*Please note - if you download data from the State's geoportal (<https://geoportal.hawaii.gov/>), the data is exported in WGS84 coordinates, although it is stored internally (in the State's geodatabase), served in the State's web services (<https://geodata.hawaii.gov/arcgis/rest/services>) and made available in the State's legacy download site (<https://planning.hawaii.gov/gis/download-gis-data-expanded/>) in UTM / NAD 83 coordinates.*

Description: 2020 Census Tracts

Source: U.S. Census Bureau (September 2021).

History: Projected from decimal degrees to UTM Zone 4 NAD83 HARN. Removed extraneous fields (e.g., State Code). Water polygons were removed from the census blocks layer, and that layer was used to clip the remaining 2020 census layers - block groups, census county boundaries, census county divisions, census designated places, census Hawaiian homelands and census tracts. **April 2022:** Added population data by joining to census table using GEOID20 field; Added tract name, county and island fields, April 2022. \\ **NOTE – February 2023:** The Hawaii Statewide GIS Program was notified in Feb 2023 that the tract names for the Kalawao and Sprecklesville census tracts were reversed (both tracts have census tract number 319). The GIS staff corrected the error and re-published the layer).
