ORDER NO. 23530

Filed _________________. 2007
At __ o'clock ___ M.

Karen Higashî
Chief Clerk of the Commission

ATTEST: A True Copy
KAREN HIGASHI
Chief Clerk, Public Utilities
Commission, State of Hawaii.

Karen Higashî.
Order

By this Order, the commission initiates an investigation to examine the feasibility of implementing intra-governmental wheeling of electricity in the State of Hawaii ("State").

I.

Background

In October 2003, the commission instituted a proceeding to examine the potential benefits and impacts of distributed generation on Hawaii's electric distribution systems and market ("Distributed Generation Docket"). One of the issues raised in the Distributed Generation Docket was the concept of intra-governmental wheeling. ¹ However, due to the nature of the

¹Some of the issues discussed in the Distributed Generation Docket included, for example, intra-governmental wheeling as a means of reducing electricity costs for the counties, the cost of intra-governmental wheeling to be borne by customers of a utility, and the entities eligible for intra-governmental wheeling, e.g., would intra-governmental wheeling be limited to municipal entities or government entities in general. While issues such as these were discussed briefly, as noted above, the
docket, the commission was unable to fully address all of the
issues relevant to intra-governmental wheeling in the course of
that docket.

On April 30, 2004, the Legislature adopted Senate
Concurrent Resolution No. 180 ("S.C.R. No. 180"). Among other
things, S.C.R. No. 180 recognized the State's dependence on
imported oil to meet its energy needs and the necessity for the
State to emphasize renewable energy production programs. The
Legislature requested that the commission explore ways to
implement intra-governmental wheeling to facilitate government
wheeling of electricity, and other regulatory measures to support
the development of renewable energy systems by federal, state,
and county agencies.

Wheeling is defined as "the process of transmitting
electric power from a seller's point of generation across a
third-party-owned transmission and distribution system to the
seller's retail customer." The Legislature found that the
production of renewable energy could be encouraged if government
agencies, as sellers of renewable energy, are allowed to transmit
electricity to other governmental facilities over existing
transmission lines of an electric public utility, i.e.,
intra-governmental wheeling. According to S.C.R. No. 180,
government agencies can include any federal, state, or county
department, commission, board, bureau, office or other government

issues were not developed to any extent. See In re Public
Utilities Commission, Docket No. 03-0371, Transcript of

establishment, or any quasi-public institution that is supported in whole or in part by government funds.

In addition, by letter to the commission dated December 21, 2006, the State of Hawaii Department of Business, Economic Development and Tourism ("DBEDT") requested information from the commission on ways to facilitate the purchase of renewable energy by State agencies. According to DBEDT, as a major user of electricity, the State should "lead by example" in the use of electricity and by purchasing electricity from renewable sources. Specifically, the State and other government agencies such as the counties, could acquire renewable energy by purchasing it from a renewable energy project developer, which would then be transmitted across utility lines owned and maintained by an existing electric utility, to the government agency or another government agency. As such, DBEDT requested information from the commission as to how proceed with these types of projects, including whether there would be a cost associated with transmitting electricity and whether the State is exempt from utility regulation associated with these types of projects.

Based on that history, the commission finds it appropriate and necessary to institute a proceeding at this time to fully address the issues related to intra-governmental wheeling in Hawaii.
II.
Discussion

A.

Investigative Authority

HRS § 269-7 states, in relevant part:

(a) The public utilities commission and each commissioner shall have the power to examine the condition of each public utility, the manner in which it is operated with reference to the safety or accommodation of the public, the safety, working hours, and wages of its employees, the fares and rates charged by it, the value of its physical property, the issuance by it of stocks and bonds, and the disposition of the proceeds thereof, the amount and disposition of its income, and all its financial transactions, its business relations with other persons, companies, or corporations, its compliance with all applicable state and federal laws and with the provisions of its franchise, charter, and articles of association, if any, its classifications, rules, regulations, practices, and service, and all matters of every nature affecting the relations and transactions between it and the public or persons or corporations . . .

(c) Any investigation may be made by the commission on its own motion, and shall be made when requested by the public utility to be investigated, or by any person upon a sworn written complaint to the commission, setting forth any prima facie cause of complaint. A majority of the commission shall constitute a quorum.
HRS § 269-7(a) and (c) (emphasis added). Similarly, in HRS § 269-6, the commission is vested with "general supervision . . . over all public utilities."³

In addition to the commission's statutory authority to investigate wheeling described above, S.C.R. No. 180 supports the establishment of this docket. The commission, moreover, notes that the Legislature recently enacted Act 177, Session Laws Hawaii 2007, which authorizes the commission "to consider the need for increased renewable energy use in exercising its authority and duties."

B.

Named Parties

Since all regulated electric utilities in the State will likely be impacted by the outcome of this investigation, the commission, sua sponte, names as parties to this proceeding: HAWAIIAN ELECTRIC COMPANY, INC. ("HECO"), HAWAII ELECTRIC LIGHT COMPANY, INC. ("HELCO"), MAUI ELECTRIC COMPANY, LIMITED ("MECO"), KAUAI ISLAND UTILITY COOPERATIVE ("KIUC") and the DEPARTMENT OF COMMERCE AND CONSUMER AFFAIRS, DIVISION OF CONSUMER ADVOCACY (the "Consumer Advocate")⁴ (collectively, the "Parties").

³Commission investigatory authority is also set forth in HRS § 269-15 and HAR § 6-61-71.

⁴The Consumer Advocate is statutorily mandated to represent, protect, and advance the interests of all consumers of utility service and is an ex officio party to any proceeding before the commission. See HRS § 269-51; HAR § 6-61-62.
involvement and participation in this proceeding will assist the commission in developing a sound record for its investigation into the feasibility of implementing intra-governmental wheeling.

In addition, the commission will provide a copy of this order to all individuals and entities that were involved in some manner in the Distributed Generation Docket, as the commission anticipates that some of those same entities or individuals may want to intervene or participate in the instant proceeding.

C.

Preliminary Issues

Through this docket, the commission intends to address issues affecting the electric industry in Hawaii with the implementation of intra-governmental wheeling. These issues include, but are not limited to the following:

1. Identifying what impact, if any, intra-governmental wheeling will have on Hawaii's electric industry;

2. Addressing interconnection matters;

3. Identifying the costs to utilities of implementing intra-governmental wheeling;

4. Identifying any rate design and cost allocation issues associated with intra-governmental wheeling;
5. Considering the financial cost and impact of intra-governmental wheeling on non-wheeling customers of a utility, i.e., an uncompensated use of the utility system;

6. Identifying any power back-up issues; and

7. Addressing how rates for intra-governmental wheeling would be set.

These are preliminary issues for consideration. During the development of the prehearing (or procedural) order for this proceeding, the Parties (and intervenors and participants, if any) shall have the opportunity to restructure these preliminary issues, stipulate to eliminate them, or suggest other issues for resolution in this proceeding for the commission’s review and consideration.

D.

Procedural Matters

Any interested individual, entity, agency, or community or business organization may file a motion to intervene or participate without intervention in this docket. Motions to intervene or participate without intervention must comply with all applicable rules of HAR Chapter 6-61, Subchapter 4 of the Rules of Practice and Procedure Before the Public Utilities Commission.

If a protective order to govern the treatment of certain documents is desired, the Parties (and intervenors and
participants, if any) shall file a stipulated protective order for the commission’s review and approval within forty-five (45) days from the date of this Order. If the Parties (and intervenors and participants, if any) are unable to stipulate, each party or participant shall file proposed protective orders for the commission’s review and consideration within the forty-five (45)-day filing deadline.

Within forty-five (45) days of the date of this Order, the Parties (and intervenors and participants, if any) shall file a stipulated prehearing (or procedural) order to govern the matters of this investigation for the commission’s review and approval. If the Parties (and intervenors and participants, if any) are unable to stipulate, each of them shall file proposed orders for the commission’s review and consideration within the forty-five (45)-day filing deadline.

The commission expects all Parties (and intervenors and participants, if any) to this proceeding to participate fully in the development of the necessary procedures and issues for the orderly conduct of this investigatory proceeding, consistent with all applicable State laws and commission rules and regulations. Moreover, if necessary or appropriate, the Parties to this proceeding will be expected to actively participate in an evidentiary hearing or other procedures authorized by State law.
III.

Orders

THE COMMISSION ORDERS:

1. An investigative proceeding is initiated to examine the implementation of intra-governmental wheeling in the State of Hawaii.

2. The commission, sua sponte, designates HECO, HELCO, MECO, KIUC and the Consumer Advocate as parties to this investigative docket.

3. A motion to intervene or participate without intervention must be filed not later than twenty (20) days from the date of this Order, pursuant to HAR § 6-61-57(3)(B). Motions to intervene or participate without intervention must comply with all applicable rules of HAR Chapter 6-61, Rules of Practice and Procedure Before the Public Utilities Commission.

4. If a protective order to govern the treatment of certain documents is desired, the Parties (and intervenors and participants, if any) shall file a stipulated protective order for the commission’s review and approval within forty-five-(45) days of the date of this Order. If they are unable to stipulate, each party, (intervenor or participant, if any) shall file a proposed protective order for the commission’s review and consideration within the forty-five (45)-day filing deadline.
5. Within forty-five (45) days of the date of this Order, the Parties (and intervenors and participants, if any) shall file a stipulated prehearing (or procedural) order to govern the matters of this investigation for the commission's review and approval. If the Parties (and intervenors and participants, if any) are unable to stipulate, each of them shall file a proposed order for the commission's review and consideration within the forty-five (45)-day filing deadline.

DONE at Honolulu, Hawaii JUN 29 2007.

PUBLIC UTILITIES COMMISSION
OF THE STATE OF HAWAII

By Carlito P. Caliboso, Chairman
By John E. Cole, Commissioner

APPROVED AS TO FORM:

Benedyne Stone
Commission Counsel
