

Layer Name: Wrecks  
File Name: Wrecks  
Layer Type: Point  
Status: Complete  
Geog. Extent: Main Hawaiian Islands  
Projection: Universal Trans Mercator, Zone 4, Meters  
Datum: NAD 83 HARN

*Please note - if you are using data in the [State's web services](#) or downloading from the [State's geoportal](#), the data is served and exported in WGS84 coordinates, although it is stored internally in UTM coordinates.*

Description: This dataset contains those shipwreck locations in marine waters within the vicinity of the main Hawaiian Islands and recorded on the nautical charts.

Source: NOAA Raster Nautical Charts

History: The raster nautical charts were first re-projected from their original projection/datum to UTM Zone 4, NAD 83 using NOAA's Nautical Chart Re-projector v1.8.3. NOAA's ArcView ChartViewer extension was used to display the re-projected nautical charts in ArcView v3.2. Objects were then digitized from the individual nautical charts and merged into a single dataset/shapefile which covers the entire state. Completed December, 2002.

Attributes: Polygons:

ID	Point ID
Notes	Notes pertaining to individual objects as reported on the nautical charts
Depth	Depth of object as reported on the nautical chart
Descript	Description of object as interpreted from the nautical chart symbol
Chart	Source chart from which object was digitized

NOTE: Data not to be used for navigational purposes. Data were not reviewed or authenticated by the Office of Coast Survey, NOAA National Ocean Service. NOAA is not responsible for the use of these data as a navigational tool.
