The Commission on Water Resource Management (CWRM) has no record of any wells or stream diversions for the subject parcel and are unsure what is the water source for the parcel.

The Hawaii District Land Office (HDLO) staff believes this request and the intended use of these State lands should be exempted from the preparation of an environmental assessment because the intended use is consistent with past use of the property. The property has been in use as a pasture for many decades. Such use has resulted in no known significant impacts, whether immediate or cumulative, to the natural, environmental and/or cultural resources in the area. As such, staff believes that the proposed use would involve negligible or no expansion or change in use of the subject area beyond that previously existing.

The successful Applicant will work with the Department of Land and Natural Resources, Division of Forestry and Wildlife in identifying any traditional trails or other means of access through the leased parcel.

#### **RECOMMENDATION:** That the Board:

- 1. Declare that, after considering the potential effects of the proposed disposition as provided by Chapter 343, HRS, and Chapter 11-200, HAR, this project will probably have minimal or no significant effect on the environment and is therefore exempt from the preparation of an environmental assessment.
- 2. Find the area to be an economic unit in terms of the intended use.
- 3. Find that the subject area is not suitable for hunting, nor will it become so during the term of the lease.
- 4. Authorize the sale of a lease at public auction covering the subject area for pasture purposes under the terms and conditions cited above, which are by this reference incorporated herein and further subject to the following:
  - a. The standard terms and conditions of the most current pasture use general lease form, as may be amended from time to time;
  - b. Within the first 2 years of the lease term, the land under lease shall be utilized for the purposes for which the lease is sold, all in accordance with a conservation plan approved by the Chairperson;
