The Environmental Notice provides public notice for projects undergoing environmental review in Hawai‘i as mandated under Section 343-3, Hawai‘i Revised Statutes, the Environmental Impact Statement Law. Along with publishing Environmental Assessments and Environmental Impact Statements for projects in Hawai‘i, The Environmental Notice also includes other items related to the shoreline, coastal zone, and federal activities.

ANNOUNCEMENTS

As a reminder, items to be published in The Environmental Notice must be submitted in their final form by the submittal deadline for each issue, and no changes to the documents can be made after that deadline. This policy is intended to ensure equity and consistency in the environmental review process, while also supporting the abbreviated production cycle. Please review documents prior to submittal!

Kamehameha Schools (KS) proposes the Keauhou Bay Management Plan (KBMP) on approximately 29 acres at Keauhou Bay. KS plans to reinvigorate and transform the Keauhou Bay area to become a place where culture and education is celebrated and highlighted amidst viable commercial operations, which are essential to fund the cultural and educational programming within the immediate area. The KBMP proposes to reorient commercial activities away from culturally sensitive areas to alleviate congestion and establish a new place-based cultural educational center. Existing commercial operations and parking areas will be relocated to new facilities in more appropriate locations away from cultural resources. The KBMP will also create a new boutique resort on the resort-zoned plateau mauka of the bay. The new reconfiguration will focus on place-based cultural stewardship, enhance and encourage bayfront access for kamaʻāina and kupaʻāina, and promote high quality educational experiences for all.

Status Statutory 30-day public review and comment period starts. Comments are due by April 22, 2022. Please send comments to the proposing/determining agency and copy the consultant.

The State of Hawai‘i Department of Transportation (HDOT) Highways Division proposes to replace the existing Waiaka Stream Bridge with a new bridge that would be approximately 53 feet wide and up to 80 feet long to accommodate two travel lanes, one in each direction, a roadway shoulder or bike lane, and raised sidewalk. In addition, the roadway approaches to the bridge would be realigned to create a smooth transition to the replacement bridge. The intersection of Kawaihae Road and Kohala Mountain Road would be reconfigured to a roundabout.

The UH College of Tropical Agriculture and Human Resources (CTAHR) has prepared a master plan for 283 acres in Waimānalo, located adjacent to the existing Waimānalo Research Station (WRS). The property is the site of the former Meadow Gold Dairies and will be leased from the State Department of Land and Natural Resources. The master plan represents CTAHR’s 20+ year vision for the property. The Project Area will be an extension of the existing WRS, and be used to support CTAHR’s Cooperative-Extension, research, and educational activities. There will be 3 primary land uses: 1) Animals/livestock; 2) Plants; and 3) Forestry. Another use may be an Education Center near the Waikupanaha Street entry. An archaeological/cultural preserve will be designated around Pueo Heiau and will include a publicly accessible area for community-driven and sponsored projects. The location and acreage of the master plan land uses are flexible, and may be modified in response to future needs and priorities.

Iwilei Master Plan Area: The Iwilei Infrastructure Master Plan will focus on infrastructure facilities that serve regional or area-wide scales and public investments required to advance Transit-Oriented Development (TOD) based on the City and County of Honolulu (City) Kalihi and Downtown Neighborhood TOD Plans. Anticipated development for the area includes a shift to higher density housing and mixed-use development over the next 30 to 50 years or longer. The Iwilei Infrastructure Master Plan will identify phasing and associated costs for improvements to the existing sewer, water, drainage, storm water quality, roadways, and circulation, electrical and communications systems, public schools, and sustainability and district systems.

Liliha Civic Center Site: The Liliha CC site is being considered for development/redevelopment that may include offices and space for State programs, new affordable housing, commercial/retail uses, and/or open space.
Use of the Special Management Area (SMA) is not a trigger under Chapter 343, but developments in O‘ahu's SMA are required to go through an environmental review process that mirrors the procedural requirements of HRS Chapter 343, pursuant to Revised Ordinances of Honolulu, Chapter 25. Developments being reviewed under Chapter 25 but not Chapter 343 appear here.

The proposed Project includes the demolition and reconstruction of a single-family dwelling located on a shoreline lot at the end of Kaimoku Place. The Project parcel is a shoreline lot within the Special Management Area, and contains an existing seawall and other development within the shoreline setback area. The proposed dwelling contains over 7,500 square feet of floor area. The Project also involves various other activities associated with the redevelopment of the new dwelling and pool, including partial demolition and filling of the existing pool within the shoreline setback area.

Applicant Ken Stiles is proposing a new single-family dwelling on a 20,001-square-foot lot within the R-5 Residential District in Waialua. The Applicant owns the makai half of the lot, where the new dwelling is proposed. The mauka half of the lot has a separate landowner and is developed with a single-family dwelling. The development requires approval of a Special Management Area Use Permit from the Honolulu City Council.

Coastal Zone Management Notices

Federal Consistency Reviews

The following federal actions are being reviewed for consistency with the enforceable policies of the Hawai‘i Coastal Zone Management (CZM) Program, including the [CZM objectives and policies in Hawai‘i Revised Statutes, Chapter 205A](#). Federal consistency, pursuant to Section 307 of the Coastal Zone Management Act of 1972 (CZMA), as amended, generally requires that federal actions, within and outside of the coastal zone, which have reasonably foreseeable effects on any coastal use (land or water) or natural resource of the coastal zone be consistent with the enforceable policies of a state’s federally approved coastal management program. Federal actions include federal agency activities, federal license or permit activities, and federal financial assistance activities. This public notice is being provided in accordance with § 306(d)(14) of the CZMA, and federal regulations at 15 CFR § 930.2, § 930.42, and § 930.61. General information about federal consistency is available at the [Hawai‘i CZM Program web site](#), or call (808) 587-2878.

For specific information or questions about an action listed below, contact the CZM staff person identified for each action. The CZM Program is required to adhere to federal review deadlines, therefore, comments must be received by the date specified. Comments may be submitted by mail or electronic mail, to the addresses below.

**Hono‘uli’uli Invasive Mangrove Removal, Pearl Harbor, O‘ahu**

**Proposed Action:** The DLNR-DAR proposes to restore the coastal estuarine and wetland pond habitat at the lower reaches and mouth of Hono‘uli’uli Stream, and the adjacent shoreline along West Loch, Pearl Harbor over a 24-month period. The proposed action includes restoration through the removal of mangroves and other non-native vegetation using hand tools and heavy equipment; planting of native plants; maintaining restored sites; and non-native predator control. Wildlife, water quality, and hydrological monitoring; and community engagement will also be conducted throughout the project period. The proposed action is expected to result in 21-acres of restored estuarine and wetland habitat, improved water quality, and increased public engagement and stewardship at the project site.

**Applicant:** State of Hawai‘i, Department of Land and Natural Resources, Division of Aquatic Resources

**Federal Action:** Federal Assistance (funding) from U.S. Fish & Wildlife Service

The Department of Health (DOH) initiated Section 106 of the NHPA consultation with the State Historic Preservation Division (SHPD) in accordance with 36 CFR Part 800. In 1990, the U.S. Environmental Protection Agency (EPA) designated the DOH to act on EPA’s behalf, pursuant to 36 CFR §800.2 (c) (4), when initiating Section 106 of the NHPA process in connection with projects funded under the Hawai‘i Clean Water State Revolving Fund (CWSRF). The DOH is providing funding under the CWSRF to the County of Kaua‘i for the BMP Improvements at Various Refuse Transfer Stations. The proposed project will utilize federal funding and is considered an undertaking, as defined by Section 106 of the NHPA, 54 U.S.C. §306101 et seq., and 36 CFR Part 800.

The proposed project includes upgrading facilities at four refuse transfer stations: Hanapēpē Refuse Transfer Station, Lihu‘e Refuse Transfer Station, Kapa‘a Refuse Transfer Station, and Hanalei Refuse Transfer Station and improving site conditions related to stormwater conveyance and segregation of water flows to enhance compliance with the National Pollutant Discharge Elimination System (NPDES) regulations at these four refuse transfer stations.

The project’s design efforts intend to get the sites in full compliance with NPDES stormwater guidance for Type B (Industrial Activities) sites. The design improvements will reduce the water collection in these discrete areas at these sites, which is being remedied by the project. (Continued on next page)
The site improvements will generally address issues noted in past compliance inspections, reports, and other documentation and will include improvements to the following:

- Concrete pad and tipping floor areas for disposal operations.
- Drop-off areas with roll-off and recycling bins.
- Retaining walls, containment curbs, and berms.
- Truck wash areas.
- Storage and queuing areas, including the installation of pre-engineered metal canopies for the industrial operations at the facilities.
- Stormwater conveyance infrastructure through the incorporation of low-impact development (LID) features, including bioswales and rock-lined channels.
- Installation of a new leachate-collection system including leachate storage tanks.
- Electrical service required for the installation of lighting and security features.

The DOH has engaged SHPD to determine the presence of potential sites of historic importance within the vicinity of the project area as well as the potential impact of the project on such sites, if present.

The Department of Health (DOH) initiated Section 106 of the NHPA consultation with the State Historic Preservation Division (SHPD) in accordance with 36 CFR Part 800. In 1990, the U.S. Environmental Protection Agency (EPA) designated the DOH to act on EPA’s behalf, pursuant to 36 CFR §800.2 (c) (4), when initiating Section 106 of the NHPA process in connection with projects funded under the Hawai‘i Clean Water State Revolving Fund (CWSRF). The DOH is providing funding under the CWSRF to the County of Maui for the North Kīhei Mauka Transmission System. The proposed project will utilize federal funding and is considered an undertaking, as defined by Section 106 of the NHPA, 54 U.S.C. §306101 et seq., and 36 CFR Part 800.

The proposed project will include replacing the gravity sewer line to Wastewater Pump Station (WWPS) No. 3 with a larger pipe; replacing the gravity sewer lines to WWPS No. 4 with larger pipes; installing a new force main starting at WWPS No. 4 that heads south on South Kihei Road, turns east on Pi‘ikea Avenue, turns south on Liloa Drive, and transitions to a gravity sewer line for 500 feet (ft) until it reaches a new proposed WWPS near the Kīhei Aquatic Center; constructing a new WWPS at the Lipoa Street and Liloa Drive intersection; and installing a second new force main that heads south on Liloa Drive and continues on to the Kīhei Wastewater Reclamation Facility.

In addition, the proposed project will also involve improvements to WWPS Nos. 2, 3, 4, and 5. Pump station upgrades work will entail replacing the existing dry well pumps with wet well submersible pumps and resizing them to accommodate anticipated future flows. The electrical systems and controls will also be replaced to match other upgraded County WWPSs. The improvements to the WWPSs are a process the County is working towards to standardize their facilities. Depending upon the existing conditions of each WWPS, building improvements may be necessary. All improvements at the existing WWPSs will occur within existing developed areas of the parcel.

The DOH has engaged SHPD to determine the presence of potential sites of historic importance within the vicinity of the project area as well as the potential impact of the project on such sites, if present.
The Department of Health (DOH) initiated Section 106 of the NHPA consultation with the State Historic Preservation Officer (SHPO) in accordance with 36 CFR Part 800. In 1990, the U.S. Environmental Protection Agency (EPA) designated the DOH to act on EPA’s behalf, pursuant to 36 CFR §800.2 (c) (4), when initiating Section 106 of the NHPA process in connection with projects funded under the Hawai‘i Clean Water State Revolving Fund (CWSRF). The DOH is providing funding under the CWSRF to the County of Maui for the Kihei No. 7 Force Main Replacement. The proposed project will utilize federal funding and is considered an undertaking, as defined by Section 106 of the NHPA, 54 U.S.C. §306101 et seq., and 36 CFR Part 800.

The undertaking consists of replacing the force main at Kihei No. 7 pump station located in Kama‘ole Ahupua‘a, Makawao District, Island of Maui. The project consists of replacing the existing 20-inch ductile iron force main with a new 20-inch PVC force main that will be constructed in parallel along the same corridor. The new 20-inch force main extends approximately 1,550 linear feet along South Kihei Road, starts from the Kihei No. 7 Pump Station near Kama‘ole Beach Park No. 1, and reconnects to the existing sewer system near Kaiau Place. The entirety of the project is within the South Kihei Road paved roadway except for a small portion which is contained within the Kihei No. 7 Pump Station site. The DOH has engaged SHPO to determine the presence of potential sites of historic importance within the vicinity of the project area as well as the potential impact of the project on such sites, if present.

The original NHPA Section 106 notice was published in The Environmental Notice on January 23, 2022. Because there were typographical errors in the previous NHO distribution list, the original letter dated January 14, 2022 with the updated NHO distribution list is being republished.

The Department of Health (DOH) initiated Section 106 of the NHPA consultation with the State Historic Preservation Officer (SHPO) in accordance with 36 CFR Part 800. In 1990, the U.S. Environmental Protection Agency (EPA) designated the DOH to act on EPA’s behalf, pursuant to 36 CFR §800.2 (c) (4), when initiating Section 106 of the NHPA process in connection with projects funded under the Hawai‘i Clean Water State Revolving Fund (CWSRF). The DOH is providing funding under the CWSRF to the County of Maui for the Kihei No. 8 Force Main Replacement. The proposed project will utilize federal funding and is considered an undertaking, as defined by Section 106 of the NHPA, 54 U.S.C. §306101 et seq., and 36 CFR Part 800.

The original NHPA Section 106 notice was published in The Environmental Notice on January 23, 2022. Because there were typographical errors in the previous NHO distribution list, the original letter dated January 14, 2022 with the updated NHO distribution list is being republished.

The Department of Health (DOH) initiated Section 106 of the NHPA consultation with the State Historic Preservation Officer (SHPO) in accordance with 36 CFR Part 800. In 1990, the U.S. Environmental Protection Agency (EPA) designated the DOH to act on EPA’s behalf, pursuant to 36 CFR §800.2 (c) (4), when initiating Section 106 of the NHPA process in connection with projects funded under the Hawai‘i Clean Water State Revolving Fund (CWSRF). The DOH is providing funding under the CWSRF to the County of Maui for the Kihei No. 8 Force Main Replacement. The proposed project will utilize federal funding and is considered an undertaking, as defined by Section 106 of the NHPA, 54 U.S.C. §306101 et seq., and 36 CFR Part 800. (Continued on next page)
The undertaking consists of replacing the force main at Kihei No. 8 pump station located in Kama’ole Ahupua’a, Makawao District, Island of Maui. The project consists of replacing the existing 18-inch ductile iron force main with a new 18-inch PVC force main that will be constructed in parallel along the same corridor. The new 18-inch force main extends approximately 2,000 linear feet along South Kihei Road, starts from the Kihei No. 8 Pump Station near Kilohana Drive, and reconnects to the existing sewer system near the Kihei Boat Ramp driveway. The entirety of the project is within the South Kihei Road paved roadway except for a small portion which is contained within the Kihei No. 8 Pump Station site. The DOH has engaged SHPO to determine the presence of potential sites of historic importance within the vicinity of the project area as well as the potential impact of the project on such sites, if present.

**Federal Notices**

As a courtesy, listed below are some relevant summarized entries from the Federal Register published since the last issue of The Environmental Notice. For more information, click on the title link of any entry, also available at www.federalregister.gov.

**Rule: Approval of State Underground Storage Tank Program Revisions; Hawaii** (published by the Environmental Protection Agency on 03/07/2022)

Hawaii has applied to the Environmental Protection Agency (EPA) for updated approval of changes made to its Underground Storage Tank Program under the Resource Conservation and Recovery Act, as amended, since the previous approval of Hawaii’s Underground Storage Tank Program in September 2002. The EPA has reviewed Hawaii’s application and has determined that these changes satisfy all requirements needed to qualify for the requested updated approval. The EPA is correcting one citation identified as a result of public comment received on the proposal to approve Hawaii’s Underground Storage Tank Program that was published in August 2020. All other aspects of the August 2020 proposed State Program Approval remain the same. Therefore, the EPA is granting final approval to the State of Hawaii to operate its Underground Storage Tank Program for petroleum and hazardous substances. This final approval is effective at 1:00 p.m. HST March 7, 2022.

**Notice: Pacific Island Fisheries; Experimental Fishing Permit** (published by NOAA on 03/18/2022)

NMFS is issuing an experimental fishing permit (EFP) to the Hawaii Longline Association to evaluate the risk of seabird interactions in the Hawaii shallow-set longline fishery when setting fishing gear one hour before and one hour after local sunset and using tori lines instead of required blue-dyed bait & strategic offal discharge as seabird mitigation measures. The intent of the EFP is to conduct a preliminary evaluation of potential alternative effective methods of discouraging seabird interactions while providing operational flexibility during setting in the shallow-set longline fishery. The EFP is authorized through Sept. 24, 2023.

**Notice: Pacific Island Pelagic Fisheries; False Killer Whale Take Reduction Plan; Trigger for the Southern Exclusion Zone Closure Met in 2021** (published by the National Oceanic and Atmospheric Administration on 03/08/2022)

In 2021, four observed mortalities or serious injuries (M&SI) of false killer whales occurred incidental to the Hawaii deep-set longline fishery within the U.S. Exclusive Economic Zone (EEZ) around Hawaii on January 18, 2021, March 26, 2021, April 17, 2021, and November 19, 2021. These M&SI met the established annual trigger of four observed M&SI for closing the Southern Exclusion Zone (SEZ) to deep-set longline fishing under the False Killer Whale Take Reduction Plan (Plan) regulations. In accordance with the Plan regulations a closure of the SEZ is required through the end of the fishing year. Because the injury determination for the fourth interaction meeting the trigger was not available until January 2022, the timeframe for closing the SEZ in 2021 had passed, and the SEZ was not closed. In accordance with the Plan regulations, the requirements for closure of the SEZ were met in 2021, therefore, if the trigger is met in 2022, the process for closure of the SEZ will follow the procedures described in the Plan regulations. Comments on this notice must be received by April 7, 2022.

**Notice: Review of Nomination for Mariana Trench National Marine Sanctuary** (published by the National Oceanic and Atmospheric Administration on 03/10/2022)

On January 21, 2022, NOAA published a notice in the Federal Register requesting written and oral comments to facilitate ONMS’ five-year review of the nomination for the Mariana Trench National Marine Sanctuary (NMS) at the five-year interval. In that notice, NOAA requested relevant information as it pertains to its 11 evaluation criteria for inclusion in the inventory. During the public comment period, NOAA received requests for an extension to the comment period. This notice reopens the public comment period by an additional 45 days. Written comments must be received by April 25, 2022. Comments submitted through the Federal eRulemaking Portal must be received by 11:59 p.m. Eastern Time on the closing date. NOAA will conduct a virtual meeting on Wednesday, March 30, 2022, from 4 p.m.-7 p.m. HST (Hawaii’i). Webinar registration details and additional information about how to participate in the public scoping meeting is available at https://nominate.noaa.gov/5-year-review.html.
March 23, 2022

The Environmental Notice

Glossary of Terms and Definitions

Agency Actions
Projects or programs proposed by any department, office, board, or commission of the state or county government which is part of the executive branch of that government per HRS 343-2.

Applicant Actions
Projects or programs proposed by any person who, pursuant to statute, ordinance, or rule, requests approval for a proposed action per HRS 343-2.

Draft Environmental Assessment
When an Agency or Applicant proposes an action that triggers HRS 343, an Environmental Assessment shall be prepared at the earliest practicable time to determine whether the action’s environmental impact will be significant, and thus whether an environmental impact statement shall be required per HRS 343-5(d), for Agency actions and HRS 343-5(e), for Applicant actions. For actions for which the proposing or approving agency anticipates a Finding of No Significant Impact (AFNIS), a Draft EA (DEA) shall be made available for public review and comment for 30 days and public notice is published in this periodic bulletin.

Final Environmental Assessment and Finding of No Significant Impact
The action’s proponent shall respond in writing to comments on a DEA received during the 30-day review period and prepare a Final EA (FEA) that includes those responses to determine whether an environmental impact statement shall be required. If there are no significant impacts, then the Agency will issue a Finding of No Significant Impact (FONS). An Environmental Impact Statement (EIS) will not be required and the project has cleared HRS 343 requirements. The public has 30 days from the notice of a FONS in this bulletin to challenge the FONS in the Environmental Court and seek a ruling to require the preparation of an EIS.

Final Environmental Assessment and Environmental Impact Statement Preparation Notice
An EIS shall be required if the Agency finds that the proposed action may have a significant effect on the environment. The Agency shall file notice of such determination with OPSD called an EIS Preparation Notice (EISPN) along with the supporting Final EA. After the notice of the FEA-EISP is published in this bulletin, the public has 30 days to request to become a consulted party and to make written comments. The public (including the Applicant) has 60 days from the notice of the EISPN in this bulletin to ask a court not to require the preparation of an EIS.

Act 172-2012, Direct-to-EIS, Environmental Impact Statement Preparation Notice (with no EA)
Act 172 in 2012 amended HRS 343 by providing for an agency to bypass the preparation of an environmental assessment for various actions that in the experience of the agency would clearly require the preparation of an EIS. The agency must submit its determination that an EIS is required for an action (Act 172-2012, EISP) with a completed publication form detailing the specifics of the action. This starts a 30-day scoping period in which the agency or applicant must hold a public scoping meeting for the preparation of the Draft EIS. Written comments and responses on the EISP must be incorporated into the subsequent Draft EIS and oral comments from the public scoping meeting must be recorded and submitted to OPSD with the Draft EIS.

HEPA
While technically there is no “Hawai‘i Environmental Policy Act,” HRS 343 is often referred to by this term.

Act 312-2012, Secondary Actions in the Highway or Public Right Of Way
Act 312-2012, amended HRS 343, by adding a new section (HRS 343-5.5., entitled “Exception to applicability of chapter”). HEPA allows for a statutory exception for “secondary actions” (those that involve infrastructure in the highway or public right-of-way) provided that the permit or approval of the related “primary action” (those outside of the highway or public-right-of-way and on private property) is not subject to discretionary consent and further provided that the applicant for the primary action submits documentation from the appropriate agency confirming that no further discretionary approvals are required. An aid to understanding this is to visualize residential driveway improvements in the public right-of-way, versus, retail outlet driveway improvements in the public right-of-way.

Draft Environmental Impact Statement
After receiving the comments on the EISPN, the Agency or Applicant must prepare a Draft Environmental Impact Statement (DEIS). The content requirements of the DEIS shall contain an explanation of the environmental consequences of the proposed action including the direct, indirect and cumulative impacts and their mitigation measures. The public has 45 days from the first publication date in this bulletin to comment on a DEIS.

Final Environmental Impact Statement
After considering all public comments filed during the DEIS stage, the Agency or Applicant must prepare a Final EIS (FEIS). The FEIS must respond in a point-by-point manner to all comments from the draft and must be included in the FEIS. For Applicant projects, the Approving Agency is the Accepting Authority and must make a determination within 30 days or the FEIS is deemed accepted as a matter of law. For an Agency project, the Governor or the Mayor (or their designated representative) is the Accepting Authority, and unlike applicant actions, there is no time limit on the accepting authority reviewing the FEIS. Only after the FEIS is accepted may the project be implemented.

Acceptability
The Accepting Authority must be satisfied that the FEIS meets three criteria (process, content, response to comments) to accept it. Whether the FEIS is accepted or not accepted, notice of the Acceptance Determination is published in this bulletin. The public has 60 days from publication to legally challenge the acceptance of a FEIS. For both Applicant and Agency actions, the Applicant or the proposing Agency can prepare a Revised DEIS after a non-acceptance determination.

National Environmental Policy Act
The National Environmental Policy Act (NEPA) requires federal projects to prepare a Federal EA or EIS. In many ways it is similar to Hawai‘i’s law. Some projects require both a State and Federal EIS and the public comment procedure should be coordinated. Upon request by a federal agency, OPSD publishes NEPA notices in this bulletin to help keep the public informed of important federal actions.

Conservation District
Proposed uses of land in the State Conservation District require a Conservation District Use Application (CDUA). These applications are reviewed and approved/denied by the Department or Board of Land and Natural Resources. Members of the public may intervene in the permit process. This bulletin will include EAs & EISs for actions proposed within the Conservation District.

Special Management Area and Shoreline Setback Area
The Special Management Area (SMA) is along the coastline of all islands; development in this area is generally regulated by HRS 705A, and county ordinance. A portion of the SMA that is addressed by HRS 343 is the Shoreline Area, which includes land between the State-certified shoreline and the county-determined shoreline setback line. This bulletin will include EAs & EISs for actions proposed within the Shoreline Setback Area. Some projects going through the SMA permit process on O‘ahu are also required to go through an environmental review process that mirrors HRS 343; these “ROH Chapter 25” EAs/EISs are included in this bulletin.

Shoreline Certifications
State law requires that Hawaii’s shorelines be surveyed and certified when necessary to clearly establish the shoreline setback from the certified shoreline. The public may participate in the process to help assure accurate regulatory boundaries. Private land owners often petition to have their shoreline certified by the State surveyor prior to construction. This bulletin publishes notice from the Department of Land and Natural Resources of shoreline certification applicants and final certifications or rejections.

Environmental Advisory Council
The Environmental Advisory Council is a 15-member citizen board appointed by the Governor. They serve as a liaison between the Director of OPSD and the general public concerning ecology and environmental quality. Agendas of their regular meetings are posted on the Internet and the public is invited to attend.

Agency Exemption Lists
Government agencies may keep a list describing the minor activities they regularly perform that are exempt from the environmental review process. These lists and any amendments shall be submitted to the Council for review and concurrence (HAR 11-200.1-16). This bulletin will publish an agency’s draft exemption list for public comment prior to Council decision making, as well as notice of the Council’s decision on the list.

Endangered Species
This bulletin is required by HRS 343-3(c), to publish notice of public comment periods or public hearings for Habitat Conservation Plans (HCP), Safe Harbor Agreements (SHA), or Incidental Take Licenses (ITL) under the federal Endangered Species Act, as well as availability for public inspection of a proposed HCP or SHA, or a proposed ITL (as a part of an HCP or SHA).
