Coverage Name: <isl>tmk
Layer Type: Polygon

Please note - if you download data from the State's geoportal (<https://geoportal.hawaii.gov/>), the data is exported in WGS84 coordinates, although it is stored internally (in the State's geodatabase), served in the State's web services (<https://geodata.hawaii.gov/arcgis/rest/services>) and made available in the State's legacy download site (<https://planning.hawaii.gov/gis/download-gis-data-expanded/>) in UTM / NAD 83 coordinates.

Description: Parcel/TMK maps for Neighbor Islands

Parcel boundaries represented in these GIS files were not derived from metes and bounds and are not survey grade data.

Source: Counties of Kauai, Maui and Hawaii

Latest Updates:

Hawaii County: 4/25/22
Kauai County: 4/25/22
Maui County: 4/20/22

State GIS Program projected all county tmk layers to UTM Zone 4, NAD 83 HARN

GIS_Acres fields recalculated to reflect conversion to UTM NAD 83 HARN projection/datum.

Additional fields added if not present: TMK_txt, cty_tm, GIS_Acres, Qpub_link

Note1: Kauai parcels: The assessment values in the attribute tables are "for assessment purposes only" per Kauai Real Property Department.

Note2: All neighbor island counties are in the process of better aligning their parcel layers with satellite imagery, which results in shifts in the parcel and other related county layers. This realignment results in the county parcel layers not perfectly overlaying with other related state and federal GIS layers such as state roads, reserves, critical habitat and others. This is an ongoing project, with an unknown completion date.
