Board of Land  
and Natural Resources  
Honolulu, Hawaii

**SUBJECT:** Request for Approval to Add Funding (\$566,250 Federal, \$93,750 Commercial Fisheries Special Fund) and Extend through FY17 the Project Agreement (Contract No. 60393, Amendment No. 5) between the Board of Land and Natural Resources (BLNR) and The Research Corporation of the University of Hawaii (RCUH) for the Division of Aquatic Resources (DAR) Research Project Titled "Hawaii Marine Recreational Fishing Survey."

Submitted herewith for your consideration is a request to amend and extend an existing research Project Agreement (Contract No. 60393) between the BLNR and RCUH. Amendment No. 5 to the Project Agreement will add \$660,000 and allow continuation of the Hawaii Marine Recreational Fishing Survey (HMRFS) project from July 1, 2016 through June 30, 2017. This Amendment provides \$566,250 in Federal funds: \$285,000 from the Department of Commerce, National Oceanic and Atmospheric Administration (NOAA) and \$281,250 from the Department of Interior, U.S. Fish and Wildlife Service (USFWS) Sport Fish Restoration Program. LNR 153 Commercial Fisheries Special Fund provides the required State match component of \$93,750. The BLNR/RCUH Project Agreement allows DAR to secure assistance from RCUH in order to perform project objectives and meet project goals in a timely manner.

The project includes fisheries research activities that support components relevant to all DAR programs, with the primary purpose to conduct surveys and compile recreational fishing catch and effort data. Unlike commercial fisheries where commercial catch reporting is mandatory, recreational fishing information is largely unaccountable. Furthermore, the impact of recreational fishing activities on Hawaii's fishery resources is substantial due to the widespread popularity, cultural significance, and dependence on a food source that fishing provides for the people of Hawaii. By conducting routine interviews with both shoreline and private boat fishers statewide, the project provides both State and Federal agencies with baseline data that is vital to responsibly managing Hawaii's fishery resources. By integrating catch data (e.g. species caught, numbers landed, length, weight and disposition of catch), effort data (e.g. hours fished, target species, gear types used and fisher demographics) and U.S. Census data, estimates of fishing pressure and total landings of Hawaii's various marine recreational fisheries are calculated and publicly posted via NOAA's website. The project collaborates with federal partners to optimize data collection and processing as well as increase the accuracy of the catch and effort estimates of Hawaii's recreational fisheries. Ultimately, this project fulfills a mandatory Federal requirement (per the Magnuson-Stevens Fishery Conservation and Management Act) for all U.S. coastal states to provide recreational catch and effort data to NOAA.

Approval to amend and extend the Project Agreement is being requested concurrently from the Governor, through the Department of Budget and Finance. Also, Amendment No. 5 to the Project Agreement is being prepared for submission to the Attorney General's Office for preliminary approval as to form. DAR is aware implementation of Amendment No. 5 is dependent upon receipt of all required approvals as well as the availability of funds, and that funding restrictions may occur at any time.

Chapter 343 - Compliance with Environmental Law:

Contract No. 60393 involves the use of state lands (submerged lands zoned in the Conservation District, Resource subzone) and use of state funds. The Department has determined that the actions undertaken by this ongoing project will have little or no significant effect on the environment and are exempt from the preparation of an environmental assessment. See Agency's Determination of Exemption (attached) from preparation of an environmental assessment.

RECOMMENDATION:

Based on the attached proposed declaration of exemption prepared by the department after consultation with and advice of those having jurisdiction and expertise for the proposed actions under the contract:

1. That the Board declare that the actions which are anticipated to be undertaken under this contract will have little or no significant effect on the environment and is therefore exempt from the preparation of an environmental assessment.
2. Upon the finding and adoption of the department's analysis by the Board, that the Board delegate and authorize the Chairperson to sign the declaration of exemption for purposes of recordkeeping requirements of Chapter 343, HRS, and Chapter 11-200, HAR.
3. That the Board authorize the Chairperson to negotiate and, subject to necessary approvals, amend and extend the Project Agreement (Contract No. 60393, Amendment No. 5) with The Research Corporation of the University of Hawaii for the Division of Aquatic Resources research project titled "Hawaii Marine Recreational Fishing Survey."

Respectfully submitted,

BRUCE S. ANDERSON  
Administrator

SUBJECT: Declaration of Exemption from the Preparation of an Environmental Assessment under the Authority of Chapter 343, HRS, and Chapter 11-200, HAR, for a Request for Approval to Add Funding (\$400,000 Federal, \$150,000 DLNR Trust Fund, \$20,000 General Fund) and Extend through FY17 the Project Agreement (Contract No. 58627, Amendment No. 7) between the Board of Land and Natural Resources (BLNR) and The Research Corporation of the University of Hawaii (RCUH) for the Division of Aquatic Resources (DAR) Research Project Titled "Statewide Marine Resources Assessment" (aka Maui/Oahu Marine Resources Assessment).

The following contract activities are found to be exempted from preparation of an environmental assessment under the authority of Chapter 343, Hawaii Revised Statutes (HRS) and Chapter 11-200, Hawaii Administrative Rules (HAR):

Project Title: Statewide Marine Resources Assessment (aka Maui/Oahu Marine Resources Assessment).

Request for Approval to Add Funding (\$400,000 Federal, \$150,000 DLNR Trust Fund, \$20,000 General Fund) and Extend through FY17 the Project Agreement (Contract No. 58627, Amendment No. 7) between the Board of Land and Natural Resources (BLNR) and The Research Corporation of the University of Hawaii (RCUH) for the Division of Aquatic Resources (DAR) Research Project Titled "Statewide Marine Resources Assessment" (aka Maui/Oahu Marine Resources Assessment).

Project Description: The focus of this research project is to assess and monitor the status and trends of fisheries resources for use in evaluating the effectiveness of managed areas and current fisheries regulations. In FY17, on-going monitoring will examine the effectiveness of regulations such as the lay gill-net ban in Maui and Oahu; management efforts at the Kahekili Herbivore Fisheries Management Area, in Kaanapali Maui; recent Maui parrotfish and goatfish size and bag-limit rules; and will establish new monitoring sites around the island of Kauai. The project will continue to

examine impacts and trends in fish stocks and associated habitats at marine reserves and open access control locations. Information from assessment efforts is important to document the immediate and possible long-term impacts from natural forces (storms, hurricanes), anthropogenic disturbances (runoff, pollution, vessel groundings, oil spills), and displacement of native marine species (by alien fish, invertebrates and algae).

Exemption Determination: After reviewing §11-200-8, HAR, including the criteria used to determine significance under §§11-200-1 and 5, HAR, DLNR has concluded that the activities under this contract would have no significant effect on the environment and that approval of the contract extension is categorically exempt from the requirement to prepare an environmental assessment based on the following analysis:

1. All activities associated with this contract have been evaluated as a single action. Since this research contract involves activities that are precedent to a later planned activity, i.e., the monitoring and collection of data and research, the categorical exemption determination here will treat all planned activities as a single action under §11-200-8, HAR.
2. The Exemption Class #5 or Scientific Research with no Serious or Major Environmental Disturbance Appears to Apply. §11-200-8(a)(5), HAR, exempts the class of actions that involve “basic data collection, research, experimental management, and resource evaluation activities which do not result in a serious or major disturbance to an environmental resource.” This exemption class has been interpreted to include the data collection, research and resource evaluation activities related to Maui, Oahu and Kauai marine resources, such as those being proposed.

The proposed activities here appear to fall squarely under the exemption class identified under §11-200-8(a)(5), HAR, and as described under the 2015 DLNR exemption list class #5, item #2, #14 and #15. As discussed below, no significant disturbance to any environmental resource is anticipated. Thus, so long as the below considerations are met, an exemption class should include the action now contemplated.

3. Cumulative Impacts of Actions in the Same Place and Impacts with Respect to the Potentially Particularly Sensitive Environment Will Not Be Significant. Even where a categorical exemption appears to include a proposed action, the action cannot be declared exempt if “the cumulative impact of planned successive actions in the same place, over time, is significant, or when an action that is normally insignificant in its impact on the environment may be significant in a particularly sensitive environment.” §11-200-8(b), HAR. To gauge whether a significant impact or effect is probable, an exempting agency must consider every phase of a proposed action, any expected primary and secondary consequences, the long-term and short-term effects of the action, the overall and cumulative effect of the action, and the sum effects of an action on the quality of the environment. §11-200-12, HAR.

Significant cumulative impacts are not anticipated as a result of this activity, and numerous safeguards further ensure that the potentially sensitive environment of the project area will not be significantly affected. All activities will be conducted in a manner that does not diminish

marine resources, qualities, and ecological integrity, or have any indirect, secondary, cultural, or cumulative effects.

Since no significant cumulative impacts or significant impacts with respect to any particularly sensitive aspect of the project area are anticipated, the categorical exemptions identified above should remain applicable.

4. Overall Impacts will Probably have No Significant Effect on the Environment. Any foreseeable impacts from the proposed activity will be further mitigated by general and specific conditions attached to the contract. Specifically, all research activities covered by this contract will be carried out with strict safeguards for the natural, historic, and cultural resources, other applicable law and agency policies and standard operating procedures.

Conclusion: Upon consideration of the contract to be approved by the Chairperson, being delegated signatory authority on behalf of the Board of Land and Natural Resources at its meeting of March 24, 2016, the potential effects of the above listed project as provided by Chapter 343, HRS, and Chapter 11-200, HAR, have been determined to be of no significant effect on the environment and exempt from the preparation of an environmental assessment.
