

Layer Name: Hawaii Humpback Whale National Marine Sanctuary  
 File Name: humpback\_whale\_sanct  
 Layer Type: Polygon  
 Status: Complete  
 Geog. Extent: Main Hawaiian Islands  
 Projection: Universal Trans Mercator, Zone 4, Meters  
 Datum: NAD 83 HARN  
 Description: Humpback Whale National Marine Sanctuary boundaries for the State of Hawaii.  
 Source: NOAA National Marine Sanctuary Program  
 History: Received by Office of Planning from NOAA National Marine Sanctuary Program, March, 2006. OP staff projected from geographic to UTM coordinates. Please see humpback\_whale\_sanct.xml for more information as to compilation procedures.  
 Received corrected/updated version, June, 2020, from Hawaii Coral Reef Initiative (HCRI) and Hawaiian Islands Humpback Whale National Marine Sanctuary (HIHWNMS) staff. The corrected version omits the Kaunalapau Harbor area from the boundary (all small boat and commercial harbors should be excluded from the HIHWNMS boundaries).  
 Attributes: Polygons:  
 SANCTUARY Sanctuary Name  
 DATUM Geographic Datum of Original Coordinates  
 AREA\_NAME Sanctuary Area Name  
 POLY\_ID Polygon ID  
 AREA\_KM Area in square kilometers  
 AREA\_NM Area in square nautical miles  
 AREA\_SM Area in square statute miles  
 AREA\_ACRES Area in acres
