FOR IMMEDIATE RELEASE

November 16, 2023

HAWAII OCTOBER UNEMPLOYMENT RATE AT 2.9 PERCENT

Jobs increased by 6,600 year-over-year

HONOLULU — The Hawaii State Department of Business, Economic Development and Tourism (DBEDT) today announced that the seasonally adjusted unemployment rate for October was 2.9 percent, compared to 2.8 percent in September. In October, 655,800 persons were employed and 19,400 were unemployed, for a total seasonally adjusted labor force of 675,200 statewide. Nationally, the seasonally adjusted unemployment rate was 3.9 percent in October, up from 3.8 percent in September.

The unemployment rate figures for the State of Hawaii and the U.S. in this release are seasonally adjusted, in accordance with the U.S. Bureau of Labor Statistics (BLS) methodology. The not-seasonally adjusted rate for the state was 3.1 percent in October, compared to 3.3 percent in September.

State of Hawaii Seasonally Adjusted Labor Force Data**			
	<u>Oct 2023</u>	<u>Sep 2023</u>	<u>Oct 2022*</u>
Labor Force	675,200	675,650	679,950
Employment	655,800	656,450	654,700
Unemployment	19,400	19,200	25,250

* benchmarked data

	OCT 2023	SEP 2023	OCT* 2022
<u>Seasonally Adjusted</u>			
STATE	2.9	2.8	3.7
U. S.	3.9	3.8	3.7
<u>Not Seasonally Adjusted</u>			
STATE	3.1	3.3	3.8
HONOLULU	2.5	2.6	3.8
HAWAII COUNTY	2.6	2.8	4.0
KAUAI	2.3	2.4	3.7
MAUI COUNTY	7.1	8.3	3.7
Maui Island	7.4	8.6	3.6
Molokai	1.5	1.5	7.9
Lanai	0.8	1.6	1.6
U. S.	3.6	3.6	3.4

county and island rates are not seasonally adjusted

Industry Payroll Employment (Establishment Survey)

In a separate measure of employment, total nonagricultural jobs increased by 900 month-over-month, from September 2023 to October 2023. Job gains were experienced in Private Education & Health Services (+1,000); Professional & Business Services (+200); Manufacturing (+100); and Information (+100). Within Private Education & Health Services, the most prominent subsector expansion was in Social Assistance and Hospitals. Job losses occurred in Trade, Transportation & Utilities (-100); Financial Activities (-100); Other Services (-100); Leisure & Hospitality (-200); and Construction (-500). Government employment went up by 500 jobs, with a rise in all branches (Federal, State, and Local). Year-over-year (October 2022 was the 31st month of pandemic effects), nonfarm jobs have gone up by 6,600, or 1.1 percent. However, in comparison with March 2020 (the last month prior to pandemic effects), nonfarm jobs were down by 21,300, or -3.3 percent.

Seasonally Adjusted Non-Ag. Jobs (Statewide)

	Oct-23	Sep-23	Oct-22
MINING, LOGGING & CONSTRUCTION	37,600	38,100	38,200
MANUFACTURING	12,900	12,800	12,700
Durable Goods	3,300	3,200	3,300
Non-Durable Goods	9,600	9,600	9,400
TRADE, TRANSPORTATION & UTILITIES	115,700	115,800	115,800
Wholesale Trade	17,300	17,100	17,500
Retail Trade	64,800	65,000	65,300
Transportation, Warehousing & Utilities	33,600	33,700	33,000
INFORMATION	9,000	8,900	8,600
FINANCIAL ACTIVITIES	26,800	26,900	28,200
Finance & Insurance	14,800	14,800	15,700
Real Estate & Rental & Leasing	12,000	12,100	12,500
PROFESSIONAL & BUSINESS SERVICES	72,200	72,000	71,200
Professional, Scientific, Tech Svcs	27,300	27,100	26,500
Management of Companies & Enterprises	8,800	8,700	8,700
Administrative & Support & Waste Mgmt	36,100	36,200	36,000
PRIVATE EDUCATION & HEALTH SERVICES	89,300	88,300	87,000
Private Educational Services	15,400	15,200	14,400
Health Care & Social Assistance	73,900	73,100	72,600
LEISURE & HOSPITALITY	119,100	119,300	118,000
Arts, Entertainment & Recreation	12,600	12,600	12,600
Accommodation & Food Services	106,500	106,700	105,400
OTHER SERVICES	26,800	26,900	26,400
GOVERNMENT	124,500	124,000	121,200
Federal Government	35,300	35,200	34,900
State Government	70,300	70,000	67,900
Local Government	18,900	18,800	18,400
TOTAL: STATEWIDE	633,900	633,000	627,300
TOTAL: HONOLULU MSA	457,500	456,800	451,000
TOTAL: KAHULUI-WAILUKU-LAHAINA MSA	73,100	71,800	75,500

Technical Notes:

Labor Force Components

The concepts and definitions used by the Local Area Unemployment Statistics (LAUS) program are the same as those used in the Current Population Survey for the national labor force data:

- *Civilian labor force.* Included are all persons in the civilian noninstitutional population ages 16 and older classified as either employed or unemployed. (See the definitions below.)
- *Employed persons.* These are all persons who, during the reference week (the week including the 12th day of the month), (a) did any work as paid employees, worked in their own business or profession or on their own farm, or worked 15 hours or more as unpaid workers in an enterprise operated by a member of their family, or (b) were not working but who had jobs from which they were temporarily absent because of vacation, illness, bad weather, childcare problems, maternity or paternity leave, labor-management dispute, job training, or other family or personal reasons, whether or not they were paid for the time off or were seeking other jobs. Each employed person is counted only once, even if he or she holds more than one job.
- *Unemployed persons.* Included are all persons who had no employment during the reference week, were available for work, except for temporary illness, and had made specific efforts to find employment sometime during the four-week period ending with the reference week. Persons who were waiting to be recalled to a job from which they had been laid off need not have been looking for work to be classified as unemployed.
- *Unemployment rate.* The unemployed percent of the civilian labor force [i.e., 100 times (unemployed/civilian labor force)].

Seasonal Adjustment

The seasonal fluctuations in the number of employed and unemployed persons reflect hiring and layoff patterns that accompany regular events such as the winter holiday season and the summer vacation season. These variations make it difficult to tell whether month-to-month changes in employment and unemployment are due to normal seasonal patterns or to changing economic conditions. Therefore, the BLS uses a statistical technique called seasonal adjustment to address these issues. This technique uses the history of the labor force data and the job count data to identify the seasonal movements and to calculate the size and direction of these movements. A seasonal adjustment factor is then developed and applied to the estimates to eliminate the effects of regular seasonal fluctuations on the data. Seasonally adjusted statistical series enable more meaningful data comparisons between months or with an annual average.

Current Population (Household) Survey (CPS)

A survey conducted for employment status in the week that includes the 12th day of each month generates the unemployment rate statistics, which is a separate survey from the Establishment Survey that yields the industry job counts. The CPS survey contacts approximately 1,000 households in Hawaii to determine an individual's current employment status. Employed persons consist of 1) all persons who did any work for pay or profit during the survey reference week, 2) all persons who did at least 15 hours of unpaid work in a family-owned enterprise operated by someone in their household, and 3) all persons who were temporarily absent from their regular

jobs, whether they were paid or not. Persons considered unemployed are those that do not have a job, have actively looked for work in the prior four weeks and are available for work. Temporarily laid-off workers are counted as unemployed, whether they have engaged in a specific job-seeking activity. Persons not in the labor force are those who are not classified as employed or unemployed during the survey reference week.

Benchmark Changes to Local Area Unemployment Statistics Data

Statewide and substate data for 2010 to 2022 have revised inputs and have been re-estimated to reflect revised population controls and model re-estimation.

Change to Monthly Employment Estimates

This release incorporates revised job count figures for the seasonally adjusted series. The revised data reflects historical corrections applied to unadjusted supersector or sector-level series dating back from 1990 through 2022. For years, analysts with the State of Hawaii Department of Labor and Industrial Relations' Research and Statistics Office have developed monthly employment estimates for Hawaii and its metropolitan areas. These estimates were based on a monthly survey of Hawaii businesses and analysts' knowledge about our local economies. Beginning with the production of preliminary estimates for March 2011, responsibility for the production of state and metropolitan area (MSA) estimates were transitioned from individual state agencies to the U.S. Bureau of Labor Statistics (BLS).

For Hawaii, this means the transition of statewide, Honolulu and Kahului-Wailuku-Lahaina MSA estimates for both the seasonally adjusted and not seasonally adjusted areas are produced by BLS. State agencies will continue to provide the BLS with information on local events that may affect the estimates, such as strikes or large layoffs/hiring at businesses not covered by the survey and to disseminate and analyze the Current Employment Statistics (CES) estimates for local data users. BLS feels this change is designed to improve the cost efficiency of the CES program and to reduce the potential bias in state and area estimates. A portion of the cost savings generated by this change is slated to be directed toward raising survey response rates in future years, which will decrease the level of statistical error in the CES estimates. Until then, state analysts feel this change could result in increased month-to-month variability for the industry employment numbers particularly for Hawaii's counties and islands. BLS can be reached at (202) 691-6555 for any questions about these estimates.

The not-seasonally adjusted job estimates for Hawaii County, Kauai County, Maui, Molokai, and Lanai are produced by the State of Hawaii Department of Business, Economic Development, and Tourism.

Seasonally Adjusted Labor Force and Unemployment Estimates for Honolulu and Maui County

BLS publishes smoothed seasonally adjusted civilian labor force and unemployment estimates for all metropolitan areas, which includes the City and County of Honolulu and Maui County.

BLS releases this data each month in the *Metropolitan Area Employment and Unemployment* news release. The schedule is available at <http://www.bls.gov/news.release/metro.toc.htm>.

Alternative Measures of Labor Underutilization

Alternative Measures of Labor Underutilization for States, Fourth Quarter of 2022 through Third Quarter of 2023 averages

Area	Measure					
	U-1	U-2	U-3	U-4	U-5	U-6
United States	1.2	1.7	3.6	3.8	4.4	6.8
Hawaii	1.3	1.3	3.3	3.4	4.1	6.3

The six alternative labor underutilization state measures based on the Current Population Survey (CPS) and compiled on a four-quarter moving average basis defined:

- U-1, persons unemployed 15 weeks or longer, as a percent of the civilian labor force;
 - U-2, job losers and persons who completed temporary jobs, as a percent of the civilian labor force;
 - U-3, total unemployed, as a percent of the civilian labor force (this is the definition used for the official unemployment rate);
 - U-4, total unemployed plus discouraged workers, as a percent of the civilian labor force plus discouraged workers;
 - U-5, total unemployed, plus discouraged workers, plus all other marginally attached workers*, as a percent of the civilian labor force plus all marginally attached workers; and
 - U-6, total unemployed, plus all marginally attached workers, plus total employed part-time for economic reasons, as a percent of the civilian labor force plus all marginally attached workers.
- *Individuals who want and are available for work, and who have looked for a job sometime in the prior 12 months (or since the end of their last job if they held one within the past 12 months) but were not counted as unemployed because they had not searched for work in the four weeks preceding the survey, for such reasons as childcare or transportation problems, for example. Discouraged workers are a subset of the marginally attached.

Please note that the state unemployment rates (U-3) that are shown are derived directly from the CPS. As a result, these U-3 measures may differ from the official state unemployment rates for the latest four-quarter period. The latter are estimates developed from statistical models that incorporate CPS estimates, as well as input data from other sources, such as state unemployment claims data.
