Subject: [EXTERNAL] Update re: new downloadable Geographic Names files

Sending courtesy of Maria McCormick, GNIS Manager, for any of you who rely on geographic names data for your agency use:

The downloadable products for Geographic Names are available at <https://prd-tnm.s3.amazonaws.com/index.html?prefix=StagedProducts/GeographicNames>. Files include the Gazetteer database in geodatabase and GeoPackage formats, as well as the traditional text file deliverables. Files will be generated and posted on a bi-monthly schedule so the next set of files will be updated on June 1.

Thanks, and many kudos to Maria for all the hard work that went into this.
