to the existing Kalalau Trail in the Nāpali Coast State Wilderness Park, on Kauaʻi Island, Hawaiʻi.
Status: Public review and comment period for these projects began previously. Comments are due October 24, 2016 unless specified otherwise. Please send comments to the relevant agency and copy any relevant applicant and/or consultant.

SHORELINE NOTICES

APPLICATIONS FOR SHORELINE CERTIFICATION

The shoreline certification applications below are available for review at the Department of Land and Natural Resources Offices on Kaua‘i, Hawai‘i, Maui, and Honolulu, 1151 Punchbowl Street, Room 220 (HRS 205A-42 and HAR 13-222-12). All comments shall be submitted in writing to the State Land Surveyor, 1151 Punchbowl Street, Room 210, Honolulu, HI 96813 and postmarked no later than 15 calendar days from the date of the public notice of the application. For more information, call Ian Hirokawa at (808) 587-0420.

## Proposed Shoreline Certifications and Rejections

The shoreline notices below have been proposed for certification or rejection by the Department of Land and Natural Resources (HRS 205A-42 and HAR 13-222-26). Any person or agency who wants to appeal shall file a notice of appeal in writing with DLNR no later than 20 calendar days from the date of this public notice. Send the appeal to the Board of Land and Natural Resources, 1151 Punchbowl Street, Room 220, Honolulu, Hawai‘i 96813.

COASTAL ZONE MANAGEMENT NOTICES

FEDERAL CONSISTENCY REVIEWS

The Hawai‘i Coastal Zone Management (CZM) Program has received the following federal actions to review for consistency with the CZM objectives and policies in Chapter 205A, Hawai‘i Revised Statutes. This public notice is being provided in accordance with section 306(d)(14) of the National Coastal Zone Management Act of 1972, as amended. For general information about CZM federal consistency please call John Nakagawa with the Hawai‘i CZM Program at (808) 587-2878. For neighboring islands, use the following toll free numbers: Lana‘i & Moloka‘i: 468-4644 x72878, Kaua‘i: 274-3141 x72878, Maui: 984-2400 x72878, or Hawai‘i: 974-4000 x72878. For specific information or questions about an action listed below please contact the CZM staff person identified for each action. Federally mandated deadlines require that comments be received by the date specified for each CZM consistency review. Comments may be submitted by mail or electronic mail, as indicated below.

National Oceanic and Atmospheric Administration (NOAA) Designation of the Heʻeia National Estuarine Research Reserve (NERR), Kāneʻohe Bay, Oʻahu

Proposed Action: The NOAA Office for Coastal Management is proposing to designate the Heʻeia NERR in Kāneʻohe Bay, Oʻahu, and approve the State of Hawai‘i developed management plan. Designation of the Heʻeia site as the 29th reserve in the national system will provide a more coordinated approach to managing the estuarine system that fosters collaboration in reaching common goals for research, education, and resource/cultural stewardship. The proposed Heʻeia NERR is located within the Kāneʻohe Bay region on the windward side of Oʻahu and would represent the only reserve within the Hawaiian Islands. The proposed site encompasses 1,385 acres of coastal habitats including uplands, wetlands, and marine habitats, and includes Heʻeia State Park, Heʻeia Fishpond, and Moku o Loʻe (Coconut Island). Designation does not alter existing state or federal regulations and authorities of the resource agencies, land owners, and lessees of the lands and waters contained within the proposed boundaries. The proposed NERR will be operated by the University of Hawai‘i Institute of Marine Biology in partnership with NOAA and multiple state and local entities, and be eligible for annual operational funding from NOAA. The Draft Environmental Impact Statement and Draft Management Plan can be viewed at: https://www.coast.noaa.gov/czm/compliance/

Location: Heʻeia, Kāneʻohe Bay, Oʻahu

Residential Boat Dock in Kāneʻohe Bay at 46-194 Na Kao Place, Kāneʻohe, Oʻahu

Proposed Action: Construct a new residential boat dock to replace an existing pier in Kāneʻohe Bay, Oʻahu. The dock will run along 22 feet of an existing concrete rubble masonry wall and extend seaward 16 feet, for a total of approximately 352 square feet. The dock construction will consist of structural plastic lumber for the deck and will involve the placement of six pre-cast concrete pier footings placed into position by crane-lift. The purpose of the dock is to provide berthing of a private boat and recreational use of the residential dock.

Location: 46-194 Na Kao Place, Kāneʻohe, Oʻahu

**CONSERVATION DISTRICT USE APPLICATION**

Persons interested in commenting on the following Conservation District Use Application(s) or receiving notification of determinations on Conservation District Use Applications must submit comments and requests to the Department of Land and Natural Resources. Notification requests must include the following information: 1) Name and address of the requestor; 2) The application for which the requestor would like to receive notice of determination; and 3) The date the notice was initially published in *The Environmental Notice*. Send comments and requests to: Department of Land and Natural Resources, Office of Conservation and Coastal Lands, P.O. Box 621, Honolulu, HI, 96809. DLNR will make every effort to notify those interested in the subject CDUAs. However, DLNR is not obligated to notify any person not strictly complying with the above requirements. For more information, please contact the Office of Conservation and Coastal Lands staff listed for each project. CDUAs can be found on the OCCL website at dlnr.hawaii.gov/occl.

**Polarized Light from Atmospheres of Nearby Extra-Terrestrial Systems (PLANETS) Astronomy Facility**

- **File No.:** CDUA MA-3779
- **Name of Applicant:** University of Hawai’i, Institute for Astronomy
- **Location:** Haleakalā High Altitude Observatories Site at Waiakoa, Makawao District, Maui
- **TMK(s):** (2) 2-2-007:008
- **Proposed Action:** PLANETS astronomy facility
- **343, HRS determination:** Draft Environmental Assessment published July 23, 2016
- **Applicant’s Contact:** Dr. Charlie Fein, KC Environmental, Inc. (808) 573-7837

Persons interested in commenting on the following Conservation District Use Application (Board Permit) must submit comments to the Department of Land and Natural Resources within thirty days from the initial date that the notice was published in *The Environmental Notice*. Comments may be sent to the Office of Conservation and Coastal Lands, P.O. Box 621, Honolulu, Hawai’i 96809. For more information, please contact Michael Cain of the Office of Conservation and Coastal Lands staff at 587-0048.
As a courtesy, listed below are documents submitted for publication that have been prepared pursuant to NEPA, rather than Chapter 343, HRS. Accordingly, these entries may have unique comment periods. Occasionally, actions are subject to both NEPA and Chapter 343, HRS. In those cases, a separate entry would be published in The Environmental Notice.

Pursuant to the National Environmental Policy Act, Marine Corps Base Hawai‘i hereby provides notice that a Finding of No Significant Impact has been determined for the Pali Kilo Beach Cottages Expansion Project at Marine Corps Base Hawai‘i, Kāne‘ohe Bay, O‘ahu, Hawai‘i based on an Environmental Assessment. The project proposes developing new recreational cottages on about 16.8 acres in the Pali Kilo district of the Base. This would increase the number of recreational cottages to meet current and future demand, and promote the overall morale and welfare of the U.S. Department of Defense community. The project consists of new recreational cottages and an Efficiency Unit complex (total of 49 units). As part of the National Historic Preservation Act, Section 106 consultation with the State Historic Preservation Officer and other consulting parties, MCB Hawai‘i decided to reduce the number of lodging units from 49 to 33 to avoid certain historic properties as a means of mitigating adverse effects. The cottages would be single-story, wood-framed buildings, and range in size from 950 (single unit) to 2,600 square feet (duplex unit). The EU complex consists of a cluster of single-story buildings and a maintenance building. Studio units would have a floor area of about 450 square feet. The EU complex would be constructed on a previously developed site used to store emergency generators and other portable equipment. The equipment would be relocated to a vacant area within the Base along D Street.
Federal Notices

As a courtesy, listed below are relevant entries from the Federal Register published since the last issue of *The Environmental Notice*. For more information, click on the title link, also available at [www.federalregister.gov](http://www.federalregister.gov).

An incidental harassment authorization has been issued to the U.S. Air Force 86 Fighter Weapons Squadron to incidentally harass marine mammals during Long Range Strike Weapons System Evaluation Program activities in the Barking Sands Underwater Range Extension area of the Pacific Missile Range Facility at Kaua‘i.

**Marine Mammals; File No. 17845** *(published 10/3/2016)*

Rachel Cartwright, Ph.D., Keiki Koholā Project, has applied for an amendment to Scientific Research Permit No. 17845 to authorize Level B playbacks for humpback whales to estimate their hearing range using behavioral observation audiometry. Sounds will be presented to a maximum of 300 humpback whales and their behavioral responses will be measured through visual and acoustic recordings including an unmanned aerial system.

**Endangered Status for 49 Species From the Hawaiian Islands** *(published 9/30/2016)*

The U.S. Fish and Wildlife Service determined endangered status under the Endangered Species Act of 1973, as amended, for 10 animal species, including the Hawai‘i distinct population segment of the band-rumped storm-petrel (*Oceanodroma castro*), the orangeblack Hawaiian damselfly (*Megalagrion xanthomelas*), the anchialine pool shrimp (*Procaris hawaiana*), and seven yellow-faced bees (*Hylaeus anthracinus*, *H. assimulans*, *H. facilis*, *H. hilaris*, *H. kuakea*, *H. longiceps*, and *H. mana*), and for 39 plant species from the Hawaiian Islands. This rule adds these species to the Federal Lists of Endangered and Threatened Wildlife and Plants.

**Injurious Wildlife Species; Listing 10 Freshwater Fish and 1 Crayfish** *(published 9/30/2016)*

10 freshwater fish and 1 crayfish have been added to the list of species injurious to the interests of agriculture, wildlife, or wildlife resources of the US. These listings will prohibit the importation or interstate transportation of any live animal, gamete, viable egg, or hybrid in the US, except as specifically authorized. Species that have climate matches to Hawai‘i are: the crucian carp and Nile perch (high climate matches), the Prussian carp (medium climate match, in regions of Hawai‘i), and the European perch (ranges from low to high climate matches). If introduced, each is likely to spread and become established in the wild.

**Nominations to the Marine Mammal Scientific Review Groups** *(published 9/29/2016)*

Secretary of Commerce established three independent regional scientific review groups (SRGs) to provide advice on a range of marine mammal science and management issues. NMFS has conducted a membership review of the Alaska, Atlantic, and Pacific SRGs, and is soliciting nominations for new members to fill vacancies and gaps in expertise. Nominees should possess demonstrable expertise in the areas specified in this notice, be able to conduct thorough scientific reviews of marine mammal science, and be able to fulfill the necessary time commitments associated with a thorough review of documents and to attend one annual meeting. Nominations must be received by October 31, 2016 and can be emailed to Shannon.Bettridge@noaa.gov or mailed to: Chief, Marine Mammal and Sea Turtle Conservation Division, Office of Protected Resources, National Marine Fisheries Service, 1315 East-West Highway, Silver Spring, MD 20910-3226, Attn: SRGs.
October 8, 2016

**Glossary of Terms and Definitions**

**Agency Actions**
Any department, office, board, or commission of the state or county government which is part of the executive branch of that government per HRS 343-2.

**Applicant Actions**
Any person who, pursuant to statute, ordinance, or rule, requests approval for a proposed action per HRS 343-2.

**Draft Environmental Assessment**
When an Agency or Applicant proposes an action that triggers HRS 343, an Environmental Assessment shall be prepared at the earliest practicable time to determine whether the actions’ environmental impact will be significant, and thus whether an environmental impact statement shall be prepared per HRS 343-5(d), for Agency actions and HRS 343-5(e), for Applicant actions. For actions for which the proposing or approving agency anticipates a Finding of No Significant Impact (AFNSI), a Draft EA (DEA) shall be made available for public review and comment for 30 days and public notice is published in this periodic bulletin.

**Final Environmental Assessment and Finding of No Significant Impact**
The Agency shall respond in writing to comments on a DEA received during the 30-day review period and prepare a Final EA (FEA) that includes those responses to determine whether an environmental impact statement shall be required. If there are no significant impacts, then the Agency will issue a Finding of No Significant Impact (FONSI). An Environmental Impact Statement (EIS) will not be required and the project has cleared HRS 343 requirements. The public has 30 days from the notice of a FONSI in this bulletin to ask a court to require the preparation of an EIS.

**Final Environmental Assessment and Environmental Impact Statement Preparation Notice**
An EIS shall be required if the Agency finds that the proposed action may have a significant effect on the environment. The Agency shall file notice of such determination with OEQC, called an EIS Preparation Notice (EISPN) along with the supporting Final EA. After the notice of the FEA-EISPN is published in this bulletin, the public has 30 days to request to become a consulted party and make written comments. The public (including the Applicant) has 60 days from the notice of the EISPN in this bulletin to ask a court to not require the preparation of an EIS.

**Act 172-2012, Direct-to-EIS, Environmental Impact Statement Preparation Notice (with no EA)**
Act 172 in 2012 amended HRS 343 by providing for an agency to bypass the preparation of an environmental assessment for various actions that in the experience of the agency would clearly require the preparation of an EIS. Until administrative rules have been drafted, the agency must submit its determination that an EIS is required for an action (Act 172-2012, EISPN) with a completed OEQC publication form detailing the specifics of the action to enable the public a 30-day period to request to be consulted parties in the preparation of the Draft EIS. Comments and responses on the EISPN must be incorporated into the subsequent Draft EIS.

**Act 312-2012, Secondary Actions in the Highway or Public Right Of Way**
Act 312-2012, amended HRS 343, by adding a new section (HRS 343-5.5., entitled “Exception to applicability of chapter.”) HEP Act 312-2012, which was passed in 2012, amended HRS 343, by providing for an “Exception to applicability of chapter.” This new act, entitled “Exception to applicability of chapter,” provides for an exception to the applicability of the chapter where the agency finds that the action will have no significant impact on the environment.

**Draft Environmental Impact Statement**
After receiving the comments on the EISPN, the Agency or Applicant must prepare a Draft Environmental Impact Statement (DEIS). The content requirements of the DEIS shall contain an explanation of the environmental consequences of the proposed action including the direct, indirect and cumulative impacts and their mitigative measures. The public has 45 days from the first publication date in this bulletin to comment on a DEIS. The DEIS must respond to comments received during the EISPN comment period in a point-by-point manner.

**Final Environmental Impact Statement**
After considering all public comments filed during the DEIS stage, the Agency or Applicant must prepare a Final EIS (FEIS). The FEIS must respond in a point-by-point manner to all comments from the draft and must be included in the FEIS. See here for style concerns. For Applicant projects, the Approving Agency is authorized to accept the FEIS and must do so within 30-days or the FEIS is accepted as a matter of law. For an Agency project, the Governor or the Mayor (or their designated representative) is the Accepting Authority, and unlike applicant actions, there is no time limit on the accepting authority reviewing the FEIS. Only after the FEIS is accepted may the project be implemented.

**Acceptability**
If the FEIS is accepted, notice of this action is published in this bulletin. The public has 60 days from the date of notice of acceptance to ask a court to vacate the acceptance of a FEIS. For Applicant actions, non-acceptance by the Approving Agency is cause for the Applicant to administratively appeal to the Environmental Council. For Agency actions, there is no such administrative appeal. In both instances, the Applicant or the proposing Agency can prepare a revised DEIS after a non-acceptance determination.

**National Environmental Policy Act**
The National Environmental Policy Act (NEPA) requires federal projects to prepare an EA or EIS. In many ways it is similar to Hawaii’s law. Some projects require both a State and Federal EIS and the public comment procedure should be coordinated. OEQC publishes NEPA notices in this bulletin to help keep the public informed of important federal actions.

**Conservation District**
Any use of land in the State Conservation District requires a Conservation District Use Application (CDUA). These applications are reviewed and approved by the Board of Land and Natural Resources. Members of the public may intervene in the permit process. Notices of permit applications are published in this bulletin.

**Special Management Area and Shoreline Setback Area**
The Special Management Area (SMA) is along the coastline of all islands and development in this area is generally regulated by HRS 205A, and county ordinance. A special subset of the SMA that is regulated by HRS 343 is the Shoreline Setback Area. Most development in this area requires a Special Management Permit. This bulletin posts notice of these SMA applications to encourage public input.

**Shoreline Certifications**
State law requires that Hawaii’s shorelines be surveyed and certified when necessary to clearly establish the regulatory boundaries. Private land owners often petition to have their shoreline certified by the State surveyor prior to construction. This bulletin publishes notice from the Department of Land and Natural Resources of shoreline certification applicants and final certifications or rejections.

**Environmental Council**
The Environmental Council is a 15-member citizen board appointed by the Governor. They serve as a liaison between the Director of OEQC and the general public concerning ecology and environmental quality. The Council makes the rules that govern the Environmental Impact Statement process (HRS 343). Agendas of their regular meetings are posted on the Internet and the public is invited to attend.

**Administrative Exemption Lists**
Government agencies must keep a list describing the minor activities they regularly perform that are exempt from the environmental review process. These lists and any amendments shall be submitted to the Council for review and concurrence (HAR 15-200-8(d)). This bulletin will publish an agency’s draft exemption list for public comment prior to Council decision making, as well as notice of the Council’s decision on the list.

**Endangered Species**
This bulletin is required by HRS 343-3(c), to publish notice of public comment periods or public hearings for Habitat Conservation Plans (HCP), Safe Harbor Agreements (SHA), or Incidental Take Licenses (ITL) under the federal Endangered Species Act, as well as availability for public inspection of a proposed HCP or SHA, or a proposed ITL (as part of an HCP or SHA).
