COMMISSION ON WATER RESOURCE MANAGEMENT

APPLICATION FOR SURFACE WATER USE PERMIT FOR  
PROPOSED NEW USE IN A DESIGNATED SURFACE WATER  
MANAGEMENT AREA

FORM SWUPA-N

- ☒ Application for New Use  
☐ Application to Modify SWUP No. \_\_\_\_\_

For Official Use Only:

For detailed instructions on filling out this application form completely, refer to the attached instructions sheet.  
Incomplete applications will not be accepted for processing.

The following must be attached before this application is accepted as complete:

- Portion of 7.5-Minute Series USGS topographic map (scale 1:24,000) labeled with stream and diversion location and the quad map name.
- Property tax map showing the stream or diversion location and location of water use referenced to established property boundaries.
- Photograph(s) of the surface water source, diversion and end use, if applicable.

**APPLICANT INFORMATION:** NOTE: In accordance with HRS §174C-51(1)(B), in the event a lessee, licensee, developer, or any other person with a terminable interest or estate in the land which is the water source of the permitted water, applies for a water permit, the landowner shall be stated as a joint applicant for the water permit.

### OTHER PERTINENT INFORMATION

**21. PUBLIC INTEREST:** Hawaii Revised Statutes §174C-2(c) states that: *The state water code shall be liberally interpreted to [a] obtain maximum beneficial use of the waters of the State for purposes such as domestic uses, aquaculture uses, irrigation and other agricultural uses, power development, and commercial and industrial uses. However, [b] adequate provision shall be made for the protection of traditional and customary Hawaiian rights, the protection and procreation of fish and wildlife, the maintenance of proper ecological balance and scenic beauty, and the preservation and enhancement of waters of the State for municipal uses, public recreation, public water supply, agriculture, and navigation. Such objectives are declared to be in the public interest.*

Explain how the proposed new use(s) in your application are consistent with items [a] and [b] above.

Please See attachment A

**21a. Please provide the identity and scope of cultural, historical, and natural resources in which traditional and customary Native Hawaiian rights are exercised in this area.**

The land is blessed with many giant kukui trees and they produce nuts throughout the year. We have been harvesting the nuts and cold-pressed them to make kukui nut oil. The oil is then bottled and given out to friends and visitors to the land as gift or in exchange for a small donation to cover the cost. While we are not native Hawaiians, we enjoy taking care of our land and all that it offers to us. We believe living in harmony with the environment is one way to practice the Hawaiian traditional spirit of Aina.

**21b. Identify the extent to which those resources, including traditional and customary Native Hawaiian rights, will be affected or impaired by the proposed action**

None of the resources, including traditional and customary Native Hawaiian rights will be affected or impaired by our proposed action.

**21c. What feasible action, if any, could be taken by the Commission on Water Resource Management in regards to your application to reasonably protect Native Hawaiian rights?**

We do not see a need for any feasible action could be taken by the Commission on Water Resource Management in regard to our application to reasonably protect Native Hawaiian rights.

### 22. INTERFERENCE WITH THE RIGHTS OF THE DEPARTMENT OF HAWAIIAN HOME LANDS

Explain how the proposed new use(s) of water will not interfere with the rights of the Department of Hawaiian Home Lands, as provided in section 221 of the Hawaiian Homes Commission Act.

As far as we know, there is no Hawaiian Homes Lands in the district of Wailuku.

### 23. INTERFERENCE WITH ANY EXISTING LEGAL USES

Explain how the proposed new use(s) of water will not interfere with any other existing legal use(s) of water.

Iao River runs through our property, so we have riparian rights ( see Appurtenant Rights Historical Data folder) which are constitutionally protected, see Haw. Const. Art. XI, 7 (preserving appurtenant rights and existing riparian rights).

APPLICANTS: Yas Yamazaki

### **Form SWUPA-N Source Information:**

#### ***Item 5. Explain how your proposal uses(s) can be accommodated within the existing IFS for the above hydrologic unit:***

Since our request is for the minimal daily use requirements estimated for domestic use (600 gpd per dwelling) and state required agricultural plantings and necessary irrigation needs (2500 gpd per div ag acre), the conveyance of this minimal amount for irrigation and domestic water supplies should have no discernible effect to downstream points of diversion or the IFS. Further, while rain amounts during the rainy season, November through April, vary widely, it is likely water diversion amounts would be minimal perhaps as little as zero gpd during these months and done only upon storage tank depletion to about 25%.

#### ***Item 7a. Proposed Stream Diversion; How will water be diverted from the stream to your property?***

Due to elevation change from the river bed and the property irrigation needs of the property, it is likely only a portable submersible pump would be used in order to supplementally fill existing rain catchment tanks, as needed. No permanent pump or piping is anticipated as replenishment would occur only as needed during long periods without adequate rain.

There are currently one 15,000 gallon catchment tank for the dwelling, and one 500 gallon catchment tank for the shed on the property for a total of 15,500 gallons. Rainfall totals vary widely with seasonal and drought conditions requiring additional hydro input from Iao Stream in order to properly irrigate current and future plantings during periods of inadequate rainfall.

During the permitting process for the construction of the main dwelling, state agricultural inspections required adequate agricultural planting in order to gain approval. Inspections were conducted with our plan passed by the State Land Use Planning Department on Maui. Rain catchment totals cannot meet the necessary requirements to adequately irrigate the agricultural requirements from the State of Hawaii.

**NOTE:** *Historically, the kama auwai (south side of Iao Stream) and the kalani auwai (north side of Iao Stream) were the main sources of water for kalo and other agricultural uses in the area. The kama auwai became the Mission Ditch and then the Kama Ditch, whose stream access point was moved further makai from the original access point. This 2nd*

intake point which resides on subject property was damaged around 1995 and Wailuku Ag decided not to repair it. We understand that a tunnel portion of the kalani auwai caved in around 1960, where Wailuku Ag (C. Brewer) decided not to repair it.

**Item 7b. *Will the diverted water be returned to the stream?***

Since all water pumped into storage tanks would be used for domestic use and diversified agricultural irrigation, it is doubtful very little water would percolate through the soil. Because of the low volume needed for diversity agricultural irrigation and domestic use, it is estimated very little would be returned to the stream.

**Item 8. *Proposed flow measurement information; Explain how stream diversion will be measured or estimated to justify amounts requested.***

Since water replenishment to the storage tanks would be accomplished only when water levels are determined to be low (approximately 25% of the total in each storage tank), it is very easy to estimate, with a high degree of accuracy, amounts of water replenishment since the total number of gallons the tanks can hold are a known fixed amount. A log book would be kept noting the dates and amount pumped from the stream which would be calculated by fairly accurately estimating the levels in the tank prior to, and after completing the replenishment of the tanks.

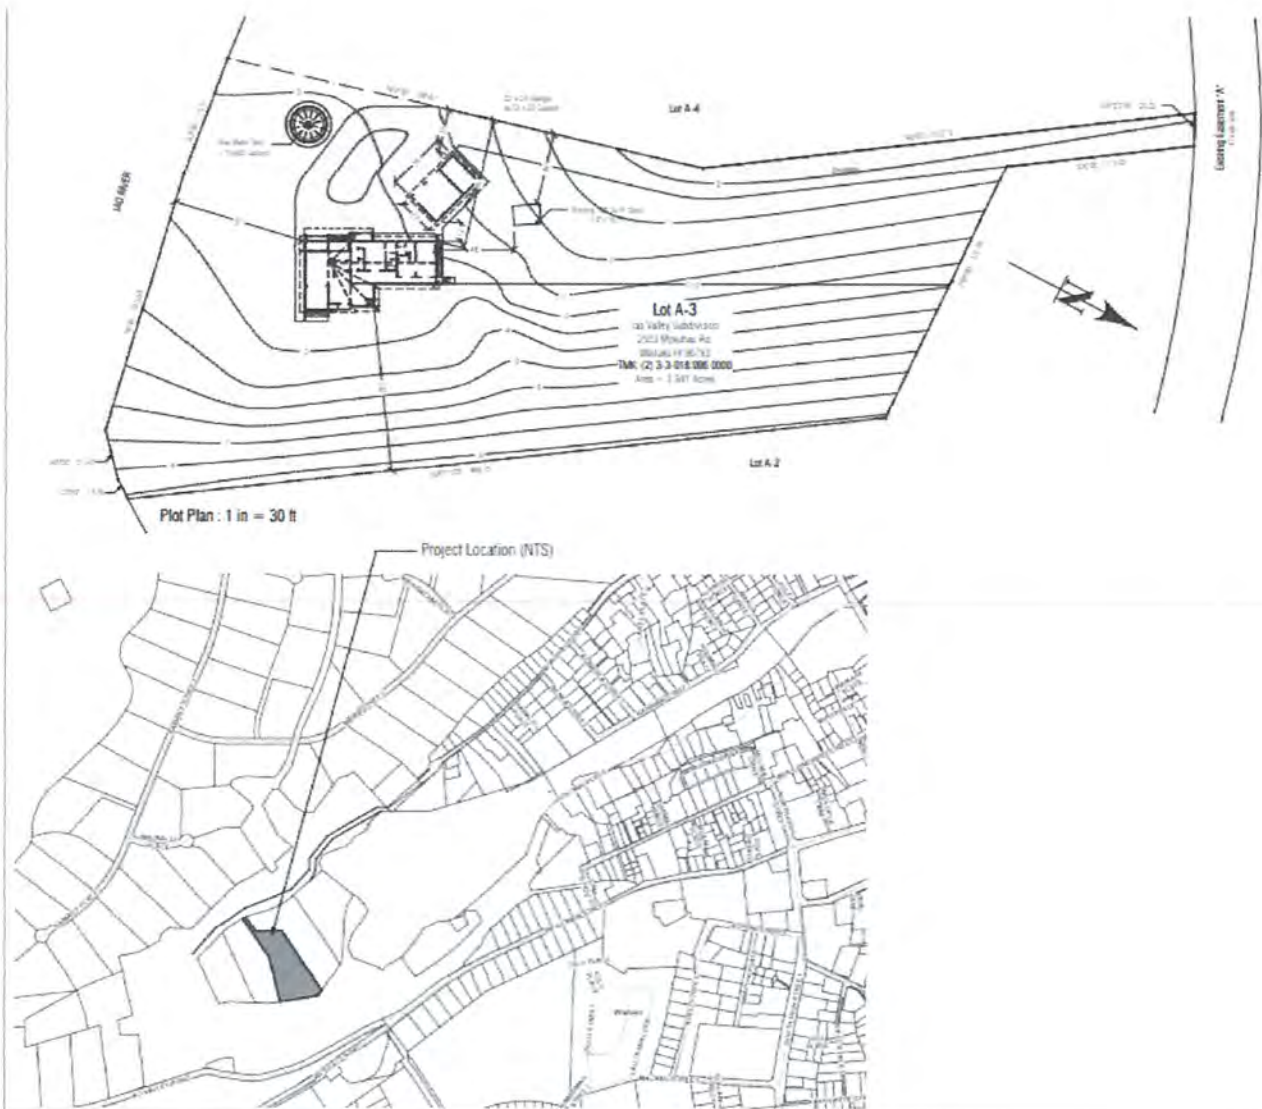

The pump to be used would be a Superior Pump, a portable submersible pump, powered by 12 V battery and consuming 12 ampere (approximately 144 watts). This pump can pump up to 480 gallons per hour for the height difference of approximately 20 feet between the river surface and the location of a booster pump that will further pump up the water to the top of the water tank.

The amount of the stream diversion is measured by observing the increase of water depth in the 14,900-gallon storage tank used. The tank is round and approximately 7 feet high (or 84 inches deep); thus, an increase of 1 inch in water depth represents approximately 177 gallons of water diverted.

### Item 11. Location of Proposed Water Use:

Location of proposed use is located at 2553 Mokuhan Road, Wailuku, HI 96793. It is designated as Lot A-3 of the Iao Valley Homestead Subdivision.

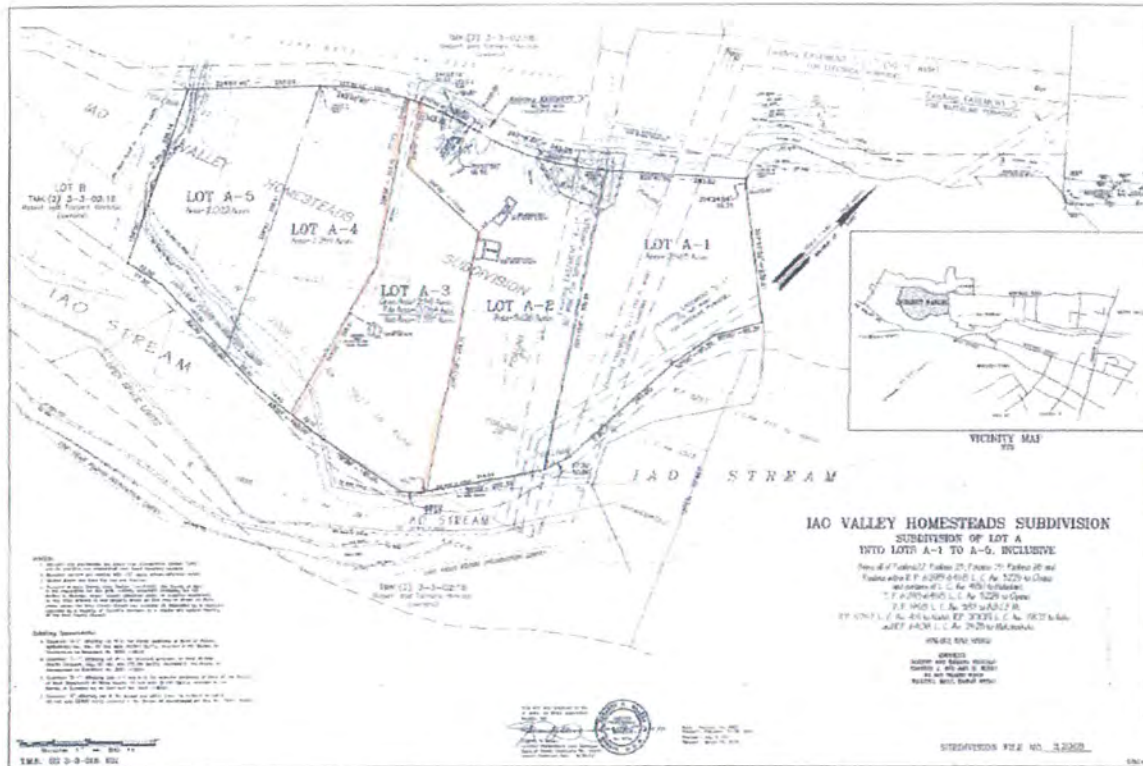

Lot A-3 Iao Valley Homestead Subdivision

2553 Mokuhan Road, Wailuku, HI 96793

TMK: (2) 3-3-018-006-0000

Area = 2.341 acres

**Item 18. Table 1: Land Use Consistency/Efficiency of Use**

***Applicants justification for requested quantity of use for item 9***

**Domestic Use;** While it is highly doubtful a 2 bed-room dwelling would consume its 600 gallons daily for domestic use, we are requesting the standard used by the Commission on Water Resource Management estimates for domestic dwellings per day to avoid having to request future revisions of this application. Also, since determining daily rainfall amounts is impossible, it makes logical sense to request the domestic daily estimate. The actual estimated total average diversion would be approximately 300 gallons per day for domestic used, or 109,500 gallons per year.

**NOTE:** Estimated irrigated acreages have taken into account driveways, easements , and dwelling footprints.

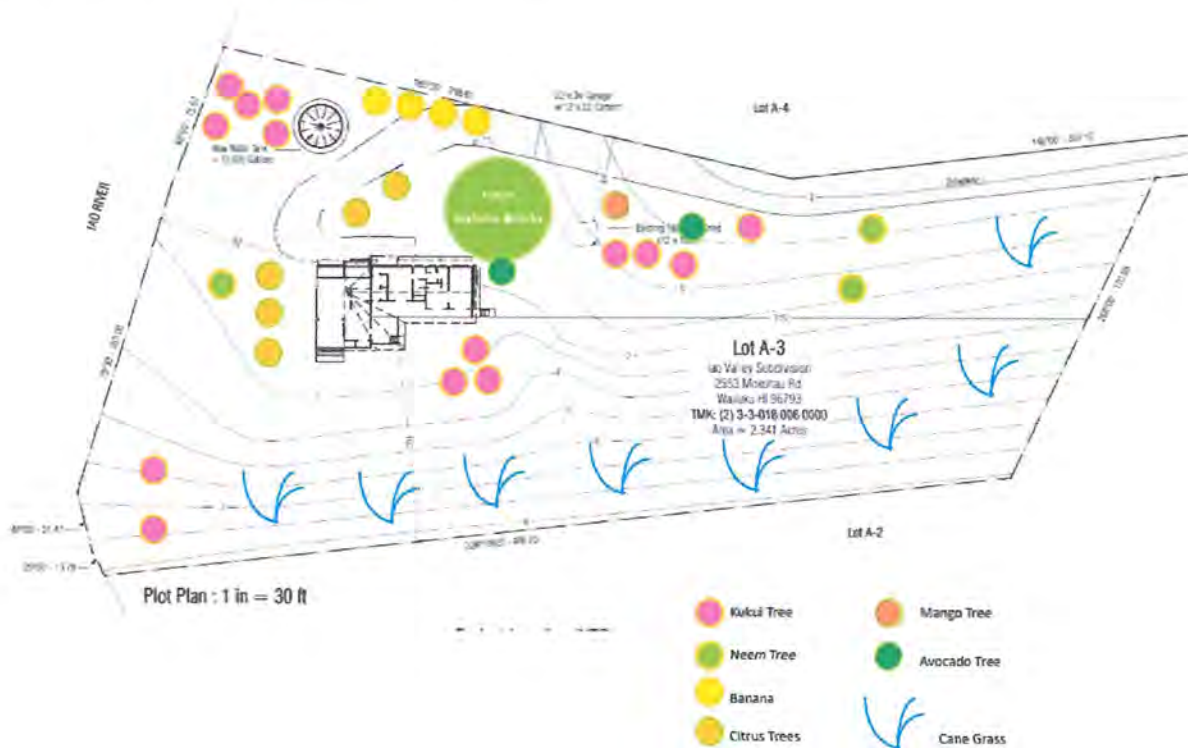

**AGRC/ACRON Use;**

Determining exact irrigation amounts is dependant upon rainfall amounts and frequency. Obviously, the more rainfall the more absorbtion of water in the soil. Again, it is highly unlikely that 2500 gallons per acre, per day would be necessary but, it is only prudent to request the Water Resource Management standard.

### Item 19. Table 2: Comments

This plan was submitted and approved by Ms. Shelly M. KanHai, Land Use Building Plans Technician, County of Maui, Department of Planning on September 20, 2021. We continue to plant according to the plan. Many plants thrive and we have already harvested food fruits. Please see some photos from our garden.

### Item 21 Public Interest; *Explain how the proposed new use(s) in your application are consistent with items [a] and [b] above.*

Our proposed uses are consistent with the Public Interest.

Since state and/or county agricultural properties require a certain amount of ag use to obtain building permits, water use for diversified agriculture on land zoned for agriculture is consistent with the public interest.” Also, since Maui County does not service the area with county water supply, the authorized and permitted dwellings require adequate water resources which is clearly in the public interest.

In re: Waiahole Ditch Combined Contested Case, 94 Hawai’i 97, 162, 9 P.3d409, 474 (2000) (“Waiahole I”). Further, HRS 174C-2(c) provides that the protection of traditional and

customary Hawaiian rights, agriculture and the maintenance of proper ecological balance and scenic beauty is “in the public interest.”

Our proposed uses is a Protected Public Trust Purpose.

Most of the water we use supports other existing public trust purposes such as: (1) the maintenance of waters in their natural state; (2) resource protection; (3) water for domestic and agricultural purposes. (3) scenic beauty (4) a positive carbon footprint, (5) a continued habitat for avian and other animal life. (6) the protection of traditional and customary Hawaiian rights.

Our proposed use supports beneficial Instream uses.

By using the water resource to irrigate plant life, and vegetation for food sources while maintaining existing plant life, the following items will be promoted. (1) the maintenance of fish and wildlife habitats as they currently exist; (2) outdoor recreational activities; (3) our maintenance of existing ecosystems of wetlands, and stream vegetation that border our property that runs through the middle of Iao stream;

Our proposed use is Reasonable and Beneficial.

*“Reasonable-beneficial use” is defined as “the use of water in such a quantity as is necessary for economic and efficient utilization, for a purpose, and in a manner which is both reasonable and consistent with the State and County land use plans and public interest.” HRS 174C-3.*

*\*\*\*In terms of economic and efficient utilization, we intend to use only the amount necessary to cultivate agricultural crops consistent with the public interest.*

has never been disputed.

It is bounded Maunaloa, by John Pelliter's land. Waikae, by Moomoo's & Pelliter's land. Makai, by Pelliter's land. Maalaea, by my land.

C. 3225. Opunui.

Maunaloa is the land of the Ct. It is one piece of Kalo land partly in the ili of Eleele and partly in the ili of Pohakupukupuku, Waialae, Maui.

The Ct. got this land from his ancestors in ancient times. They possessed it from the days of Kamehameha I. His title was never disputed up to his death in 1818. His heir is his widow Kaioke.

It is bounded Maunaloa, by Kaula's land. Waikae, by the Pali; Makai, by Waiheke's land. Maalaea, by the Creek of Waialae.

They are bounded on the north by the lo'is of Kekuauli, on the east by the lo'is of Makahanohano, on the south by the lo'is of Maaha, on the west by the watercourse. They were from Makahanohano, and Pakimea /Bartimeus?/. Respectfully

EXHIBITS

August 30, 2013  
Wailuku, Maui

INTRODUCTION:

The Na Wai Eha water issues cover four streams (Waihee, Waiehu, Iao, and Waikapu) in western Maui and their respective watersheds. The State Commission on Water Resource Management ("Commission") must address three (3) separate, but ultimately related, processes in these areas: 1) Appurtenant rights; 2) Surface Water Use Permit Applications ("SWUPAs"); and (3) Amendments to the Instream Flow Standards ("IFS") for the four streams in question.

The first proceeding and the issue addressed here is appurtenant rights.

Appurtenant rights are incidents of land ownership and "are rights to the use of water utilized by parcels of land at the time of the original conversion into fee simple lands." *Reppun v. Board of Water Supply*, 65 Haw. 531, 554-556 (1982). The rights are not personal. The measure of an appurtenant right is the amount of water utilized at the time of the Mahele, generally, but not exclusively, for taro cultivation. *McBryde v. Robinson*, 54 Haw. 174, 187-191 (1973). Once an appurtenant right is recognized and quantified, current use is not limited to its specific use at the time of the Mahele, but for uses on the parcel of land that are reasonable and beneficial. *Peck v. Bailey*, 8 Haw. 658, 665 (1867); HRS §174C-3.

In 1978, the Hawaii State Constitution was amended by adding Article XI, section 7 which expressly protected appurtenant rights:

The legislature shall provide for a water resources agency which, as provided by law, shall set overall water conservation, quality and use policies; define beneficial and reasonable uses; protect ground and surface water resources, watersheds and natural stream environments; establish criteria for water use priorities while assuring appurtenant

rights and existing correlative and riparian uses and establish procedures for regulating all uses of Hawaii's water resources. (emphasis added)

The Constitution's protection of appurtenant rights was reflected in the 1987 State Water Code, Hawaii Revised Statutes ("Haw. Rev. Stat.") §174C-63.

Appurtenant rights are preserved. Nothing in this part shall be construed to deny the exercise of an appurtenant right by the holder thereof at any time. A permit for water use based on an existing appurtenant right shall be issued upon application. Such permit shall be subject to sections 174C-26 and 174C-27 and 174C-58 to 174C-62.

Haw. Rev. Stat. §§174C-26 and 174C-27 require any person making use of water to file a declaration of water use and certification that the use is reasonable and beneficial. Haw. Rev. Stat. §§174C-58 to 174C-62 provide that water use permits are subject to revocation, limitations on transfer of permits, contested cases, fees, and restrictions when a water shortage is declared.

The Commission has the legal authority to determine appurtenant rights pursuant to Haw. Rev. Stat. §174C-5(14): "(The Commission) (s)hall determine appurtenant water rights, including quantification of the amount of water entitled to by that right, which determination shall be valid for purposes of this chapter."

Former Commissioner Lawrence Miike was appointed to evaluate the applications for appurtenant rights and make recommendations to the Commission.

#### THE COMMISSION'S PROCESS FOR DETERMINING APPURTENANT RIGHTS

On September 27, 2011, the Commission approved a three (3)-step process for determining appurtenant water rights in the Wailuku District (Waihee, Waiehu, Iao and Waikapu), Na Wai Eha Surface Water Management Areas (SWMAs), Maui. The areas include Tax Map Keys ("TMKs") from (2) 3-1-006:001 to (2) 3-8-087:093 and from (2) 4-1-001:017 to 4-8-001:002:

1. Notice to potential claimants of the Commission's intent to process and recognize claims for appurtenant rights as part of the surface water permitting process;
2. Determination of whether there is an appurtenant right associated with the parcel of land on which the water is being used or proposed to be used; and
3. Quantification of the amount of water accompanying the appurtenant right, which would be determined as part of the surface water use permitting process. (**Exhibit 1**)

#### A. Public Notice to Potential Claimants

On November 1 and November 8, 2011, the Commission published notice in the Maui News and the Honolulu Star Advertiser that appurtenant rights would be determined in the Na Wai Eha Surface Water Management Areas for the area with TMKs identified above. (**Exhibit 2**)

On August 29 and September 5, 2012, the Commission published notice in the Maui News and the Honolulu Star Advertiser, describing how written objections to the appurtenant rights claims should be filed. The deadline for filing objections was September 19, 2012. **(Exhibit 3)**

On March 4 and March 11, 2013 the Commission published notice in the Maui News and the Honolulu Star Advertiser addressing a subset of parcels with TMKs, (2) 3-2-002:009 to (2) 3-5-012:028, because a number of claimants submitted the relevant documentation after the August 29, 2012, public notice. The deadline for filing new written objections was March 25, 2013. **(Exhibit 4)**

Claimants were given the opportunity to submit responses in support of their application/rebuttal to the written objections.

**B. Criteria for the Provisional Determination of Appurtenant Rights**

On September 27, 2011, the Commission approved the process to be followed and identified, the information and documentation that the applicants needed to provide in support of their claims:

1. Proof of ownership or occupancy;
2. TMK map showing boundaries of all parcels for which an appurtenant right is being claimed;
3. TMK map showing current auwai(s)/ditches, loi, and source of water (i.e., stream or spring);
4. Documents demonstrating that the parcel was used as a residence or for cultivation at the time of the Mahele, including but not limited to:
  - a. Legible copy of the Land Commission Award (“LCA”) and number;
  - b. English translation of the LCA;
  - c. Royal Patent (“RP”) and number;
  - d. Name of the original awardee.
5. Kamaaina testimony and/or other Mahele documents;
6. Other title history in support of the claim;
7. Map showing sources of water at the time of the Mahele;
8. 1800's tax records;
9. Current or historic photos of archeological features of historic uses;
10. Schematic maps or diagrams showing water flow in, through, and/or out of the parcel;
11. Current title or deed to the parcel clarifying any terms or conditions regarding water;
12. List of future crops and the water flow requirements (total and net flow) to supplement information in the application for a SWUPA; and
13. Other relevant information that may assist the Commission in making its determination.

In this initial stage, the only issues to be addressed, provisionally, are whether the land parcel in question has an appurtenant right. Issues regarding quantification will be taken up later.

The provisional recognition that a parcel has an appurtenant right is subject to challenge by someone with standing to address the “title” claim. Standing to address issues in the water use permit or IFS proceeding will be addressed later.

Subsequently, it was decided that English language translations of the LCA (number 4b, above) would not be required. Provisional recognition is recommended for any parcel (TMK) that is derived from an LCA or RP that have descriptions associated with water use; for example, auwai (ditch), loi (taro patch), kalo (taro), hale (house), poalima (land cultivated for the chief), and so forth. Most of the time, references to auwai and poalima in the LCAs and RPs were boundary references in the survey of the parcel. Otherwise, there was insufficient documentation of water use. At other times, when auwai or poalima were only boundary references, there were native/foreign testimonies and native registers with explicit references to auwai, kalo, hale, or poalima, to document appurtenant rights. In the later quantification process, if an auwai within a LCA or RP is found to only convey water across the parcel, or if no further documentation is provided that water was being used on the parcel at the time of the Mahele, the provisional recognition may be withdrawn.

As of the April 30, 2009, deadline for applying for *existing-use* SWUPAs, the Commission received 125 applications. One hundred fifteen (115) applications were accepted. Ten (10) applications were incomplete and were not accepted. Sixty-nine (69) of the 115 accepted existing-use applications claimed an appurtenant right.

As of September 27, 2011, seventy-two (72) applications for “new” uses were filed. Fifty-one (51) of the 72 new use applications claimed an appurtenant right. New-use SWUPAs are identified by an “N” following the number. For example, SWUPA 2207 for an existing use; 2208N for a new use.

Most of these new-use appurtenant rights claims are for additional water for parcels in which existing-use applications have been filed.

Finally, because appurtenant rights are not diminished or extinguished by a failure to apply for or to receive a water-use permit (Haw. Rev. Stat. §174C-101(d)), claimants who have not applied for a SWUPA may do so at any time.

### C. Objections

The August 24, 2012, public notice to file objections identified three general categories:

1. Documentation demonstrating that the parcel was not being used as a residence or for cultivation at the time of the Mahele;
2. Documentation demonstrating that the appurtenant right has been reserved or extinguished; or
3. Evidence suggesting that there are materially false statements or representations in the application.

Written objections could be filed by any person or entity with a legal or material interest in the appurtenant right. Because appurtenant rights are incidents of land ownership, persons or entities with objections are limited to those a legal interest in the particular parcel in question. Objections to parcels in which a person or entity has no legal or material interest are denied.

However, to assist Commission staff in evaluating the appurtenant rights claims and to give claimants the opportunity to respond to issues that might arise in documentation of their claims, objections raised by all SWUPA applicants were accepted. Copies were provided to affected claimants. This information provided additional basis for deciding the claims.

If the objections proceed to the due process hearing, standing should be limited to persons or entities with a legal or material interest in the particular parcels in question. (The standing issue is addressed in more detail below.)

Objections based on categories one (1) and three (3) most commonly referred to lack of information in the application, or on occasion, false statements or representations, such as references to incorrect LCAs or RPs in relation to the TMK(s) owned by the claimant. Two examples will illustrate these categories of objections:

1. SWUPA #2353 for Hiolani Ranch LLC for TMKs (2)3-2-007:001 and 005:

The documentation in the application is unclear and illegible, which denies a full and fair opportunity to review the appurtenant rights claims. The documentation does not indicate, for example, whether many of the specified LCAs and apanas are within the applicant's TMK, and whether several of the LCAs were in cultivation at the time of the Mahele. Approval of this application would unjustifiably recognize priority claims of appurtenant rights to such water to the prejudice of the opposing rights and interests of the Community Groups and their members and supporters and OHA and its beneficiaries.

2. SWUPA #2207/2208N for Makani Olu Partners LLC for TMKs (2) 3-5-04:014 and 18:

The Community Groups and OHA have reviewed this application as carefully as possible in the limited time permitted, and are unable to confirm that some of the kuleana parcels (e.g., LCAs 1304 and 1307 (unknown apana) are actually within applicant's TMKs. In addition, the Community Groups and OHA found no documentation to confirm that LCAs 205, 3201:1, or 3802:6 (which may have been highlighted in error) were in cultivation at the time of the Mahele. These claims thus appear unsubstantiated.

Much of the lack of information illustrated by these two examples was already noted by Commission staff. Together with the specific information provided by objectors and responding claimants, the Commission staff conducted an evaluation and, with the Hearings Officer, concluded as follows:

1. Hiolani Ranch LLC's SWUPA 2353:

14 of 22 LCAs were verified, but water use was verified on only 2 of the 14 LCAs (see **Exhibit 7**, for Waihee River).

2. Makani Olu Partners LLC's SWUPAs 2207/2208N:

One TMK derived from a LCA for which water use was not verified; and for the other TMK, 23 of the 24 LCAs from which the TMK was derived were verified, and water use was verified on 16 of these 23 LCAs (see **Exhibit 7**, for Iao Stream).

The most frequent objections were based on category two (2) (i.e., that the appurtenant right had been reserved and thus extinguished). The largest number of objections was directed at Wailuku Country Estates, SWUPAs 2189 and 2190N, because of the large number of individual lot owners. The objections cited the Hawaii Supreme Court decision in *Reppun v. Board of Water Supply*, 65 Haw. 531, 552 (1982), which distinguished between appurtenant and riparian rights in deciding what happens to a water right reserved when the parcel is sold.

The Hawaii Supreme Court in *Reppun* concluded that riparian rights were based on an 1850s statute. By comparison, appurtenant rights were found in the common law (first noted in *Peck v. Bailey*, 8 Haw. 658 (1867)). The Court in *Reppun* concluded that if reservations were made on either riparian or appurtenant rights, the person transferring title could not sever the right from the land and retain it. Because riparian rights had a statutory basis, the right attached to the land and was transferred with the title. It could not be severed. With an appurtenant right, the Court concluded that the attempted reservation could extinguish the right. Thus the conveyed land no longer had the appurtenant right attached to it. The Court treated appurtenant rights as an incident of land ownership that parties could mutually agree to modify.

While the Hawaii Supreme Court has not addressed or revisited its 1982 *Reppun* decision on a seller's ability to extinguish appurtenant rights, more recent analysis of constitutional and historical material indicate that appurtenant rights do pass with land title are not severed, and may not be extinguished even if a land owner attempts to reserve water upon a sale of the property.

In *Reppun*, taro farmers observed decreased flow in the Waihee Stream in windward Oahu in 1975. They brought a lawsuit in 1976 to enjoin the Honolulu Board of Water Supply from diverting any of the stream's waters.

Two years later in 1978, Hawaii's Constitution was amended to expressly preserve all appurtenant rights, not just appurtenant use. The 1987 Water Code carried forward this protection.

Thus, the situation before the trial court in *Reppun* occurred in 1975-1976 – two years before the 1978 constitutional amendment. The Hawaii Supreme Court did not address the 1978 Constitutional amendment because the 1976 trial took place before the 1978 Constitutional Amendment. The Court addressed the law as it was understood at the time of the trial. In general, courts are reluctant to apply a new law retroactively to a trial court's decision that occurred before the new law came into effect.

Thus, given the 1978 constitutional amendment preserving appurtenant rights without exception and for all time (an even stronger basis than the 1987 State Water Code), the Commission may not now treat *post-1978* efforts to reserve water in the same manner as the *Reppun* decision did for pre-1978 cases. The 1978 Constitutional Amendment trumps ambiguous decisional law.

The Wailuku Country Estates deed reservation was dated August 21, 2002. The other reservations in this matter were all made after the year 2000, with three (3) exceptions: a) MMK Maui, LP, The King Kamehameha Golf Club (SWUPA 2186) on February 21, 1992; b)

Maui Tropical Plantation (SWUPA 2203); and c) Waikapu Properties (SWUPA 3471) on March 24, 1983. But even these three were all made *after 1978* and after the constitutional amendment forever preserving appurtenant rights.

Wailuku Water Company (WWC) raised two other objections to numerous SWUPAs:

A. Whether the Claim Properly Characterized the Source of Water

The claim contains an ambiguity or possibly a mischaracterization on the water source for the appurtenant right.

A claimant to an appurtenant right must establish that the surface water was taken directly from the stream, or from an auwai that was connected to a stream, at the time of the original conversion of the property fee simple title.

Claims based on surface water taken from a privately owned distribution system and not from a stream, especially a distribution system that did not exist at the time of the original fee simple conversion, does not establish an appurtenant right to surface water delivered through a privately owned distribution system.

According, factual and legal questions exist on whether the subject claim for appurtenant rights derives from a diversion that existed at the time of the original fee simple conversion from a stream or an auwai that was then connected to a stream.

In addition, factual and legal questions exist as to whether applicant is required to hold a stream diversion works permit and/or a stream channel alteration permit and whether there is a right to use a privately owned distribution system if the surface water is being diverted through that privately owned distribution system.

Paragraphs one and two. The source of the claimed right is a requirement under criteria 1 and 7 (see section II.B above), and were part of the evaluations of appurtenant rights claims.

Paragraphs three and four. There is a distinction between an appurtenant right and the exercise of that right. The Commission's determination of appurtenant rights is limited to whether or not water was being used on the parcel in question at the time of the Mahele, including the amount of water that accompanied that right. There is no requirement that water from the surface water source be delivered in the same delivery system in existence at the time of the Mahele.

How that right is or can be exercised is the responsibility of the right-holder. For example, water delivered through a private system is not a right to use the delivery system. Use of the delivery system is (generally) through an agreement (formal or informal) between the right-holder and the operator of the private delivery system. If the private system decides to discontinue delivery, that dispute does not bear on the parcel's water right per se.

However, the Commission does have the duty to determine whether or not a use is reasonable and beneficial. The delivery system has no right to retain the water for its own or other uses without Commission approval if it terminates delivery to the right-holder.

A right-holder may also investigate how and where the water had been delivered at the time of the Mahele (e.g., an auwai), and, if necessary, use its recognition of the appurtenant right to seek an easement across lands which the auwai had previously traversed. Easements are an incident of land ownership. Such an easement, if granted, could take the form of a pipe instead of reinstating the original auwai.

Paragraph five. Permits for stream diversion and channel alteration permits are not related to the determination of an appurtenant right. Rather, they are related to the manner in which water is being diverted from the surface water source. Owners or operators of existing stream diversion works must have registered their works with the Commission. Haw. Rev. Stat. §174C-92. Alteration or construction of a stream diversion works and alteration of a stream channel require permits from the Commission. Haw. Rev. Stat. §174C-93; Haw. Admin. Rules §13-169-50. In the case of a private delivery system, these requirements rest with the owner or operator of the delivery system, and not on its customers.

**B. Rights Claimed May be Subject to Public Utilities Commission Regulation**

The claim asserts a right to use surface water that reaches the claimant's property through a distribution system owned by Wailuku Water Company, LLC.

The ability of Wailuku Water Company, LLC to deliver water through that distribution system is the subject of a proceeding pending before the State of Hawaii Public Utilities Commission (PUC).

Any determination by the Commission on Water Resource Management on claims in which the surface water is delivered through use of the distribution system owned by Wailuku Water Company, LLC must include a condition that the delivery of the surface water is subject to applicable terms, conditions, rules, regulations, decisions, order, tariffs, and actions of the PUC (collectively, "PUC Regulation").

Accordingly, factual and legal questions exist on whether the subject claim for appurtenant rights may be subject to PUC Regulation.

The PUC has no authority to regulate appurtenant rights, nor are the determination of appurtenant rights subject to conditions that the PUC may impose on WWC's private delivery system. As in the previous objections filed by Wailuku Water Company, LLC, these objections are related to how the water is delivered.

**Exhibit 5 – SWUPAs by Hydrologic Unit.** Exhibit 5 lists the SWUPAs by hydrologic unit (Waihee, Waiehu, Iao, and Waikapu) and identifies which parties objected to each specific SWUPA.

## CONCLUSIONS

**Exhibit 6 – Schematic diagram.** Exhibit 6 is a simplified schematic diagram of the SWUPAs submitted by the April 30, 2009, deadline for *existing uses* in the Na Wai Eha hydrologic units of Waihee (6022), Waiehu (6023), Iao (6024) and Waikapu (6001). This exhibit is for illustrative purposes only. It does not contain the new-use SWUPAs. The diagram is not meant to represent the total subset of SWUPAs for both new and existing uses that applied for appurtenant rights. The purpose of the diagram is to illustrate the relationship between the four hydrologic units, the complexity of the diversion systems, and a picture of how applicants are distributed across the four hydrologic units.

**Exhibit 7 – Summary of Appurtenant Rights Claims.** Exhibit 7 summarizes the results of the analyses and conclusions on the applicants' claims for appurtenant rights. The SWUPAs are grouped by hydrologic units (Waihee, Waiehu, Iao, and Waikapu), because water available to meet the SWUPAs will depend on which the hydrologic unit is the water source. The amount available from each stream for off stream uses will be determined by the Commission at a later date and in the context of the matter on the remand from the Hawaii Supreme Court on its initial attempt to establish Interim Instream Flow Standards (IIFS) for the four streams. *In re `Iao*, 42 ELR 20174, No. SCAP 30603, (Haw. 08/15/2012).

Exhibit 7 presents the information for each SWUPA applying for recognition of an appurtenant right (in the following order):

1. SWUPA number(s).
2. Hydrologic unit.
3. Applicant's name.
4. Whether or not an appurtenant right is being claimed.
5. TMK(s).
6. LCAs/RPs.
7. Whether or not the LCA/RP has been verified.
8. Whether or not water use on that LCA/RP at the time of the Mahele has been verified.
9. Summary comments for verifying or not verifying water use on the LCA/RP.
10. Summary of objections based on categories 1) The parcel was not used as a residence or for cultivation at the time of the Mahele; 2) The Appurtenant right to water has been reserved or extinguished; and 3) There are materially false statements or representations in the claimant's application for Appurtenant rights.
11. Recommendation for Commission action.

Appurtenant rights have been determined on a parcel by parcel basis. For simplicity, parcels are identified by their Tax Map Key number. The exhibits list each parcel TMK-by-TMK.

1. Many SWUPAs, both for existing and new uses, list multiple TMKs. Some TMKs will be provisionally recognized as having appurtenant rights; others will not. The amount of water that is recognized as attached to an appurtenant right can only be used on that TMK and not on any of the other TMKs listed on the SWUPA.
2. Some TMKs refer to several LCAs/RPs. Some LCAs/RPs have verified water uses; others do not. Appurtenant rights can be exercised only on that portion of the TMK that

is derived from the LCA/RP for which water use has been verified. This may prove difficult to monitor and enforce, but this is the basis of the right.

3. An appurtenant right attaches to the whole LCA/RP, and not only to the particular part of the LCA/RP which was using water at the time of the Mahele. It is not relevant to the division of water among several TMKs with the same LCA/RP origins if one TMK includes the part of the LCA/RP that was using the water at the time of the Mahele. If different TMKs derived (in whole or in part) from the same LCA/RP, they all have a right to the water. The amount of water awarded based on use at the time of the Mahele will later be apportioned among the TMKs according to the amount of the LCA/RP that they proportionately represent. So if two TMKs are derived from the same LCA/RP, one making up 2/3s and the other, 1/3, the amount of water awarded should be divided accordingly. If numerous TMKs share the same LCA/RP origins, the utility of the amount of water accompanying each TMK could be limited.
4. There are four sources of water in the Waihee Ditch: Waihee, North Waiehu, Iao, and Waikapu streams. Each appurtenant right, as well as the amount of water awarded under the SWUPAs, must be correlated with its original source. However, each permitted diversion from the Ditch will consist of waters from the four comingled sources.

### STANDING

As previously noted, the public notice to file objections stated that written objections could be filed by any person or entity with a legal or material interest in an appurtenant right. All objections were accepted and included in the evaluation of the appurtenant rights claims. For example, WWC filed objections to nearly all SWUPAs. Earthjustice and OHA filed multiple objections.

As explained above, only provisional recognition is being recommended at this stage. Final determination will be made when the SWUPAs are addressed. At the later stage, the quantity of water accompanying each appurtenant right will be determined, followed by the quantity of water to be awarded under each SWUPA. The amount awarded under the permit may be less than the amount identified with the original the appurtenant right because of reasonable and beneficial use requirements, instream flow standards, or overall declining stream flows.

If the Commission adopts the Findings and Recommendations set forth here to grant provisional appurtenant rights for parcels with both LCA/RP and verified water uses, third parties with standing may request due process rights to object. However, no final decisions will be made by the Commission until the conclusion of the hearing. The only claims that will be resolved at this stage will be those appurtenant rights claims that have been deemed to have provided either no information or insufficient information. They will be denied without prejudice and may reapply at a later date with more information since the Appurtenant right is never lost. Individuals or entities challenging the provisional recognition of an appurtenant right may make their record and preserve their right to appeal once the Commission has made a final determination. Only after the quantity of water accompanying the appurtenant right is determined will the recognition become final.

Those with standing to object now are limited to persons or entities with a legal or material interest in the particular land at issue. With regard to claims to “reserved” water rights, the analysis outlined above indicates that any purported reservation of water right made after the 1978 constitutional amendments is null and void. All the documentation for the parcels in this matter indicates that every claim of reservation occurred after 1978.

Those whose appurtenant rights would be extinguished clearly have standing to challenge that decision. Objectors who lack a direct interest in the parcel have no standing in this phase.

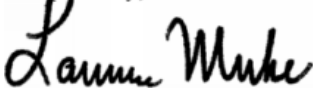

The quantification (second phase) will also present special considerations. The appurtenant rights claims process is distinguishable from the surface water use application process. Even though the Commission will later quantify water in the appurtenant rights process and the quantification of water awarded under a SWUPA in the same administrative process, the test for appurtenant rights has some different considerations.

Quantification of appurtenant rights depends first upon water use at the time of the Mahele. By contrast, a water use permit will depend on whether the proposed use is reasonable and beneficial and the amount of water available to all applicants who have met the reasonable and beneficial requirement. While only selective applicants for surface water use in the Na Wai Eha Surface Water Management Area will have standing to challenge specific appurtenant rights claims, all applicants will have standing in the SWUPA process itself to challenge competing uses because they have a legal or material interest in the amount of water awarded to competing applicants.

#### RECOMMENDATIONS

1. Approve the Hearing Officer's analyses and conclusions on applications for the recognition of appurtenant rights claims in the Na Wai Eha Surface Water Management Areas, Maui (Waihee, Waiehu, Iao, and Waikapu Streams) as set forth in these Findings, Recommendations and attached Exhibits. This analysis concludes that reservations of appurtenant water rights made after 1978 were void, and that the rights were not extinguished, but passed with the land.
2. Grant *provisional* recognition of appurtenant rights to the parcels (by TMKs) in Exhibit 7, identified by SWUPAs, whose LCAs/RPs and water use at the time of the Mahele have been verified according to the criteria approved by the Commission at its September 27, 2011 meeting.

Meeting: September 27, 2011  
Honolulu, Oahu

Process for Determining Appurtenant Rights  
Na Wai Eha Surface Water Management Area, Island of Maui

SUMMARY OF REQUEST:

The Chairperson recommends that the Commission on Water Resource Management ("Commission") adopt the proposed process (outlined in Exhibit 3) to determine appurtenant rights in the pending due process proceedings involving surface water for the Na Wai Eha (Maui) Surface Water Management Area.

LOCATION MAP:

The four Na Wai Eha streams (Waihee River, Waiehu, Iao, and Waikapu) are depicted on Exhibit 1 (attached).

LEGAL AUTHORITY

The Commission has the legal authority to determine appurtenant rights pursuant to HRS §174C-5(15) which provides that, in addition to its other powers and duties, the Commission "[s]hall determine appurtenant water rights, including quantification of the amount of water entitled to by that right, which determination shall be valid for purposes of this chapter." The Commission is also authorized to issue water use permits in regulated water management areas pursuant HRS chapter 174C, Part IV Regulation of Water Use. The obligation to respect appurtenant rights derives from the common law and from Haw. Const. article XI, section 7.

BACKGROUND:

On March 13, 2008, the Commission designated four Maui streams of Nā Wai `Ehā (Waihee River, Waiehu, Iao, and Waikapu) as a surface water management area. The effective date of designation was April 30, 2008, upon publication of the Public Notice.

Staff Submittal

September 27, 2011

Applications for existing use permits had to be filed within one year from the effective date of designation, or no later than April 30, 2009. New use applications may be filed at any time.

As of April 30, 2009, the Commission had received 125 applications for the Na Wai Eha *surface* water management area, as follows:

Existing Uses

- a. 115 applications were accepted to continue "existing" surface water uses (10 applications were incomplete and did not proceed);
- b. 69 of the 115 "existing use" applications claimed an appurtenant right.

Subsequently, the Commission received 72 applications for "new uses," as follows:

New Uses

- c. 51 of the 72 "new use" applications claimed an appurtenant right;
- d. 21 of the "new use" applications simply applied for a "new use."

Appurtenant rights are an incident of land ownership. Appurtenant water rights "are rights to the use of water utilized by parcels of land at the time of their original conversion into fee simple lands." *Reppun v. Board of Water Supply*, 65 Haw. 531, 554-556 (1982). The measure of an appurtenant right is the amount of water utilized at the time of the Mahele, generally, but not exclusively for taro cultivation. *McBride v. Robinson*, 54 Haw. 174, 187-191 (1973).

The Hawaii State Constitution, article XI, section 7, expressly protects appurtenant rights.

The legislature shall provide for a water resources agency which, as provided by law, shall set overall water conservation, quality and use policies; define beneficial and reasonable uses; protect ground and surface water resources, watersheds and natural stream environments; establish criteria for water use priorities while assuring appurtenant rights and existing correlative and riparian uses and establish procedures for regulating all uses of Hawaii's water resources. (emphasis added)

Haw. Cons. Art. XI, sec. 7.

In addition, the State Water Code specifically protects appurtenant rights.

Appurtenant rights are preserved. Nothing in this part shall be construed to deny the exercise of an appurtenant right by the holder thereof at any time. A permit for water use based on an existing appurtenant right shall be issued upon application. Such permit shall be subject to sections 174C-26 and 174C-27 and 174C-58 to 174C-62.

HRS §174C-63.

While the Water Code establishes a one-year deadline from the effective date of designation to file an application for a permit to continue an existing use, appurtenant rights are exempted from this filing deadline. HRS §174C-50(c). In addition, the Water Code provides that

[t]he appurtenant water rights of kuleana and taro lands, along with those traditional and customary rights assured in this section, shall not be diminished or extinguished by a failure to apply for or to receive a permit under this chapter.

HRS §174C-101(d).

On August 20, 2000, the Hawaii Supreme Court issued its decision in *In the Matter of the Water Use Permit Applications, Petitions for Interim Instream Flow Standard Amendments, and Petitions for Water Reservations for the Waiahole Ditch Combined Contested Case Hearing* (CWRM No. CCH-OA95-1), 94 Haw. 97, 9 P.3<sup>rd</sup> 409 (2000). The court recognized three public trust responsibilities regarding fresh water: 1) maintenance of waters in their natural state, 2) domestic water uses, and 3) the exercise of Native Hawaiian and traditional and customary rights.

The public trust protection of traditional and customary rights applies to traditional appurtenant rights first recognized 140 years ago in *Peck v. Bailey*, 8 Haw. 658, 661 (1867).

The Court extended the public trust responsibilities to a fourth purpose: reservations of water for the Department of Hawaiian Home Lands. *In the Matter of the Contested Case Hearing on Water Use, Well Construction, and Pump Installation Permit Applications Filed by Waiola O Molokai and Molokai Ranch, Limited* (CWRM No. CCH-MO96-1), 103 Haw. 401, 83 P.3d 664 (2004).

#### ISSUES AND ANALYSIS

The Commission has not yet adopted administrative rules to implement the appurtenant rights provisions in the Water Code. To date, the Commission has not taken any actions to determine appurtenant rights in a permit application.

However, to fully adjudicate applications for water use in the now designated water management area of Na Wai Eha, and to determine reasonable and beneficial offstream uses for which water use permits may be granted, the Commission must now set forth a process to determine appurtenant rights. The legal priority of appurtenant rights under the State Constitution and the Hawaii Water Code, the competition for the limited surface water resources in Na Wai Eha, and the obligation to protect and integrate instream and offstream uses under the Hawai'i Supreme Court's public trust jurisprudence now require that the Commission address the issue in a more comprehensive manner.

Staff Submittal

The Commission proposes to determine appurtenant rights for Na Wai Eha in a three (3)-step process:

1. Notice to potential claimants of the Commission's intent to process and recognize claims for appurtenant rights as part of the surface water use permitting process,
2. Determination of appurtenant rights, and
3. Quantification of appurtenant rights.

An outline of the proposed process is shown in Exhibit 3.

Step 1: Notice of Commission's Intent to Determine Appurtenant Rights in Na Wai Eha

The first step will be to notify all potential claimants of the Commission's intent to determine appurtenant rights. To date, the Commission has only noticed existing surface water users of their need to apply for surface water use permits to continue existing uses (Exhibit 2). The staff will compile a mailing list based on information from the registration program, pending existing and future surface water use applications, and LCA awards. Two notices will be mailed. Two notices will be published in two consecutive months in newspapers of general circulation in the state and on Maui. The notice will also be posted on the Commission's website and CWRM's monthly bulletin.

There appear to be kuleana parcels in Na Wai Eha currently using or planning to use Na Wai Eha surface waters under an appurtenant rights claim that have not yet filed for surface water use permit applications. In order to allocate limited surface water, and determine how much water is available for other offstream uses, a full accounting of all rights claims is necessary. Although appurtenant rights can not be diminished or extinguished by a failure to apply for a permit, the Commission encourages all potential appurtenant rights claimants to submit an application for a surface water use permit if they are currently using surface water (SWUPA-E Form) or plan to use surface water (SWUPA-N Form) so that multiple demands (including multiple appurtenant rights demands) are addressed with the best information.

The Commission will provide a 90-day filing deadline. Incorporating all appurtenant rights claims provides better protection for the parcel owners, better overall information, and greater certainty in the adjudication. Given changes in stream flows over time, it is possible that the sum of appurtenant rights claims may (by themselves) exceed available water supply during prolonged dry periods.

Step 2: Determination of Appurtenant Right

Following the Notice period, the Commission will proceed to determine whether a particular parcel of land has an appurtenant water right based on the evidence provided by each claimant. The question about how much water (i.e. quantity) may be used on the parcel will be decided separately and later in Step 3. Each claimant must submit a surface water use permit application (SWUPA-E for an existing use; a SWUPA-N for the future exercise of the appurtenant right).

Staff Submittal

September 27, 2011

While a title search is not required, the following information and documentation will assist the Commission in making a judgment about the appurtenant rights claim. The Applicant has the burden of a) coming forward with the documentation, and b) the initial burden of establishing his / her claim.

- Proof of ownership or occupancy;
- TMK map showing boundaries of all parcels for which an appurtenant right is being claimed;
- TMK map showing current auwai(s)/ditches, loi, and sources of water (i.e., stream or spring);
- Documents demonstrating that parcel was used as a residence or for cultivation at the time of the Mahele, including but not limited to:
  - Legible copy of the LCA (and number);
  - English translation of LCA;
  - Royal Patent (and number);
  - Name of original awardee.
- Kamaaina testimony and/or other Mahele documents;
- Other title history in support of claim;
- Map showing sources of water at the time of the Mahele;
- 1800's tax records;
- Current or historic photos of archaeological features or historic uses;
- Schematic maps or diagrams showing water flow in, through, and/or out of parcel;
- Current title or deed to parcel clarifying any terms or conditions regarding water
- List of future crops and the water flow requirements (total & net flow) to supplement information in application (SWUPA-E);
- Other relevant information that may assist the Commission in making its determination;

The Commission staff will review all applications and determine if the application provides the necessary information to be deemed complete for processing purposes. The Commission staff will notify applicants in writing of any deficiencies in their application. The Commission staff will also notify all applicants in writing whose applications are deemed to be complete for processing. All completed applications will be scanned and posted on the Commission's website. The Commission will publish a notice of completed applications in a newspaper of general circulation in the state and on Maui as required by law. The public notice will contain the name and address of the applicant, date of filing, source of water (stream name), hydrologic unit, and the parcel TMK. The notice will establish a deadline for written objections. The notice will be emailed to the Office of Hawaiian Affairs, Department of Hawaiian Home Lands, the Mayor's Office, and the Maui Department of Water Supply. All applicants shall be responsible for any costs associated with noticing their application.

As provided in the public notice, any interested person may file written objections. Those filing objections shall serve copies of the written objections on the applicant and the Commission.

Staff Submittal

September 27, 2011

Written objections should address and provide (as applicable): 1) documentation demonstrating that the parcel was not used as a residence or for cultivation at the time of the Mahele, 2) documentation demonstrating that the appurtenant right has been reserved or extinguished, and 3) evidence suggesting materially false statements or representations in application.

If no objections are filed, the Commission may proceed to act upon the application within 120 days of the application being deemed complete.

Upon the receipt of timely written objections, or if the staff has knowledge of issues which require further investigation or deliberation, the staff will submit to the Commission a recommendation that the appurtenant rights claim be resolved in the manner provided by law. This may include a contested case hearing. A contested case hearing is an independent process and not subject to the regular time limits.

### Step 3: Quantification of Appurtenant Right

The third step will be to decide how much water is required on the parcel, when it is needed, and what (if any) conditions should apply (generally "quantification"). This determination will be done as part of the surface water use permitting process. While the measure of an appurtenant right is generally the amount of water utilized on the parcel at the time of the Mahele, the Courts recognize that quantification will depend upon current conditions. For example, hydrologic data indicate a trend towards decreasing rainfall and declining stream flows. Hydrologically, there may be less water available now (and in the future) than there was at the time of the Mahele (1848).

Since the Mahele, circumstances have changed and evolved. The ecosystem may be different. There are competing public trust needs. Reasonable and beneficial use requirements apply. Therefore, water quantities (which often vary by time, need, availability, and competing demands) need to be integrated into the entire water system.

While this submittal is specific to Na Wai Eha contested case, the process outlined here may have some applicability in other situations. However, the legal process and requirements in *non-designated* areas are different and must be analyzed separately.

### CHAPTER 343 – ENVIRONMENTAL ASSESSMENT (EA)

HRS chapter 343 does not apply to adjudications in contested case due process proceedings.

PUBLIC NOTICE

To Announce the  
DESIGNATION OF THE SURFACE WATER HYDROLOGIC UNITS OF  
WAIHEE, WAIHEHU, IAO and WAIKAPU STREAMS (NA WAI EHA) AS  
SURFACE WATER MANAGEMENT AREAS  
By the  
COMMISSION ON WATER RESOURCE MANAGEMENT

The Commission on Water Resource Management (Commission), on March 13, 2008, designated the surface water hydrologic units of Na Wai Eha in the Wailuku District of Maui, as Surface Water Management Areas, in accordance with Part IV (Regulation of Water Use) of the State Water Code, Chapter 174C, Hawaii Revised Statutes, and Title 13, Chapter 171 (Designation and Regulation of Water Management Areas), Hawaii Administrative Rules.

The State Water Code authorizes the Commission to designate water management areas for surface water use regulation where the Commission, after research and investigations, and consultation with the appropriate county mayor, county council, and county water agency, and after public hearing and published notice, finds that serious disputes respecting the use of surface water resources are occurring.

The land areas affected by the designation are located in the Wailuku District of Maui and include Tax Map Keys from: (2) 3-1-006:001 to (2) 3-8-087:093 and from (2) 4-1-001:017 to (2) 4-8-001:002 (see map).

In any water management area, no person shall make any withdrawal, diversion, impoundment, or consumptive use of water without first obtaining a water use permit from the Commission. However, no water use permit shall be required for domestic consumption of water by individual users, users on any Maui Department of Water Supply water system, and for the use of rain catchment systems to gather water.

Applications for water use permits to continue existing uses of surface water must be made within a period of one year from the effective date of designation, that is, between April 30, 2008 (the date this Public Notice is published) and no later than April 30, 2009. The Commission shall send notices to existing users who had declared their uses and/or registered stream diversions with the Commission and to persons who have obtained stream diversion works permits from the Commission, to file for applications for water use permits to continue their existing uses.

Except for appurtenant rights, failure to apply within this period creates a presumption of abandonment of the use, and the user, if the user desires to revive the use, must apply for a permit as a proposed new use. A proposed new user of surface water must apply for a water use permit and will be subject to the availability of surface water as determined by existing surface water use permits and the interim instream flow standards for Na Wai Eha.

Application forms for surface water use permits are available at the Department of Land and Natural Resources, Commission on Water Resource Management, Kalanimoku Building, Room 227, 1151 Punchbowl Street, Honolulu, HI 96813, or may be downloaded from the Commission's website at: <http://hawaii.gov/dlnr/cwrn/forms.htm>. If you have any questions regarding surface water use permit applications, please call the Commission's Stream Protection and Management Branch at (808) 587-0234, or toll-free from Maui at 984-2400 extension 70234.

**PUBLIC NOTICE**

**To Announce  
APPURTENANT RIGHTS DETERMINATION IN  
NA WAI EHA SURFACE WATER MANAGEMENT AREAS  
(WAIHEE, WAIHEHU, IAO and WAIKAPU STREAMS)  
By the  
COMMISSION ON WATER RESOURCE MANAGEMENT**

On September 27, 2011, the Commission on Water Resource Management (Commission) approved a process for determining appurtenant water rights in the Na Wai Eha Surface Water Management Areas (SWMAs). The appurtenant rights determination will be done in a two-step process. The first step will be to determine whether there is an appurtenant water right associated with the parcel of land on which the water is being used or proposed to be used. The second step will be to quantify the amount of water associated with that parcel. The quantity determination will be done as part of the surface water use permitting process.

The Commission has the legal authority to determine appurtenant rights pursuant to HRS §174C-5(15) which provides that, in addition to its other powers and duties, the Commission "[s]hall determine appurtenant water rights, including quantification of the amount of water entitled to by that right, which determination shall be valid for purposes of this chapter."

The land areas affected by the appurtenant rights determination are located in the Wailuku District of Maui and include Tax Map Keys from: (2) 3-1-006:001 to (2) 3-8-087:093 and from (2) 4-1-001:017 to (2) 4-8-001:002 (see map).

Applications for appurtenant water rights in Na Wai Eha must be made within ninety (90) days from the date of the last publication of this notice. The deadline is February 6, 2012. The Commission shall send notices to all existing users who declared their surface water uses and/or registered stream diversions with the Commission; existing and new users who applied for Surface Water Use Permits with the Commission; and the principal contacts for TMKs indicating a Land Commission Award in Na Wai Eha.

Although appurtenant rights may not be diminished or extinguished by a failure to apply for a permit, the Commission hereby notifies all potential appurtenant rights claimants to submit an application for a surface water use permit if they are currently using surface water (FORM SWUPA-E) or plan to use surface water in the Na Wai Eha SWMA (FORM SWUPA-N).

Application forms for surface water use permits are available at the Department of Land and Natural Resources, Commission on Water Resource Management, Kalanimoku Building, Room 227, 1151 Punchbowl Street, Honolulu, HI 96813, or may be downloaded from the Commission's website at: <http://hawaii.gov/dlnr/cwrm/forms.htm>.

In addition to filing an application for surface water use permit, the following information and documentation will assist the Commission in making a judgment about the appurtenant rights claim:

- Proof of ownership or occupancy
- TMK map showing boundaries of all parcels for which an appurtenant right is being claimed
- TMK map showing current auwai(s)/ditches, loi, and sources of water (i.e., stream or spring)
- Documents demonstrating that parcel was used as a residence or for cultivation at the time of the Mahele, including but not limited to:
  - Copy of the LCA (and number) that is legible
  - Translation into English
  - Royal Patent (and number)
  - Name of original awardee
  - Kamaaina testimony and/or other Mahele documents
  - Other title history in support of claim
  - Map showing sources of water at the time of the Mahele

- 1800's tax record
- Current or historic photos of archaeological features or historic uses
- Schematic maps or diagrams
- Current title or deed clear of language demonstrating that the appurtenant right has been extinguished (i.e., no severance in deed)
- Such other relevant information that the Commission may request from time to time
- List of future crops and water flow requirements (total & net) to supplement SWUPA-E applications, as applicable.
- Other relevant information that may assist the Commission in making its determination, e.g. oral history.

If you have any questions regarding the process for claiming an appurtenant right, please call the Commission's Stream Protection and Management Branch at (808) 587-0234, or toll-free from Maui at 984-2400 extension 70234.

PUBLIC NOTICE

APPURTENANT RIGHTS CLAIMS PROCESS IN  
NA WAI EHA SURFACE WATER MANAGEMENT AREAS, MAUI  
(WAIHEE, WAIEHU, IAO and WAIKAPU STREAMS)

COMMISSION ON WATER RESOURCE MANAGEMENT

On September 27, 2011, the State Commission on Water Resource Management (Commission) approved a process for determining Appurtenant water rights in the Na Wai Eha Surface Water Management Areas (SWMAs) Maui. The Appurtenant rights determination is a three-step process. The first step was completed when the Commission notified potential claimants of its intent to process and recognize claims for Appurtenant rights as part of the surface water use permitting process.

The next two steps are: 1) to determine whether there is an Appurtenant water right associated with the parcel of land on which the water is being used or proposed to be used; and 2) to quantify the amount of water that may be used on that parcel as part of the surface water use permitting process.

The Commission has the legal authority to determine Appurtenant rights pursuant to Hawaii Revised Statutes §174-5(15) which provides that, in addition to its other powers and duties, the Commission "[s]hall determine appurtenant water rights, including quantification of the amount of water entitled to by that right..."

The land areas affected by the Appurtenant rights determination are located in the Wailuku District (Waihee, Waiehu, Iao and Waikapu), Na Wai Eha Surface Water Management Areas, Maui (see attached map). They include Tax Map Keys from (2) 3-1-006:001 to (2) 3-8-087:093 and from (2) 4-1-001:017 to (2) 4-8-001:002.

The Commission received the claims for Appurtenant rights in the Na Wai Eha Surface Water Management Areas listed below. Relevant documentation submitted by the applicants is available for viewing on the Commission's website at [http://hawaii.gov/dlnr/cwrm/sw\\_nawaieharights.htm](http://hawaii.gov/dlnr/cwrm/sw_nawaieharights.htm).

Written objections may be filed by any person or entity with a legal or material interest in the Appurtenant rights by submitting the form (Form APRT-OBJ) provided by the Commission at [http://hawaii.gov/dlnr/cwrm/sw\\_nawaieharights.htm](http://hawaii.gov/dlnr/cwrm/sw_nawaieharights.htm). Written objections must address and provide (as applicable): (1) documentation demonstrating that the parcel was not used as a residence or for cultivation at the time of the Mahele; (2) documentation demonstrating that the Appurtenant right has been reserved or extinguished; or (3) evidence suggesting there are materially false statements or representations in the application. Any persons filing objections must serve copies of the written objections on the applicant at the address provided and on the Commission at Commission on Water Resource Management, P.O. Box 621, Honolulu, HI 96809, **no later than September 19, 2012**. Applicants will be given the opportunity to submit a brief in support of their application / rebuttal to the written objections.

Upon the timely receipt of written objections, or if the staff has knowledge of issues which require further investigation or deliberation, the Commission will review the evidence and make a decision.

If no objection to an Appurtenant right claim is filed, the Commission may proceed to act upon the application within 120 days of the application being deemed complete.

For more information, please visit the Commission on Water Resource Management's website at [http://hawaii.gov/dlnr/cwrm/sw\\_nawaieharights.htm](http://hawaii.gov/dlnr/cwrm/sw_nawaieharights.htm), or call the Stream Protection and Management Branch at (808) 587-0234 or toll free from Maui at 984-2400, extension 70234.

APPURTENANT RIGHTS CLAIMS PROCESS IN  
NA WAI EHA SURFACE WATER MANAGEMENT AREAS, MAUI  
(WAIHEE, WAIHEHU, IAO and WAIKAPU STREAMS)

COMMISSION ON WATER RESOURCE MANAGEMENT

On September 27, 2011, the State Commission on Water Resource Management (Commission) approved a process for determining Appurtenant water rights in the Na Wai Eha Surface Water Management Areas (SWMAs) Maui. The Appurtenant rights determination is a three-step process. The first step was completed when the Commission notified potential claimants of its intent to process and recognize claims for Appurtenant rights as part of the surface water use permitting process.

The next two steps are: 1) to determine whether there is an Appurtenant water right associated with the parcel of land on which the water is being used or proposed to be used; and 2) to quantify the amount of water that may be used on that parcel as part of the surface water use permitting process.

The Commission has the legal authority to determine Appurtenant rights pursuant to Hawaii Revised Statutes §174-5(15) which provides that, in addition to its other powers and duties, the Commission "[s]hall determine appurtenant water rights, including quantification of the amount of water entitled to by that right..."

The land areas affected by the Appurtenant rights determination are located in the Wailuku District (Waihee, Waiehu, Iao and Waikapu), Na Wai Eha Surface Water Management Areas, Maui (see attached map). They include Tax Map Keys from (2) 3-2-002-009 to (2) 3-5-012-028.

The Commission received the claims for Appurtenant rights in the Na Wai Eha Surface Water Management Areas listed below. Relevant documentation submitted by the applicants is available for viewing on the Commission's website at [http://hawaii.gov/dlnr/cwrm/sw\\_nawaieharights.htm](http://hawaii.gov/dlnr/cwrm/sw_nawaieharights.htm).

Written objections may be filed by any person or entity with a legal or material interest in the Appurtenant rights by submitting the form (Form APRT-OBJ) provided by the Commission at [http://hawaii.gov/dlnr/cwrm/sw\\_nawaieharights.htm](http://hawaii.gov/dlnr/cwrm/sw_nawaieharights.htm). Written objections must address and provide (as applicable): (1) documentation demonstrating that the parcel was not used as a residence or for cultivation at the time of the Mahele; (2) documentation demonstrating that the Appurtenant right has been reserved or extinguished; or (3) evidence suggesting there are materially false statements or representations in the application. Any persons filing objections must serve copies of the written objections on the applicant at the address provided and on the Commission at Commission on Water Resource Management, P.O. Box 621, Honolulu, HI 96809, **no later than March 25, 2013**. Applicants will be given the opportunity to submit a brief in support of their application / rebuttal to the written objections.

Upon the timely receipt of written objections, or if the staff has knowledge of issues which require further investigation or deliberation, the Commission will review the evidence and make a decision.

If no objection to an Appurtenant right claim is filed, the Commission may proceed to act upon the application within 120 days of the application being deemed complete.

For more information, please visit the Commission on Water Resource Management's website at [http://hawaii.gov/dlnr/cwrm/sw\\_nawaieharights.htm](http://hawaii.gov/dlnr/cwrm/sw_nawaieharights.htm), or call the Stream Protection and Management Branch at (808) 587-0234 or toll free from Maui at 984-2400, extension 70234.

**EXHIBIT 7: Summary of Commission staff analyses and conclusions on applicants' claims for Appurtenant rights.**

**SWUPA No.:** For instances where an applicant has submitted a SWUPA for both existing and new use, and the TMKs are the same, the Appurtenant right claim has combined. Existing use SWUPAs are in **bold**.

**Appurtenant Rights Claim:** This column indicates where an appurtenant right was claimed at the time the SWUPA was submitted. **X** = Appurtenant rights checked off and claimed; **X\*** = Appurtenant rights not checked off, but claimed.

**Objection Categories:** Objections are indicated by the entity submitting the objection (see Abbreviations Used below), followed by the category of the claim. Those objections that did not indicate a specific category are described as "General". The three objection categories are as follows: **1** = The parcel was not used as a residence or for cultivation at the time of the Mahele; **2** = The Appurtenant right to water has been reserved or extinguished; **3** = There are materially false statements or representations in the claimant's application for Appurtenant rights.

**Abbreviations Used:** **Ap** = Apana; **EJ** = Earthjustice; **FR** = Foreign Register; **FT** = Foreign Testimony; **LCA** = Land Commission Award; **NT** = Native Testimony; **OHA** = Office of Hawaiian Affairs; **RP** = Royal Patent; **WCEIC** = Wailuku Conuntry Estates Irrigation Company; **WWC** = Wailuku Water Company;

QUITCLAIM DEED

KNOW ALL MEN BY THESE PRESENTS: /

That WAILUKU AGRIBUSINESS CO., INC., successor in interest to Wailuku Sugar Company, a Hawaii corporation, whose address is P. O. Box 1826, Papaikou, Hawaii 96781-1826, hereinafter called the "Grantor," for and in consideration of the sum of Ten Dollars (\$10.00) and other good and valuable consideration to Grantor paid by ROBERT HORCAJO and TAMARA HORCAJO, husband and wife, whose address is 80 Iao Valley Road, Wailuku, Maui, Hawaii 96793, hereinafter called the "Grantee," the receipt whereof is hereby acknowledged, does hereby give,

grant, convey, release and forever quitclaim unto the said Grantee, as Tenants by the Entirety, all of Grantor's right, title and interest in and to the real property described in Exhibit "A" attached hereto and by this reference incorporated herein (the "Property"); subject, however, to all encumbrances noted on said Exhibit "A".

EXCEPTING AND RESERVING, HOWEVER, unto Grantor, its successors and assigns, all water and water rights (surface and ground water) within or appurtenant to the Property; provided, however, that in the exercise of said rights, Grantor, its successors and assigns, shall not have the right to drill for water or otherwise disturb the surface of the land or any improvements thereon. Notwithstanding the above, Grantor does not reserve water rights, if any, to the fresh water spring on the Property or riparian water rights concerning the Property; provided, however, that Grantee's use of water from the fresh water spring, if any, and riparian water rights shall be limited to uses on the Property, and Grantee shall be prohibited from conveying or transporting all such water beyond the boundaries of the Property.

EXCEPTING AND RESERVING, FURTHER, unto Grantor, its successors and assigns forever, as appurtenant to the lands which are located adjacent or in the vicinity of the Property and which are now owned or used or hereafter acquired and used

by Grantor, its successors and assigns, in agricultural operation, the unrestricted right to engage in any type of farming operation, including, but not limited to, open burning, percolating, evaporating, fertilizing, milling, generating power, water diversion, plowing, grading, storing, hauling, spraying pesticides, irrigating, crop dusting, and all other activities incidental to the planting, farming, harvesting and processing of agricultural products and by-products, which operations may from time to time cause noxious emissions such as noise, smoke, dust, light, heat, vapor, odor, chemicals, vibration, and other nuisances to be discharged or emitted over and upon the Property. Grantor, its successors and assigns, shall not be responsible or liable to Grantee, its successors and assigns, for the consequences from the creation and discharge of such noxious emissions within the Federal and State environmental and agricultural laws and regulations, and Grantee, its successors and assigns, shall indemnify and hold Grantor, its successors and assigns, harmless from any liability or expense resulting from such claims arising from such nuisance whether made by Grantee or guests or other persons using the Property.

TO HAVE AND TO HOLD the same, together with all buildings and other improvements, rights, easements, privileges and appurtenances thereon or thereunto belonging or in anywise

appertaining or held and enjoyed therewith, unto the said Grantee, forever.

The terms "Grantor" and "Grantee", as and when used herein, or any pronouns used in place thereof, shall mean and include the masculine or feminine, or neuter, the singular or plural number, individuals or corporations, and their and each of their respective successors, heirs, personal representatives, and permitted assigns, according to the context hereof. If these presents shall be signed by two or more Grantors or by two or more Grantees, all covenants of such parties shall for all purposes be joint and several.

IN WITNESS WHEREOF, the Grantor and the Grantee have executed these presents on this 21<sup>th</sup> day of June, 2002.
