# PREFACE

This report was produced by the staff of the Research and Economic Analysis Division of the Hawai'i State Department of Business, Economic Development & Tourism, Tourism Research Branch (DBEDT). The department is headed by Mr. Theodore E. Liu. This report was prepared under the direction of the Division Administrator, Dr. Pearl Imada Iboshi by Hospitality Advisors LLC with assistance from Hawai'i School of Travel Industry Management and was reviewed by Mr. Daniel Nahoopii, Ms. Minh-Chau T. Chun and Ms. Sarah Takemoto.

Ms. Marsha Wienert, State Tourism Liaison, reviewed this report and provided valuable comments.

Hawai'i Visitors and Convention Bureau (HVCB) first published the Visitor Plant Inventory in 1964 and every year thereafter, except 1995 and 1998. HVCB did not conduct a survey in 1995 and did not publish hard copies of the report in 1998.

Act 156, Session Laws of Hawai'i 1998, transferred the tourism research program from HVCB to DBEDT. DBEDT has been responsible for collecting and disseminating data on Hawai'i's visitor industry since July 1, 1998.

As part of the tourism research program, in 2008, DBEDT conducted its tenth survey on statewide visitor units. This report provides the results of the visitor accommodation survey. Specifically, data on the number of visitor units, island distribution, type of property and class of rooms are presented. For the purpose of consistency, this report continues to use HVCB's definitions and format of reporting.

As in previous reports, island and district names were written in proper Hawaiian language orthography. However, individual property names were not written in the same manner unless the words were easily identifiable (i.e., island names).

This report is also posted on the DBEDT website: <http://www.hawaii.gov/dbedt/info/visitor-stats/visitor-plant/>

# OVERVIEW

Total statewide visitor plant inventory in 2008 increased by 1.3 percent from the previous year to 74,177 visitor units (Table 1). O'ahu (City and County of Honolulu) reported a slight increase of 1.5 percent to 34,081, due largely to Waikiki units undergoing renovation being added back into the visitor supply. The County of Kaua'i had the largest percentage increase of 5.9 percent to 9,203 units, with timeshare units increasing by 241 units, driven, in part, by new timeshare units coming on line in Princeville. The County of Maui visitor supply decreased by -1.1 percent to 19,653. The County of Hawai'i (Hawai'i Island) reported an increase of 1.6 percent to 11,240 visitor units.

Just under half (45.9 percent) of the statewide visitor units in 2008 were located on O'ahu. The island of Maui continued to have the second largest share of visitor units, followed by Hawai'i Island and Kaua'i counties (Figure 1). Hotels continued to comprise the majority (57.2 percent) of visitor units statewide. Condominium hotel properties accounted for the second largest share of visitor units at 22.1 percent. Timeshare units accounted for 11.2 percent of the total visitor units followed by individual vacation unit properties with 7.4 percent. Bed & Breakfasts, apartment hotels, and hostels each comprised less than 1 percent of the total visitor units (Table 2, Figure 2).

71,647 units were reported by class (Figures 9 through 12 and Tables 6 and 7). Visitor units categorized as "Standard" (\$101 to \$250 per night) comprised the largest percentage of the total units statewide in 2008. Following close behind, the second largest group of units were those classified as "Deluxe" (\$251 to \$500 per night), followed by those in the "Luxury" (over \$500 per night) and "Budget" (\$100 or less per night) categories.

By island, 80 percent of O'ahu visitor units were classified as "Standard" or "Deluxe." Similarly, the majority of the visitor units on Kaua'i, Hawai'i Island and Maui were also in the "Standard" or "Deluxe" price range. In contrast, most of the visitor units on Lāna'i (95.5 percent) were in the higher-priced "Deluxe" and "Luxury" classes.

53.4 percent of the condo hotel properties categorized their units as "Standard." Among hotels, 40.5 percent of the units were classified as "Deluxe" and 29 percent were "Standard" units. Hotels had the largest percentage share of "Luxury" units with 23.1 percent.

50 properties that were included in the 2007 report were not in operations for 2008 (Table 13).

The data remains comparable to reports from previous years. However, to make the report more effective, we implemented an enhancement to further subcategorize the individual vacation units into Individual Vacation Unit – Condo, Individual Vacation Unit – House/Villa/Cottage, Individual Vacation Unit – Cabin, in order to better correspond with the lodging categories in DBEDT's visitor surveys. To preserve data integrity, no changes were made to prior year data and to maintain comparability to reports from previous years, subcategories are only reported in the Current Inventory (page 39).

# METHODS AND PROCEDURES

The 2008 Visitor Plant Inventory presents the results of DBEDT's enumeration of visitor accommodations in Hawai'i. Existing visitor accommodations as of May 1, 2008 as well as planned developments and additions to existing developments are catalogued.

Visitor Plant Inventory Survey: Information about transient accommodations was gathered mainly from a survey of existing visitor accommodation properties and management companies. Survey forms were sent to general managers, property managers and other individuals who could provide information about the property. The survey provided information about available units, planned additions and other information presented in this report.

Survey forms were distributed to all properties that participated in the prior year's survey and additional properties identified through the association survey (below) and internet research. Over 2,300 properties were identified as part of a detailed web search using pertinent key word phrases, such as "Vacation Units In Hawaii," "Hawaii B&B," "Hawaii Hostels," etc. Information for hotel and condominium hotel properties that participate in Smith Travel Research's monthly survey were also cross-verified against Smith Travel Research's property database. Survey forms were distributed via mail, email, and fax.

If no response was received, follow-up telephone calls, emails, and/or faxes were made to the property to remind them to complete and return the form. Subsequently, if no response was received after the follow-ups, an Internet search was conducted to determine if the property was still in business and telephone calls were made to verify unit counts and types. If no response was received or no data was found on the Internet, but information was available from prior years (2005, 2006, and 2007), that information was included and so noted. If no response was received from a property and information was available from the association survey, such information was included and so noted. If no survey form was returned and no information was available from previous years or other sources, the property was listed as a non-respondent.

Association Survey: Continued in 2008, this survey's purpose was to gather contact information of associations whose members were transient visitor accommodations in the State of Hawai'i. Letters were sent to these associations to request member accommodation contact information, from which the mailing list was updated and new accommodations were contacted via mailing as described above.

Timeshare Properties: Information on timeshare properties were gathered through the survey questionnaire, which asked for information on the number of units *registered* as timeshare and units *operated* as timeshare. The number of units registered included those that were available for sale as well as those currently in use by visitors. The number of units operated represented the units that have been sold and were in use. The available timeshare units listed in Tables 3 and 5 and their related charts were the total number of operated units. The number of timeshare properties listed in Tables 2 and 3 were the properties with the majority of units classified as timeshare. However, the number of available units listed with the timeshare category included those units that were cross-listed under the other property types. The 2008 Current Visitor Plant Inventory details the unit types available at each property.

## Cross Verification of Data:

Responses from selected hotels, condominium hotels, and timeshare properties were cross verified against Smith Travel Research's property database and data from the American Resort Development Association.

## Property Type Classification:

Classification of property type (Tables 2 & 4) for properties with more than one unit type was determined by the majority of units on that property. Historically property type was self-selected by the respondent but research has shown that the response was not always consistent with DBEDT's type definitions (page 5).

Property Changes: A section requesting information on property changes between April 2007 and May 2008 was included on the Visitor Plant Survey form in 2008. This section provided detail on increases or decreases in inventory by the specific property and detail on property inventory that was converted to timeshare or condo units.

Planned New Developments: Information about planned new developments was gathered with assistance from the four county Planning Offices. The information is reprinted here and includes projects and developments that have achieved some level of jurisdictional approval. That is to say, these developments are a step beyond the preliminary stages of development and have some “official” standing as planned developments.

## SUMMARY BY ISLAND AND TYPE

### Defintions

An individual property may include more than one type of unit. If a property has more than one unit type, the majority unit type was used to determine the property type for the purposes of Table 2 and Table 4. Units were categorized as follows:

Apartment / Hotel (Apt/Hotel)	Inexpensive units (usually in a low-rise building) equipped with kitchens and geared for long-term rentals. Front desk operations and maid service are usually limited and sometimes non-existent.
Bed & Breakfast (B&B)	A lodging facility with a limited number of guest units, which include breakfast in the daily rental rate. Typical bed and breakfast facilities are either small, quaint inns, or family homes.
Condominium Hotel (Condo Hotel)	A multi-unit property legally classified as a condominium with each unit individually deeded. Generally, units are collectively placed into transient hotel rental operations, offering most of the services of a hotel, such as daily maid service and front desk operations. Condominium units are usually larger than hotel units and include studios and one- to three-bedroom units, with kitchen and laundry facilities, geared for transient use of 30 days or less.
Hotel	A multi-unit lodging facility which provides room accommodations on a daily basis and generally, but not always, restaurant operations and other “away from home” services such as daily maid service and front desk operations. Includes condominiums if a single owner owns all units and the property is operated as defined here.
Hostels	An inexpensive, limited service facility, often with dormitory-style accommodations, appealing primarily to younger travelers.
Individual Vacation Unit (IVU)	An individual vacation unit can be classified as an ivu-condominium unit (not in a hotel rental operation), and ivu-house, villa, or cottage with very limited service, often with only basic cleaning supplies provided, or an ivu-cabin unit. They can also be reported as unclassified and are listed as an individual vacation unit.
Timeshare	<p>A timeshare is a kind of property ownership that allows guests to acquire a percentage of interest in a hotel unit, condominium/hotel, bed and breakfast, individual vacation home etc. for a specific period of time on a recurring basis. This share could be one week per year (i.e. 1/52 share) or more; some resorts offering one week every other year (1/104 share) or four weeks per year (1/13 share).</p> <p>The survey questionnaire asks for information on the number of units registered as timeshare and units operated as timeshare. The number of units registered includes those that are available for sale as well as those currently in use by visitors. The number of units operated represents the units that have been sold and are used.</p>
Other	Includes residential condominium units, timeshare units, motels, lodges, inns, or any other form of property not included in the above definitions.
