Description: TMK parcels for the main Hawaiian Islands

Parcel boundaries represented in these GIS files were not derived from metes and bounds and are not survey grade data.

Source: Counties of Honolulu, Kauai, Maui and Hawaii

History: Created by the Office of Planning and Sustainable Development. Merged from TMK Parcel datasets from all four counties of Hawaii. Updated November, 2021 (Oahu only).

The Hawaii Statewide GIS Program projected to a common projection/ and merged all counties’ parcel data into one layer. Where necessary, the State standardized field names or added fields to the county layers (e.g. creating text fields for corresponding numeric fields), and / or calculated values for fields (e.g. links to qpublic9.qpublic.net websites).
