Layer Name: Statewide TMK Parcels
Coverage Name: SOH\ParcelsZoning\tmk_state
Layer Type: Polygon
Status: Updated periodically
Geog. Extent: Main Hawaiian Islands
Projection/Datum: Universal Transverse Mercator, Zone 4 (Meters); NAD 83 HARN

Please note - if you are using data in the State’s web services or downloading from the State's geoportal, the data is served and exported in WGS84 coordinates, although it is stored internally in UTM coordinates.

Description: TMK parcels for the main Hawaiian Islands
Parcel boundaries represented in these GIS files were not derived from metes and bounds and are not survey grade data.

Source: Counties of Honolulu, Kauai, Maui and Hawaii

History: Created by the Office of Planning. Merged from TMK Parcel datasets from all four counties of Hawaii. Updated November 2020.

Hawaii Statewide GIS Program projected to a common projection/and merged all counties parcel data into one layer. Where necessary, the State standardized field names or added fields to the county layers (e.g. creating text fields for corresponding numeric fields), and / or calculated values for fields (e.g. links to qpublic9.qpublic.net websites).

Dates of TMK Parcel datasets:
City and County of Honolulu – November 27, 2020
Hawaii County – May 5, 2020
Kauai County – May 4, 2020
Maui County – May 4, 2020
(Note: Maui County provided a corrected layer which removed duplicate polygons for some parcels, July 23, 2020, tmk_state layer was subsequently regenerated).
