Honorable George R. Ariyoshi
Governor of Hawaii
State Capitol
Honolulu, Hawaii

Dear Governor Ariyoshi:

On behalf of the members of the Board and staff of the Department, I am pleased to present to you the Annual Report for Fiscal Year 1975-76.

In the past year, because of high unemployment in Hawaii, we have emphasized fiscal responsibility in our departmental operation and effectively carried out the public employment programs to provide the necessary services to the public.

The bulk of our capital improvement programs involved the State parks and water resources development. The department's major operating programs included the management of State lands, forest reserves, fish and wildlife resources, and the State Conservation District. The Mauna Kea Plan was submitted to the Board for hearing and adoption. The Endangered Species Act was reviewed for impact on our CIP and operating programs. Finally, the preservation of sites for natural areas, historical and archeological is continuing.

Respectfully submitted

BOARD OF LAND AND NATURAL RESOURCES

Annual Report Narrative

THE DIVISION OF LAND MANAGEMENT

FY 1975-1976

Land Management

The Division of Land Management is charged with the prudent management of the public lands of the State including the planning and administration of their acquisition, development, disposition and control in such a manner as to contribute to the greatest extent possible to the social, environmental and economic well being of the people of Hawaii.

Land Development Projects

A number of projects are now completed, under construction or will be under construction.

Kurtistown School site has been made into an eight lot subdivision and will be put on sale in the first half of fiscal year 1976-77.

The Kukuihaele School site subdivision will be ready for construction in fiscal year 1976-77.

Sand Island Parkway Increment II should also be put to bid in fiscal year 1976-77.

The Kealakehe Houselot Subdivision is now under construction and should be completed in fiscal 1976-77.

The Nawiliwili Industrial Lots subdivision is now in the design stage.

Land Acquisition

The Division continues to acquire the necessary lands needed for public purposes. This activity provides the lands not only for this department but also for other State agencies as well as for the several county governments.

During FY 1975-1976, the Division completed twenty-four (24) acquisitions at a total cost of $3,532,710.15.

Land Disposition

In fiscal year 1975-1976 Land Management Division completed 224 dispositions with sales in fee accounting for a one time revenue of $998,207.08 and new annual rentals totaling $962,341.67.

Gross revenues for FY 1975-1976 generated by the Division efforts totaled $6,581,707.00 in spite of the fact that there was a considerable drop in lease revenue from cane leases due to the drop in raw sugar prices.

PART II

DEPARTMENT OF LAND AND NATURAL RESOURCES

PROGRAM OBJECTIVES AND ACTIVITIES PERFORMED

Statement of objectives and description of activities performed under the sixteen (16) programs carried out by the Department of Land and Natural Resources.

LNR 101: PUBLIC LANDS MANAGEMENT

Statement of Program Objectives

To assure the effective and efficient use of public lands for both public and approved private purposes by developing lands according to established guides and policies, selling lands, leasing lands, issuing revocable permits and issuing executive orders; by inventorying, controlling and managing lands, and by assuring the availability of lands needed for State programs.

Description of Activities Performed

Acquisition of non-public lands for public purposes, disposition of lands for public and private uses, managing the lands through inspection, enforcement, planning and projecting future needs, by inventorying the lands and maintaining records of all State land transactions handled by the program. State lands total 1,584,715 acres of which 1,077,715 acres are managed by the county governments, various State agencies and Hawaiian Homes Commission with land management having minimum responsibility. Of the remaining 507,000 acres, 478,000 acres are encumbered by general leases, revocable permits, licenses, etc. The remaining unencumbered 29,000 acres includes roadways, streams, beach right of way, etc., as well as lands that can be encumbered for various purposes.

LNR 111: CONVEYANCES AND RECORDING

Statement of Program Objectives

To protect the public by providing for an accurate, timely and permanent system of registering and recording land title and related documents and maps.

Description of Activities Performed

The program's activities include the examination, registration and processing of all legal and land title documents and maps entitled to registration, issuance of Land Court Certificates of Title, certified copies of matters of record and UCC information requests.

LNR 141: WATER DEVELOPMENT AND IRRIGATION

Statement of Program Objectives

Develop and convey the water resources of the State for irrigation, municipal, industrial, hydropower, and other uses to provide the necessary water for planned growth, and to support the planned programs designed to achieve the State's economic environmental and social goals. To provide irrigation services at selected sites to increase agricultural productivity.

Description of Activities Performed

Activities conducted by the water development phase of the program include: (1) planning and programming of capital improvement projects, including the budgeting, scheduling, control and management of project activities; (2) conduct geologic and hydrologic investigations, and engineering and economic studies for the development and utilization of the State's water resources; (3) design and construct authorized and funded water projects; and (4) provide engineering services to other offices within the department.

Activities conducted under the irrigation service phase of the program include: (1) operating the irrigation system and controlling the flow of water to maximize the supply and minimize the waste, and to assure an adequate availability and equitable distribution of the water supply; (2) the maintenance of the irrigation system including tunnels, ditches, flumes, pipeline, siphons, dams, wells, reservoirs, valves, pumps, roadway, gates, bridges and other related water facilities; and (3) to meter, bill and collect water service charges from consumers.

LNR 153: COMMERCIAL FISHERY

Statement of Program Objectives

To assist commercial fishery enterprises by increasing productivity through improvements in production methods, product processing equipment usage and management methods, and developing new and improved aquaculture products by providing technical assistance and demonstration projects so as to enhance the quality and diversification of Hawaii's commercial fishery production.

Description of Activities Performed

Management oriented biological studies and analysis of commercial fishermen catch reports to gather information about commercially important fish and shellfish species to determine the effects of fishing on the resource so that appropriate laws and regulations may be adopted to manage and protect the resource. Patrols, inspection of fishing crafts and fishery product outlets, and investigation of alleged fishing violations are conducted to enforce the State's fishing laws and regulations. Aquacultural techniques are developed for commercial scale production of freshwater prawn, pilot ponds and facilities are managed for research and demonstration purposes and consultant and extension service (training of prospective aquaculturists) are provided. Commercial fish catch information and other assistance is provided to the Department of Planning and Economic Development for their commercial fishery loan programs.

LNR 172: FORESTRY PRODUCT DEVELOPMENT

Statement of Program Objectives

To produce, improve and assist in the production of forest products so as to provide raw forest materials on a sustained basis to manufacturers, thereby broadening the State's economic base.

Description of Activities Performed

Major activities are: (1) operation of the Central Tree Nursery; (2) tree planting project including silvicultural upkeep of stand; (3) plan and administer forest product management which includes resource inventory, review and update the availability of resources, sale plan and procedure; administering forest product sales; and (4) assist private landowners with technical forestry information.

LNR 401: FISH AND WILDLIFE

Statement of Program Objectives

To preserve and enhance endangered and other resident fish and wildlife species and their habitats through active protection, propagation and other management measures.

Description of Activities Performed

This program is concerned with the preservation and protection of native fish and wildlife, particularly endangered species, through such activties as research, surveys and inventories, recovery team planning, establishment of wildlife refuges and marine sanctuaries, captive propagation of nene (Hawaiian goose) and koloa (Hawaiian duck) for release into the wild, and protection through acquisition and/or cooperative agreements of critical habitat areas that are susceptible to destruction through acts of man and natural predators. Laws and regulations protecting endangered and other native species of fish and wildlife are promulgated and enforced. Evaluations are made on environmental impact statements, conservation district use applications, importation permit applications, and various proposed development projects that may affect fish and wildlife resources and their uses.

LNR 402: FORESTS AND OPEN SPACES

Statement of Program Objectives

To conserve and enhance open spaces, forests, arboreta, and wilderness areas and to provide watershed, aesthetic beauty, wildlife habitat, samples of undisturbed ecosystem, display of varieties of plant species and by controlling and suppressing fires, erosion, noxious plant species, and other damaging phenomena.

Description of Activities Performed

Major activities are: (1) enforcement of all laws and regulations regarding forest land; (2) noxious plant species and erosion control; (3) prevention and suppression of forest and range fires; (4) forest insect and disease surveillance and control; (5) review, recommend and enforce Conservation District Use Applications; (6) serve as primary coordinator for endangered species of forest plants; and (7) develoo, protect and maintain arboreta and unique ecosystem.

LNR 403: MINERAL RESOURCES

Statement of Program Objectives

To conserve and enhance, where appropriate, the State's supply of mineral resources.

Description of Activities Performed

Mineral producers state-wide are canvassed to provide and maintain a much-needed inventory on mineral resources and quarrying activities in the State. Special resources investigations are conducted to cope with growing community problems relating to mineral resources. Requests for information, technical data, and rock samples are handled routinely. These activities establish in government the technical data capability and competence on mineral resources matters pertinent to land use management, planning, zoning, and environmental matters.

LNR 404: WATER RESOURCES

Statement of Program Objectives

To preserve and enhance the state's upply of inland surface and underground waters. This includes the management and encouragement toward the wise utilization of all water resources in the State of Hawaii.

To provide a desirable physical environment for the people of Hawaii by fulfilling their needs for water and for energy from water power.

To protect and control the use of the water resources in the State.

Description of Activities Performed

To administer the activities relating to the management, conservation, protection, and utilization of water resources.

To coordinate water resources programs of State, Federal and County agencies and private entities. To manage and administer water resources data collection activities which include the collection of climatological data, such as rainfall, evaporation,

temperature, wind, solar radiation, etc.; streamflow data which includes the measurement of floodflows, low flows, and divertible streamflows; ground water data which includes measurements of water levels, water quality and pumpage; and the collection of water use data from all water sources divided into the various categories of use; such as domestic, agricultural, industrial, recreational, and other uses.

Under the water resources data collection activities are the cooperative agreement with the U. S. Geological Survey and the cooperative understanding with the National Weather Service and the Hawaiian Sugar Planters Association. Long-range comprehensive water resources planning activities include an assessment of Hawaii's supply-demand requirements for its limited water resources, inventory of water availability, and a proposed plan of guiding the demand for water toward areas of available water in an effort to provide for the optimum development of Hawaii's water resources.

LNR 801: HISTORICAL AND ARCHAEOLOGICAL

Statement of Program Objective

To enrich the leisure time of people of all ages by preserving and making available for appreciation and study, places of historical or archaeological significance.

Description of Activities Performed

Major activities for the budget period

a . Stabilization and/or restoration are anticipated for 21 projects.

b. Protection and maintenance of 10 existing and 2 proposed historic parks.

c. Interpretive programs are needed for all historic projects and some historic sites in other State Parks. During the budget period programs are anticipated for 23 projects.

d. Acquisition, using existing appropriations, involves 5 projects. More acquisition is expected, but needs and priorities cannot be determined until the Statewide Historic Preservation Plan is completed in FY 1977-78. The plan will also clarify stabilization and restoration needs and the needs for various facilities.

LNR 803: OTHER NATURAL FEATURES

Statement of Program Objectives

To enrich the leisure time of people of all ages by making available for appreciation and study other unique features of the State.

Description of Activities Performed

Currently the major activities are the maintenance of irreplaceable and significant geological, scenic, botanical and zoological features in 13 State Parks and the development of support facilities for the convenience of visitors in these parks and in future parks. In the future, emphasis will be placed on interpreting these features.

LNR 804: INLAND BASED ACTIVITIES

Statement of Program Objectives

To enrich the leisure time of people of all ages by providing opportunities and facilities for developing skills and participating in non-organized inland-based outdoor recreation activities such as hiking, camping, freshwater fishing, freshwater boating, etc.

Description of Activities Performed

Major activities performed in this program are planning, construction and maintenance of State parks, hiking trails, trail shelters, picnic grounds, vista points, hunting and fishing areas. Inland recreation information printed for public distribution. Also inventories, surveys and research conducted on freshwater game fishes, birds and mammals to set open seasons and establish regulations.

LNR 805: OTHER OCEAN BASED ACTIVITIES

Statement of Program Objectives

To enrich the leisure time of people of all ages by providing opportunities and facilities for developing skills and participating in non-organized ocean-based outdoor activities, such as surfing, saltwater fishing, ocean swimming, etc.

Description of Activities Performed

Activities of this program include the operation and maintenance of the fourteen existing State beach parks and coordinating the acquisition, planning and development of additional parks. Other activities include: surveys and inventories of fish species and populations for purposes of formulating management regulations and plans to enhance saltwater fishing opportunities; sport fishermen surveys to obtain estimates of catch and effort; fish-kill investigations; development and maintenance of artificial reefs; information and education activities; and enforcement of fishing laws and regulations.

LNR 809: GENERAL ADMINISTRATION FOR CULTURE AND RECREATION

Statement of Program Objectives

To enhance program effectiveness and efficiency by formulating overall policies and plans, directing operations and personnel and providing other administrative and housekeeping services.

Description of Activities Performed

1. Planning and analysis for State Parks, including data collection and user analysis. A statewide inventory and evaluation of historic and archaeological places is being completed and an inventory and evaluation of existing and potential state parks is underway. Surveys and analysis of user needs will be planned.

2. Two functions involving historical programs are performed directly for the Chairman of the Department. Duties for Federal matching grants available from the National Historic Preservation Act are performed for the Chairman by the State Historic Preservation Officer. The review, enforcement and salvage coordination of all historic and archaeological sites and remains within the State is also being performed for the Chairman, as established in Chapter 6, HRS.

LNR 810: PREVENTION OF NATURAL DISASTERS

Statement of Program Objectives

To minimize death, injury, disability and property damage and the economic losses resulting from floods by controlling destructive floodwaters and by removing or reducing the number and susceptibility of people and property subject to injury or damage.

Description of Activities Performed

The Flood Control Agency prepares, maintains and updates a general statewide flood control plan and coordinates all flood control activities in the State. Assist counties in qualifying for Federal projects and when County funds are inadequate, provides the necessary local assurance required under Federal laws authorizing the projects.

Program Objectives

To continuously enhance program effectiveness and efficiency by formulating policies, directing and coordinating operations and personnel, and providing other administrative and support services.

Activities Performed

This program is responsible for the general administration of the Department of Land and Natural Resources under the Board of Land and Natural Resources. The depa-tment's basic function is to manage, administer and exercise control over public lands, water resources, minerals and other related interests. The activities performed under this program include land use and resource planning, resource inventories, conservation district land use control, personnel and budget management, fiscal control, service to boards and commissions and liaison with other agencies. Through these activities the department assists in providing directions relating to its area of responsibility in formulating policies that are designed to achieve statewide objectives.
