

Layer Name: HDOT Existing Crosswalks  
File Name: crosswalks\_state\_existing  
Layer Type: Line  
Status: Complete  
Geog. Extent: Main Hawaiian Islands  
Projection: Universal Transverse Mercator, Zone 4 (Meters)  
Datum: NAD 83 HARN

*Please note - if you download data from the State's geoportal (<https://geoportal.hawaii.gov/>), the data is exported in WGS84 coordinates, although it is stored internally (in the State's geodatabase), served in the State's web services (<https://geodata.hawaii.gov/arcgis/rest/services>) and made available in the State's legacy download site (<https://planning.hawaii.gov/gis/download-gis-data-expanded/>) in UTM / NAD 83 coordinates.*

Description: This dataset includes crosswalks on the state highway system.

Source: Hawai'i Department of Transportation, Highways Division

[https://services3.arcgis.com/lww7RONHYhstqYxg/arcgis/rest/services/HDOT\\_2021\\_RVX\\_gdb/FeatureServer/21](https://services3.arcgis.com/lww7RONHYhstqYxg/arcgis/rest/services/HDOT_2021_RVX_gdb/FeatureServer/21)

History: This dataset is derived from the HDOT Highways Division's LiDAR data. It is updated as needed. Received by the Hawai'i Statewide GIS Program from Hawai'i DOT, Highways Division September 2022.

This layer is maintained by the Hawai'i Department of Transportation, Highways Division and is available as a feature service in the link shown above. It is provided on the State of Hawai'i GIS downloading site as a service to the public. Data is provided by the Hawai'i DOT to the GIS Program periodically or as data is updated. For more information about the HDOT Pedestrian Master Plan, please visit <https://highways.hidot.hawaii.gov/stories/s/Pedestrian-Planning/a6mu-vr5z>.

*Attributes and contact information shown on the following page*

Attributes:

BMP = begin milepost

EMP = end milepost

PREFIX = type of road (example, SR = state road, CR = county road)

ROUTE = route number (example, 50)

ISLAND = name of island (example, Maui)

DIRECTION = "+" is direction away from milepost 0.0; "-" is direction toward milepost 0.0

TYPE = type of pavement message (example, crosswalk – all set to "crosswalk")

NHS = National Highway System (example, YES, NO)

Note: The Hawai'i Department of Transportation strives to provide the most accurate and updated data possible. However, if you see an error on this map, please contact
