

Layer Name: State Parks
File Name: parks_state
Layer Type: Polygon
Status: Complete
Geog. Extent: Islands of Kauai, Oahu, Maui, Molokai, and Hawaii Island
Projection: Universal Transverse Mercator, Zone 4 (Meters)
Datum: NAD 83 HARN

Please note - if you are using data in the [State's web services](#) or downloading from the [State's geoportal](#), the data is served and exported in WGS84 coordinates, although it is stored internally in UTM coordinates.

Description: Areas managed by the State of Hawaii DLNR Division of State Parks

Abstract: The Hawai'i State Park system is composed of 50+ parks covering over 28,000 acres on five major islands. These lands are administered by the State of Hawaii Department of Land and Natural Resources Division of State Parks. The Hawai'i State Park system is composed of 50+ parks covering over 30,000 acres on five major islands: Kauai, Oahu, Molokai, Maui, and Hawaii Island. These parks offer a variety of outdoor recreation and heritage opportunities. The park environments range from landscaped grounds with developed facilities to wildland areas with trails and primitive facilities.

Source: This data has been created by georeferencing Governor's Executive Order (E.O.) metes & bounds maps included in EO Set Asides to the Division of State Parks. The boundaries are referenced with County TMK data and subject to variance. **This data is for general reference only.**

Use Limitations: This dataset was compiled from various data sources and is updated frequently. No warranty is made that the GIS data or any subsequent update will be error free, and no warranty is made regarding the positional or thematic accuracy of the GIS data. The features are graphic representation of managed areas for planning purposes and do not represent or confer any legal rights, privileges, benefits, boundaries, or claims of any kind. DLNR encourages GIS data users to verify the suitability of the data before use. Please report any discrepancies or errors to the point of contact.

Note: *In some cases, differences in the acreage calculated by the GIS and the acreage listed in county real property records may exist. This can be especially evident in large parcels in remote areas, and is often a result of the difficulty in surveying the steep, overgrown terrain found in these natural areas.*

Attribute descriptions and contact information on following page

Attributes:**Polygons:**

OBJECTID	Polygon ID (for ArcGIS use)
NAME	Name of Reserve
TYPE	Park Type Abbreviation
Type_Defin	Type of Park, e.g. State Park, State Recreation Area, etc.
MANAGEDBY	Agency That Manages Park (All set to DOSP – Div of State Parks)
ISLAND	Island Park is located on
GIS_Acre	Area of the reserve in acres as calculated by the software
Shape_Length	Length of the perimeter of the polygon in meters as calculated by software
Shape_Area	Area of the polygon in square meters as calculated by the software
