

Layer Name: HDOT Airports – Property Boundaries

File Name: HDOTA_Airport_Prop_Bndries

Layer Type: Polygon

Status: Complete

Geog. Extent: Property Boundaries for Airports under the Jurisdiction of SDOT Airports as of 12/1/23.

Projection: Universal Transverse Mercator, Zone 4 (Meters)

Datum: NAD 83 HARN

Description: Property boundaries for airports owned or managed by the State of Hawaii, Airports Division as of December 1, 2023.

Source: Hawaii State Department of Transportation, Airports Division, via their consultant, Ricondo & Associates, May 2024. The source of each airport property boundary was the respective Airport Layout Plan (ALP). Years of the plans varied from 1999 to 2023. The specific plan titles and dates are available in the application referenced below. Data was provided to the Hawaii Statewide GIS Program in May 2024. This layer was created for use with the FAR FAA Part 77 Airspace Application developed by Ricondo & Associates for DOT Airports.

Attributes: **Polygon:**
Airport Name and Abbreviation of Airport
