By acquiring ownership of the Lot, Grantee hereby further covenants and agrees, for the benefit of Grantor and its successors and assigns, that some of the soils within the Community, including the land below the Lot may have expansive characteristics, which will require special consideration and attention. Specifically, Grantee understands that the Lot has been graded in connection with the construction of improvements on the Lot and that excavated or fill material has been overlaid on the Lot in order to create the "pad" or building area for the improvements to the Lot. Grantee understands that it should exercise reasonable care to ensure that the non-expansive fill underlying the "pad" or building area is not disturbed and that proper drainage away from the home is maintained. Grantee understands and agrees that Grantor bears no responsibility for the manner in which Grantee irrigates the Property and the effect of such irrigation on the soils condition. Grantee shall not change the existing drainage pattern on the Property, and any modifications made to the grading or drainage pattern on the Property, and any modifications made by Grantee to the grading or drainage contours/swales/flowlines of surfaces or subsurface drainage systems, if any, installed by Grantor are made by Grantee at Grantee's own risk. Because any changes made to the grade or contour of the Property may alter the drainage flow and cause damage to other improvements within the Community and/or Ho'opili, Grantee must be sure to properly landscape so water is directed away from the home. Grantee must (a) ensure that any construction or alteration of patios, walkways, wall or planters or installation of landscaping or other improvements on the Property shall not alter or block the current surface or subsurface drainage systems installed by Grantor and (b) install and maintain appropriate additional drainage and/or gutter systems to

accommodate such alterations and improvements. Regular inspection and maintenance must be performed to keep all drainage devices free from dirt, debris and obstructions.

Grantee acknowledges and agrees that, except for the express written limited warranty described herein as the Limited Warranty, a copy of which is included in Grantor's homeowner manual (the "**Homeowner's Manual**") a copy of which has been provided to Grantee, and any applicable termite warranty, Grantor is not making or offering any warranties, express or implied, with respect to the Property or the Community, including, without limitation, any warranties of merchantability, habitability, quality of construction, or fitness for a particular purpose. Grantor expressly disclaims any warranties other than the Limited Warranty, and any applicable termite warranty, including, without limitation, any express or implied warranties of merchantability, habitability, quality of construction, or fitness for a particular purpose with respect to the Property or the Community. Grantee acknowledges and agrees that: (i) Grantee has received, read and understands the terms of the Limited Warranty, any applicable termite warranty, and the Homeowner's Manual and is familiar with the coverage and exclusions contained therein, (ii) Grantee shall abide by all the applicable terms, covenants, conditions and provisions of the Limited Warranty, any applicable termite warranty, and Homeowner's Manual, and (iii) other than the Limited Warranty, and any applicable termite warranty, Grantor is making no other representations, promises, or warranties of any kind, including, without limitation, any express or implied warranties of merchantability, habitability, quality of construction, or fitness for a particular purpose with respect to the Property, or the Community. Grantor has established a customer care program (which will be administered by Grantor pursuant to the section in the Homeowner Manual commonly referred to as the "Customer Care Program" (the "**Customer Care Program**")). The Limited Warranty, any applicable termite warranty, and the Customer Care Program do not cover and Grantee acknowledges and agrees that the Limited Warranty, any applicable termite warranty, and the Customer Care Program do not cover (i) any consequential damages, including, but not limited to, damage to the Property or the Community that is caused by a warranted defect (as defined in the Limited Warranty) but is not itself a warranted defect and/or any claims for emotional distress, lost opportunity, profit or time (from Grantee's employment or otherwise), loss of use of the Property or any other improvements in the Community, the costs of shelter, transportation, food, moving, storage or other incidental expenses related to relocation during repairs of the Property, or (ii) any appliance, equipment, or other items which are "consumer products" for purposes of the Magnuson-Moss Warranty Act, 15 U.S.C. § 2301, et seq., or which are "consumer goods". The only warranties of such consumer products or goods are those which the manufacturer provides to the purchaser. Information as to such manufacturer's warranties will be provided to Grantee. Grantor does not assume any obligation to service or repair such consumer products or goods. They are included on an "AS IS" basis with Grantee assuming the entire cost of all necessary service, repair, or replacement in the event of defect in quality or performance. With respect to appliances or other consumer products included in Grantee's purchase of the Property hereby conveyed, this Deed operates as an assignment from Grantor to Grantee of all manufacturer's or dealer's warranties, if any, covering any such appliances or consumer products for the unexpired term thereof to the extent that Grantor has the right and power to make such an assignment. Grantee acknowledges and understands that Grantor is not stating that any such warranties exist, or that such an assignment will be effective, nor is Grantor adopting any such manufacturer's or dealer's warranties or acting as a co-warrantor, but Grantor is merely attempting to pass through to Grantee the benefits of such warranties, if any exist. Grantee specifically agrees that during the term of the limited warranty afforded by Grantor to Grantee under the terms of the Limited Warranty, and any applicable termite warranty, Grantee shall in each and all instances permit Grantor or Grantor's designated representative and/or the administrator of or insurer under the Limited Warranty and any applicable termite warranty, or their respective representative to repair any and all items classified by Grantor or the administrator as items covered by the Limited Warranty and any applicable termite warranty

or provide such alternate coverage in respect of warranted items available thereunder, and that Grantee shall have no further rights and Grantor no further obligation to Grantee in respect of such matters repaired or administered as provided therein.

Without limitation of any other provision herein contained, Grantor hereby grants Grantee a non-exclusive right of entry for access purposes over, upon and across the roadway lots (the "**Roadway Lots**") more specifically described in Exhibit A attached to this Deed owned by Grantor and others; provided, however, that such right of entry shall automatically terminate upon dedication of the Roadway Lots to any governmental authority. Grantee, for Grantee, its successors and assigns, and Grantee's family, lessees, tenants, servants, guests, invitees, licensees, employees, or other persons who may occupy or otherwise use the Property or improvements to the Property, acknowledges, covenants and agrees that (a) Grantor may continue to use the Roadway Lots for construction and sales activities within the Community, which may from time to time result in noise, vibration and other hazards and inconveniences to Grantee; (b) Grantee shall use the Roadway Lots with due care for public and private safety and shall comply with all laws, statutes, ordinances, and all rules and regulations of Grantor while occupying or using the Roadways Lots; (c) Grantee will not interfere with any work being performed, operations being carried out, or use being engaged in on the Roadways Lots by, on behalf of, or authorized by Grantor; (d) Grantor shall have no liability or obligation of any nature to Grantee, Grantee's family or household members, or Grantee's guests as a result of such persons' entry upon or use of the Roadway Lots or other property owned or controlled by Grantor; and (e) Grantee shall indemnify and hold harmless Grantor and its affiliates, members, managers, officers, directors, representatives, employees and agents, from and against any and all loss, damage, costs, expenses, including attorneys' fees, liability, demands, or causes of action resulting from nuisance, injury, harm or death to persons or property arising out of or in any way connected with the right of entry granted by Grantor pending dedication as described above, except any loss or damage caused by the gross negligence or willful misconduct of Grantor; and (f) Grantee fully realizes and assumes all risks of using the Roadway Lots prior to dedication of the Roadway Lots as described above, including, but not limited to, the dangers associated with construction equipment and workers on or near the Roadway Lots, the dangers resulting from the condition of the Roadway Lots, and the dangers of collision with other vehicles and pedestrians using the Roadway Lots.

Without limiting the generality of the foregoing, Grantee hereby specifically acknowledges and agrees to all of the reservations of rights and easements as set forth and described in the Master Declaration in favor of Grantor and Grantor's successors and assigns as "Declarant". By acceptance of this Deed, Grantee hereby consents and agrees to and with Grantor that in order to effectuate the rights and easements reserved to Grantor as aforesaid, Grantor and/or Grantor's assignee shall also have the right to prepare, execute, file, process and record necessary and appropriate papers and documents to establish and grant easements and to make necessary and appropriate amendments of the Community Documents, all without further notice to Grantee or Grantee's mortgagee. By such acceptance, Grantee also agrees to execute all documents and to do all other things as may be necessary or convenient to effect the same; and such acceptance shall be deemed an appointment of Grantor and/or Grantor's assignee, with full right of substitution, as the attorneys-in-fact of Grantee (and any mortgagee of Grantee) to execute such documents and to do such things on Grantee's (or Grantee's mortgagee's) behalf, which grant of such power, being coupled with an interest, is irrevocable for the term of Grantor's reserved rights and shall not be affected by the disability of Grantee.

Grantee, on behalf of Grantee and Grantee's successors and assigns, agrees that in the event Grantee or any other person with an interest in the Community or the Property shall have any claim or cause of action arising out of or in any way related to this Deed, except as specifically

provided above, the Master Declaration (and any and all rules, regulations and supplemental declarations promulgated pursuant to the foregoing, and the enforcement thereof), any aspect of the Property, the Community, Ho'opili, the development, construction, quality, sales, marketing, disclosures concerning, financing, delivery of the Property or Community or improvements thereto, the Limited Warranty, any applicable termite warranty, or each of those items identified in the Limited Warranty, all of which are incorporated herein by this reference, Grantor's Customer Care Program, and/or any other aspect of or activity with respect to Ho'opili, the Community or the Property (herein collectively the "**Covered Matters**"), against Grantor and/or any of the Covered Parties defined in the Master Declaration, such claim or cause of action (a "**Dispute**") whether such dispute is based on contract, tort, or statute, including, without limitation, any dispute described in the Master Declaration, whether such Dispute arises before or after the recording of this Deed, shall be resolved by binding arbitration in accordance with the Federal Arbitration Act (9 U.S.C. §1, et seq.) now in effect and as the same may from time to time be amended, to the exclusion of any different or inconsistent state or local law, ordinance, regulation, or judicial rule, by and pursuant to the rules of Dispute Prevention and Resolution, Inc. ("**DPR**") in effect at the time of the initiation of the arbitration (sometimes the "**Arbitration**" or "**arbitration**") after it shall have first been submitted to the process of "Negotiation" and "Mediation" defined in the Master Declaration, and not by a court of law; provided, however, any and all Disputes relating to Unresolved Warranty Issues (as the same is or may be defined in the Limited Warranty) shall be resolved by mediation and arbitration in the manner specified in the Limited Warranty, utilizing the mediator and arbitrator selected under the provisions of the Limited Warranty; provided further that in the event of an arbitration of a Dispute relating to an Unresolved Warranty Issue under the terms of the Limited Warranty, the provisions of the Master Declaration shall apply only to the extent not in conflict with the Limited Warranty. Any such claim or cause of action shall be subject to arbitration regardless of whether the claim is against Grantor or the "**Covered Parties**", defined in the Master Declaration, which include, without limitation, Grantor's real estate broker, agent or attorney, the architects, engineers, or other design consultants for the Community, the contractor, subcontractors, sub-subcontractors, material suppliers or other persons involved with the Community, their officers, directors, agents, servants, employees or representatives, the managing agent, if any, and their respective officers, directors, agents, servants, employees or representatives , provided that such person(s) agrees to or has agreed to arbitrate such disputes; or if such claim or cause of action is filed jointly and severally against other parties, it shall be subject to arbitration whether or not such other parties are willing to submit to arbitration as provided in this Deed. Any arbitration shall be conducted in the County in which the Property is located, and notwithstanding anything to the contrary contained in the Limited Warranty, any such Arbitration shall be conducted at the office of the arbitrator. No punitive damages shall be awarded in any claim against Grantor or any other Covered Parties; provided however in the event such limitation is determined to be invalid or unenforceable then such limitation shall be severed and this Deed shall be construed as if such limitation were omitted and shall not affect the other provisions hereof. The arbitrator may not award attorneys' fees or costs (including expert costs) to the prevailing party. Further, no award for damages attributable to emotional distress or a multiple of actual damages based upon any theory of law may be awarded by the arbitrator in any claim against Grantor or any of the other Covered Parties. The award rendered by the arbitrator shall be final.

Grantor and Grantee mutually agree that this instrument may be executed in counterparts, each of which shall be deemed an original, and said counterparts shall together constitute one and the same agreement, binding all of the parties hereto, notwithstanding all of the parties are not signatory to the original or the same counterparts. For all purposes, including, without limitation, recordation, filing and delivery of this instrument, duplicate unexecuted and unacknowledged pages of the counterparts may be discarded and the remaining pages assembled as one document.

Grantor and Grantee mutually agree that the terms "Grantor" and "Grantee" as used in this Deed, or any pronouns used in place of such terms shall include the masculine, feminine or neuter gender, the singular or plural number, individuals or corporations, and each of their respective heirs, devisees, personal representatives, members, managers, successors, successors in trust and assigns, according to the context of such terms. If this Deed is signed by two (2) or more persons or parties as Grantee, all covenants of Grantee contained in this Deed shall be deemed joint and several. Each and every acknowledgment, acceptance, appointment, agreement and covenant of Grantee contained in this Deed shall run with the Property hereby conveyed and constitute an equitable servitude and lien on the Property, and each person or party hereafter acquiring from Grantee any interest in the Property shall be deemed to make such acknowledgments, acceptances, appointments, agreements and covenants by and upon such acquisition.

9. Bylaws of Ho'opili Community Association dated January 31, 2017, as the same may be amended, supplemented and/or restated.

10. The obligation of Grantee, at Grantee's cost, to maintain, repair, clean, and keep free from debris the existing drainage pattern on the Lot, and any drainage facility and/or concrete facility, on the Lot, except for drainage facilities constructed for the benefit of and granted to the City and County of Honolulu, if any, which facilities shall be maintained by the City and County of Honolulu.

11. The obligation of Grantee, at Grantee's cost, to properly maintain the Lot to prevent excess water on the Lot and to avoid the risks of expansion or subsidence of soils, as set forth in the Master Declaration.

12. The obligation of Grantee, prior to obtaining a building permit for all buildings and improvements on the Lot, to comply with the design guidelines and to obtain written approval of the Design Review Committee, as set forth in the Master Declaration.

13. Reservation of right for Grantor to designate, grant and convey within the boundary of the Lot easements, including without limitation easements for landscaping, irrigation, maintenance, sewer, drainage, and electrical and utility purposes, without the joinder or consent of Grantee or Grantee's mortgagee, all as set forth in the Master Declaration.

14. The Lot will be subject to each and all of those easements shown on the plot plan for the Lot.

15. Easement L-4, for landscaping and irrigation purposes, as shown on the map attached to the Declaration of Subdivision (Ho'opili Phase 13 Subdivision) (DPP File No. 2020/SUB-223) recorded February 16, 2022, in the Bureau as Document No. A-80820189.Subdivision Declaration, together with the right reserved to Grantor to grant the same as provided in the Master Declaration without the joinder or consent of Grantee or Grantee's mortgagee.

16. Restriction of vehicular access rights as shown on the Subdivision Map attached to the Subdivision Declaration.

END OF EXHIBIT A

MAMAKA AT HO'OPILI
DISCLOSURE ADDENDUM

Mamaka at Ho'opili Community. The Community is a fee simple residential community consisting of 113 single family detached condominium units (the "**Units**"). The Community is located at Ewa Beach, Oahu, Hawaii.

Sales Contract. This Disclosure Addendum supplements Buyer's Sales Contract and is part of that legally binding agreement. Defined terms used in the Sales Contract are sometimes used in this Disclosure Addendum and have the same meanings here.

SCOPE OF DISCLOSURE. THIS DISCLOSURE ADDENDUM IS NOT EXHAUSTIVE IN SCOPE. BY ENTERING INTO A SALES CONTRACT BUYER IS ENTERING INTO A LEGALLY BINDING AGREEMENT. BUYER SHOULD READ AND FULLY UNDERSTAND THE CONTENTS OF EACH AGREEMENT MENTIONED IN THE SALES CONTRACT, INCLUDING, BUT NOT LIMITED TO, THOSE DOCUMENTS CONTAINED IN THE DOCUMENT PACKAGE FOR THE COMMUNITY AND HO'OPILI. THESE DOCUMENTS ARE CALLED THE "**COMMUNITY DOCUMENTS**" AND EACH DOCUMENT WILL AFFECT BUYER'S SUBSTANTIVE RIGHTS AND OBLIGATIONS. THIS DISCLOSURE ADDENDUM ATTEMPTS TO HIGHLIGHT SOME BUT NOT ALL OF THE IMPORTANT PROVISIONS OF THE COMMUNITY DOCUMENTS AND TO PROVIDE BUYER WITH OTHER INFORMATION. IN THE EVENT OF A CONFLICT BETWEEN THE COMMUNITY DOCUMENTS AND THIS DISCLOSURE ADDENDUM, THE COMMUNITY DOCUMENTS SHALL CONTROL. HOWEVER, WHERE THIS DISCLOSURE ADDENDUM PROVIDES FOR ADDITIONAL, DIFFERENT OR EXPANDED COVENANTS OR OBLIGATIONS WHICH ARE NOT CONTAINED IN THE COMMUNITY DOCUMENTS, THIS DISCLOSURE ADDENDUM SHALL CONTROL.

BUYER UNDERSTANDS AND ACKNOWLEDGES THAT THE MATTERS CONTAINED IN THIS DISCLOSURE ADDENDUM AND OTHERWISE IN THE SALES CONTRACT REPRESENT A GOOD FAITH EFFORT BY SELLER TO DISCLOSE CERTAIN INFORMATION THAT MAY AFFECT BUYER'S DECISION TO PURCHASE THE PROPERTY, BUT THAT THESE DISCLOSURES ARE NOT INTENDED TO BE AND SHOULD NOT BE REGARDED BY BUYER AS A COMPLETE DESCRIPTION OF ALL MATTERS THAT ARE OR MIGHT BE RELEVANT TO THE OWNERSHIP AND USE OF THE PROPERTY. BUYER ALSO UNDERSTANDS THAT THIS DISCLOSURE ADDENDUM CONTAINS A RELEASE PROVISION THAT HAS LEGAL CONSEQUENCES. Buyer understands and acknowledges that the activities in and around the Community affect the use and enjoyment of the Property and represents and warrants to Seller that Buyer, in Buyer's sole discretion, based on Buyer's independent investigation, has determined that the benefits of owning and enjoying the Property outweigh such detriments and risks. Buyer hereby covenants and agrees to assume all risks of impairment of the use and enjoyment of the Property, property damage and personal injury arising from activities affecting the Community. The terms of this Disclosure Addendum shall survive occupancy of the Property by Buyer and the recordation of the Deed and shall be binding upon and inure to the benefit of the parties and their respective heirs, personal representatives, successors and assigns.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Community Documents. Buyer is strongly encouraged to carefully read the Community Documents applicable to the property Buyer is purchasing (sometimes the "**Property**" and/or "**Unit**"). Without limitation, the Community Documents, as the same may be amended, modified and/or supplemented, include the: (1) Master Declaration; (2) Master Association Articles and Bylaws; (3) Community Articles of Incorporation; (4) Community Declaration; (5) Community Bylaws; (6) Condominium Map; (7) Community Rules; (8) Master Association Rules; (9) Ho'opili Design Guidelines, Ho'opili UDP, and any supplemental architectural standards contained in the Community Rules; (10) other materials adopted by the Master Association; (11) Sales Contract; (12) Deed; and (13) Public Report.

Master Planned Community. The Ho'opili Community is a master planned community encompassing several residential and mixed-use communities, condominiums, commercial and other related facilities. Ho'opili is planned to have many subdistrict areas. The Community is within the Ho'opili Community. By purchasing a Unit in the Community, Buyer agrees that Buyer, Buyer's family, lessees, tenants and guests will observe and obey the terms, covenants, conditions and provisions contained in the Master Declaration, the Master Association Articles and Bylaws, the Master Association Design Guidelines, the Master Association Community Rules, if any, as well as those terms, covenants, conditions and provisions set forth in the Community Documents.

Residential Community. All Units in the Community are designated for residential use as limited by the Community Declaration. Units are intended for use for dwelling purposes or long-term residential purposes, and shall not be used for any other purpose. Units 1 to 113, inclusive, and those Units' Private Yard Areas and the surrounding features, including

without limitation, the Community Access Drive, pedestrian paths, and related facilities are still in design. As a result, final placement of street signs. If any, electrical facilities and utility features serving more than your Unit, including without limitation, fire hydrants, transformers, utility boxes, and utility service lines (such as water, irrigation, sewer, electric, and communications) has yet to be determined.

Design Review. Seller and the County retain design review and approval authority over all developments in Ho'opili, pursuant to the Ho'opili UDP and Ho'opili Design Guidelines. In order to assist in the review of projects and interpretation of provisions of the Ho'opili UDP, Seller has established a Design Advisory Board ("**DAB**") comprised of professionals in various fields including but not limited to architecture, planning, landscape architecture and engineering to review project plans. As an accommodation, the authority of the DAB to administer and to enforce the Ho'opili UDP and the Ho'opili Design Guidelines with respect to proposed improvements by Owners within the Ho'opili Community has been delegated to the Ho'opili Design Review Committee established pursuant the Master Declaration ("**DRC**" or "**Design Review Committee**"), which may adopt such design guidelines and rules, as determined appropriate by the DRC, specific to any land use classification within Ho'opili and which may otherwise contain specific provisions that vary from one portion of Ho'opili to another depending upon the location, unique characteristics and intended use thereof.

Private Yard Area Plans. Owners will be provided with a "Private Yard Area Plan" prepared by Seller for your Unit and appurtenant Private Yard Area, which will show certain information specific to your Unit and Private Yard Area such as the approximate location of utilities and their connection points, some of the easements affecting your Private Yard Area, and building setbacks. The Unit and Private Yard Area shall be subject to all items shown or referred to on the Private Yard Area Plan. Both before and after your Unit is conveyed to you, Seller shall have the right to revise your Private Yard Area Plan to show new or revised utility, landscaping and drainage easements benefiting your Unit and Private Yard Area and/or other portions of the Community.

Date of Disclosure. Information in this Disclosure Addendum is current, to the best of Seller's knowledge, as of the date of publication set forth in the bottom left hand corner of this page. The information contained herein was collected from sources deemed to be reliable. While Seller has made every effort to obtain the most recent and accurate information, Buyer should rely solely on Buyer's own investigation and the investigation of Buyer's agents in making a decision to purchase. As information can change rapidly, Seller also encourages Buyer to contact the agencies and named individuals at the addresses and phone numbers listed for the most up-to-date information.

Closing. Completion dates are ALWAYS and ONLY estimates. Early occupancy is NOT ALLOWED. Early delivery of furniture is NOT ALLOWED.

Loans. Closing of any loan that will finance Buyer's purchase is Buyer's responsibility. Buyer's sales representative will assist, but each Buyer must stay in contact with Buyer's lender so that loan approval is obtained in accordance with the time frames provided in the Sales Contract and closing coincides with building completion. Buyer must be in a position to close Escrow on the transaction within five (5) days after Buyer's Unit is ready for occupancy. Delay interest charges may be charged if these deadlines are not met and/or Seller may cancel the Sales Contract.

Owner Occupancy and Pre-Sale Requirements. If Buyer is obtaining FHA financing, Buyer understands that in order for the Community to qualify for FHA financing, FHA requires a certain percentage of Units in the Community be owner-occupied or sold to persons who intend to occupy the units before Buyer's FHA loan can close. The required percentages may vary and Buyer should consult its lender to determine what percentages will apply to Buyer's loan. Buyer also understands that pursuant to FHA regulation, FHA approval of the Community for FHA loans does not occur until after the Unit is ready for occupancy. As a result, a delay in closing may occur based on the timing of FHA's review of Community Documents. Seller is not able to estimate the length of any delay that may occur and is not responsible for any delay attributable to FHA review.

Financing. The primary lender will be DHI Mortgage Company, Ltd. ("**DHI Mortgage**"). DHI Mortgage is an affiliate of Seller. Buyer should review the special disclosure regarding DHI Mortgage. Buyer should be aware that DHI Mortgage may offer special rates and incentives and if the loan is approved by DHI Mortgage and closed utilizing the settlement services of DHI Mortgage, Buyer shall be entitled to purchase a package of related settlement services at a discounted price. Also, because of its knowledge of the Community, DHI Mortgage should be able to approve Buyer's loan quickly. Buyer is not required to use the affiliated company as a condition of Buyer's purchase of the Property or Buyer's access to settlement services. Buyer may use any lender Buyer wishes. However, Seller has not reviewed or approved any lender's sales or marketing materials, and does not make any representations or warranties whatsoever regarding any matters set forth therein or Buyer's ability to obtain any financing under any particular terms. Buyer is strongly encouraged to make Buyer's own independent evaluation of the rates and loan programs offered by all lenders. Buyer understands that the

interest rate and loan fees for the loan applied for will be determined at the time of the Close of Escrow and may be higher or lower than on the date Buyer signed the Sales Contract to purchase Buyer's Unit. Buyer also acknowledges that the interest rate, loan fees estimates or quotations that may have been provided to Buyer are for illustrative purposes only and do not constitute a binding commitment. If Buyer has chosen to make a loan with a lender with whom Seller has arranged a loan commitment, the interest rate quoted may not be available unless the loan closes by a certain date. Seller is not responsible if, for any reason, including construction delays, Buyer's loan does not close on time to obtain a guaranteed rate.

Model Units.

Decorator Items. One or more but not all units to be offered for sale by Seller may be available for viewing by Buyer as a model unit (each, a "**Model Unit**"). These Model Units show generally the configuration of certain units that may be constructed by Seller in the Community, but are not necessarily identical in construction or configuration to units bearing the same model designation. Model Units may reflect typical or different exterior elevations, floor plans, workmanship and methods of construction, but may differ from the Unit Buyer purchases. The Unit will not be constructed to the precise specifications or design of any Model Unit. The exterior elevations, architectural treatments, floor plans and colors shown on any master plans on display at the office of Seller may be different than those displayed in the models. Room dimensions, square footages, cabinetry and countertops in kitchens, bathrooms and laundry areas, etc., plumbing and electrical fixtures, door types, door hardware, shower walls, appliances, tile and floor covering, bathroom accessories (faucets, shower heads, etc.), window types, and electrical and cable outlet placement may also vary from Model Units, the plans and/or the Unit. By way of example, Model Units may have window coverings, which are not included in the purchase price of the Unit. Seller's warranty and representation as to the similarity between the Unit being purchased and a Model Unit constructed by Seller is limited strictly to design and configuration (subject to variance in horizontal measurements permitted by construction tolerances (+/ - 2%) and not to similarity of appearance dependent upon particular decorations, furnishings or landscaping, or the location of wall switches, electrical outlets, thermostats, chases, plumbing and similar items (which may vary from the Model Unit). Buyer should note that Model Units Buyer may have seen have been professionally decorated and landscaped to present an attractive appearance to prospective buyers and will differ from the Unit Buyer is purchasing. Certain landscaping features may not be permitted under the Master Declaration and the Community Declaration. Variations in floor plan, paint schedules and landscaping are to be expected. Buyer should also be aware that model units in other communities developed by Seller may contain features or have been constructed in a manner different from Model Units in this Community.

Model Units may show the types of features that could be incorporated into the Units and may be helpful in providing purchasers with possible decorating ideas. Model Units may display certain fixtures and furnishings, which MAY be identified as "**Decorator Items**". These are not available to purchasers even upon payment of an additional charge. In certain instances, decorator items may not be marked. In Model Units, Decorator Items (such as furnishings, draperies, built-in shelves and lighting) and landscaping and hardscaping (such as entryways, patios and spas) are displayed only to suggest ideas to buyers. All such options and upgrades displayed in Model Units (including, decorator items, landscaping and hardscaping) are not included in the purchase price for the Unit unless expressly agreed to in writing by Seller. If Buyer has any questions regarding which items, such as light fixtures, may be purchased as an option or come with the Unit, they should consult a Sales Representative and make sure the item in question is addressed in writing in the Sales Contract.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Materials and Construction. Buyer should be aware that Units in the Community are constructed and fabricated with various materials and may include steel, wood framing, and ground face CMU components. Wood framing components include such items as stud framing in certain locations, blocking, posts plates, beams and roof trusses, among others. Seller may substitute materials, fixtures, equipment and appliances of substantially equal quality as (a) those specified in the plans and specifications for the Unit or models and/or (b) the standard items displayed in the Model Units. As a result, the Unit may be constructed completely of wood framing materials. Seller also reserves the right to change the location of electrical switches, water meters, plumbing chases outlets, windows and the like and the right to make any changes in construction (e.g. plan changes, field changes or otherwise) such as window types, door types and roofing materials which it deems appropriate, such as the substitution of wood and metal framing. Buyer understands that asphalt shingles are subject to cracking if walked on or struck by an object. In addition, Seller has the right to make changes in construction and as may be required from time to time by any lender, government agency, or as may be required by any law or regulation, by labor, material or utility availability, shortages, or stoppages or by any emergencies. Buyer accepts all of these changes. Buyer

understands and agrees that any available rebates in connection with or attributable to the installation by Seller of ENERGY STAR or other energy-efficient appliances or devices, including photo-voltaic, solar and EV devices, in the Unit or at the Community shall belong to Seller.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Construction Plans. Copies of construction plans for the Unit are available for inspection prior to closing. However, Buyer should be aware that the construction plans will not include field changes (changes made during construction, which occur regularly) or the changes described above. As a result, construction plans will not reflect the as-built condition of the Unit.

Dimensions and Square Footages Are Estimates Only. Unit dimensions and square footages are approximate. Buyer should be aware that any statement regarding the dimensions of rooms or square footages of Units or other areas are approximates only. Buyer may not rely upon any written brochures and other sales documents or oral statements by Seller or Seller's agents regarding the exact square footage of Buyer's Unit or Private Yard Area, if any.

Net Living/Floor Area Square Footage. The area of each Unit is generally expressed as "**net living/floor area**" square footage. This measurement represents the Community architect's best estimate of the interior square footage of the Unit as measured from interior of the Unit's perimeter walls, which are included in the Unit. The measurement is based upon the plans for construction of the Unit and different architects performing the same measurement may obtain a larger or smaller result after making allowances for exterior or perimeter wall thickness. Advertising materials may express square footage using other methods.

Homeowner's Manual/Orientation/Keys. At the time that Buyer signs the Sales Contract Buyer will receive the Homeowner's Manual. This manual should be brought to any meeting regarding option selections, the home orientation meeting and the walk through inspection of the Unit. Please take the time to review the manual completely. If there any questions, please ask Buyer's sales representative. Seller will schedule an appointment with Buyer to conduct a home orientation tour of the Unit prior to Closing. At that time, Seller will review the Homeowner's Manual and Seller's Limited Warranty. Buyer should advise Seller's warranty service representative of any concerns Buyer may have about the Unit during the course of the home orientation tour. By doing so, delays in closing may be avoided. Keys to Buyer's new Unit will be available after recording of the Deed. Buyer acknowledges that the Homeowner's Manual contains certain operating instructions and maintenance requirements and schedules for certain components of Buyer's Unit, including, without limitation, information relating to mold and mildew. Buyer must review and comply with any and all operating instructions, maintenance requirements and schedules for Buyer's Unit contained in such Homeowner's Manual.

Elevations and Plans. In order to provide diversity for the street scene, Seller's architect may have produced more than one exterior elevation for the front, side and rear of each floor plan. Due to this and due to certain variations caused by construction techniques and methods, Buyer may notice size, scale and proportional interior and exterior changes from the Model Unit or other Units in the Community from Buyer's particular elevation. These may include such items as ceiling heights, sloped ceilings, veneer treatments, window locations, window types and sizes, gutter and downspouts, interior and exterior wall and roof lines, color schemes and front porch dimensions. It is the responsibility of Buyer to inspect the Property and consider the differences in the elevations and other features of the Unit prior to Close of Escrow. Buyer acknowledges that Buyer has had the opportunity to review the floor plan and elevation and interior details for the unit Buyer is purchasing, all as shown on the building plans located in the sales office. Seller may alter, add or delete any unit plans for Units to be constructed in the development.

No Guarantee About Development. Seller does not make any representation that the Community will be developed as proposed. Seller reserves the right, at any time and without notice, to modify its development plan for the Community, including, but not limited to, changing the style, size, square footage, density, exterior elevations, color schemes, construction schedule and/or phasing of the units in the Community. The Model Units are displayed for illustrative purposes only and such display does not constitute a commitment to complete the development with the same or similar units. Seller may also sell all or any of the property in the development to another builder, who may change the unit plans, square footage, elevations, features, materials or designs of the Units.

Buyer Information and As-Built Conditions. In connection with Buyer's purchase of the Unit in the Community, Seller may provide Buyer with sales literature, which may include such information as elevations, Private Yard Areas, set-backs, unit orientation, driveway locations, parking stall locations, utility structures, rear yard dimensions, easements, etc. This information is intended for general informational purposes. There may be discrepancies between this information which is provided to Buyer and the actual as-built conditions. If there are such discrepancies, the as-built conditions will control.

Additional Information About the Unit.

1. **Front Doors**. Front doors will vary by elevation and floor plan. Standard doors included with the purchase of the Unit will vary in style to suit different exterior elevations. Certain door styles, such as those distressed or antiqued for decorative accent, may differ in appearance from the doors installed on the Model Units.

2. **Color Variations**.

Paint – Buyer should confirm with Buyer's representative what interior colors will be used in the Unit. Regarding white walls, it must be remembered that there are many shades of white. Buyer should not assume that the Unit will be painted any shade of white shown in the Model Units. Model interior paint colors are chosen by the model decorators and are not necessarily what will be used in the Unit. Buyer should also be aware that variations in wall texture and drywall taping may be more obvious where gloss, semi-gloss, and/or luster paint is used and may appear more obvious at different times of the day or night depending upon the lighting in the Unit. These variations are within industry standard.

Grout – The elements of nature including, but not limited to, sun, temperature, food, or chemical reactions may, combined with the aging process, change the color of the grout in varying degrees from time to time. In the event of repairs or replacement of tile or grout in the future, the replacement grout and/or tile probably will not match the color of the original tile or tile grout.

Countertops - Samples are small select cuts from a slab; they do not exhibit all the characteristics of a design and therefore are not fully representative of what will be installed in the Unit. Variations in the color, pattern, size, shape and shade are inherent and unique characteristics to be expected with this product. This does not affect the product performance in any manner. Certain colors are meant to be used as accents rather than a main work surface. Furthermore, the pattern may not always match at the seams and there may be variations between the deck surface and backsplash. These items are not covered by the warranties of Seller, the countertop fabricator, and the countertop manufacturer. Buyer's countertop will not be replaced due to these variations.

3. **Building Code Changes**. Periodically, governing agencies change building codes and other requirements; therefore, as construction proceeds, future units may be constructed differently in order to meet these updated or revised regulations. Seller reserves the right to change elevations, designs, or other elements of the construction process at its sole discretion.

4. **Fencing**. Buyer should be aware of what fencing or walls have been or will be constructed surrounding the Unit, if any, and the fences Buyer will be required to maintain. The exact size, type and location of Buyer's fence or wall will be determined at the time of fencing installation. Only one fence is permitted to be constructed on the common boundary line between the Private Yard Areas for adjacent Units, and any fence so installed shall be deemed a Party Wall and shall be subject to the provisions of the Master Declaration.

5. **Fire Prevention**. Smoke detectors will be installed in all Units in accordance with the requirements of the local agency. Smoke detectors must be maintained by Buyer and backup batteries replaced in accordance with manufacturer's recommendations provided to Buyer at the orientation. Emergency contact is not automatically made when a smoke alarm is sounding, so Buyer is charged with calling the proper emergency number upon the occurrence of an emergency.

6. **Insulation.** Where insulation is installed, Seller will install unfaced, friction-fit, flexible batt or blanket fiberglass insulation batt insulation with an R-value (or R-value equivalent) of R-19 is installed in the attic of the home during construction. Unfaced, friction fit, thermal batt insulation with an R-value (or R-value equivalent) of R-13 is installed in the exterior walls of living spaces and in any floor system between the garage and living spaces during the course of construction. No representations are or may be made that Buyers of homes in the Mamaka Community will save on household expenses as a result of any house insulation.

7. **Driveways, Carports and Garages.** The shape and dimensions of the driveways, carports and garages for the homes in the Community may not be standardized. Driveways may vary in size, shape, length and/or configuration from the model driveways or from what is shown on any depiction of the Community. Parking of vehicles in the carports and garages may also require Buyer to maneuver a vehicle back and forth in order to enter the carport and garage. There may be certain obstacles (i.e. pillars, Buyer's Home, fencing, improvements, etc.) that may make it difficult to maneuver a vehicle into and out of the driveway, carport and garage. Seller is not responsible for any damage to any Unit, including Buyer's Unit, landscaping, pillars, fencing or any other improvement incurred during Buyer's or Buyer's guests

or visitors maneuvering of the driveway and/or parking of a vehicle in the carports and garages. It may not be possible to maneuver certain types of vehicles on the driveways and into the carport and garage. Not all carports and garages will accommodate all vehicles (especially full size models and sport utility vehicles) due to the shape, size, configuration and location of the garages, garage doors, driveways, carports and Units. Also, parking of the maximum number of cars for which a carport and garage was designed may block or make it difficult to access any storage area (if any) in the carport and garage or to the Unit from the carport and garage. Buyer acknowledges that it is Buyer's responsibility to determine whether the size and location of car spaces in the carport and garage of the floor plan of the Unit selected by Buyer are adequate and appropriate to park Buyer's vehicles. Buyer should also confirm where street parking is permitted. Please realize that in many instances the Board of Directors may limit parking on private streets and on streets dedicated to the County, the County may restrict parking on public streets.

8. **Air Conditioning.** Buyer understands that even with screening, air conditioning units may emit noise at levels unacceptable to some people. Buyers agree to assume all risks of such noise emissions attributable to the air conditioning unit for Buyer's Unit and attributable to such air conditioning units servicing adjacent Units.

9. **Satellite Dishes.** Satellite dish antennas may be installed and used within the Community only to the extent permitted by law. Where possible, all components of the system should be concealed from public view and be placed on the side of the home not facing the adjacent road. The system should not be visible from the front yard of the Unit. In instances where Buyer can demonstrate that installation on the rear of the Unit would cause an unreasonable expense increase in the expense of installation, maintenance or use, or would prevent reception of acceptable signal quality, installation in a location where the satellite dish is visible from the Street may be appropriate. Submission of documents supporting Buyer's position that installation in a location visible from the Street is appropriate shall be made within thirty (30) days of installation. The Design Review Committee may retain its own expert to confirm that installation on the rear of the Unit causes an unreasonable expense increase in the expense of installation, maintenance or use, or would prevent reception of acceptable signal quality. Such installation shall only be made in accordance with the Declarations, Ho'opili Design Guidelines, and any other recorded restrictions and governmental requirements. However, if installed Seller has provided no assurances or guarantees that any satellite dish or other antenna installed within the Community will remain unobstructed. Buyer should understand that antennae signals may become obstructed by the installation and maintenance of Improvements within and outside of the Community including homes, walls, fences, trees and other landscaping.

10. **Building Code Changes**. Periodically, governing agencies change building codes and other requirements; therefore, as construction proceeds, future homes may be constructed differently in order to meet these updated or revised regulations. Seller reserves the right to change elevations, designs, or other elements of the construction process at its sole discretion. Seller is not responsible for providing any certification Buyer may request or require concerning compliance of construction of the home with Building Codes or other requirements.

11. **Electrical Outlets in Carport and Garage**. The building code requires that electrical outlets in carports and garages be provided with ground fault interrupter circuits. These circuits are not intended for use with any appliances, especially refrigerators, freezers and aquariums or on any service that an interruption of electrical power would cause a problem. Seller strongly recommends that Buyer not use carport and garage circuits for appliances or for any service (such as freezers) that would be harmed by an interruption of electrical power. Seller cannot be held responsible for the contents of appliances which are damaged because of the ground fault interrupter switches shutting off power, nor can Seller be held responsible for damage to the appliance units themselves. Please check with an electrician for further information.

12. **Fences and Walls**. Various Units may be sold with certain fences or walls constructed on the Property. Buyer should be aware of what fencing or walls are constructed surrounding Buyer's Unit. Buyer will be required to maintain the fencing. The exact size, type and location of Buyer's fence or wall will be determined at the time of fencing installation. Certain fences and walls have been constructed on the common Private Yard Area boundary between limited common elements appurtenant to adjacent Units as delineated on the Condominium Map, with portions of the fence or wall located in one or the other of the Private Yard Areas (such fences and walls are described in the Community Declaration as "**Party Wall(s)**"), the maintenance of which is shared by the Owners of the abutting Private Yard Areas. Only one fence is permitted to be constructed on the common boundary line between the Private Yard Areas for adjacent Units. Fences and walls installed by Seller may not be removed, altered or modified by any Owner except in accordance with the terms of the Community Declaration.

13. **EV Use**. The Unit's garage is "EV Ready" which means the Unit's garage is provided with a junction box and 6/3 electrical cable to the breaker panel for the future installation of an electrical car charging station that may be installed by Buyer. The Breaker panel will have reserved slots to accommodate an additional 110V or 220V for future expansion.

14. **PV Ready.** The Unit is "PV Ready" which means the Unit is "pre-plumbed" for installation of a photovoltaic system ("PV System") post-closing by Buyer in that photovoltaic conduit that has been installed from the electric panel into the Unit's attic. The PV System pre-plumbed improvements by Seller do not penetrate the insulation in the attic or the roof deck of the Home, but permit future re-routing by Buyer's PV System contractor. Seller provides no assurance that the installation of a PV System will be permitted under practices, regulations or rules adopted by Hawaiian Electric Company ("HECO"). Buyer should confirm with HECO whether such a system may be installed at the Home. Buyer acknowledges and agrees that Seller makes no warranty or representation concerning electrical expense savings a Buyer may obtain through the installation of a PV System, the efficiency of any solar energy (hot water and photovoltaic) system, which are dependent on a myriad of factors including, without limitation, system quality, weather, orientation to the sun, the size of the system capable of being installed on the roof of the Home, or the impact such installation may have on the integrity of the roof system. If Buyer elects to have such a system installed and the installation is authorized by HECO, Buyer must utilize a certified licensed photovoltaic system installer and should consult with the installer regarding the size and location of the PV System as the design of the roof or roof orientation may not be optimal for the PV System. Before commencing any installation effort, Buyer must secure any and all necessary permits required to allow such installation and obtain all necessary approvals of such activity in accordance with the Ho'opili Design Guidelines. Buyer assumes all risk and liability in connection with the construction, installation, maintenance, and repair of the solar energy devices on the Unit, including the roof, and such risk and liability assumed by Buyer shall include without limitation the risk that such construction, installation, maintenance and repair may affect or void any existing contractor's guarantee or manufacturer's warranty on the roof, roofing membrane, or roofing material. Further, by undertaking the construction, installation, maintenance and repair of a solar energy device on the Unit, Buyer shall release, indemnify, and hold harmless Seller, Community Association, Board, and the Community DRC from and against all claims, liability, and expense arising in connection with such construction, installation, maintenance, and repair. The Board or the Community DRC may require Buyer to execute and deliver an indemnification and release in accordance with the Community Declaration. Buyer should review the Ho'opili Design Guidelines closely and should provide a copy of the Ho'opili Design Guidelines to Buyer's photovoltaic contractor before installation of such a system.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

15. **Dryer Vent System**. The dryer vent system in the Units has been installed pursuant to the design instructions of the manufacturer of the dryer being offered by Seller. If Buyer does not select the dryer being offered by Seller at the time of purchase (or installs a new dryer in the future), Buyer understands that the design of the dryer vent system may not conform to the dryer being installed by Buyer as each dryer manufacture has its own dryer vent system requirement. Prior to the installation of a dryer by Buyer, Buyer should review the manufacturer's dryer vent system requirements to verify that the dryer vent system installed in the Unit conforms to the manufacturer's requirements.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

16. **Plumbing, Electrical and Air Conditioning Lines**. Buyers should use caution and care when hanging items on walls by, among other things, using a stud finder or other device or consulting with a contractor or other professional, to ensure studs are used so as not to puncture plumbing, electrical or air conditioner lines within the walls of the Unit.

Seller's Limited Warranty.

Generally. Seller will provide purchasers with Seller's Limited Warranty (herein, sometimes, the "**Limited Warranty**") covering the Unit at Closing. Seller makes no warranty or guarantee, express or implied, except as specifically set forth in the Limited Warranty. A copy of Seller's Limited Warranty is in the Homeowner's Manual Buyer receives at the time of purchase. The Limited Warranty describes Seller's repair and warranty obligations in respect of the Unit, the procedures for making a warranty claim and the procedures for the settlement of disputes.

Exclusions. In order for the Limited Warranty to be effective, common sense maintenance of the Unit is required. Buyer should review the Limited Warranty to familiarize Buyer with specific exclusions. By way of example, the Limited Warranty does not cover non-structural cracking of the Unit's drywall, carport and garage slab, foundation slab or non-structural variations from level in the carport and garage slabs, foundation slabs or upper story sub-floors. Standard construction techniques and the applicable design for the Unit's foundation slab or upper level sub floors may result in a degree of non-structural cracking or "spider" cracking in the slab and may result in modest variations from level in the slab and sub-floor. Although certain carport and garage foundation slabs will contain contraction joints to minimize this result, such cracking is inherent in concrete construction. Variations from level

on second floor sub-floors are filled and patched with an adhesive floor leveling agent. As a result, hard surface floor coverings (wood, marble and ceramic tile), where permitted, may also crack or reflect the effect of foundation slab cracking. There is no warranty coverage for these circumstances. To minimize this risk, Seller recommends that hard surface floors, where permitted, be installed over a "slip sheet" available through Buyer's flooring supplier. In conformance with home construction standards, the rafter tails will not be caulked unless there is a gap between the rafter tails and the fascia in excess of 1/8 of an inch. By signing the Sales Contract and this Disclosure Addendum, Buyer accepts these conditions with respect to the Unit. Buyer should review the "Preconstruction Conference Confirmation Form" prior to the Unit orientation tour to become familiar with Seller's standards and specifications.

Common Element Utility Features. Certain utility features serving more than your Unit, including without limitation, fire hydrants, transformers, utility boxes, and utility service lines (such as water, irrigation, sewer, electric, and communications) may exist in your Private Yard Area. The Declaration creates easements for these facilities and areas benefitting the Community Association. Such utility facilities, if present, will be identified in the Private Yard Area Plan your Unit. Seller recommends that you maintain a copy of the Private Yard Area Plan, and provide the Private Yard Area Plan to any subsequent purchaser of your Unit. Utility features that serve more than one Unit are Common Elements of the Community, and as such, Seller, and the Board, have the right to access the utility features for ongoing maintenance, replacement and repair. These utility features may not be altered or removed. Where such facility is bordered by a fence or wall and landscaping, maintenance, repair and replacement of the landscaping and fence or wall is the responsibility of the Owner of the Unit in whose Private Yard Area where such facility is located.

Private Yard Areas. This land area appurtenant to each Unit, as described in the Declaration and shown on the Condominium Map, and bearing the same Private Yard Area number as the unit number assigned to the Unit, is a Limited Common Element. Private Yard Areas are not legally subdivided lots. They are an exclusive Limited Common Element available for Buyer's use, subject to the limitations of the Community Declaration and reserved easement areas and utility facilities benefitted more than a single Unit. The dimensions of the Private Yard Area for Units 1 to 57 are shown on Sheet M-1 of the Condominium Map. The dimensions of the Private Yard Area for Units 58 to 113 will be defined by later amendment to the Condominium Map. Private Yard Areas shall be encumbered by and subject to rights in the nature of a non-exclusive easement or easements benefiting the Community or other individual units in the Community by maintenance easement areas shown on the Condominium Map and for the installation, construction, maintenance, repair, and replacement of various utility facilities, lines and related components, together with right of access thereto over, on and under such Private Yard Areas.

Options.

Generally. All option items are subject to adjustment in price and quality if such items become unavailable for reasons beyond Seller's control. Buyer will be required to make a deposit, which is **non-refundable**, on all selected option items. Seller reserves the right not to install any selected options until Buyer receives loan approval. Once option selections are completed, Buyer and Seller agree that the final purchase price is to be amended by execution of the final Sales Price Addendum to include options.

Air Conditioners. Seller will install as a standard in each Unit a split air conditioning system(s) to serve the entire unit. Buyer understands that even with screening, air conditioning units may emit noise at levels unacceptable to some people. Buyer agrees to assume all risks of such noise emissions. Buyer agrees to assume all risks of noise emissions attributable to the air conditioning unit for Buyer's Unit and attributable to such air conditioning units servicing adjacent Units.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Utilities/Phones/Cable. Buyers need to make their own arrangements with the electric, phone and cable companies. Seller takes no responsibility for cable or telephone installation. Buyer should contact Hawaiian Telcom, Inc. and/or Buyer's cable company in advance to schedule installation on or after the date of closing. No early installation will be permitted. Buyer shall be responsible for initiating the commencement of any service from a utility company such as water, electricity, telephone and cable television (if available) upon or after the Closing Date. If Seller receives any bills for utilities that are attributable to the period after the Close of Escrow, Buyer shall reimburse Seller for such payments within ten (10) days after receipt of a statement from Seller. Seller is not affiliated with the cable company or with any other utility companies (i.e., water, electricity, telephone service, etc.), and has no control over the rates or the services furnished. The Board of Water Supply ("**BWS**") water distribution system (specifically, the Honouliuli, Waipahu, Kunia and Hoaeae wells) services Ho'opili. Seller has no control over the water pressure available at the Unit. Seller does not make any representations as

to when or if cable services will be available nor as to the quality of television reception or cable services. Seller has no control over timing of meter installation once final inspection has been performed. Seller also has no control over the location and placement of public utility structures and facilities. All locations of the utility structures and facilities are final, and the owners shall not tamper, move or damage these structures and facilities. Please check with Buyer's sales representative to determine whether any utility structures or facilities are located within or in the vicinity of the Unit.

Real Property Taxes. The 2021-2022 annual Real Property Tax Rate for Residential Units in the Community is $3.50 per $1,000.00 net taxable value of the Unit. Payments are due on February 20 and August 20 each year. At Closing, Buyer will be required to pay real property taxes for the full County fiscal year (July 1 – June 30) in which Closing occurs, prorated as between Buyer and Seller as of the Closing Date, given the Unit has not yet been separately assessed by the County. Buyer may also be required to prepay real property taxes for future tax periods at Closing as may be required by Buyer's mortgage lender or otherwise, among other fees. Buyer understands that if Tax Map Key identification numbers have yet to be assigned to Buyer's Unit and the units in the Community, the Real Property Assessment Division of the City and County of Honolulu ('**RPAD**') may continue to access the Community as a single parcel for real property tax purposes and send the assessment notice and tax bill for the Community to Seller after Closing. Should that occur, the Community Association shall be responsible for the payment of the real property taxes allocable to the Community. If such real property taxes are paid by D.R. Horton Hawaii LLC, to avoid a risk of penalty, the Community Association shall reimburse D.R. Horton Hawaii LLC, on demand. In either circumstance, the Community Association will specially assess Buyer for portion of the real property taxes paid (based on the common interest in the community allocable to Buyer's Unit). Buyer understands and agrees that such special assessment may be made by the Community Association and Buyer shall be responsible for payment of any such special assessment made by the Community Association. Owner-occupants may be eligible for a home exemption that reduces the net taxable assessed value of the unit that is used in determining the property tax assessment for Buyer's Unit. An owner-occupant may make a claim for a homeowner exemption on or before September 30th preceding the tax year for which the exemption is claimed. The basic home exemption is currently $100,000.00. Seller understands that for homeowners 65 years and older the home exemption will increase to $140,000.00, but Buyer should confirm that this increase exemption will be available following the date of Buyer's purchase. Currently, to qualify for the "senior" exemption, one must be 65 years or older on or before June 30 preceding the tax year for which the exemption is claimed. These tax rates are approximate only. For further information and to confirm the actual rate, Buyer may contact the Real Property Tax Office at (808) 768-3799.

Schools and Related Matters. The Community is located in the Leeward School District. The Leeward District telephone number is (808) 692-8000. The schools for this Community are determined by the Department of Education and are subject to change. Although various elementary schools, a middle school and a high school are planned in Ho'opili, it will be a number of years before construction of those improvements by the Department of Education.

Maintenance Easements. A number of the units within the Community are constructed along the boundary of the neighboring homes Private Yard Area, essentially creating a "**Zero Lot Line Unit**". These units and the Private Yard Area of the neighboring unit are subject to specific restrictions as set out in the Community Declaration. Each Zero Lot Line Unit is benefited by or subject to an open space easement referred to as a "Maintenance Easement". The Maintenance Easement is located along a Private Yard Area boundary line abutting the benefited unit as shown on the Condominium Map and Private Yard Area Plan and is for the purpose of access, support, encroachment, construction, maintenance and repair of the home on the adjacent lot. Additionally, the open space easement is also reserved for underground encroachments for purposes of footing and foundation location and support of the abutting. This easement area must be kept an open space. Buyer may not landscape this easement area or construct any improvement in it without the adjoining Unit owner's permission. Under no circumstance should Buyer disturb any portion of the easement area within two feet (2') of the home on the adjacent Unit as that will void the termite warranty available to that structure.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Access to Maintenance Easements. Generally, access to the Maintenance Easement area benefitting a Unit will be through the burdened Unit's Private Yard Area through the gate to the burdened Private Yard Area where gate access exists. If the burdened Unit's Private Yard Area does not contain a Community Access Road facing gate for access, the carport and the gates facing the carport will afford access to the Unit's Private Yard Area so that the Unit Owner benefited by a Maintenance Easement may have access to the Maintenance Easement area. No improvements shall be erected, altered, or permitted to the Unit or the Unit's Private Yard Area burdened by a Maintenance Easement that restrict the benefitted Unit Owner's access on and over the Unit's Private Yard Area, the Unit's carport or the Unit's carport doors to the Maintenance Easement area benefitting the adjacent Unit. This restriction will be contained in the deed for the Unit and shall be a covenant running with the Unit. In every instance, the Owner of the benefitted Zero Lot Line Unit shall make a verbal or written request to the Owner or occupant of the burdened Zero Lot Line Unit to grant the Owner of the benefitted

Zero Lot Line Unit with access to the Maintenance Easement. Access to and over the neighboring Zero Lot Line Unit is more particularly described in Section D.6 of the Community Declaration. If access is not granted pursuant to a verbal request, then the benefitted Zero Lot Line Unit Owner must send a written request for such access. If the Owner or occupant of the burdened Zero Lot Line Unit does not respond to a written request for access from the Owner of the benefitted Zero Lot Line Unit within seven (7) days after delivery of such a request from the Owner of the benefitted Zero Lot Line Unit, then the Owner of the benefitted Zero Lot Line Unit shall send another written notice to the Owner or occupant of the burdened Zero Lot Line Unit, which notice shall state the day, time, and length of time that the Owner of the benefitted Zero Lot Line Unit will need access to the Maintenance Easement. No earlier than two (2) days after having delivered the written notice to the Owner or occupant of the burdened Zero Lot Line Unit of the day, time and length of entry, the Owner of the benefitted Zero Lot Line Unit (and such Owner's agents and contractors) shall have the right to access the Maintenance Easement during daylight hours, but excluding holidays and Sundays. The notice procedures may be modified by Community Rules established by the Board. Further, the Maintenance Easement benefitting Owners of Units 21, 29, 41, 42, 52, 62, 70, 80, 88, 99, 106 and 113 is located on either the Common Elements of the Community or pedestrian paths adjacent to their Unit as shown on the Condominium Map. Access to and over any affected Common Element area shall be coordinated with the Board.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Mailboxes. Buyer understands that in order to receive postal services, mailboxes may need to be located only in those areas designated for these purposes. The United States Postal Service will not deliver mail to the Unit (or to any other Unit in the Community). Mail will only be delivered to the designated cluster mailboxes, which may be limited to one or two locations within the Community.

Refuse Collection. In order to receive trash services, trash containers may need to be located only in those areas designated for these purposes. In order for Units 21, 29, 61, 62, 70, 71, 79, 80, 88 and 89 to receive trash service, the City and County of Honolulu requires that Buyer place trash containers only in the area designated for this purpose as shown on the Condominium Map. Trash containers are to be placed with a minimum of 18 inches between each container. The location of the placement of trash containers is subject to modification by the City and County of Honolulu.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Postal Service. The United States Postal Service may require that at least 50% or more of the Units and roads within the Community be built before mail services will commence. In such event, Buyers will need to arrange for temporary mail service via either a general delivery service through the post office in the area or purchase a post office box at any post office until the requirements of the United States Postal Service, which are subject to change, are met by Seller.

Property Maintenance and Soils Condition. All Units and the land within the Community, including the land below the Unit, may have expansive soils, and, as a result, improvements, including the Unit and the driveways, walkways and other improvements may be subject to various types of distress including subsidence, settlement or lifting. Further, the land within the Community has been graded. Soil has been removed and added to reach the land's finished height and form, and as a result may contain fill and resident expansive soils. Please refer to the Soils Condition and Drainage Addendum for further disclosures and recommendations. Foundations may settle over time within certain construction tolerances. The soils underneath the foundations may expand, contract and/or settle causing the foundation itself to move over time. Foundations are designed with such movement in mind and Buyer should expect such movement to occur. Settlement may occur differentially whereby one side of the foundation settles differently than the other side. Except for limited soil borings, Seller has not investigated the soils below the limits of grading and as a result soil below the limits of grading may contain items installed during periods of agricultural use, such as, without limitation, drainage, irrigation and sewer lines which have been abandoned in place. Buyer also acknowledges that standard construction techniques and applicable designs for the foundation slab may result in a degree of non-structural cracking or "spider" cracking within the slab and that certain slabs will contain crack control joints. Buyer accepts such slab cracking. Certain non-structural cracking or swelling of drywall joints at windows, doorways and other locations within the Unit may also be visible. Concrete slabs for the buildings in the Community may be reinforced with a grid of steel cable installed in the concrete slab and then tightened to create extremely high tension, known as a "Post Tension Slab". Any cutting into this "Post Tension Slab" is very hazardous and may result in serious damage to the Unit, personal injury, or both, and should not be permitted. Buyers must be especially sensitive to landscape watering, avoid over watering and ponding of water. Landscaping is also important and will reduce the incidence of erosion attributable to wind or rain. Buyer understands and acknowledges that Buyer will be acquiring the Property in "AS IS" condition at the time of closing. Except as expressly set forth herein, Buyer is relying and will rely solely upon Buyer's own inspection and investigation of the land of the Community, and is not relying and will not rely in any way

upon any representations, statements, warranties, or other information or material furnished by Seller or its representatives, whether oral or written, express or implied.

Soil. The suitability of the soil contained within this Community for the planned construction was determined by Geolabs, Inc. A copy of the soils report for this Community is also available for review in the Sales Office.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Easements. Buyer is aware that there may be easements which affect the Community and Buyer's Property. These easements are noted in the Master Declaration, the exhibit to the Deed, the title report, the Subdivision Map and/or the Private Yard Area Plan for the Unit. Specifically, Units along Maunakapu Street, Kamaliehope Street, 'Ala'apapa Street, and Hono'uli'uli Street will be subject to landscape easements benefiting the Master Association. Seller is installing fencing and landscaping within or adjacent to these landscape easement areas. Due to topography and site conditions, Seller may construct the fence and landscaping in a location that may differ from the location shown on the Private Yard Area Plan and the fence may be located outside of the landscape easement area. Seller and the Master Association shall have the right to maintain and access the landscape easement area and any area outside between the landscaping easement and the fence installed by Seller. A subdivision monument or monuments and/or cluster mailbox system may be included within this landscape easement area and may affect certain Private Yard Areas. There may also be landscape easement areas within the Community roads

Drainage Facilities and Easements. Surface water drainage in the Community is directed to the streets servicing the Community utilizing certain surface drainage facilities, which may include lined and unlined ditches and swales. Buyer may not alter and must maintain the existing drainage pattern on Buyer's Private Yard Area, if any. The grading and drainage systems on the Property are designed to direct water away from the foundation of the Property. Buyer shall not modify any existing drainage facility located on Buyer's Private Yard Area may adversely affect the Unit or others. Because any changes made to the grade or contour of the Property may alter the drainage flow and cause damage to other Improvements, Buyer must be sure to properly landscape so water is directed away from the Unit. Saturation of the ground or ponding around foundation slabs may result in expansion or lifting of soils beneath the slab and settlement when the ground dries. Gutters, downspouts (directing water), splash guards, lined swales and pipe conduits should be considered if not included in the purchase of the Unit or purchased as an option by Buyer, if available. Buyers shall maintain the existing drainage pattern on Buyer's Unit and Private Yard Area. Any drainage or ditch facility or portion thereof located within the Private Yard Area, if any, shall be Buyer's responsibility. Buyer is responsible at Buyer's cost, for the maintenance, repair and cleaning, as required, of the drainage ditch facilities located on the Private Yard Area, if any.

Swale facilities and drainage and flowage easements are reflected on the approved grading plans for the Community. Buyer understands and agrees that should a swale facility or any drainage or flowage easement be disturbed during construction of a Unit, Seller may restore the swale in accordance with approved grading plans even after closing of the purchase or sale. This right is reserved to Seller in the Deed for the Unit and the Community Declaration. If Buyer removes, modifies or otherwise alters the established drainage patterns or devices in Buyer's Private Yard Area, Buyer may cause significant and permanent damage to the Unit and/or other Units, including but not limited to, damage to the foundation of the Unit or adjacent slopes. Buyer should take precautions by using licensed professionals (e.g., landscape architects, civil engineers, geotechnical engineers, general contractors, etc.) to assure that Improvements such as walkways, landscaping, patios and/or lanais, decks, planters, etc. are constructed so as not to alter the established drainage of the Unit. Seller shall not be responsible for any modifications or changes to the established drainage for the Property.

Sewer, Irrigation and Drain Easements. Certain portions of the Community may be affected by underground sewer, irrigation and/or drain easements, including any underground drainage chambers, benefiting the Community and/or the County. These facilities may be located in the Private Yard Areas and the Community shall be responsible for the maintenance of such facilities, provided however, that the County shall be responsible for the maintenance of any underground drainage facilities, located in any Private Yard Area, which are constructed for the benefit of the County. Such facilities and easements may NOT be reflected on the Condominium Map. The location of these facilities depicted on any development map is preliminary in nature and these facilities may be sited as required without further notice to Buyers.

Sight Distance/View Triangles. A "sight view triangle" is required by the County on certain yards abutting a corner at the intersection of two (2) streets in order to maintain clear views of traffic at certain intersections. The County requires that all structures and landscaping within the sight view triangle be no greater than thirty inches (30") in height.

Landscape Electrical and Utility Easements. Utility boxes, transformers, utility lines, manholes and other utility features, such as structural transformers, transformer and switching vaults are placed throughout the Community and may be located

near the Unit or in Buyer's Private Yard Area. Certain Private Yard Areas are affected by landscape and above ground or underground electrical utility easements as may be shown on the Condominium Map. Buyer should inspect the Private Yard Area to confirm the location of these facilities and easements. As previously noted, the location of these facilities depicted on any development map is preliminary in nature and these facilities may be sited as required without further notice to Buyers. Electrical easements run in favor of and will be granted to the electric company, Hawaiian Telcom and/or Buyer's local cable television provider. Seller has the right to grant these easement areas even after Buyer occupies the Unit.

Use of Easement Areas. Buyer may landscape the easement area(s) as long as Buyer does not interfere with the use of the easement area(s) affecting the Unit and Private Yard Area, if any. The grantee of the easement area (whether it is the electric company, the Community Association, or an agency of the County) will have the right to trim and keep trimmed any plants within the easement area that may be in the way. Also, Buyer may not be permitted to construct other structures in the area depending on the nature of the easement. Such structures may require the grantee's approval. Additionally, should the grantee determine that it must remove any plants or foliage within the easement area, it may NOT be obligated to replace them, but rather will only be obligated to restore the surface of the ground within the easement area as much as the grantee determines is reasonably possible.

Units Affected by Easements. A special Easement Addendum to the Sales Contract will identify easements affecting a Buyer's Private Yard Area. Such easements may also be reflected on the Condominium Map.

Digging Generally. Buyer should call 811 before digging anywhere on Buyer's Property to avoid damage to underground utilities. If any digging is contemplated, call the Hawaii One Call Center at 811 at least five (5) working days beforehand. Be sure to give the address and location of the cross street(s) nearest where digging is planned. The Hawaii One Call Center will, at no cost to Buyer, contact all local public utilities to tone, mark or identify the location of underground public utilities. Homeowners are asked to mark the area where excavating is planned in WHITE as the utilities are designated other colors to mark their facilities (yellow for gas, oil, steam, petroleum, or other hazardous liquid or gaseous materials; red for electric; orange for communications, cable TV, alarm or signal lines, cables or conduits; blue for water, irrigation, and slurry lines; purple for slurry and reclaimed water; green for sewers, drainage facilities or other drain lines; pink for temporary survey markings). Buyers are encouraged to visit http://callbeforeyoudig.org/hawaii/index.asp for additional details regarding the Hawaii One Call Center.

Improvements. As specified in the Community Declaration, NO exterior modification or additions to a Unit are permitted. Installation of storage sheds, pools, hot tubs or spas, is also prohibited within the Community. Improvements or modifications to landscaping of a Private Yard Area (including installation Orr replacement of air conditioners) must comply with the Design Guidelines and the improvements and/or landscaping will need to be approved in writing by the Board or the DRC before the improvement or modification is made. The Board may prohibit the construction of the improvement if it fails to comply with the Design Guidelines. Approval of the County is also required. Buyers are encouraged to read and review the Design Guidelines as they will substantially affect their ability to improve their Property. Buyers should note that the Design Guidelines are subject to further revision by the DRC. Further, Buyer should refer to the Soils Condition and Drainage Addendum for additional disclosures and recommendations that may impact any improvements.

Garage. Buyer should be aware that the height of the opening of the garage door may not permit you to park some larger automobiles, such as Hummers, etc., inside the garage. Some vehicles may be too long to park in the garage or on the driveway. Buyers should analyze the garage floor plan dimensions and model garages (if available) and review their garage at the homeowner tour to insure that the garage is large enough for their vehicles. Buyer acknowledges that it is Buyer's responsibility to determine whether the size and location of car spaces in the garage of the floor plan of the Home selected by Buyer are adequate and appropriate to park Buyer's vehicles Street parking is not permitted.

Air Conditioners. Buyer understands that even with screening, air conditioning units may emit noise at levels unacceptable to some people. Buyers agree to assume all risks of such noise emissions attributable to the air conditioning unit for Buyer's Unit and attributable to such air conditioning units servicing adjacent Units.

Landscaping.

Buyer's Responsibility – Private Yard Areas. The Common Element landscaping outside of the fenced Private Yard Area, if any, is irrigated by a sprinkler system maintained by either the Master Association or Community Association. Buyer must not interfere with the sprinkler system. Seller will install landscape and irrigation water lines in the Private Yard Area attached to Buyer's Unit. Buyer is responsible for the maintenance and upkeep of Buyer's Private Yard Area. For certain Units, the Private Yard Area may include land in between the Community Access Drive and the Private Yard Area fence installed by Seller. Buyer is responsible for the maintenance and

upkeep of such areas. When landscaping, Buyer should not disturb termite treated areas adjacent to the Unit and avoid voiding applicable warranties. Buyer should also be sensitive to watering and avoid excessive watering especially around the perimeter of the Unit. Buyer is also responsible to maintain and keep clean, passable and free from weeds, debris and overgrowth the sidewalk and gutter area in front of Buyer's property.

Irrigation Water Lines. BWS requires the installation of separate irrigation water lines for non-potable water for irrigation of landscaping within the Common Elements of the Community and Ho'opili. These irrigation lines will initially carry potable water, but will later carry treated effluent, reclaimed water or other sources of non-potable water and at such time will require installation of new water meter(s) and signage at the expense of the Community Association. Such lines will not run in the Private Yard Areas of Buyer's Unit. Buyer may obtain information regarding the requirements of the Recycled Water Program at http://health.hawaii.gov/wastewater/home/reuse/.

Trees. Trees will be planted in the Community. These trees may NOT be removed, replaced or relocated without the prior written consent of Seller and the County. Each Buyer shall be responsible for the proper maintenance and care of any and all trees planted within Buyer's Private Yard Area, if any. The County or Seller may also plant trees in the planting area bordering the roadways in abutting the Community, as required by the County. Buyers may not remove, replace, alter or relocate these trees or plantings. Owners may pick fruit and vegetables from fruit trees and/or gardens in Community common element areas for individual noncommercial consumption; provided, each Owner in the Community must use reasonable care in any picking of fruit and vegetables so as not to damage any trees and/or gardens and to avoid any excessive picking of fruit and vegetables.

Community Common Elements

Collective Maintenance Responsibility. Each Owner in the Community must share in the cost to maintain, repair and replace the Community common element areas as described in the Community Declaration (herein, sometimes, the "**Mamaka at Ho'opili Community Common Elements**").

Community Common Elements. The Mamaka at Ho'opili Community Common Elements include without limitation:

Common Element Landscaping: This term refers to the Common Element landscaping shown on the Condominium Map.

Roads: The roadway(s) within the Community shown on the Condominium Map will be a portion of the Common Elements of the Community unless dedicated. The roadways may be described as the Community Access Drive in the Community Declaration.

Drainage: All drainage facilities, including any hydrodynamic separator, serving the Common Elements or more than one (1) Unit will be a portion of the Common Elements of the Community.

Entry Sign Monument: Sign monuments identifying the Community.

Ownership, Administration and Assessment. The Community Association shall own the Community Common Elements, once deeded to it and must accept the conveyance of the Common Elements from Seller. The Community Association shall be responsible for the management and administration of the Community Common Elements. The level of service of maintenance of Community Common Elements shall be determined by the Community Association's Board of Directors.

Community Disclosures.

Other Development within the Surrounding Area. Buyer understands that Seller does not control the development of the entire surrounding area and that current and future plans for the development and use of all or any part of the surrounding area are under the control of others, and may change at any time before or after Closing of Buyer's purchase of the Property without notice to Buyer. The surrounding community contains or may contain various commercial, residential, recreational and ancillary uses, industrial, including extensive commercial, retail, industrial, multi-family and single-family detached residential subdivision and rental communities. To date, by way of example, without limitation, Seller has conveyed vacant development parcels within Ho'opili to The Hawaiian Humane Society (5.473 acres; B-1 zoned; contemplated use - new West Oahu campus), Fred Lau Properties, LLC (1.806 acres; B-1 zoned; contemplated use - not yet determined), HBP Partners LLC (57.190 acres; IMX-1 zoned;

contemplated use - industrial business park); The Queen's Medical Center (4.901 acres; BMX-3 zoned; contemplated use - ambulatory medicine center), Alaka'i Apartments I LP (11.311 acres; BMX-3 zoned; contemplated use - market and affordable rental apartments up to 80% of area median income), and The Mutual Housing Association of Hawai'i, Inc. (7.127 acres; A-2 zoning; contemplated use - affordable rental apartments up to 60% of area median income). Some of these project areas may be under construction or have been completed. Buyer hereby accepts the risk of any such changes pertaining to the development and use of all or any part of the surrounding area, and agrees that Seller shall not have any responsibility to Buyer for such changes. Buyer further understands and acknowledges that any descriptions of planned amenities for the surrounding area, which may have been provided to Buyer by Seller or agents of Seller, are for general information purposes only and are subject to change or deletion at any time and from time to time. Seller makes no warranties or representations regarding the accuracy or completeness of any descriptions of such planned amenities, which may have been provided to Buyer, and no reliance may be placed thereon. Further, up to or more than thirty percent (30%) of the residential housing in the surrounding area and within the Community and the Ho'opili Community has been or may in the future be developed in cooperation with the County's Department of Planning and Permitting or equivalent State or County agency (the "**Agency**") as affordable housing available only to buyers satisfying special median income limitations established by the Agency. Such homes may be sold and/or rented at prices below the market value of comparable homes as determined by the Agency, and may be subject to additional use, occupancy, and transfer/option restrictions.

Condition of Property. Buyer understands and hereby acknowledges that the land of the Community may have been used previously for agricultural and farming operations and in connection therewith, fertilizer and pesticides, among other things, may have been applied and used on the land of the Community or adjacent lands. Buyer also understands that the Property, including Private Yard Area, has been graded, soil removed and added to reach its finished height and form, and contains or may contain fill and/or expansive soils, and, as a result, may be subject to subsidence, settlement or expansion. Please refer to the Soils Condition and Drainage Addendum for further disclosures and recommendations. Buyer understands and acknowledges that, as previously stated, Buyer will be acquiring the land underlying the Unit in "AS IS" condition at the time of Closing. Except as expressly set forth herein, Buyer is relying and will rely solely upon Buyer's own inspection and investigation of the Property and the land of the Community, and is not relying and will not rely in any way upon any representations, statements, warranties, or other information or material furnished by Seller or its representatives, whether oral or written, express or implied. Seller makes or gives no warranty, express or implied, concerning the condition of the land. Without limiting the generality of the foregoing, Buyer assumes all risks associated with the condition of the Property, the nature of the soils making up the Property and of hazardous materials on, about, around, under, over or within the Community, including all risks of (a) any and all enforcement, clean up, or other governmental or regulatory actions instituted or threatened pursuant to any hazardous material laws affecting the Community, (b) all claims made or threatened by any third party against Buyer or the Community relating to damage, contribution, compensation, loss or injury resulting from any hazardous materials and (c) Buyer's discovery of any occurrence or condition on the land of the Community or any land adjoining or in the vicinity of the Community which might result in Buyer or the Property being made subject to restrictions on ownership, occupancy, transferability or use of the Property or the Community pursuant to any applicable hazardous materials laws. Furthermore, Buyer specifically waives and relinquishes any and all claims of whatsoever kind or nature based on the condition of the land or the use or presence of any hazardous materials on, about, around, under, over or within the Property, and from and after the date that Buyer acquires title to the Property, Buyer shall hold harmless and defend Seller and its members, managers, stockholders, successors and assigns, from and against all claims, demands, actions, lawsuits, proceedings, fines, penalties, damages, liabilities, judgments, awards, expenses and costs (including attorneys' fees and costs) which may arise out of or may directly or indirectly be attributable to the condition of the land, the soils thereon and therein, and the use, generation, manufacture, treatment, handling, refining, production, storage, release, discharge, disposal, or presence of any hazardous material on, about, around, over or within the Property. As used herein, the term "hazardous materials" includes, but is not limited to, any and all radioactive materials, asbestos, polychlorinated biphenyls ("**PCB's**"), chemicals which cause cancer or reproductive toxicity, pollutants, contaminants, hazardous wastes, toxic substances, and other hazardous substances or materials listed, described or defined in 40 CFR Para. 302, as amended from time to time. Buyer and Seller agree that the covenants and agreements contained in this paragraph shall survive the Closing of the sale of the Property and shall be binding upon and inure to the benefit of the parties and their respective heirs, personal representatives, successors and assigns.

Uses Within and Around the Community. Buyer understands, acknowledges, approves and agrees, as set forth here, and in certain instances in the Declaration(s) and Deed, that: (a) the land of the Community may have been used previously for commercial agricultural and farming operations and in connection therewith, fertilizer and

pesticides, among other things, may have been applied and used upon the land of the Community or lands adjacent thereto; (b) noise levels in the Community may exceed noise level standards for residential-zoned areas promulgated by the State Department of Health, and that these noise levels may not be acceptable to some individuals; (c) the Community may be located near or adjacent to properties that were used for the production of pineapple, sugar cane, diversified agricultural, other agricultural and related uses, and the development of alternative energy projects, that may have a limited buffer area, if any, between the agricultural use and the Community (the "**Agricultural Properties**"), and a variety of commercial and industrial purposes; (d) further development of mixed residential (multi-family, single family and affordable), commercial, industrial, recreational, utilities facilities/substations, and public projects (including without limitation roads, bus stops, railroad, parks, schools, preschools and day care centers) may be ongoing and may continue within and in the vicinity of the Community for a considerable period of time after Buyer has occupied the Property; (e) there are or may be a variety of pets within the Community that may not be acceptable to some individuals or may create a nuisance; (f) aboveground and underground radio transmission wires, high voltage electric lines and microwave telecommunications facilities are located within and around the Community, which lines purportedly may emit electric and magnetic fields; (g) certain lands within the Community may be irrigated with treated effluent, reclaimed water or other sources of non-potable water; (h) fruit trees and/or gardens in Community common element areas may result in an increase in insects, pesticides, offensive odors from fruit and vegetables, hazards from fallen fruit, low hanging branches and/or tree roots, and other conditions customarily found where fruit trees and gardens exist; and (i) the Property will be subjected to those other uses and circumstances described in this Disclosure Addendum (collectively, all the foregoing uses and circumstances set forth in this Section (Community Disclosures) are described as the "**Community Uses**"). Seller has the right, but not the obligation, to develop, market and sell as many affordable Units in the Community as Seller desires. Each Buyer hereby waives any and all claims arising out of the presence of or lack of affordable Units in the Community.

Surrounding Community Conditions and Uses. Each Unit in the Community may be periodically affected by certain environmental conditions due to historical, existing and prospective surrounding conditions and uses. The land of the Community was used previously for commercial agricultural and farming operations and in connection therewith, fertilizer and pesticides, among other things, may have been applied to and used upon the land of the Community or lands adjacent thereto. The Community is located near or adjacent to properties which are or may be used for agricultural, farming, animal husbandry or related uses. Further development, construction and sale of residential, commercial, recreational and public projects by Seller and others, which may include changes in use (due to zoning changes or other governmental authorization or otherwise), construction, grading, improvement and maintenance of adjacent and surrounding properties, including roadways, drainage facilities, sewage treatment facilities and the like is ongoing and may continue within the Community and/or within the vicinity of the Community for an indefinite period. Lands adjacent to the Community are owned by Department of Hawaiian Home Lands and its development and use is not within the control of Seller. Commercial and community agricultural uses are planned in Ho'opili and will be supported by the Ho'opili Urban-Agriculture initiative. Certain lands within the surrounding area and within the Community may be irrigated with treated effluent, reclaimed water or other sources of non-potable water. The land of the Community is subject to potential adverse soil conditions. Numerous schools and public parks may be built in Ho'opili, and the West Oahu campus of the University of Hawaii is just west of Ho'opili.. A park located within the Mamaka Community is also planned that will be open to the public. Seller may also improve the Ho'opili Community with other recreational facilities, which may include, but are not limited to, barbeque areas and play structures. All of the foregoing factors and uses may affect Buyer as a Unit owner. Use of the parks, areas and structures may negatively impact Buyer's use, views, privacy, and enjoyment of their Unit.

Commercial and community agricultural uses are planned in Ho'opili and will be supported by the Ho'opili Urban-Agriculture initiative, which will include without limitation, land for commercial farming operations, shared and home gardens, community farms and gardens, civic farms, and urban gardens. The urban gardens are intended to feature edible landscaping throughout certain lands in Ho'opili, including portions of the Common Elements within the Community. Commercial agricultural uses are protected under the Hawai'i Right to Farm Act, Hawaii Revised Statutes, Chapter 165. Buyer shall provide subsequent notice to Buyer's lessees, tenants or assignees of these aforementioned farming operations and practices on adjacent or contiguous land and the protections of such uses afforded under the Hawaii Right to Farm Act.

The Community may also be affected by traffic, aircraft noise, and adverse effects from the Kalaeloa Community Development District and an expansion of military uses and associated adverse impacts may occur within Kalaeloa and Pearl Harbor, which is east of the Community. The Community may be affected by airport noise overflight from the Honolulu International Airport and is near an active airstrip in Kalaeloa. Roads adjacent to the Community, which are not under Seller's control may be widened or modified. Significant widening and highway improvements are

planned for Farrington Highway which is adjacent to Hoʻopili, which may impact the Community as a result of noise, nuisances, annoyances, and other impacts associated with the construction, operation, and maintenance of such improvements. A central hub of the planned Honolulu rapid transit rail system including, but not limited to, a rail station within the Ho'opili Community, one rail station west of the Ho'opili Community, portions of the guideway, and a planned park-and-ride and/or bus transfer facilities, will be located in or adjacent to Ho'opili, and the operation of the rail system may result in noise and other impacts associated with the operation of trains and mass transit related uses. Parts of the Ho'opili Community will be subject to Transit Oriented Development regulations and neighborhood plans. An "Energy Easement Corridor" is adjacent to Farrington Highway which may contain jet and other petroleum based fuel underground transport lines as well as above ground and underground utility lines and electrical lines. Near the Community is a planned Ho'opili Community Center facility. This Community Center facility is not part of the Community. The Community may be affected by surrounding operations effects created by or attributable to historical, existing, and prospective surrounding construction, including construction of intersections within Hoʻopili near or around the Community, including Kulanihako'i Street, Ho'omohala Avenue and Kualaka'i Parkway, development, agricultural, pasture, commercial and other non-residential uses and activities, which include, but are not limited to: (a) cane milling, burning, harvesting, tending, as well as fertilization and pest and weed control; or (b) cattle and other livestock grazing and pets that may be objectionable to residents; or (c) commute and off-hours (non-peak) traffic and parking. Areas surrounding and mauka of the Community include quarrying operations.

The Ho'opili Community is a mixed-use development and includes within it, homes, schools, pre-schools, churches, parks for use by Hoʻopili residents and the public, walkways, bicycle paths, government offices, library(ies), day care centers, hospital, urgent care, medical and medical emergency facilities, homeless shelters or transitional shelters, cellular towers, commercial, retail and industrial areas and operations, recreational and related facilities and other features common to urban environments, including without limitation to, a Community wide system of bicycle and walking paths, aboveground and underground radio transmission wires and high voltage electric lines, which lines purportedly may emit electric and magnetic fields. Easements shall be retained over the Community for some or all of the foregoing described uses, including, specifically, easements permitting the commencement, continuation and resulting effects of the foregoing uses, and all activities incidental to such uses.

Further, Buyer is aware that there are numerous materials and components required to construct and used in and around Buyer's Unit to which certain individuals may be allergic or especially sensitive. Some of these materials such as paint, wood preservative treatments, insulation materials, glues, mastic, caulk, carpet or the like may cause lingering odors to which people are sensitive. Also, due to the nature of community living, various noises or odors due to trash areas, compost and recycling receptacles, storage sheds, plumbing, impact, including, without limitation, noises from adjacent neighbors and other circumstances may result to which a Buyer may be especially sensitive. Mold and mold spores are also present in the Community and may be present in Buyer's Unit. Certain strains of mold may cause adverse health effects in susceptible persons.

The Unit is sold subject to these conditions, hazards and risks. Buyer is aware of and understands these risks, accepts them and has decided that the benefits of home ownership in the Community outweigh the detriments of such ownership.

Other Environmental Issues. Mold and mold spores are present throughout our environment and residential home construction is not, and cannot be, designed to exclude mold spores. If the growing conditions are right, mold can grow in the Unit. Buyer may be familiar with mold growth in the form of bread mold, and mold that may grow on bathroom tile. All mold is not necessarily harmful, but certain strains of mold have been shown to have adverse health effects in susceptible persons. The most common effects are allergic reactions, including skin irritation, watery eyes, runny nose, coughing, sneezing, congestion, sore throat and headache. Individuals with suppressed immune systems may risk infections. Some experts contend that mold causes serious symptoms and diseases which may even be life threatening. However, experts disagree about the level of mold exposure that may cause health problems, and about the exact nature and extent of the health problems that may be caused by mold. The Center for Disease Control states that a causal link between the presence of toxic mold and serious health conditions has not been proven. Moisture is the only mold growth factor that can be controlled in a residential setting. The Homeowner's Manual contains recommendations for positive steps and action a Buyer may take following possession of the Unit to reduce mold. Buyer agrees to assume responsibility for the recommendations contained in the Homeowner's Manual to act in accordance with the best practice guidelines contained on the Governmental Internet Sites described in the Manual. Buyer further acknowledges that if there is any water damage or water intrusion to Buyer's Unit, Buyer will take immediate action to prevent conditions which cause mold or mildew to develop. Also, since energy conservation has become a concern, the State of Hawaii uniform building code,

specifically the energy standards, has created the need to build Units that are more airtight. As a result, these Units trap unwanted gases in different degrees depending on how each person lives within their Unit. To date, measurements of such unwanted gases (such as the radon gas described below) are reported as parts of the air they occupy. Since the quality of air we breathe can affect our health, Seller recommends frequent airing of Buyer's Unit by simply opening windows to introduce fresh air uncontaminated with such gases. The United States Environmental Protection Agency (the "**EPA**") has indicated that a number of homes in the United States experience elevated levels of radon gas. Radon is a naturally occurring gas that is caused by radioactive decay of the element radium. Since radium is contained in the earth's crust and dissolves readily in water, radon can be found virtually everywhere and can enter the home through a variety of sources. Buyers seeking information about radon can contact the EPA or a state environmental office. Seller has no expertise in the measurement or reduction of radon in homes or regarding acceptable levels or possible health hazards associated with radon. Seller makes no warranty or representation of any kind, express or implied, regarding the presence or absence of radon gas, or regarding the effectiveness of any architectural activities for reducing the presence of radon.

Mamaka Community Features. The private Ho'opili Community park within the Community will be open to all Ho'opili residents and be maintained by the Master Association. This Ho'opili Community park may contain a playground area and barbeque areas available for use for Ho'opili Community functions. Dogs may be permitted in the park. Bicycle pads/structures, bicycle racks, bicycle sheds, and bicycle waiting areas may be located within the Common Element areas of the Community. A temporary fenced detention basin and stockpile area (the "**Detention Basin Area**") will be/is within the Ho'opili Community and will be used for those purposes for an extended period before it is developed. Roadways serving Ho′opili come to an end around the Detention Basin Area and may be extended when the Detention Basin Area is developed in the future. Civil defense sirens are located within the vicinity of the Community, which will result in siren noise from civil defense tests. The Community is in the vicinity of a planned park-and-ride and/or bus transfer facilities area that will be used for those purposes and is near a central hub of the planned Honolulu rapid transit rail system including, but not limited to, a rail station west of the Community and portions of the guideway north and west of the Community. The operation of the rail system may result in noise and other impacts associated with the operation of trains and mass transit related uses. The future site of an elementary school is adjacent to the Community. A planned Ho'opili Community Center is near the Community and may result in noise and other impacts associated therewith. A middle school and adjacent elementary school are planned near the Community. All of these factors and uses may affect Buyer's use and enjoyment of Buyer's Unit. The Unit is sold subject to these conditions, hazards and risks. Buyer is aware of and understands these risks, accepts them and has decided that the benefits of home ownership in the Community outweigh the detriments of such ownership. Buyer accepts this risk.

On-going nearby Agricultural Activities (including "GMO"); Sugar cane burning and construction activities. The Ho'opili Community is in the vicinity of lands currently leased and being actively used for growing, harvesting and processing activities (collectively, "**Agricultural Activities**") of corn and other agricultural genetically modified organisms or "GMO" products, which activities may from time to time bring upon the Project or result in smoke, pollution, dust, noise, heat, agricultural chemicals, particulates, and similar substances and nuisances (collectively, "**Agricultural By-Products**"). The Hawaii Right to Farm Act (Hawaii Revised Statutes, Chapter 165) and Hawaii law limits the circumstances under which farming activities may be deemed a nuisance. Units in the Community may also be subject to occasional dust from field operations, pollutants, smoke and debris from other agricultural activities or feral lands not in close proximity to the Community, such as sugar cane fires, odor, noise, and other agricultural nuisances associated with agricultural cultivation. The Community may also be subject to occasional smoke, soot, and odors emanating from the vicinity of the irrigation ponds and other feral lands, depending on prevailing wind conditions. The Agricultural Activities performed on and Agricultural By-Products from nearby lands are not within the control of Seller.

Nuisances Related to Community Uses. Without in any manner limiting the foregoing, Buyer, in purchasing or otherwise taking title to any Property, does so with the express understanding and acknowledgment that the Community and the Property may be periodically affected by various hazards and by noise, dust, smoke, earth shock, soot, ash, odor, mold or mold spores, noxious vapors, the presence and/or transmission of pollutants or other hazardous materials, surface water runoff, or other adverse environmental conditions, including but not limited to those resulting from wind drift and other weather factors (collectively the "**Community Use Effects**") created or exacerbated by or attributable to the Community Uses and the historical, existing, and prospective surrounding construction, development, agricultural, pasture, residential, industrial and commercial and other non-residential uses and activities. Buyer specifically approves all of the foregoing uses, circumstances and activities, including changes in use due to zoning changes, other governmental authorization or otherwise (collectively the "**Community Operations**"). Buyer is strongly encouraged to inspect the Community and the various Community Operations to assess the impact of these operations, uses and circumstances on the Community and the Property. Buyer covenants and agrees, on behalf of Buyer and the tenants, lessees, family, servants, guests, invitees, licensees and employees of Buyer: (a) to assume and does hereby assume any and all risks associated with the Community

Operations including specifically the presence of mold in the Unit and the annoyances, inconveniences, impacts on property value or loss of the sale value, Community Use Effects and other nuisances thereby created; (b) to waive and does hereby expressly waive all rights to make any claim against and specifically releases Seller, the owners of the Agricultural Properties and any of their related entities, affiliates, successors-in-title, members, managers, stockholders, or assigns, arising out of or in connection with such activities, annoyances, inconveniences and nuisances, the clean-up or remediation of the same, including but not limited to (i) any claim for damages attributable thereto or for the design or the placement of improvements to the Community, the Property or the surrounding property, or any part thereof, or related or adjacent facilities, or to the orientation of the Unit as it relates to exposure to sun or wind, or (ii) claims for the abatement or elimination thereof; and (c) to hold harmless and defend Seller and its affiliates, successors, members, managers, stockholders and assigns, from and against all claims, demands, actions, lawsuits, proceedings, fines, penalties, damages, liabilities, judgments, awards, expenses and costs (including attorneys' fees and costs) which may arise out of or may directly or indirectly be attributable to any and all of the foregoing.

Non-Disclosure of Neighbor's Plans. During the course of the purchase of their Units, some buyers disclose information to Seller regarding their potential plans for their Units, (e.g., landscape, hardscape, add-ons, repainting plans, etc.) and/or information about their personal lifestyles (e.g., pets, interests, hobbies, etc.) Seller will not disclose such information to prospective neighbors. Should Buyer wish to obtain any information about prospective neighbors, Seller will, upon Buyer's written request, attempt to place Buyer in contact with prospective neighbors, but makes no warranty that Seller will be able to do so or that the information which Buyer may obtain will be accurate.

Adjoining Land Uses. Buyer may have received written disclosures which depict the current and proposed land uses for the properties which adjoin the Community. Land uses are subject to change, and consequently, Seller cannot guarantee whether any information so disclosed is current. Also, land planning and zoning matters are complex and therefore the information which may have been supplied by Seller is not complete. If Buyer is concerned about the type of development that may occur on the adjoining properties, Buyer should discuss nearby land uses with the County Planning Department and otherwise conduct his or her own investigation of those matters. THE MARKET VALUE OF THE UNIT IS NOT GUARANTEED BY SELLER AND MAY CHANGE DUE TO ADJOINING LAND USES BY OTHERS, INCLUDING WITHOUT LIMITATION THOSE USES BY THE STATE OF HAWAII AND/OR THE CITY AND COUNTY OF HONOLULU, ALL OF WHICH USES ARE NOT UNDER THE CONTROL OF SELLER.

Grading, Landscaping, and Building Materials. Development of the areas around the Community will cause dust in the Community during grading and landscaping work until adequate landscaping has been installed to minimize blowing dust. Seller will try to minimize the dust from its construction activities. Buyers understand, however, that Seller does not control all construction in the area and that dust is an inevitable result of the ongoing and surrounding construction. The grading of the soil and other elements created by nature, as well as building materials, many times create unwanted and undesired gases and other contaminates in residential and commercial buildings, both new and used.

Disposal of Toxic and Other Substances. Water that enters a storm drain flows directly to natural sources of water, including waterways, creeks, drains, rivers, lakes and that erosion has an impact on the environment. Unlike the water in the sewer system in the Unit which is being purchased by Buyer, which flows to wastewater treatment plants, water that enters a storm drain flows directly, without any treatment, to waterways, creeks, streams, rivers, lakes and/or oceans. Accordingly, the National Pollution Discharge Elimination System, the Regional Water Quality Control Board Orders covering the Community, and the policies and ordinances of the County prohibit discharging anything other than natural rain water into storm drainage systems, including gutters and streets which drain into storm drains. Toxic chemicals or hydrocarbon compounds such as gasoline, motor oil, antifreeze, solvents, paints, paint thinners, wood preservatives, fertilizers, lawn clippings, yard waste, detergents, pet waste, and other such materials and pollutants shall not be discharged into any street, public or private, gutters, or into storm drains or storm water conveyance systems. Buyer further acknowledges that the disposal of such pollutants and materials into a storm drain system may result in significant penalties and fines and that Buyer may be responsible for any activities by Buyer's contractors (e.g., painters, landscapers, etc.) who dispose of such pollutants from Buyer's Unit or Private Yard Area, if any, into a storm drain system. Use and disposal of pesticides, fungicides, herbicides, insecticides, fertilizers, and other such chemicals shall meet all federal, state, and County requirements and requirements of any other governmental agencies having jurisdiction over the Property. All Buyers within the Community are required to comply with such restrictions. The Community Association shall be responsible for the periodic inspection and maintenance of any sewage backwater valve located within the Community. Buyers are encouraged to consult with the County, other governmental authorities, and the refuse hauler in the area of the Community concerning the proper disposal of any toxic or hazardous materials. Dumping any such materials into sewers, gutters or storm drains is against the law.

Continued Construction. The construction of units at the Community and other communities on nearby land will continue for some time. The roadways in and around the Community may be used for ingress and egress to the construction sites. The ongoing construction will cause dust, noise and increased traffic in and around the Community for a period of time. Due to these continuing activities, and notwithstanding dust and noise control measures employed by contractors, Buyer may have to close windward facing windows in the Unit during certain times of the day and may have to clean the Unit more often. Certain persons may be more sensitive to these activities than others. Also, care must be taken around the construction sites, as hazardous conditions may exist temporarily due to the construction. Buyer is purchasing the Unit knowing these facts and agrees, as provided in the Sales Contract, to not hold Seller responsible for any damage, annoyance, inconvenience or nuisance Buyer may experience as a result of the ongoing construction activity within the Community and surrounding areas.

Marketing Activity. Seller may continue to market units in the Community for sale after Buyer moves into the Unit. Seller may also use the Model Units to market units in other Communities. Seller's marketing activities may include operating a model unit complex, displaying signs, balloons, flags, banners and conducting on-site events and other promotional activities. The ongoing marketing of units may cause Buyer some inconvenience and may disrupt the enjoyment of the Unit.

Roads. Buyer is aware that the roads shown on the Condominium Map are currently private roadways, which are not intended to be dedicated to the County as public roadways in the future. Roads surrounding the Community will be extended in the future to serve other developments within the Ho′opili community. Seller makes no representation or warranty regarding the availability of parking along the public streets abutting the Community, which may change if the streets or portions of the streets are dedicated to the County. All roads are used at Buyer's risk.

Views. Views from Units in the Community are not assured or guaranteed in any way. Buyer is not buying a view easement with the Unit. Future residential development within the vicinity of and adjacent to the Community and adjacent property may have a detrimental effect on views. Further, fencing and landscaping changes and additions within and around the Community, through the addition, removal or trimming of trees or other vegetation, may occur in the future and may adversely affect views from the Units. VARIATIONS IN PRICING DUE TO THE ELEVATION OF A UNIT IN THE COMMUNITY IS NOT A WARRANTY OR ASSURANCE THAT ANY VIEW (OR AN UNOBSTRUCTED OR PARTIALLY UNOBSTRUCTED) VIEW WILL BE AVAILABLE FROM THE UNIT.

Flooding. Buyer acknowledges that Buyer's Unit is not warranted against damage due to floods. Buyer is responsible to conduct Buyer's own investigation regarding the potential for floods.

Common Element Landscaping. Aspects of the Common Element landscaping may be altered from that depicted in any artist's rendering or advertisement regarding the Community. Changes within the Common Element landscaping may be made at any time and mature plantings may not be used. Further, various landscape easements as may be referenced on the Condominium Map may be granted to the Master Association.

Fire Hazards and Barbeques. In order to prevent a fire hazard, no fires, including barbeque fires, shall be allowed in any part of any Unit or the Common Elements. Barbecuing is not permitted on covered lanais, within ten (10) feet of any structure, in the unfenced front yard of the Private Yard Area or on the driveway serving the Unit. Barbequing is only permitted in the fenced portion of the Unit's Private Yard Area Barbequing shall include, but shall not be limited to, the broiling of any food items over a charcoal fire, gas grill, or electrical grill.

Pest Control. It is in Buyer's best interest, as a new owner, to contact a local pest control company to arrange for a preventive maintenance program. Please refer to the homeowner's and Community Association's limited warranty for termites for the specifics of the program that must be established by the Community Association in order to maintain the termite warranty coverage described in the limited warranty. In many locations, especially where there are adjacent open spaces or agricultural uses, rodent control is essential. Uncontrolled, rodents can damage water and electrical systems in the Unit. Buyer fully understands that it is Buyer's and the Community Association's responsibility, not Seller's responsibility, to control pest (insects, rodents and the like) in and around Buyer's Unit and Private Yard Area.

Water Sprinklers. Water sprinklers may be installed in the Common Elements within the Community. Please be aware that water from sprinklers near parked automobiles may cause water spotting or paint damage, and Seller will not be responsible for such damage. The owners must not interfere with the sprinkler system.

Pets. Buyers shall be permitted to keep in their Units a reasonable number of common household pets, such as dogs, cats, aquarium fish and birds. Pets should not be kept, bred or used for any commercial purpose and should be restrained from running free on any Common Elements except when in transit and being carried or on a leash. As set forth in the Bylaws,

any pets being or causing a nuisance or an unreasonable disturbance to any other occupant of the Community may be permanently removed from the Community promptly upon notice given by the Board or Managing Agent. Buyers shall be responsible for the immediate and proper disposal of all fecal matter of their pets. Buyers should review the Bylaws and Community Rules as they limit the types of "pets" permitted in the Community.

Declaration of Restrictive Covenants. Each Unit within the Community is sold subject to all of the covenants, conditions and restrictions contained in the Community Declaration. This Disclosure attempts to summarize important provisions set forth in the Community Declaration.

Construction Claims. State statutes limits how a Buyer may make a claim against a contractor. Before making an arbitration claim for defective construction against the contractor who designed, repaired or constructed the Unit, Buyer must serve on the contractor a written notice of any alleged construction defect ninety days before filing an arbitration claim. The contractor has the opportunity to make an offer to repair and/or pay for the alleged defects. Buyer is not obligated to accept any offer made by the contractor. There are strict deadlines and procedures under the law and failure to follow them may negatively affect Buyer's ability to file an arbitration claim.

Mediation & Arbitration. Buyer understands that by purchasing a Unit in the Community, Buyer agrees to resolve any disputes with Seller, the administrator and insurer under the Limited Warranty, builder, contractor or others concerning the purchase of the Unit by way of mediation and arbitration without resort to the courts.

Property Condition. Buyer expressly acknowledges and agrees that, as part of the ongoing process of new home construction, it is standard procedure for Seller to routinely test, modify, alter and adjust, if necessary, all systems, structures and improvements installed in, on or to the Unit, including but not limited to, pipes, wires, circuits, switches, plumbing, truss systems and other construction systems, drywall, tile, carpet, flooring, windows, window blinds, cabinets, shingles, shutters, gutters, downspouts, doors, locks, air-conditioning, insulation and heating. Buyer further agrees that any adjustments, modifications or alterations so made are not "material facts" as defined by Hawaii Revised Statutes Chapter 508D, and that Seller will not, and is under no obligation to, disclose any such adjustment, modification or alteration. Nothing in this paragraph shall be construed to create any warranty, express or implied, beyond the Limited Warranty as defined in the Community Declaration.

Buyer Obligation To Investigate. Nothing contained herein is intended to be a complete disclosure of all facts, which Buyer may wish to consider in buying a Unit in the Community. Buyer is still obligated to conduct his/her own full investigation of all facts relevant to him/her in deciding where and when to buy. Buyer is hereby advised to seek the advice of independent tax, legal, and financial consultants.

Disclosure To Subsequent Purchasers. When Buyer sells his/her unit, Buyer is required to provide to the subsequent purchaser(s) any documents provided in conjunction with the original sale of the Unit, including, but not limited to, information that Buyer has regarding the Unit, the Community, and overall Community, the information set forth in this and any other disclosures provided by Seller to Buyer and any other information that may be of value to the subsequent purchaser(s), including, but not limited to, the Master Declaration and the Community Declaration.

Preferred Provider Agreements. The Master Association has entered into a Preferred Provider Agreement with Hawaiian Telcom Services Company, Inc. ("**Hawaiian Telcom**"), which may provide Buyer with a discount on a variety of Hawaiian Telcom services, including set top boxes, wifi, TV, and high-speed internet for which Hawaiian Telcom will be afforded special marketing rights at Ho`opili. The Master Association also plans to have Hawaiian Telcom provide wifi for the community parks and community centers.

Unit Owner Responsibilities Regarding Payment of Certain Fees. Without limitation of other disclosures provided for in this addendum or in any of the other Community Documents as to the payment of certain fees, dues and/or charges, Buyer expressly acknowledges and agrees that, in addition to the monthly common expense fees for the Community and other items as described in the Community Declaration or other Community Documents, each Unit Owner is solely responsible for payment of the following:

Water and Sewer Charges. Water and sewer usage to the Unit is submetered. The Board will send Buyer a bill for the amounts due based on submetered readings. During any period a Unit's submeter is not yet operational, the Board may bill such Unit owner on an interim basis for water and sewer charges based upon a fair and equitable manner, as determined by the Board. The Board may bill Buyer for water and sewer charges in conjunction with the monthly common expense statement, or on a schedule determined by the Board. The Board may bill Buyer for water and sewer charges in conjunction with the monthly common expense statement, or on a schedule determined by the Board. In addition to the

water and sewer usage charges, a fee of $10 per unit per month will be added to each Unit Owner's monthly bill to off-set the cost of meter reading and billings services for water and sewer. If Buyer fails to pay the water and sewer assessment, the Board may, in certain circumstances, turn off the water to the Unit.

The term "**Buyer**" as and when used herein, or any pronouns used in place thereof, shall mean and include the singular or plural number, individuals, partnerships, trustees and corporations, and each respective heir, personal representative, successor and assign.

This Disclosure Addendum modifies Buyer's Sales Contract and is binding upon Buyer. Buyer agrees to the foregoing and acknowledges receipt of this addendum on: «SALE-DATE-MONTH-NAME-FORMAT» (date).

MAMAKA AT HO'OPILI
UNIT DEED AND RESERVATION OF RIGHTS

THIS UNIT DEED AND RESERVATION OF RIGHTS ("**Unit Deed**") is made this 25 day of March, 2022, by and between **D.R. HORTON HAWAII LLC**, a Delaware limited liability company, the address of which is 130 Merchant Street, Suite 112, Honolulu, Hawaii 96813 (hereinafter called "**Grantor**"), and **DEXTER JAMES YANIT BARIT, single, and RONNILYN MARTIN CORDERO, single**, both of whose address is **91-968 Ololani Street, Ewa Beach, Hawaii 96706** (hereinafter called "**Grantee**") (hereinafter collectively called "**Grantee**");

Grantor, in consideration of the sum of TEN DOLLARS ($10.00) and other good and valuable consideration to Grantor paid by Grantee, receipt of which is acknowledged, and of the promises and covenants hereinafter set forth and on the part of Grantee to be faithfully observed and performed, does hereby grant, bargain, sell and convey unto Grantee, as **joint tenants**, the premises described in this Unit Deed, and the reversions, remainders, rents, issues and profits thereof and all of the estate, title and interest of Grantor, both at law and in equity, therein and thereto.

The premises hereby conveyed comprise a portion of the Mamaka at Ho'opili condominium community ("**Community**"), as established by the Declaration of Condominium Property Regime of Mamaka at Ho'opili Condominium Map No. 6301 recorded in the Bureau of Conveyances of the State of Hawaii (hereinafter sometimes referred to as "**Bureau**") as Document No. A-79911125, as the same may be amended, restated and/or supplemented from time to time ("**Community Declaration**"). Capitalized terms used in this Unit Deed without definition shall have the meanings assigned to such terms in the Community Declaration. The Community consists of those certain parcels of land situate at Honouliuli, Ewa, City and County

of Honolulu, State of Hawaii, more particularly described in the Community Declaration and in Exhibit A attached hereto, which description is incorporated herein by this reference, together with the improvements located thereon, as more particularly described in the Community Declaration (hereinafter sometimes referred to as "**Property**"). The portion of the Community constituting the premises (hereinafter sometimes referred to as "**Premises**") hereby conveyed is more particularly described as follows:

FIRST:

Unit No. 2 (the "**Unit**") of the Community, as described in the Community Declaration and shown on the plans thereof recorded in said Bureau as Condominium Map No. 6301, as the same may be amended from time to time (hereinafter referred to as "**Condominium Map**").

SECOND:

An undivided **0.008601 (0.8601%)** interest in all common elements of the Community, as established for the Unit by the Community Declaration, or such other undivided interest as hereafter established for the Unit by any amendment of the Community Declaration, as tenant in common with the holders of other undivided interests in and to the common elements of the Community.

TOGETHER with easements appurtenant to the Unit as established by and described in the Community Declaration, including, without limitation, the following:

(a) The right to use those certain limited common elements of the Community, if any, which are described in the Community Declaration as being appurtenant to the Unit, including specifically without limitation the private yard area described as the "Private Yard Area" in the Community Declaration and bearing the same unit number as the Unit hereby conveyed as shown on the Condominium Map; which Private Yard Area shall be encumbered by and subject to rights in the nature of a non-exclusive easement or easements benefiting the Community or other individual units in the Community for the installation, construction, maintenance, repair, and replacement of the abutting unit, if specified herein, and various utility facilities, lines and related components, together with right of access thereto over, on and under such Private Yard Area;

(b) Nonexclusive easements for use of the common elements in accordance with the purpose for which they are intended without hindering or encroaching upon the lawful rights of the other unit owners, subject always to the exclusive use of the limited common elements as provided in the Community Declaration;

(c) Nonexclusive easements for use of the common elements for ingress to, egress from, utility services and elements for support, maintenance and repair of the Unit; and

(d) In the case of encroachments by the Unit upon any other Unit or the common elements, a valid easement for such encroachment and the maintenance thereof shall and does exist in favor of and appurtenant to the Unit for so long as such encroachment continues. In the event any building of the Community shall be partially or totally destroyed and then rebuilt, or in the event of any shifting, settlement or movement of any portion of the Community, encroachments upon any part of the common elements or Units due to the same shall be permitted, and valid easements for such encroachments and the maintenance thereof shall exist in favor of and appurtenant to the Unit for so long as such encroachment continues.

EXCEPTING AND RESERVING AND SUBJECT TO all use restrictions applicable to such Unit as specified in the Declarations, as hereinafter defined, and all easements for encroachments appurtenant to other units as they arise in the manner set forth in the preceding paragraph, now or hereafter existing thereon, and subject also to easements for access to the Unit from time to time during reasonable hours as may be necessary for the operation of the Unit or for making emergency repairs therein to prevent damage to the common elements or to another unit or units or for the installation, repair or replacement of any common elements, as established by and more particularly described in the Community Declaration;

ALL TOGETHER WITH AND SUBJECT TO AS TO FIRST AND SECOND, each and all of the encumbrances, obligations, conditions, restrictions, liens, acknowledgements, covenants, agreements, and other matters and provisions and reserving unto Grantor those easements, exceptions, reservations, and all such other items as may be set forth in that certain Master Declaration of Covenants, Conditions, Restrictions and Easements for Ho'opili recorded in the Office of the Assistant Registrar of the Land Court of the State of Hawaii as Document No. T-9864231, as the same may be modified, amended, and/or supplemented from time to time ("**Master Declaration**" and together with the Community Declaration, "**Declarations**"), as the same may be amended, modified, restated, or supplemented from time to time, the Bylaws of Ho'opili Community Association ("**Ho'opili Community Association**") adopted January 31, 2017, as the same may be modified, amended, and/or supplemented from time to time ("**Master Bylaws**"), the Community Declaration and the exhibits attached to each, the limited warranty ("**Limited Warranty**") delivered to Grantee by Grantor, this Unit Deed, the Bylaws for the Community, recorded in said Bureau as Document No. A-79911126, as the same may be modified, amended and/or supplemented from time to time ("**Community Bylaws**", and together with the Master Bylaws, "**Bylaws**"), and all rules and regulations promulgated thereunder, including without limitation the Mamaka at Ho'opili Community Rules adopted November 17, 2021, as the same may be amended, modified and/or supplemented ("**Community Rules**") and the Condominium Map, all of which are incorporated herein by this reference and which constitute covenants running with the land, equitable servitudes and liens to the extent set forth therein and provided by law, and which are hereby accepted by Grantee as binding and to be binding on Grantee, Grantee's successors and assigns, and as benefitting Grantor and the lands of Grantor surrounding the Premises;

AND FURTHER TOGETHER WITH AND SUBJECT TO AS TO FIRST AND SECOND the benefits and burdens of the reciprocal appurtenant easements for maintenance purposes as between adjacent Private Yard Areas as set forth in the Community Declaration.

AND FURTHER SUBJECT TO AS TO FIRST AND SECOND AND EXCEPTING AND RESERVING unto Grantor, its successors and assigns, perpetual easements and rights of way over, across, under and through the Property and Premises hereby conveyed for roadway purposes and for all utilities (whether public or private or for the benefit of homeowners in the Community) and any public type facility or use, including but not limited to water, drainage (including drainage channels, swales and ditches), sanitary and storm sewers, gas, party walls (including the creation of the same on the Private Yard Area boundaries), refuse, disposal, landscape, maintenance, driveways, parking areas, access roadways, pathways, bicycle paths and pads, alleys, telephone, electricity, cable (including without limitation television transmission facilities), mail centers, mailboxes, security systems, communication lines and systems and electromagnetic and optical transmission facilities and other similar service purposes as Grantor in its discretion may from time to time designate, whether or not the easements or rights of way are for the purpose of serving the Property or other real property adjacent to the Property,

including, without limitation, the reservation of the right to enter upon the Premises and Property to construct, reconstruct (even after recording of this Unit Deed), install, operate, maintain, repair and relocate such lines, wires, circuits, conduits, cables, channels, swales, ditches, mailboxes, facilities and appurtenances for the aforesaid purposes and the right to grant such easements or rights of way to governmental or quasi-governmental agencies, public, quasi-public or private utility or service companies, other private entities, the association of homeowners, if any, or any other homeowner or group of homeowners in the Community or any adjacent community, without joinder or consent of, and without notice to, Grantee or Grantee's mortgagee. These reserved easements include the right to use for the benefit of other portions of the common elements within the Property and the right to use any and all existing utility lines within the Property for such purposes, provided the services therefrom employed to benefit others is submetered. These reserved rights are to be exercised in a manner that will cause the least practicable interference with the Grantee's occupancy of the Premises.

ALSO EXCEPTING AND RESERVING unto Grantor, its successors and assigns, as specified below without notice to or the consent or joinder of Grantee or Grantee's mortgagee, to create and record in the Bureau a File Plan covering the Community land which includes the Property, and to assign to the community land a File Plan lot number, or to record an affidavit of a surveyor containing the metes and bounds for the community land.

TO HAVE AND TO HOLD the same, together with all rights, easements, privileges and appurtenances thereunto belonging or appertaining or held and enjoyed therewith unto Grantee, absolutely and forever and in fee simple, according to the tenancy and estate set forth herein.

Grantor hereby covenants and agrees with Grantee that Grantor is lawfully seized in fee simple of the Premises hereby conveyed; that the same is free and clear of and from all encumbrances except as set forth herein and except for the lien of real property taxes not yet by law required to be paid; that Grantor has good right and title to sell and convey said Premises in the manner set forth herein; and Grantor will WARRANT AND DEFEND the same unto Grantee forever against the lawful claims and demands of all persons, except as herein mentioned.

Grantee hereby covenants and agrees, for the benefit of Grantor, its successors and assigns, that Grantee and Grantee's family, lessees, tenants, servants, guests, invitees, licensees, employees, or other persons who may occupy or otherwise use the Community or the Unit with Grantee's permission will, at all times, observe, perform, comply with and abide by all of the covenants, agreements, obligations, conditions and other provisions herein set forth, and Grantee covenants to indemnify, hold harmless and defend Grantor for any failure to so comply with, observe and perform any such covenant, condition, restriction or other provision contained in this Unit Deed, the Declarations which are incorporated herein by reference, the Bylaws, the Limited Warranty, and any existing or future amendments and/or supplements to any of the foregoing.

By acquiring ownership of the Premises hereby conveyed, Grantee, for Grantee and for Grantee's family, lessees, tenants, servants, guests, invitees, licensees, employees, or other persons who may occupy or otherwise use the Community or the Unit, acknowledges and agrees that Grantee has received, read and understood the Declarations, the Limited Warranty, the Bylaws and the Community Rules; and acknowledges, agrees with and accepts the disclosures, conditions, covenants, easements and reservations of rights contained in the Declarations, the Limited Warranty, the Community Rules, this Unit Deed and the Bylaws; and Grantee hereby covenants and agrees that Grantee will observe and perform all of the terms, covenants,

conditions and provisions required to be observed and performed by an "owner" under this Unit Deed, the Declarations, the Limited Warranty, the Bylaws and the Community Rules; and Grantee further covenants and agrees that Grantee's family, lessees, tenants, servants, guests, invitees, licensees, employees, or other persons who may occupy or otherwise use the Community or the Unit will abide by all of the applicable terms, covenants, conditions and provisions set forth in this Unit Deed, the Declarations, the Limited Warranty, the Bylaws and the Community Rules.

Grantee acknowledges and agrees that the Community is within and a part of an area intended to be developed as a master planned community known as "**Ho'opili**" as described in the Master Declaration and that the Premises hereby conveyed and the Community are subject and subordinate to the terms and provisions of the Declarations.

Without limitation of matters set forth in the Declarations, the Community Rules, the Bylaws, or the Limited Warranty, the respective contents of which shall control over the disclosures regarding the same contained in this instrument, the Declarations and Limited Warranty, among other matters, provide that Grantee, for Grantee and for Grantee's family, lessees, tenants, servants, guests, invitees, licensees, employees, or other persons who may occupy or otherwise use the Community, the Unit or improvements to the Community, acknowledges and agrees that the foregoing documents contain various reservations in favor of Grantor, as "Declarant" under the Declarations, as well as disclosures, covenants, undertakings, waivers of rights, disclaimers, limitations, requirements and restrictions, all of which are binding upon Grantee and all owners of Units within the Community (and in Ho'opili) and which include, but are not limited to: (a) specific limitations, restrictions, and requirements pertaining to the construction, installation, repair, modification, maintenance and/or appearance of improvements, access driveways, landscaping, irrigation, private roadways and common driveways, if any, sewer, drain and electrical improvements and facilities, and boundary fences and walls, among others; (b) specific disclosures and disclaimers concerning the plans for the development and use of all or any part of the Community and/or Ho'opili, which may change at any time without notice to Grantee, and which may include but are not limited to the construction of residential and rental housing being developed in cooperation with the City and County of Honolulu's Department of Planning and Permitting or equivalent State agency as affordable housing available only for purchase or rental by home buyers or home renters satisfying specific median income limitations established by such agency or satisfying specific State or Federal income limitations; (c) specific provisions disclosing and authorizing continued extensive construction and sales activities within and around the Community, which may result in noise, dust, mold, vibration and other nuisances, disturbances, annoyances, hazards and effects, and providing for the acceptance by Grantee of any and all nuisance, irritation, annoyance, inconvenience and risk of damage attributable thereto, and further providing for the agreement by Grantee to suffer and permit all actions and consequences incidental to such ongoing construction and sales activities; (d) specific provisions detailing and disclosing various adverse environmental hazards, conditions or circumstances, including, without limitation, noise, dust, smoke, soot, ash, odor, noxious vapors, mold, surface water runoff, or other adverse environmental conditions described in the Declarations, which may affect the Community, the Unit, and Grantee's use and enjoyment of the Unit, and providing for Grantee's acceptance of the possibility of the occurrence of the same, assumption of the risk of such occurrence and damage attributable thereto, and the express waiver of all claims against Grantor and others arising out of or in connection with such adverse conditions or circumstances, including the right to seek damages or the abatement or elimination thereof; (e) specific provisions detailing and disclosing the potential impacts, including but not limited to traffic, aircraft noise, and the adverse effects from residential, commercial, agricultural, industrial and recreational uses within and surrounding the Community; (f) specific provisions detailing and disclosing the mixed

residential and commercial uses within the Community and Ho'opili and the anticipated presence of schools, universities, churches, library(ies), day care centers, animal kennels and refuges, homeless shelters or transitional shelters, commercial and retail uses, the production of pineapple, sugar cane, diversified agricultural, other agricultural and related uses, and the development of alternative energy projects, possible future bus stop locations and facilities and bus routes (which are not in the control of Declarant), park and ride facilities, rail transit facilities, parks, walkways, pathways, including without limitation public throughways, Festival Street, bicycle paths and pads, government offices, cellular towers, recreational and related facilities and other features common to urban environments, including, without limitation, a Community wide system of bicycle and walking paths and aboveground and underground radio transmission wires and high voltage electric lines, which lines purportedly may emit electric and magnetic fields; (g) specific provisions detailing and disclosing the potential impacts, including but not limited to traffic, noise and the adverse effects, resulting from the location of the Community near the West Oahu campus of the University of Hawaii and a future middle school and future adjacent elementary school, portions of the planned Honolulu rapid transit rail system and guideway, rail station(s), and bus transfer facilities, an "Energy Easement Corridor" adjacent to Farrington Highway, which may contain jet and other petroleum based fuel underground transport lines, and potential widening of roads adjacent to the Community and the extension of roads within the Community to serve future development; (h) specific provisions detailing and disclosing that the Unit may have been previously used for commercial agricultural and farming operations, and in connection therewith, fertilizer and pesticides, among other things, may have been or will be applied and used upon the Property, or lands adjacent thereto and may have a long term effect on the Property, the water, and/or the environment, and (i) specific provisions reserving by or on behalf of Grantor, and/or others various rights and easements affecting the Community and the Unit, and Grantor the right to make specific grants thereof without joinder by Grantee or Grantee's mortgagee.

Without limitation of the foregoing, Grantee acknowledges and agrees that commercial and community agricultural uses are planned in Ho'opili and will be supported by the Ho'opili "Urban-Agriculture" initiative, which will include without limitation, land for commercial farming operations, shared and home gardens, community farms and gardens, civic farms, and urban gardens. The urban gardens are intended to feature edible landscaping throughout certain lands in Ho'opili. Commercial agricultural uses are protected under the Hawai'i Right to Farm Act, Hawaii Revised Statutes, Chapter 165. Grantee further acknowledges and agrees that Grantee shall provide subsequent notice to Grantee's lessees, tenants or assignees of these aforementioned farming operations and practices on adjacent or contiguous land and the protections of such uses afforded under the Hawaii Right to Farm Act.

In furtherance of and without diminution of the foregoing, Grantee hereby further acknowledges and approves (1) the obligations imposed on Grantee pursuant to the terms of the Declarations and the Limited Warranty and (2) the reservation by Grantor of each and all of the following facts, rights and easements:

(a) Grantor, and its agents, successors, mortgagees and assigns, shall have the right and an easement to conduct extensive sales activities on and at the Community, including the use of any improvements or units within the Community owned by Grantor (and any other unit, with the express permission of the owner of such unit) for model homes, sales and management offices, parking and extensive sales displays and activities, and the posting and maintenance of signs and other advertisements relating to such sales activities;

(b) Grantor and its agents, employees, contractors, licensees, successors, mortgagees and assigns shall have an easement over, under and upon the Community, the Private Yard Area and the Unit, as may be reasonably necessary for the completion of improvements to and correction of defects, as that term is defined in the Limited Warranty and other warranty or "punchlist" items in the Community, the Private Yard Area or the Unit;

(c) Grantor and its agents, employees, contractors, licensees, successors, mortgagees and assigns shall have an easement over, under and upon the Community and each and any portion of the Community, including the Private Yard Area and individual units, to create and cause noise, dust, vibration and other nuisances or annoyances created by and resulting from any work connected with or incidental to the development, construction and sale of any Unit or other improvement to the Community, any additional phase to the Community, or any other community which Grantor, its successors or assigns, may develop on property adjacent to or in the vicinity of the Community. Grantee and any other person acquiring any interest in the Community waives any and all rights, claims or actions that might otherwise be asserted against Grantor, its members, managers, agents, employees, licensees, successors, mortgagees and assigns, based on any such noise, dust, vibration and other nuisances or annoyances;

(d) Grantor hereby reserves an easement to enter upon, across, over, in, and under any portion of the Community, including the Private Yard Area, for the purpose of changing, correcting, or otherwise modifying the grade or drainage channels or chambers of any portion of the Community so as to improve the drainage of water on the Community. Reasonable efforts shall be made to use this easement so as to disturb as little as possible the uses of Grantee, to undertake such drainage work promptly and expeditiously, and to restore any areas affected by such work to a sightly and usable condition as soon as reasonably possible following such work; and

(e) There shall be reciprocal appurtenant easements of encroachment as between adjacent Private Yard Areas due to the unintentional placement or settling of shifting of the improvements constructed, reconstructed, or altered thereon (either initially by Grantor or subsequently by Grantee if in accordance with the terms of the Declarations) to a distance of not more than one foot, as measured from any point on the common boundary between said adjacent Private Yard Areas, along a line perpendicular to such boundary at such point; provided, however, in no event shall an easement for encroachment exist if such encroachment occurred due to willful and knowing conduct on the part of a Grantee as opposed to Grantor. These easements shall be for the encroaching improvements and their maintenance (including access to and from the encroachment).

(f) Grantor hereby expressly reserves the rights under Section V of the Community Declaration titled "Reservation to Reconfigure and Delete Land" to reconfigure and adjust the boundaries of the Community and to delete from the Community a portion of the Land covered by the Declaration, at Grantor's sole discretion and without being required to obtain the consent or joinder of any person or persons, including the Association of Unit Owners of Mamaka at Ho'opili, any Unit owner or any Mortgagee, lien holder, any purchaser, or any other person who may have an interest in the Community. Without limitation of the rights reserved to grantor as Declarant under the Community Declaration, upon withdrawal of land from the Community as evidenced by amendment to the Community Declaration in respect of the same, all land withdrawn from the Community and any land consolidated with the Community land to effect such withdrawal by way of consolidation and resubdivision shall be the land of Grantor and any interest of the Grantee, Grantee's mortgagee or their assignees, shall be deemed conveyed and transferred to Grantor.

(g) Grantee acknowledges that the Unit may be affected by a Roadway Landscape Easement Area defined and described in the Community Declaration granted to the Ho'opili Community Association. Unit Owners are prohibited from adding to, altering or modifying the landscape within the Roadway Landscape Easement Area, as further described in the Community Rules and Community Declaration.

(h) Grantee acknowledges that the Unit is benefitted by a Maintenance Easement within an adjacent unit's Private Yard Area, generally located along the boundary of the Unit's Private Yard Area abutting the adjacent unit, and as more specifically described in Section D.6 and Exhibit D-6 of the Community Declaration and reflected on the Condominium Map. Subject to the provisions of the Community Declaration, including without limitation certain notice obligations, Grantee may access the Maintenance Easement area by entering the adjacent burdened unit's Private Yard Area through the burdened unit's carport and a gate in the fencing abutting the carport.

(i) Grantee acknowledges that the Unit is burdened by a Maintenance Easement within the Unit's Private Yard Area, generally located along the boundary of the Unit's Private Yard Area abutting an adjacent unit, and as more specifically described in Section D.6 and Exhibit D-6 of the Community Declaration and reflected on the Condominium Map. Subject to the provisions of the Community Declaration, including without limitation certain notice obligations, the adjacent benefitted unit owner may access the Maintenance Easement area by entering the Unit's Private Yard Area through the gate in the fencing of the Unit's Private Yard Area.

By acquiring ownership of the Unit, Grantee hereby further covenants and agrees, for the benefit of Grantor and its successors and assigns, as follows:

(1) The foundation system for the Unit has been designed in accordance with the recommendations of geotechnical and structural engineers to meet the requirements of the soil and structural conditions and those of local public agencies. The foundation type employed is generally a post-tensioned waffle-mat style slab. Grantee is aware that any alteration to the foundation system made in order to install or modify landscaping or alter gutters, porches, porch materials, or decks for any other reason or purpose may adversely affect the foundation system and/or the moisture or vapor barriers and could damage the Unit. Further, concrete slabs for the Unit may be reinforced with a grid of steel cable installed in the concrete slab and then tightened to create extremely high tension. This type of slab is known as a "Post-Tension Slab". Cutting into any post-tensioned waffle-mat style slab for any reason (e.g., to install a floor safe, to remodel plumbing, etc.) is very hazardous and may result in serious damage to the Unit, personal injury, or both. Grantee agrees that (a) Grantee shall not cut into or otherwise tamper with the foundation slab or perimeter walls; (b) Grantee shall not permit or allow any other person to cut into or tamper with the foundation slab or perimeter walls; (c) Grantee shall disclose the existence of the character of the foundation slab to any person who rents, leases or purchases the Premises; and (d) Grantee shall indemnify, defend and hold Grantor, Grantor's agents, and the Association of Unit Owners of Mamaka at Ho'opili ("**Community Association**"), free and harmless from and against any and all claims, damages, losses or other liability (including attorneys' fees and costs of court) arising from any breach of this covenant by Grantee.

(2) Soils within the Community, including the land below the Unit may have expansive characteristics, which will require special consideration and attention. Grantee understands and agrees that Grantor bears no responsibility for the manner in which Grantee irrigates Grantee's Private Yard Area and the effect of such irrigation on the soils condition. Grantee shall not change

the existing drainage pattern on the Private Yard Area, if any, and any modifications made to the grading or drainage pattern on the Unit and the Private Yard Area, and any modifications made by Grantee to the grading or drainage contours/swales/flowlines of surfaces or subsurface drainage systems, if any, installed by Grantor are made by Grantee at Grantee's own risk. Because any changes made to the grade or contour of the Private Yard Area may alter the drainage flow and cause damage to other improvements within the Community under Ho'opili, Grantee must be sure to properly landscape so water is directed away from the Unit. Grantee must (a) ensure that any construction or alteration of patios, walkways, wall or planters or installation of landscaping or other improvements on the Private Yard Area shall not alter or block the current surface or subsurface drainage systems installed by Grantor and (b) install and maintain appropriate additional drainage and/or gutter systems to accommodate such alterations and improvements. Regular inspection and maintenance must be performed to keep all drainage devices free from dirt, debris and obstructions.

(3) Except as otherwise provided in the Community Declaration, the Community Bylaws, or other rules and regulation promulgated thereunder, Grantee may install "solar energy devices" as such term is used in and subject to the provisions of Section 514B-140 of the Act; provided that, Grantee shall assume all risk and liability in connection with the construction, installation, maintenance, and repair of one or more solar energy devices on any portion of the Unit, including the roof, and such risk and liability assumed by Grantee shall include without limitation the risk that such construction, installation, maintenance and repair may affect or void the Limited Warranty and any existing contractor's guarantee or manufacturer's warranty on any portion of the Unit, including without limitation, the roof, roofing membrane, or roofing material; provided further that, by undertaking the construction, installation, maintenance and repair of a solar energy device on the Unit, Grantee shall release, indemnify, and hold harmless Grantor and any other party as may be required by the Community Declaration, the Community Bylaws, or other rules and regulation promulgated thereunder, from and against all claims, liability, and expense arising in connection with such construction, installation, maintenance, and repair; and provided further that, in its discretion, the Board of the Community Association or a committee constituted thereunder may require Grantee to execute and deliver an indemnification and release in accordance with the foregoing in a form that is satisfactory to said Board or committee.

Grantee acknowledges and agrees that, except for the express written limited warranty described herein as the Limited Warranty, a sample of which is included in Grantor's homeowner manual ("**Homeowner's Manual**"), and as the same may be limited under the Community Declaration, Grantor is not making or offering any warranties, express or implied, with respect to the Property, Premises, Unit, the Private Yard Area, or Community, including, without limitation, any warranties of merchantability, habitability, quality of construction, or fitness for a particular purpose. Grantor expressly disclaims any warranties other than the Limited Warranty, including, without limitation, any express or implied warranties of merchantability, habitability, quality of construction, or fitness for a particular purpose with respect to the Property, the Unit, the Private Yard Area, or the Community. Grantee acknowledges and agrees that the Limited Warranty in respect of the Unit and coverage thereunder may be affected by acts of Grantee, including without limitation, by installation of solar energy devices on the Unit. Grantee acknowledges and agrees that (i) Grantee has received, read and understands the terms of the Limited Warranty and the Homeowner's Manual and is familiar with the coverage and exclusions contained in the Limited Warranty, (ii) Grantee shall abide by all the applicable terms, covenants, conditions and provisions of the Limited Warranty and Homeowner's Manual and (iii) other than the Limited Warranty, Grantor is making no other representations, promises, or warranties of any kind, including, without limitation, any express or implied warranties of merchantability, habitability, quality of construction,

or fitness for a particular purpose with respect to the Property, Premises, Unit, Private Yard Area, or Community. Grantor has established a customer care program (which will be administered by Grantor pursuant to the section in the Homeowner's Manual commonly referred to as the "Customer Care Program" ("**Customer Care Program**")). The Limited Warranty and the Customer Care Program do not cover and Grantee acknowledges and agrees that the Limited Warranty and the Customer Care Program do not cover (i) any consequential damages, including, but not limited to, damage to the Unit or the Community that is caused by a warranted defect (as defined in the Limited Warranty) but is not itself a warranted defect and/or any claims for emotional distress, lost opportunity, profit or time (from Grantee's employment or otherwise), loss of use of the Premises or any other improvements in the Community, the costs of shelter, transportation, food, moving, storage or other incidental expenses related to relocation during repairs of the Unit, or (ii) any appliance, equipment, or other items which are "consumer products" for purposes of the Magnuson-Moss Warranty Act, 15 U.S.C. § 2301, et seq., or which are "consumer goods". The only warranties of such consumer products or goods are those which the manufacturer provides to the purchaser. Information as to such manufacturer's warranties will be provided to Grantee. Grantor does not assume any obligation to service or repair such consumer products or goods. They are included on an "AS IS" basis with Grantee assuming the entire cost of all necessary service, repair, or replacement in the event of defect in quality or performance. With respect to appliances or other consumer products included in Grantee's purchase of the Premises hereby conveyed, this Unit Deed operates as an assignment from Grantor to Grantee of all manufacturer's or dealer's warranties, if any, covering any such appliances or consumer products for the unexpired term thereof to the extent that Grantor has the right and power to make such an assignment. Grantee acknowledges and understands that Grantor is not stating that any such warranties exist, or that such an assignment will be effective, nor is Grantor adopting any such manufacturer's or dealer's warranties or acting as a co-warrantor, but Grantor is merely attempting to pass through to Grantee the benefits of such warranties, if any exist. Grantee specifically agrees that during the term of the limited warranty afforded by Grantor to Grantee under the terms of the Limited Warranty, Grantee shall in each and all instances permit Grantor or Grantor's designated representative and/or the administrator of or insurer under the Limited Warranty or their respective representative to repair any and all items classified by Grantor or the administrator as items covered by the Limited Warranty or provide such alternate coverage in respect of warranted items available under the Limited Warranty, and that Grantee shall have no further rights and Grantor no further obligation to Grantee in respect of such matters repaired or administered as provided in the Limited Warranty.

Grantee, for Grantee, its successors and assigns, and Grantee's family, lessees, tenants, servants, guests, invitees, licensees, employees, or other persons who may occupy or otherwise use the Premises or the Property, improvements to the Premises or the Property, including without limitation the Community Access Drives described in the Community Declaration, acknowledges, covenants and agrees that: (a) Grantor may continue to use the Community Access Drives for construction and sales activities within the Community, which may from time to time result in noise, vibration and other hazards and inconveniences to Grantee; (b) Grantee shall use the Community Access Drives with due care for public and private safety and shall comply with all laws, statutes, ordinances, and all rules and regulations of Grantor, while occupying or using the Community Access Drives; (c) Grantee will not interfere with any work being performed, operations being carried out, or use being engaged in on the Community Access Drives by, on behalf of, or authorized by Grantor; (d) Grantor shall have no liability or obligation of any nature to Grantee, Grantee's family or household members, or Grantee's guests as a result of such persons' entry upon or use of the Community Access Drives or other property owned or controlled by Grantor; (e) Grantee shall indemnify and hold harmless Grantor, and its respective affiliates,

members, managers, officers, directors, representatives, employees and agents, from and against any and all loss, damage, costs, expenses, including attorneys' fees, liability, demands, or causes of action resulting from nuisance, injury, harm or death to persons or property arising out of or in any way connected with Grantee's use of the Community Access Drives, except any loss or damage caused by the gross negligence or willful misconduct of Grantor; and (f) Grantee fully realizes and assumes all risks of using the Community Access Drives, including, but not limited to, the dangers associated with construction equipment and workers on or near the Community Access Drives, the dangers resulting from the condition of the Community Access Drives, and the dangers of collision with other vehicles and pedestrians using the Community Access Drives.

Without limitation of any other provision herein contained, Grantor hereby grants Grantee a non-exclusive right of entry for access purposes over, upon and across the roadway lots ("**Roadway Lots**") more specifically described in Exhibit A attached to this Unit Deed owned by Grantor and/or others; provided, however, that such right of entry shall automatically terminate upon dedication of the Roadway Lots to any governmental authority. Grantee, for Grantee, its successors and assigns, and Grantee's family, lessees, tenants, servants, guests, invitees, licensees, employees, or other persons who may occupy or otherwise use the Premises or Property, or improvements to the Premises or the Property, acknowledges, covenants and agrees that: (a) Grantor may continue to use the Roadway Lots for agricultural uses, construction and sales activities within the Community, which may from time to time result in noise, vibration and other hazards and inconveniences to Grantee; (b) Grantee shall use the Roadway Lots with due care for public and private safety and shall comply with all laws, statutes, ordinances, and all rules and regulations of Grantor while occupying or using the Roadways Lots; (c) Grantee will not interfere with any work being performed, operations being carried out, or use being engaged in on the Roadways Lots by, on behalf of, or authorized by Grantor; (d) Grantor shall have no liability or obligation of any nature to Grantee, Grantee's family or household members, or Grantee's guests as a result of such persons' entry upon or use of the Roadway Lots or other property owned or controlled by Grantor; and (e) Grantee shall indemnify and hold harmless Grantor and its affiliates, members, managers, officers, directors, representatives, employees and agents, from and against any and all loss, damage, costs, expenses, including attorneys' fees, liability, demands, or causes of action resulting from nuisance, injury, harm or death to persons or property arising out of or in any way connected with the right of entry granted by Grantor pending dedication as described above, except any loss or damage caused by the gross negligence or willful misconduct of Grantor; and (f) Grantee fully realizes and assumes all risks of using the Roadway Lots prior to dedication of the Roadway Lots as described above, including, but not limited to, the dangers associated with agricultural and construction equipment and workers on or near the Roadway Lots, the dangers resulting from the condition of the Roadway Lots, and the dangers of collision with other vehicles and pedestrians using the Roadway Lots.

Without limiting the generality of the foregoing, Grantee hereby specifically acknowledges and agrees to all of the reservations of rights and easements as set forth and described in the Declarations in favor of Grantor and Grantor's successors and assigns as "Declarant". By acceptance of this Unit Deed, Grantee hereby consents and agrees to and with Grantor that in order to effectuate the rights and easements reserved to Grantor as aforesaid, Grantor and/or Grantor's assignee shall also have the right to prepare, execute, file, process and record necessary and appropriate papers and documents to establish and grant easements and to make necessary and appropriate amendments of the Declarations, all without further notice to Grantee or Grantee's Mortgagee. By such acceptance, Grantee also agrees to execute all documents and to do all other things as may be necessary or convenient to effect the same; and such acceptance

shall be deemed an appointment of Grantor and/or Grantor's assignee, with full right of substitution, as the attorneys-in-fact of Grantee (and any mortgagee of Grantee) to execute such documents and to do such things on Grantee's (or Grantee's mortgagee's) behalf, which grant of such power, being coupled with an interest, is irrevocable for the term of Grantor's reserved rights and shall not be affected by the disability of Grantee.

Grantee, on behalf of Grantee and Grantee's successors and assigns, agrees that in the event Grantee or any other person with an interest in the Community or the Premises shall have any claim or cause of action arising out of or in any way related to this Unit Deed, except as specifically provided above, the Declarations (and any and all rules, regulations and supplemental declarations promulgated pursuant to the foregoing, and the enforcement thereof), any aspect of the Unit and related facilities or the Private Yard Area as they relate to exposure to the sun, moisture, mold and/or wind and/or adjacent properties, Ho'opili, the Community, the development, construction, quality, sales, marketing, disclosures, financing, delivery of the Unit, Community or improvements thereto, any Private Yard Area or improvements thereto, the Limited Warranty, or each of those items identified in the Limited Warranty, the Customer Care Program, all of which are incorporated herein by this reference, and/or any other aspect of or activity with respect to Ho'opili, the Community, improvements thereto, or the Premises (herein collectively the "**Covered Matters**"), against Grantor and/or any of the Covered Parties defined in the Community Declaration, such claim or cause of action (a "**Dispute**") whether such Dispute is based on contract, tort, or statute, including, without limitation, any Dispute described in the Declarations, whether such Dispute arises before or after the recording of this Unit Deed, shall be resolved by binding arbitration in accordance with the Federal Arbitration Act (9 U.S.C. §1, et seq.) now in effect and as the same may from time to time be amended, to the exclusion of any different or inconsistent state or local law, ordinance, regulation, or judicial rule, by and pursuant to the rules of Dispute Prevention and Resolution, Inc. ("**DPR**") in effect at the time of the initiation of the arbitration (sometimes the "**Arbitration**" or "**arbitration**") after it shall have first been submitted to the process of "Negotiation" and "Mediation" defined in the Community Declaration, and not by a court of law; provided, however, any and all Disputes relating to Unresolved Warranty Issues (as the same is or may be defined in the Limited Warranty) shall be resolved by mediation and arbitration in the manner specified in the Limited Warranty, utilizing the mediator and arbitrator selected under the provisions of the Limited Warranty; provided further that in the event of an arbitration of a Dispute relating to an Unresolved Warranty Issue under the terms of the Limited Warranty, the provisions of the Community Declaration shall apply only to the extent not in conflict with the Limited Warranty. Any such claim or cause of action shall be subject to arbitration, regardless of whether the claim is against Grantor, or the "Covered Parties", defined in the Community Declaration, which include, without limitation, Grantor's real estate broker, agent or attorney, the architects, engineers, or other design consultants for the Community, the contractor, subcontractors, sub-subcontractors, material suppliers or other persons involved with the Community, their officers, directors, agents, servants, employees or representatives, the managing agent, if any, and their respective officers, directors, agents, servants, employees or representatives, provided that such person(s) agrees to or has agreed to arbitrate such disputes; or if such claim or cause of action is filed jointly and severally against other parties, it shall be subject to arbitration whether or not such other parties are willing to submit to arbitration as provided in this Unit Deed. Any arbitration shall be conducted in the County in which the Premises is located and notwithstanding anything contrary contained in the Limited Warranty, any such Arbitration shall be conducted at the office of the arbitrator. No punitive damages shall be awarded in any claim against Grantor or any other Covered Parties; provided however in the event such limitation is determined to be invalid or unenforceable then such limitation shall be severed and this Deed shall be construed as if such limitation were omitted and shall not affect

the other provisions hereof. Further, no award for damages attributable to emotional distress or a multiple of actual damages based upon any theory of law may be awarded by the arbitrator in any claim against Grantor or any of the other Covered Parties. The award rendered by the arbitrator shall be final.

Grantor and Grantee mutually agree that this instrument may be executed in counterparts, each of which shall be deemed an original, and said counterparts shall together constitute one and the same agreement, binding all of the parties hereto, notwithstanding all of the parties are not signatory to the original or the same counterparts. For all purposes, including, without limitation, recordation, filing and delivery of this instrument, duplicate unexecuted and unacknowledged pages of the counterparts may be discarded and the remaining pages assembled as one document.

Grantor and Grantee mutually agree that the terms "Grantor" and "Grantee" as and when used in this Unit Deed, or any pronouns used in place thereof, shall mean and include the masculine, feminine or neuter gender, the singular or plural number, individuals or corporations, and each of their respective heirs, devisees, personal representatives, members, managers, successors, successors in trust and assigns, according to the context thereof. If this Unit Deed is signed by two or more persons or parties as Grantee, all covenants of Grantee contained in this Unit Deed shall be deemed joint and several. Each and every acknowledgment, acceptance, appointment, agreement and covenant of Grantee contained in this Unit Deed shall run with the Premises hereby conveyed and constitute an equitable servitude and lien thereon, and each and every person or party hereafter acquiring from Grantee any interest in such Premises shall be deemed to make such acknowledgements, acceptances, appointments, agreements and covenants by and upon such acquisition.

EXHIBIT A

All of that certain parcel of land in the residential subdivision known as "Mamaka at Ho'opili" situate at Honouliuli, District of Ewa, City and County of Honolulu, State of Hawaii, more particularly described as follows:

LOT 53001, as shown on the map prepared by Wilfred Y.K. Chin, Land Surveyor with Controlpoint Surveying, Inc., dated June 19, 2019, revised November 17, 2020, approved by the Department of Planning and Permitting, City and County of Honolulu, Subdivision File No. 2019/SUB-122, on February 12, 2021 ("**Subdivision Map 2019/SUB-122**"), and containing an area of 4.885 acres, more or less, as described in Declaration of Subdivision (Ho'opili Phase 10A Subdivision) (DPP File No. 2019/SUB-122), dated March 5, 2021, recorded in the Bureau of Conveyances of the State of Hawaii ("**Bureau**") as Document No. A-77410004 ("**Subdivision Declaration 2019/SUB-122**"); and

LOT 103 as shown on map prepared by Wilfred Y.K. Chin, Land Surveyor, approved by the Department of Planning and Permitting, City and County of Honolulu, Subdivision File No. 2020/SUB-223, on February 4, 2022 ("**Subdivision Map 2020/SUB-223**"), and containing an area of 4.591 acres, more or less, as described in Declaration of Subdivision (Ho'opili Phase 13 Subdivision) (DPP File No. 2020/SUB-223), dated February 10, 2022, recorded in the Bureau as Document No. A-80820189 ("**Subdivision Declaration 2020/SUB-223**") (both Lot 53001 and Lot 103 being a portion of deregistered Lot 20159, as shown on Map 1698 of Land Court Application No. 1069 of the Trustees under the Will and of the Estate of James Campbell, deceased, having been deregistered and recorded in the Bureau as Document No. A-72410580).

Together with easements for water purposes in, on, over and under the easement areas granted by and described in GRANT OF EASEMENTS (WATERLINE) dated September 5, 2006, filed in the Office of the Assistant Registrar of the Land Court of the State of Hawaii ("**Land Court**") as Document No. 3485394, recorded in the Bureau as Document No. 2006-173177, subject to the terms and provisions contained therein.

Together also with access over Lots 20156, 20157 and 20158, as shown on Map 1698, to Lots 20145 and 20142, as shown on Map 1693, to Lot 10067-B-1-B, as shown on Map 1523, and then to Kualakai Parkway, a public road, as set forth by order filed as Land Court Document No. T-10837271, on September 3, 2019; provided, however, that in the event that any roadway lots are conveyed to the State of Hawaii, the City and County of Honolulu or other governmental authority, said right of access as to said roadway lots so conveyed shall immediately terminate.

-AS TO LOT 53001:-

Together also with access over Lots 53003, 53004, 53005 and 53006 as shown on Subdivision Map 2019/SUB-122; Lots 19952, 19953 and 19954 as shown on Map 1672; and Lots 19776 and 19778, as shown on Map 1665; provided, however, that in the event that any roadway lots are conveyed to the State of Hawaii, the City and County of Honolulu or other governmental authority, said right of access as to said roadway lots so conveyed shall immediately terminate.

-AS TO LOT 103:-

Together also with access over Lot 53004 as shown on Subdivision Map 2019/SUB-122; and Lot 19953 as shown on Map 1672; provided, however, that in the event that any roadway lots are conveyed to the State of Hawaii, the City and County of Honolulu or other governmental authority, said right of access as to said roadway lots so conveyed shall immediately terminate.

Together also with access over Lot 108 as shown on Subdivision Map 2020/SUB-223; Lot 19954 as shown on Map 1672; and Lot 20155 as shown on Map 1698; provided, however, that in the event that any roadway lots are conveyed to the State of Hawaii, the City and County of Honolulu or other governmental authority, said right of access as to said roadway lots so conveyed shall immediately terminate.

Being a portion of the premises acquired by:

TRUSTEES' LIMITED WARRANTY DEED WITH COVENANTS AND RESERVATION OF RIGHTS

15. Bylaws of Ho'opili Community Association dated January 31, 2017, as the same may be amended, supplemented and/or restated.

END OF EXHIBIT A

NANAINA AT HO'OPILI
DISCLOSURE ADDENDUM

Nanaina at Ho'opili Community. The Bluffs at Nanaina is the marketing name being used by Seller in connection with the sale of homes within the Nanaina at Ho'opili residential subdistrict ("**Community**"). The Community is a fee simple residential community consisting of approximately 57 single family detached homes. The Community is located at Ho'opili, Oahu, Hawaii.

Sales Contract. This Disclosure Addendum supplements The Bluffs at Nanaina Fee Simple Home Purchase Agreement (herein, "**Sales Contract**") and is part of that legally binding agreement. Defined terms used in the Sales Contract are sometimes used in this Disclosure Addendum and have the same meanings here.

SCOPE OF DISCLOSURE. THIS DISCLOSURE ADDENDUM IS NOT EXHAUSTIVE IN SCOPE. BY ENTERING INTO A SALES CONTRACT BUYER IS ENTERING INTO A LEGALLY BINDING AGREEMENT. BUYER SHOULD READ AND FULLY UNDERSTAND THE CONTENTS OF EACH AGREEMENT MENTIONED IN THE SALES CONTRACT, INCLUDING, BUT NOT LIMITED TO, THOSE DOCUMENTS CONTAINED IN THE DOCUMENT PACKAGE FOR THE COMMUNITY AND HO'OPILI. THESE DOCUMENTS ARE CALLED THE "**COMMUNITY DOCUMENTS**" AND EACH DOCUMENT WILL AFFECT BUYER'S SUBSTANTIVE RIGHTS AND OBLIGATIONS. THIS DISCLOSURE ADDENDUM ATTEMPTS TO HIGHLIGHT SOME BUT NOT ALL OF THE IMPORTANT PROVISIONS OF THE COMMUNITY DOCUMENTS AND TO PROVIDE BUYER WITH OTHER INFORMATION. IN THE EVENT OF A CONFLICT BETWEEN THE COMMUNITY DOCUMENTS AND THIS DISCLOSURE ADDENDUM, THE COMMUNITY DOCUMENTS SHALL CONTROL. HOWEVER, WHERE THIS DISCLOSURE ADDENDUM PROVIDES FOR ADDITIONAL, DIFFERENT OR EXPANDED COVENANTS OR OBLIGATIONS WHICH ARE NOT CONTAINED IN THE COMMUNITY DOCUMENTS, THIS DISCLOSURE ADDENDUM SHALL CONTROL.

BUYER UNDERSTANDS AND ACKNOWLEDGES THAT THE MATTERS CONTAINED IN THIS DISCLOSURE ADDENDUM AND OTHERWISE IN THE SALES CONTRACT REPRESENT A GOOD FAITH EFFORT BY SELLER TO DISCLOSE CERTAIN INFORMATION THAT MAY AFFECT BUYER'S DECISION TO PURCHASE THE PROPERTY, BUT THAT THESE DISCLOSURES ARE NOT INTENDED TO BE AND SHOULD NOT BE REGARDED BY BUYER AS A COMPLETE DESCRIPTION OF ALL MATTERS THAT ARE OR MIGHT BE RELEVANT TO THE OWNERSHIP AND USE OF THE PROPERTY. BUYER ALSO UNDERSTANDS THAT THIS DISCLOSURE ADDENDUM CONTAINS A RELEASE PROVISION THAT HAS LEGAL CONSEQUENCES. Buyer understands and acknowledges that the activities in and around the Community affect the use and enjoyment of the Property and represents and warrants to Seller that Buyer, in Buyer's sole discretion, based on Buyer's independent investigation, has determined that the benefits of owning and enjoying the Property outweigh such detriments and risks. Buyer hereby covenants and agrees to assume all risks of impairment of the use and enjoyment of the Property, property damage and personal injury arising from activities affecting the Community. The terms of this Disclosure Addendum shall survive occupancy of the Property by Buyer and the recordation of the Deed and shall be binding upon and inure to the benefit of the parties and their respective heirs, personal representatives, successors and assigns.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Community Documents. Buyer is strongly encouraged to carefully read the Community Documents applicable to the property Buyer is purchasing (sometimes "**Property**" and/or "**Home**" and/or "**Lot**"). Without limitation, the Community Documents, as the same may be amended, modified and/or supplemented, include the: (1) Master Declaration; (2) Master Association's Articles and Bylaws; (3) Design Guidelines (including any supplemental Design Guidelines applicable to the Community) comprised of the Ho'opili Design Guidelines described in the Master Declaration ("**Ho'opili Design Guidelines**"), Ho'opili Urban Design Plan ("**Ho'opili UDP**") and any supplemental design guidelines; (4) to the extent applicable to the Community, Ho'opili Commercial Use Guidelines and Ho'opili Signage Guidelines defined in and pursuant to the Master Declaration; (5) other related materials adopted by the Master Association, including any Ho'opili Community Rules; (6) Sales Contract; and (7) Deed. For convenience only, certain Ho'opili Community Documents may be available for viewing on Ho'opili Community Association's website at https://hoopilihoa.com/docs/.

Master Planned Community. The Ho'opili Community is a master planned community encompassing several residential and mixed use communities, condominiums, commercial and other related facilities. Ho'opili is planned to have many subdistrict areas, including some 17 single family residential subdistrict areas, which may contain other uses. Nanaina at Ho'opili is a single family community that makes up the Nanaina at Ho'opili residential subdistrict. Additional homes may be included in the Nanaina at Ho'opili residential subdistrict in the future. By purchasing a home in the Community, Buyer

agrees that Buyer, Buyer's family, lessees, tenants and guests will observe and obey the terms, covenants, conditions and provisions contained in the Master Declaration, the Ho'opili Articles and Bylaws, the Ho'opili Design Guidelines, the Ho'opili Community Rules, if any, as well as those terms, covenants, conditions and provisions set forth in the Community Documents.

Effect of Master Declaration. The Community is or will be developed and operated according to the rules, agreements, conditions, restrictions and other limitations affecting the Community and Buyer's Property set out in the Master Declaration. The Master Declaration also reserves for others certain rights in the Community lands, so that these rights are not part of what Buyer will own when purchasing a Home and Lot. For example, the Property interests above and below the surface of the Community and Buyer's Lot, such as water rights, were, are or will be owned by others and/or used for other purposes. As such, the Master Declaration directly affects Buyer and Buyer's Property. In purchasing a Lot Buyer understands and agrees that the ways in which Buyer may use Buyer's Property is limited and that ways in which others may use other parts of the Community or adjacent lands may affect Buyer and Buyer's Property.

Design Review. Seller and the County retain design review and approval authority over all developments in Ho'opili, pursuant to the Ho'opili UDP and Ho'opili Design Guidelines. In order to assist in the review of projects and interpretation of provisions of the Ho'opili UDP, Seller has established a Design Advisory Board ("**DAB**") comprised of professionals in various fields including but not limited to architecture, planning, landscape architecture and engineering to review project plans. As an accommodation, the authority of the DAB to administer and to enforce the Ho'opili UDP and the Ho'opili Design Guidelines with respect to proposed improvements by Owners and commercial users within the Ho'opili Community has been delegated to the Ho'opili Design Review Committee established pursuant the Master Declaration (herein, "**DRC**" or "**Design Review Committee**"), which may adopt such design guidelines and rules, as determined appropriate by the DRC, specific to any land use classification within Ho'opili and which may otherwise contain specific provisions that vary from one portion of Ho'opili to another depending upon the location, unique characteristics and intended use thereof.

Plot Plans. Buyer may be provided with a "plot plan" prepared by Seller for the Property, which will show certain information specific to the Property, such as the approximate location of utility connection points and building setbacks. The Property may also be subject to landscape, utility, sign monument, mailbox and other easements not shown on the plot plan. Street monuments and other items including, but not limited to, cluster mailbox units, lamp posts, handholds, fire hydrants, electrical transformers and utility boxes, easements, and other facilities may or may not be located as may be shown on the plot plan for the Property. Both before and after the Property is conveyed to Buyer, Seller shall have the right to revise the plot plan for the Property to show new or revised items affecting the Property and/or other portions of the Community.

Date of Disclosure. Information in this Disclosure Addendum is current, to the best of Seller's knowledge, as of the date of publication set forth in the bottom left hand corner of this page. The information contained herein was collected from sources deemed to be reliable. While Seller has made every effort to obtain the most recent and accurate information, Buyer should rely solely on Buyer's own investigation and the investigation of Buyer's agents in making a decision to purchase. As information can change rapidly, Seller also encourages Buyer to contact the agencies and named individuals at the addresses and phone numbers listed for the most up-to-date information.

Closing. Completion dates are ALWAYS and ONLY estimates. Early occupancy is NOT ALLOWED. Early delivery of furniture is NOT ALLOWED.

Loans. Closing of any loan that will finance Buyer's purchase is Buyer's responsibility. Buyer's sales representative will assist, but each Buyer must stay in contact with such Buyer's lender so that loan approval is obtained in accordance with the time frames provided in the Sales Contract and Closing coincides with building completion. Buyer must be in a position to close escrow on the transaction within five (5) days after Buyer's Home is ready for occupancy. Delay interest charges may be charged if these deadlines are not met and/or Seller may cancel the Sales Contract.

Financing. The primary lender will be DHI Mortgage Company, Ltd. ("**DHI Mortgage**"). DHI Mortgage is an affiliate of Seller. Buyer should review the special disclosure regarding DHI Mortgage. Buyer should be aware that DHI Mortgage may offer special rates and incentives and if the loan is approved by DHI Mortgage and closed utilizing the settlement services of DHI Mortgage, Buyer shall be entitled to purchase a package of related settlement services at a discounted price. Also, because of its knowledge of the Community, DHI Mortgage should be able to approve Buyer's loan quickly. Buyer is not required to use the affiliated company as a condition of Buyer's purchase of the Property or Buyer's access to settlement services. Buyer may use any lender Buyer wishes. However, Seller has not reviewed or approved any lender's sales or marketing materials, and does not make any representations or warranties whatsoever regarding any matters set forth therein or Buyer's ability to obtain any financing under any particular terms. Buyer is strongly encouraged to make Buyer's own independent evaluation of the rates and loan programs offered by all lenders. Buyer understands that the

interest rate and loan fees for the loan applied for will be determined at the time of the Close of Escrow and may be higher or lower than on the date Buyer signed the Sales Contract to purchase Buyer's Home. Buyer also acknowledges that the interest rate, loan fees estimates or quotations that may have been provided to Buyer are for illustrative purposes only and do not constitute a binding commitment. If Buyer has chosen to make a loan with a lender with whom Seller has arranged a loan commitment, the interest rate quoted may not be available unless the loan closes by a certain date. Seller is not responsible if, for any reason, including construction delays, Buyer's loan does not close on time to obtain a guaranteed rate.

Lot Numbers. The Lot numbers that are referenced in this Disclosure Addendum are the Lot numbers that appear on the subdivision map for the Community ("**Subdivision Map**"). The legal Lot numbers may differ.

Model Homes.

Decorator Items. One or more but not all Homes to be offered for sale by Seller may be available for viewing by Buyer as a model home (each, "**Model Home**"). These Model Homes show generally the configuration of certain Homes that may be constructed by Seller in the Community, but are not necessarily identical in construction or configuration to homes bearing the same model designation. The Model Homes may reflect typical or different exterior elevations, floor plans, workmanship and methods of construction, but may differ from the Home you purchase. Your Home will not be constructed to the precise specifications or design of any Model Home. The exterior elevations, architectural treatments, floor plans and colors shown on any master plans on display at the office of Seller may be different than those displayed in the models. Room dimensions, square footages, cabinetry and countertops in kitchens, bathrooms and laundry areas, etc., plumbing and electrical fixtures, door types, door hardware, shower walls, closet doors, appliances, tile and floor covering, bathroom accessories (faucets, shower heads, etc.), window types, and electrical and cable outlet placement may also vary from Model Homes, the plans and/or your Home. By way of example, Model Homes may have window coverings which are not included in the purchase price of the Home. Seller's warranty and representation as to the similarity between the Home being purchased and a Model Home constructed by Seller is limited strictly to design and configuration (subject to variance in horizontal measurements permitted by construction tolerances (+/- 2%) and not to similarity of appearance dependent upon particular decorations, furnishings or landscaping, or the location of wall switches, electrical outlets, thermostats, chases, plumbing and similar items (which may vary from the Model Home). You should note that the Model Homes you may have seen have been professionally decorated and landscaped to present an attractive appearance to prospective buyers and will differ from the Home you are purchasing. Certain landscaping features may not be permitted under the Master Declaration. Variations in floor plan, paint schedules and landscaping are to be expected. Buyer should also be aware that model homes in other communities developed by Seller may contain features or have been constructed in a manner different from the Model Homes in this Community.

The Model Homes may show the types of features that could be incorporated into the Homes and may be helpful in providing purchasers with possible decorating ideas. Model Homes may display certain fixtures and furnishings, which MAY be identified as "Decorator Items". These are not available to purchasers even upon payment of an additional charge. In certain instances, decorator items may not be marked. Buyer should further be aware that window coverings are not included in the purchase price of a Home even though they may be installed in the Model Homes. Decorator items (such as furnishings, draperies, built-in shelves and lighting) and landscaping and hardscaping (such as entryways, lanais, and spas) are displayed only to suggest ideas to buyers. All such options and upgrades displayed in Model Homes (including, decorator items, landscaping and hardscaping) are not included in the purchase price for your Home unless expressly agreed to in writing by Seller. If Buyer has any questions regarding which items, such as light fixtures, may be purchased as an option or come with the Home, they should consult a Sales Representative and make sure the item in question is addressed in writing in the Sales Contract.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Materials and Construction. Buyer should be aware that homes in the Community are constructed and fabricated with various materials and may include steel and wood framing components. Wood framing components include such items as stud framing in certain locations, blocking, posts plates, beams and roof trusses, among others. Seller may substitute materials, fixtures, equipment and appliances of substantially equal quality as (a) those specified in the plans and specifications for Buyer's Home or models and/or (b) the standard items displayed in the Model Homes. As a result, Buyer's Home may be constructed completely of wood framing materials. Seller also reserves the right to change the location of electrical switches, gas meter, if applicable, and water meter, plumbing chases and outlets, windows, and the like and the right to make any changes in construction (e.g. plan changes, field

changes or otherwise) which it deems appropriate, such as the substitution of wood and metal framing. Buyer understands that asphalt shingles are subject to cracking if walked on or struck by an object. In addition, Seller has the right to make changes in construction and as may be required from time to time by any lender, government agency, or as may be required by any law or regulation, by labor, material or utility availability, shortages, or stoppages or by any emergencies. Buyer accepts all of these changes. Buyer understands and agrees that any available rebates in connection with the installation by Seller of ENERGY STAR or other energy-efficient appliances or devices, including photo-voltaic, solar and EV devices, in the Home or at the Community shall belong to Seller.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Construction Plans. Copies of construction plans for Buyer's Home are available for inspection prior to Closing. However, Buyer should be aware that the construction plans will not include field changes (changes made during construction, which occur regularly) nor the changes described above. As a result, construction plans will not reflect the as-built condition of the Home.

Dimensions and Square Footages Are Estimates Only. Lot and Home dimensions and square footages are approximate. Buyer should be aware that any statement regarding the dimensions of rooms or square footages of Homes or other areas are approximates only. Buyer may not rely upon any written brochures and other sales documents or oral statements by Seller or Seller's agents regarding the exact square footage of Buyer's Lot and Home.

Homeowner's Manual/Orientation/Keys. At the time that Buyer signs the Sales Contract Buyer will receive Buyer's Homeowner's Manual. Please take time to review this manual completely. This manual should be brought to any meeting regarding option selections, Buyer's home orientation meeting and walk-through inspection of Buyer's new home. If Buyer has any questions please ask Buyer's sales representative. Seller will schedule an appointment with Buyer to conduct a home orientation tour of Buyer's new home prior to Closing. At that time Seller will review with Buyer the Homeowner's Manual and Seller's Limited Warranty. Buyer should advise Seller's warranty service representative of any concerns Buyer may have about Buyer's new home during the course of the home orientation tour. By doing so, delays in Closing may be avoided. Keys to Buyer's new home will be available after recording of the Deed. Buyer acknowledges that the Homeowner's Manual contains certain operating instructions and maintenance requirements and schedules for certain components of Buyer's Home, including, without limitation, information relating to mold and mildew. Buyer must review and comply with any and all operating instructions, maintenance requirements and schedules for Buyer's Home contained in such Homeowner's Manual.

Elevations and House Plans. In order to provide diversity for the street scene, Seller's architect may have produced more than one exterior elevation for the front, side and rear of each floor plan. Due to this and due to certain variations caused by construction techniques and methods, Buyer may notice size, scale and proportional interior and exterior changes from the Model Home or other Homes in the Community from Buyer's particular elevation. These may include such items as ceiling heights, sloped ceilings, veneer treatments, window locations, window types and sizes, gutter and downspouts, interior and exterior wall and roof lines, color schemes and front porch dimensions. It is the responsibility of Buyer to inspect the Property and consider the differences in the elevations and other features of Buyer's Home prior to Close of Escrow. Buyer acknowledges that Buyer has had the opportunity to review the floor plan and elevation and interior details for the Home Buyer is purchasing, all as shown on the building plans located in the sales office. Seller may alter, add or delete any house plans for homes to be constructed in the development.

Accessory Dwelling Units; One Dwelling Per Lot/Park Declaration. Buyer has purchased a Lot on which only a single dwelling unit may be constructed under the terms of the Master Declaration. Buyer acknowledges and agrees that pursuant to rights reserved to Seller under the Master Declaration, and as provided in the Sales Contract and Disclosure Addendum, Seller has or will record and encumber the Lot with that certain Declaration of Restrictive Covenants (Park Dedication – One Dwelling Per Lot) of which, together with the Master Declaration, restrict the improvement and use of the Lot to only a single dwelling unit and/or prohibit the improvement of the Lot with an accessory dwelling unit ("**ADU**"), absent advance written consent from Declarant pursuant to an appropriate Recorded Supplemental Declaration. Buyer specifically acknowledges and agrees that, absent advance written consent from Declarant pursuant to an appropriate Recorded Supplemental Declaration, Buyer may not construct an accessory dwelling unit on the Lot, which accessory dwelling unit includes a separate kitchen, bedroom and bathroom facilities, attached to or detached from the primary dwelling unit on the Lot, even if permitted by law or the County's Department of Planning and Permitting. The restrictions noted herein are or will be an encumbrance affecting the Lot. Buyer shall indemnify, defend and hold Seller harmless from any liability, claims or expenses, including attorneys' fees, arising from or relating to Buyer's failure to abide by the terms contained herein and the noted declarations. This provision will be set forth in Buyer's Deed for the Lot.

No Guarantee About Development. Seller does not make any representation that the Community will be developed as proposed. Seller reserves the right, at any time and without notice, to modify its development plan for the Community, including, but not limited to, changing the style, size, square footage, density, exterior elevations, color schemes, construction schedule and/or phasing of the homes in the Community. The Model Homes are displayed for illustrative purposes only and such display does not constitute a commitment to complete the development with the same or similar homes. Seller may also sell all or any of the Property in the development to another builder, who may change the house plans, square footage, elevations, features, materials or designs of the homes.

Buyer Information and As-Built Conditions. In connection with Buyer's purchase of a home in the Community, Seller may provide Buyer with sales literature, which may include such information as elevations, lot dimensions, set-backs, house orientation, driveway locations, utility structures, rear yard dimensions, easements, etc. This information is intended for general informational purposes. There may be discrepancies between this information which is provided to Buyer and the actual as-built conditions. If there are such discrepancies, the as-built conditions will control.

Additional Information About Buyer's Home.

1. **Front Doors**. Front doors will vary by elevation and floor plan. Standard doors included with the purchase of Buyer's Home will vary in style to suit different elevations. Certain door styles, such as distressed or antiqued for decorative accent, may differ in appearance from the doors installed on the Model Homes.

2. **Color Variations**.

Paint - Buyer should confirm with Buyer's sales representative what interior colors will be used in the Home. Regarding white walls, it must be remembered that there are many shades of white. Buyer should not assume that the Home will be painted any shade of white shown in the Model Homes. Model interior paint colors are chosen by the model decorators and are not necessarily what will be used in Buyer's Home. Buyer should also be aware that variations in wall texture and drywall taping may be more obvious where gloss, semi-gloss, and/or luster paint is used and may appear more obvious at different times of the day or night depending upon the lighting in Buyer's Home.

Grout –The elements of nature including, but not limited to, sun, temperature, food, or chemical reactions may, combined with the aging process, change the color of the grout in varying degrees from time to time. In the event of repairs or replacement of tile or grout in the future, the replacement grout and/or tile probably will not match the color of the original tile or tile grout.

Countertops - Samples are small select cuts from a slab; they do not exhibit all the characteristics of a design and therefore are not fully representative of what will be installed in your Home. Variations in the color, pattern, size, shape and shade are inherent and unique characteristics to be expected with this product. This does not affect the product performance in any manner. Certain colors are meant to be used as accents rather than a main work surface. Furthermore, the pattern may not always match at the seams and there may be variations between the deck surface and backsplash. These items are not covered by the warranties of Seller, the countertop fabricator, and the countertop manufacturer. Your countertop will not be replaced due to these variations.

3. **Fire Prevention/Carbon Dioxide Detection**. Smoke detectors will be installed in Buyer's Home in accordance with County requirements. Combination smoke and carbon dioxide detectors may also be installed in Buyer's home if required by the building code(s). Smoke detectors and/or combination smoke/carbon dioxide detectors, as applicable, must be maintained by Buyer and maintained in accordance with manufacturer's recommendations provided to Buyer at the homeowner orientation tour. Emergency contact is not automatically made when a smoke alarm and/or combination smoke/carbon dioxide detector is sounding, so Buyer/occupant is charged with calling the proper emergency number upon the occurrence of an emergency.

4. **Driveways and Garages**. The shape and dimensions of the garages and driveways for the homes in the Community may not be standardized. Driveways may vary in size, shape, length and/or configuration from the model driveways or from what is shown on any depiction of the Community. Any lot within the Community designated as a "Flag Lot" in connection with the subdivision of the Community is subject to Section 21-4.20(a) of the LUO, which requires that the access drive serve only the "Flag Lot" and have a minimum width of 12 feet. Some of the garages may require Buyer to maneuver a lengthy driveway to enter and exit the garages. Parking of vehicles in the garages may also require Buyer to maneuver a vehicle back and forth in order to enter the garage. There may be certain obstacles (i.e. pillars, Buyer's Home,

fencing, improvements, etc.) that may make it difficult to maneuver a vehicle into and out of the driveway and garage. Seller is not responsible for any damage to any home, including Buyer's Home, landscaping, pillars, fencing or any other improvement incurred during Buyer's or Buyer's guests or visitors maneuvering of the driveway and/or parking of a vehicle in the garages. It may not be possible to maneuver certain types of vehicles on the driveways and into the garage. Not all garages will accommodate all vehicles (especially full size models and sport utility vehicles) due to the shape, size, configuration and location of the garages, garage doors, driveways and homes. Also, parking of the maximum number of cars for which a garage was designed may block or make it difficult to access any storage area (if any) in the garage or to the Home from the garage. Buyer acknowledges that it is Buyer's responsibility to determine whether the size and location of car spaces in the garage of the floor plan of the Home selected by Buyer are adequate and appropriate to park Buyer's vehicles. Buyer should also confirm where street parking is permitted. Please realize that in many instances the Master Association's Board of Directors may limit parking on private streets and on streets dedicated to the County, the County may restrict parking on public streets.

5. **Drywall**. Some shadowing in Buyer's drywall may occur at different times of the day or night depending upon the lighting in Buyer's Home, especially on curved walls. Also, if gloss, semi-gloss, and/or luster paint is used on walls, the variations in drywall taping and wall textures (sometimes called "flashing" in the painting industry) may be visible and appear more obvious depending upon the time of day and lighting in Buyer's Home. These variations are within industry standard.

6. **Air Conditioning**. Seller will install as a standard item a central ducted air conditioning system(s) to serve the home. Buyer understands that the air conditioning condenser(s) may be located in a different area than shown in the models or on other plans or exhibits. The specific location of compressors at the Community may result in sound transmission that may affect Buyer's Home. Buyers should be sensitive to excessive noise and possible disturbance to neighbors. Buyers, not Seller, are responsible for the unit's quiet operation. Buyer understands that even with screening, air conditioning units may emit noise levels unacceptable to some people. Buyers agree to assume all risks of such noise emissions.

7. **Satellite Dishes**. Satellite dish antennas may be installed and used within the Community only to the extent permitted by law. Where possible, all components of the system should be concealed from public view and be placed on the side of the home not facing the adjacent road. The system should not be visible from the front yard of the Home. In instances where Buyer can demonstrate that installation on the rear of the Home would cause an unreasonable expense increase in the expense of installation, maintenance or use, or would prevent reception of acceptable signal quality, installation in a location where the satellite dish is visible from the Street may be appropriate. Submission of documents supporting Buyer's position that installation in a location visible from the Street is appropriate shall be made within thirty (30) days of installation. The Design Review Committee may retain its own expert to confirm that installation on the rear of the Home causes an unreasonable expense increase in the expense of installation, maintenance or use, or would prevent reception of acceptable signal quality. Such installation shall only be made in accordance with the Declarations, Ho'opili Design Guidelines, and any other recorded restrictions and governmental requirements. However, if installed Seller has provided no assurances or guarantees that any satellite dish or other antenna installed within the Community will remain unobstructed. Buyer should understand that antennae signals may become obstructed by the installation and maintenance of Improvements within and outside of the Community including homes, walls, fences, trees and other landscaping.

8. **Building Code Changes**. Periodically, governing agencies change building codes and other requirements; therefore, as construction proceeds, future homes may be constructed differently in order to meet these updated or revised regulations. Seller reserves the right to change elevations, designs, or other elements of the construction process at its sole discretion. Seller is not responsible for providing any certification Buyer may request or require concerning compliance of construction of the home with building codes or other requirements.

9. **Electrical Outlets in Garage**. The building code requires that electrical outlets in garages be provided with ground fault interrupter circuits. These circuits are not intended for use with any appliances, especially refrigerators, freezers and aquariums or on any service that an interruption of electrical power would cause a problem. Seller strongly recommends that Buyer not use garage circuits for appliances or for any service (such as freezers) that would be harmed by an interruption of electrical power. Seller cannot be held responsible for the contents of appliances which are damaged because of the ground fault interrupter switches shutting off power, nor can Seller be held responsible for damage to the appliance units themselves. Please check with an electrician for further information.

10. **Fencing**. Buyer should be aware of what fencing or walls may be constructed surrounding Buyer's Home, if any, and the fences Buyer will be required to maintain. The exact size, type and location of Buyer's fence or wall will be determined at the time of fencing installation.

11. **Concrete Products**. Cracks will occur in any stucco, EFS, and plaster exterior. This is normal in all cementitious materials. Certain elevations incorporate a "smooth trowel" plaster finish. Buyer should be aware that this finish is particularly susceptible to cracking. Cracking does not affect the structural integrity of Buyer's Home and is part of the natural look of stucco and plaster. Poured on grade concrete is prone to a certain amount of cracking as it cures over time. Such cracks can be minimized by scoring, but they cannot be completely avoided.

12. **Dryer Vent System**. The dryer vent system in the homes has been installed pursuant to the design instructions of the manufacturer of the dryer being offered by Seller. If Buyer does not select the dryer being offered by Seller at the time of purchase (or installs a new dryer in the future), Buyer understands that the design of the dryer vent system may not conform to the dryer being installed by Buyer as each dryer manufacture has its own dryer vent system requirement. Prior to the installation of a dryer by Buyer, Buyer should review the manufacturer's dryer vent system requirements to verify that the dryer vent system installed in the Home conforms to the manufacturer's requirements.

13. **EV Use**. The Home's garage is "EV Ready" which means the Home's garage is provided with a junction box and 6/3 electrical cable to the breaker panel for the future installation of an electrical car charging station that may be installed by Buyer. The Breaker panel will have reserved slots to accommodate an additional 110V or 220V for future expansion.

14. **PV Ready.** The Home is "PV Ready" which means the Home is "pre-plumbed" for installation of a photovoltaic system ("PV System") post-closing by Buyer in that a photovoltaic conduit will be/has been installed from the electric panel into the Home's attic. The PV System pre-plumbed improvements by Seller do not penetrate the insulation in the attic or the roof deck of the Home, but permit future re-routing by Buyer's PV System contractor. Seller provides no assurance that the installation of a PV System will be permitted under practices, regulations or rules adopted by Hawaiian Electric Company ("HECO"). Buyer should confirm with HECO whether such a system may be installed at the Home. Buyer acknowledges and agrees that Seller makes no warranty or representation concerning electrical expense savings a Buyer may obtain through the installation of a PV System, the efficiency of any solar energy (hot water and photovoltaic) system, which are dependent on a myriad of factors including, without limitation, system quality, weather, orientation to the sun, the size of the system capable of being installed on the roof of the Home, or the impact such installation may have on the integrity of the roof system. If Buyer elects to have such a system installed and the installation is authorized by HECO, Buyer must utilize a certified licensed photovoltaic system installer and should consult with the installer regarding the size and location of the PV System as the design of the roof or roof orientation may not be optimal for the PV System. Before commencing any installation effort, Buyer must secure any and all necessary permits required to allow such installation and obtain all necessary approvals of such activity in accordance with the Ho'opili Design Guidelines. Buyer should review the Ho'opili Design Guidelines closely and should provide a copy of the Ho'opili Design Guidelines to Buyer's photovoltaic contractor before installation of such a system.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

15. **Plumbing, Electrical and Air Conditioning Lines**. Buyers should use caution and care when hanging items on walls by, among other things, using a stud finder or other device or consulting with a contractor or other professional, to ensure studs are used so as not to puncture plumbing, electrical or air conditioner lines within the walls of the Home.

16. **Safe Room.** The Home will include a "residential safe room" in accordance with applicable codes. The intent of the safe room as provided in such applicable codes is to temporarily provide an enhanced protection area, fully enclosed within a dwelling or within an accessory structure to a residence, which is designed and constructed to withstand the wind pressures, windborne debris impacts, and other requirements of such applicable codes. Buyer should use caution and care when undertaking any alterations or improvements to the safe room, including but not limited to the installation of a closet system and/or shelving, and Buyer shall be responsible to verify with Buyer’s contractor or other professional that any such alterations or improvements do not compromise the safe room’s compliance with applicable codes.

Limited Warranty.

Generally. Seller will provide buyers with Seller's Limited Warranty (herein, sometimes, "**Limited Warranty**") covering Buyer's new Home at Closing. Seller makes no warranty or guarantee, express or implied, except as specifically set forth in the Limited Warranty. A copy of the Limited Warranty is in Buyer's Homeowner's Manual ("Everything You Need to Know About Your New Home") Buyer will receive at the time of Buyer's purchase. The Limited Warranty describes Seller's repair and warranty obligations, the procedures for making a warranty claim and the procedures for the settlement of disputes.

Exclusions. In order for the Limited Warranty to be effective, common sense maintenance of Buyer's Home is required. Buyer should review the Limited Warranty to become familiar with specific exclusions. By way of example, the Limited Warranty does not cover non-structural cracking of the Home's drywall, foundation slab or non-structural variations from level in foundation slabs or upper story sub-floors. Standard construction techniques and the applicable design for the Home's drywall and foundation slab second story sub-floor may result in a degree of non-structural cracking or "spider" cracking in the drywall and slab and may result in modest variations from level in the slab and sub-floor. Although certain foundation slabs will contain contraction joints to minimize cracking, such cracking is inherent in concrete construction. Variations from level on second floor sub-floors are filled and patched with an adhesive floor leveling agent. Further, in the case of concrete slabs, hard surface floor coverings (wood, marble and ceramic tile), where permitted, may also crack or reflect the effect of foundation slab cracking. There is no Limited Warranty coverage for these circumstances. To minimize this risk, Seller recommends that hard surface floors, where permitted, be installed over a "slip sheet" available through Buyer's flooring supplier. In conformance with home construction standards, the rafter tails will not be caulked unless there is a gap between the rafter tails and the fascia in excess of 1/8 of an inch. By signing the Sales Contract and this Disclosure Addendum, Buyer accepts these conditions with respect to the Home. Buyer should review the "Preconstruction Conference Confirmation Form" prior to the home orientation tour to become familiar with Seller's standards and specifications.

Options.

Generally. All option items are subject to adjustment in price and quality if such items become unavailable for reasons beyond Seller's control. Buyer will be required to make a deposit, which is **non-refundable**, on all selected option items. Seller reserves the right not to install any selected options until Buyer receives loan approval. Once option selections are completed, Buyer and Seller agree that the final purchase price is to be amended by execution of the Final Sales Price Addendum to include options.

Insulation. Where insulation is installed, Seller will install Kraft Faced, friction-fit, flexible batt or blanket fiberglass insulation batt insulation with an R-value (or R-value equivalent) of R-19 in the attic of the home during construction. Unfaced, friction fit, thermal batt insulation with an R-value (or R-value equivalent) of R-13 is installed in the exterior walls of living spaces and in any floor system between the garage and living spaces during the course of construction. No representations are or may be made that Buyers of homes in the Community will save on household expenses as a result of any house insulation.

Utilities/Phones/Cable. Buyer needs to contact the electric, phone and cable companies. Seller takes no responsibility for cable or telephone installation. Buyer should notify Hawaiian Telcom, Inc. or Spectrum, as applicable, in advance to schedule installation on or after recordation of Buyer's Deed. No early installation will be permitted. Buyer shall be responsible for initiating the commencement of any service from a utility company such as water, electricity, telephone and cable television (if available) upon or after the Closing Date. If Seller receives any bills for utilities that are attributable to the period after the Close of Escrow, Buyer shall reimburse Seller for such payments within ten (10) days after receipt of a statement from Seller. Seller is not affiliated with a cable company or with any other utility companies (i.e., water, gas electricity, telephone service, etc.), and has no control over the rates or the services furnished. The Board of Water Supply ("**BWS**") water distribution system (specifically, the Honouliuli, Waipahu, Kunia and Hoaeae wells) services Ho'opili. Seller has no control over the water pressure available at Buyer's Home. Seller does not make any representations as to when or if cable services will be available nor as to the quality of television reception or cable services. Seller has no control over timing of meter installation once final inspection has been performed. Seller also has no control over the location and placement of public utility structures and facilities. All locations of the utility structures and facilities are final, and Buyers shall not tamper, move or damage these structures and facilities. Buyer is to check with Buyer's sales representative to determine whether any utility structures or facilities are located within or in the vicinity of the Home Buyer is purchasing.

Real Property Taxes. Buyer understands that, as of October 1, 2022, the date of valuation used by the City and County for the 2023-2024 fiscal year (July 1, 2023 to June 30, 2024), the land comprising the Community was a portion of the land covered by TMK No. (1) 9-1-017-212, 13.433 acres, and is classified as Residential A for the 2023-2024 tax year as such land was vacant at the time of valuation and valued by the City and County at more than $1,000,000. Accordingly, the Real Property Assessment Division of the City and County of Honolulu ("**RPAD**") is assessing the Community as a single parcel and/or as part of a bulk parcel(s) for real property tax purposes for the 2023-2024 County fiscal year and will send the tax bill for the 2023-2024 tax year for the Community to Seller after Closing, notwithstanding the subsequent assignment of Tax Map Key ("TMK") identification numbers to Buyer's Lot and the lots in the Community in May 2023.

As of October 1, 2023, the date of valuation used by the City and County for the 2024-2025 fiscal year (July 1, 2024 to June

30, 2025), the lots are being individually assessed. While the 2023-2024 annual real property tax rate for residential property classified Residential is $3.50 per $1,000.00 net taxable value of the property, the real property tax rate for residential property classified Residential A is $4.00 per $1,000.00 net taxable value of the property up to $1,000,000 and $11.40 per $1,000.00 net taxable value of the property in excess of $1,000,000. To the extent the City and County assesses the value of the Property in excess of $1,000,000, the Residential A classification and real property tax rate may apply to the Property for the 2024-2025 fiscal year. Payments are due on February 20 and August 20 each year. Payments are due on February 20 and August 20 each year.

Once an individual lot is conveyed by Seller to a third party, an owner-occupant may be eligible for a home exemption that reduces the net taxable assessed value used in determining and/or affects the real property tax classification of and rate applicable to the Property. Please see the City and County of Honolulu Department of Budget and Fiscal Services Real Property Assessment Division of the City and County's website at https://www.realpropertyhonolulu.com/ for general information regarding real property taxes and https://www.realpropertyhonolulu.com/media/1683/residential-a_17.pdf for specific information regarding the Residential A classification. An owner-occupant Buyer may only make a claim for a homeowner exemption on or before September 30th preceding the tax year for which the exemption is claimed. The basic home exemption is currently $100,000.00 and will increase to $120,000.00 commencing with the 2024-2025 tax year. For homeowners 65 years and older the home exemption is $160,000. Currently, to qualify for the "senior" exemption, Buyer must be 65 years or older on or before June 30 preceding the tax year for which the exemption is claimed. These tax rates are approximate only. For further information and to confirm the actual rate, Buyer may contact the Real Property Tax Office at (808) 768-3799.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Schools and Related Matters. The Community is located in the Leeward School District. The Leeward District telephone number is (808) 692-8000. The schools for this Community are determined by the Department of Education and are subject to change. Although various elementary schools, a middle school and a high school are planned in Ho'opili, it will be a number of years before construction of those improvements by the Department of Education.

Refuse Collection. Buyer understands that in order to receive postal and trash services, mailboxes and trash containers may need to be located only in those areas designated for these purposes. Trash pickup in certain communities may be by private contractor.

Postal Service/Mailboxes. The United States Postal Service ("USPS") will not deliver mail to the Home (or to any other home in the Community). Mail will only be delivered to the designated cluster mailboxes, which may be limited to a single location within or in the vicinity of the Community. Seller expects that the cluster mailbox system for the Community will be located in the mail/utility lot located in Nanaina at Ho'opili adjacent to Hikupau Street, pending the approval of the USPS. The USPS requires that at least 50% of the homes and roads within the Community be built and may impose additional conditions before mail services will commence. Buyers will need to arrange for temporary mail service via either a general delivery service through the post office in the area or purchase a post office box at any post office until the requirements of the USPS, which are subject to change, are met by Seller.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Property Maintenance and Condition. All homes and the land within the Community, including the land below Buyer's Home, may have expansive soils, and, as a result, improvements, including the Home and the driveways, walkways and other improvements may be subject to various types of distress including subsidence, settlement or lifting. Further, the land within the Community has been graded. Soil has been removed and added to reach the land's finished height and form, and non-expansive fill has been placed under structural improvements, with underlain expansive soils. Please refer to the Soils Condition and Drainage Addendum for further disclosures and recommendations. The Property is subject to subsidence, settlement or expansion due to the presence of expansive soils and fill material. Except for limited soil borings, Seller has not investigated the soils below the limits of grading and as result soil below the limits of grading may contain items installed during periods of agricultural use, such as, without limitation, drainage, irrigation and sewer lines which have been abandoned in place. Buyer also acknowledges that standard construction techniques and applicable designs for the foundation slab may result in a degree of non-structural cracking or "spider" cracking within the slab and that certain slabs will contain crack control joints. Buyer accepts such slab cracking. Certain non-structural cracking or swelling of drywall joints at windows, doorways and other locations with the Home may also be visible, should subsidence, settlement or expansion occur. Buyers must be especially sensitive to landscape watering, avoid over watering and ponding of water, and must abide by the recommendations for maintenance set out in this Disclosure Addendum in order to minimize the risk of these occurrences. Landscaping is also important and will reduce the incidence of erosion attributable to wind or rain.

Buyer understands and acknowledges that Buyer will be acquiring the Property in "AS IS" condition at the time of closing. Except as expressly set forth herein, Buyer is relying and will rely solely upon Buyer's own inspection and investigation of the Lot and the land of the Community, and is not relying and will not rely in any way upon any representations, statements, warranties, or other information or material furnished by Seller or its representatives, whether oral or written, express or implied. Buyer should also be aware that soils within the Community may be corrosive in nature.

Soil. The suitability of the soil contained within this Community for the planned construction was determined by Geolabs, Inc. A copy of the soils report for this Community is also available for review in the Sales Office.

Easements. Buyer is aware that there may be easements which affect the Community and Buyer's Property. These easements are noted in the Master Declaration, the exhibit to the Deed, the title report, the Subdivision Map, File Plan, if any, and/or the plot plan for the Lot. Specifically, Lots on Ho'oluana Drive will be subject to landscape easements benefiting the Master Association. A subdivision monument or monuments and/or cluster mailbox system may be included within this landscape easement area and may affect certain lots. There may also be landscape easement areas within the Community roads.

Drainage Facilities and Easements. Surface water drainage in the Community is directed to the streets servicing the Community utilizing certain surface drainage facilities, which may include lined and unlined ditches and swales, affecting various Lots in the Community. Buyer may not alter and must maintain the existing drainage pattern on any Lot, nor shall any Buyer modify any existing drainage facility located on Buyer's Property. Failure to maintain the existing drainage pattern or altering the scope of the drainage pattern on Buyer's Property may adversely affect Buyer's Home and/or adjacent lot. Saturation of the ground or ponding around foundation slabs may result in expansion or lifting of soils beneath the slab and settlement when the ground dries. Gutters, downspouts (directing water), splash guards, lined swales and pipe conduits should be considered if not included in the purchase of the Home or purchased as an option by Buyer, if available. Buyer shall maintain the existing drainage pattern on Buyer's Property. Buyer of a Property on which any drainage ditch facility, concrete swale, or portion thereof is located shall be responsible, at Buyer's cost, for the maintenance, repair and cleaning, as required, of the drainage ditch facilities located on Buyer's Property. The scope and extent of swale facilities within drainage and flowage easements is reflected on the approved grading plans for the Community. Buyer understands and agrees that should a swale facility or any drainage or flowage easement be disturbed during construction of a home, Seller may restore the swale in accordance with approved grading plans even after closing of the purchase or sale. This right is reserved to Seller in the Deed and Master Declaration. If Buyer removes, modifies or otherwise alters the established drainage patterns or devices on Buyer's Lot, Buyer may cause significant and permanent damage to Buyer's Home and/or other homes, including but not limited to, damage to the foundation of Buyer's Home or adjacent slopes. Buyer should take precautions by using licensed professionals (e.g., landscape architects, civil engineers, geotechnical engineers, general contractors, etc.) to assure that Improvements such as walkways, landscaping, lanais, decks, planters, etc. are constructed so as not to alter the established drainage of Buyer's Home and/or adjacent lot. Seller shall not be responsible for any modifications or changes to the established drainage for the Lot.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Sewer and Drain Easement. Certain portions of the Community may be affected by an underground sewer and/or drain easement benefiting the Community and/or the County. The County shall be responsible for the maintenance of any underground drainage facilities located on a Property, which are constructed for the benefit of the County. Such easements may not be reflected in the plot plans for the Community. The facilities may be located within the Property and may not be shown on the plot plans.

Sidewalk and Gutter Areas; Street Trees. Buyers shall maintain and keep clean, passable, and free from weeds, debris, and overgrowth the sidewalk, planting strip, and gutter area adjacent to Buyer's Property along roadways that provide vehicular access to Buyer's Lot ("**Internal Roads**"). Before or following the conveyance of the Home, the Master Association or Seller may landscape and plant trees in the planting strip in the sidewalk along Internal Roads ("**Planting Strip Area(s)**" and such trees are "**Street Trees**"). Although not within Buyer's Lot, Buyer is responsible for the maintenance and care of the Planting Strip Area(s) fronting Buyer's Lot, including regularly watering and trimming grass (and replanting as necessary); and regularly watering Street Tree(s). Buyer should not trim, replant or replace Street Trees and should inform the Master Association if such is required. As mandated by the County and the Master Declaration, homeowners may not (i) plant additional trees in the Planting Strip Area, (ii) injure or destroy Street Trees, or (iii) modify the existing ground cover or install alternate ground cover including gravel or concrete in the Planting Strip Area. Any such action without permission from Seller, the Master Association, and the County may result in Buyer having to pay for replacements. Buyer may be required to pay for the replacement of any Street Tree in the Planting Strip Area fronting Buyer's Lot, if necessary to satisfy County requirements. Maintenance of landscaping and trees within roadway rights of way that do not provide vehicular

access to Buyer's Lot, and sidewalks along such roadways, is the responsibility of the Master Association. Buyer should be aware that the County ordinance may have additional restrictions regarding Street Trees and the Planting Strip Area(s).

Planting Strip Watering Easement. The Master Association shall have the right, but not the obligation, to own and maintain irrigation systems in landscaping easements located within Buyer's Lot. Buyer may not modify the landscaping or the irrigation system within such easements.

Sight Distance/View Triangles. A "sight view triangle" may be required by the County on certain corner Lots in order to maintain clear views of traffic at certain intersections. The County limits the height of structures and landscaping within the sight view triangle. If not reflected on the plot plan for the Lot, Buyer will need to confirm with the County Planning Department whether a sight distance/view triangle affects the Lot and limits the landscaping or improvements Buyer may wish to make to the Lot.

Setback Area Easement. Buyer understands and agrees that Seller shall retain an easement over the setback areas of the Lot for the construction and placement of fences, walls and entry signs together with all attendant rights to construct, reconstruct, install, maintain, repair and replace, as appropriate, such structures (including walls, fences, entry signs and the like), facilities and appurtenances as Seller determines necessary, appropriate or expedient.

Electrical and Utility Easements. Utility boxes, transformers, utility lines (above ground and underground), manholes and other utility features, such as structural transformers, transformer and switching vaults are placed throughout the Community and may be located near Buyer's Lot and Home. Certain Lots are affected by landscape and above ground or underground electrical, telephone, gas (if any), and cable utility easements shown on the Subdivision Map for the Community. Buyer should inspect the Lot to confirm the location of these easements and facilities. The location of these facilities depicted on the Subdivision Map is preliminary in nature and these facilities may be sited as required without further notice to Buyers. Electrical and utilities easements run in favor of and will be granted to the electric company, telephone company, gas company, and/or the local cable television provider. Seller has the right to grant these easement areas even after Buyer occupies Buyer's Home.

Use of Easement Areas. Buyer may landscape an easement area(s) as long as Buyer does not interfere with the use of the easement area(s) affecting Buyer's Lot. The grantee of the easement area, whether it is the electric company, the telephone, gas and/or local cable companies, the Master Association, or an agency of the County, will have the right to trim and keep trimmed any plants within the easement area that may be in the way. Also, Buyer may not be permitted to construct other structures in the area depending on the nature of the easement. Such structures may require the grantee's approval. Additionally, should the grantee determine that it must remove any plants or foliage within the easement area, the grantee may NOT be obligated to replace them, but rather will only be obligated to restore the surface of the ground within the easement area as much as the grantee determines is reasonably possible.

Lots Affected by Easements. Buyer's sales agent may have a schedule of Lots affected by easements. Further, a special Easement Addendum to the Sales Contract will identify easements affecting a Buyer's Lot. Such easements will also be reflected in the plot plan for the Home and/or the Subdivision Map.

Digging Generally. Buyer should call 811 before digging anywhere on Buyer's Property to avoid damage to underground utilities. If any digging is contemplated, call the Hawaii One Call Center at 811 at least five (5) working days beforehand. Be sure to give the address and location of the cross street(s) nearest where digging is planned. The Hawaii One Call Center will, at no cost to Buyer, contact all local public utilities to tone, mark or identify the location of underground public utilities. Homeowners are asked to mark the area where excavating is planned in WHITE as the utilities are designated other colors to mark their facilities (yellow for gas, oil, steam, petroleum, or other hazardous liquid or gaseous materials; red for electric; orange for communications, cable TV, alarm or signal lines, cables or conduits; blue for water, irrigation, and slurry lines; purple for slurry and reclaimed water; green for sewers, drainage facilities or other drain lines; pink for temporary survey markings). Buyers are encouraged to visit http://callbeforeyoudig.org/hawaii/index.asp for additional details regarding the Hawaii One Call Center.

Natural Gas. Hawai'i Gas has installed a gas pipeline to a point of connection near the boundary of the Property. The gas pipeline is terminated (i.e., capped) and may not extend beyond this point of connection into the Property, and Buyer must contact Hawai'i Gas as to whether the gas pipeline can be extended to the Home, which work, if possible, shall be at Buyer's sole election, responsibility and expense. Seller provides no assurance that the installation of additional natural gas pipeline(s) to the Home or interior of the Home will be permitted under practices, regulations or rules governing Hawai'i Gas or other natural gas service provider. Regardless, Buyer should always make sure there are no gas pipelines underground where any digging is planned. Digging or running heavy equipment can damage gas lines and striking a gas line may cause

an explosion resulting in personal injury, property damage and/or death. Always have underground gas lines located before beginning any excavation activity, even when conducting minor excavation (e.g., to install a fence or sprinkler system). As discussed above, call 811 before digging and the Hawaii One Call Center will contact all local utilities to tone, mark or identify the location of underground utilities.

If a gas leak is suspected, immediately evacuate the area and contact Hawai`i Gas' emergency department at 808-526-0066 or, if the situation warrants, call 911. Common signs of a gas leak include: odor of rotten eggs; an unusual hissing or blowing noise from the ground or exposed gas; flames near exposed piping or coming from the ground; constant and localized blowing of dirt, dust or debris; rapid bubbling at the surface of a body of water such as a puddle; unusual brown, dying or dead vegetation in otherwise moist areas over or near pipeline areas as well as unusual soil movement.

Buyers are encouraged to visit http://hawaiigas.com/safety/ for additional information regarding gas safety.

Community Common Areas

Collective Maintenance Responsibility. Each Owner in the Community must share in the cost to maintain, repair and replace the Community common areas as described in the Master Declaration ("**Community Common Areas**"). The Master Association may specifically assess the Community owners for the maintenance and repair of these areas.

Community Common Areas. The Community Common Areas include all of those items noted in the Master Declaration and may include, without limitation, the following:

Entrance Landscape and Sign Monument Easement which means and describes the sign monument and landscape features, if any, constructed in the landscape and/or signage easement shown on the Subdivision Map for the Community.

Landscaping Areas along and within the Community Roads and the landscaped areas within the Community as shown on the Subdivision Map.

Common Drainage Facilities which means and describes those facilities, if any, serving to control and direct the drainage of surface water within and the inlets into such facilities, as may be shown on the Subdivision Map.

Mailbox System(s) which means and includes any mail system serving the Community.

Pedestrian Access Lot(s) which means and describes the pedestrian access lot(s) shown on the Subdivision Map, if any, including any improvements, landscaping and irrigation system.

Mail/Utility Lot(s) which means and describes the mail/utility lot(s) shown on the Subdivision Map, if any, including any improvements, landscaping and irrigation system.

Slope Buffer Area which means and describes the slope buffer area located within the adjacent civic farm land immediately abutting the eastern boundary of the Community along Sales Lots 11 through 20, inclusive, 22, 23, and 25 through 40, inclusive ("**Slope Buffer Area**"). The Slope Buffer Area benefits the entire Community by stabilizing and protecting the slope for the entire Community as more specifically described in the Supplemental Declaration Designating Land Use Classification and Subdistrict for the Community (**"Subdistrict Declaration**") and the Slope Buffer Area Addendum. Given the purpose of the Slope Buffer Area (i.e., to stabilize and protect the slope for the Community), very minimal, non-aesthetic landscaping is contemplated in the Slope Buffer Area and may only consist of grass and/or natural vegetation that is cut back on a limited basis (i.e., as infrequent as once a year) and may grow up to three feet tall. Accordingly, as stated in the Slope Buffer Area Addendum, the Slope Buffer Area will **not** be maintained in accordance with the Community Wide Standard (as defined in the Master Declaration).

Access, Utility, and Drainage Easements which include those certain access and utility easements within the Community as shown on the Subdivision Map.

Road(s) which means and describes the roadways within and serving the Community. Road(s) will be included in the Community Common Areas if not dedicated to the County. These areas include the planting

strip adjacent to the curb abutting the road travel surface, as well as the street trees located in the planting strips.

Ownership, Administration and Assessment. The Master Association shall own the Community Common Areas, once deeded to it and must accept the conveyance of the Common Areas from Seller. The Master Association shall be responsible for the management and administration of the Community Common Areas, and may charge the Community owners for the cost to maintain, repair and replace these common areas. The level of service of maintenance of Community Common Areas shall be determined by the Master Association's Board of Directors.

Improvements/Ho'opili Design Guidelines. As specified in the Master Declaration, and the Ho'opili Design Guidelines, ANY exterior improvements to a Home or landscaping of a Lot, painting of Buyer's Home and the construction of fences/walls must comply with the Master Declaration and/or Ho'opili Design Guidelines, if any. The Ho'opili Design Guidelines require that all exterior metal, including gutters, flashing, sheet metal, and vents shall be finished to match or compliment the house/roof color. All vertical and hardscape improvements will need to be approved in writing by the Design Review Committee before the improvement is made. Buyers are responsible to review submittal requirements before design of improvements. Please note that DRC submittals must reflect mechanical screening material color and exterior metal finishes. Before constructing any improvements at the Property like walls or other structures, Buyers and Buyer's contractor must review the Property pins and the plot plan to make sure there are no discrepancies. If there is a discrepancy, please notify Warranty Service before any work is started so they can verify the placement for Buyer. The Property pins may have been moved during the course of surrounding or adjacent construction activities. Seller will not be responsible for any work done on the Property if they are not notified in writing of the discrepancy. Buyers are encouraged to read and review the Ho'opili Design Guidelines, as they will substantially affect Buyer's ability to improve Buyer's Lot. Buyers should note that the Ho'opili Design Guidelines are subject to further revision by the DRC. Before Buyer begins any grading, excavating, filling or constructing any improvements to Buyer's Home (e.g., planters, sidewalks, decks, lanais, lanai covers, landscaping, etc.), Buyer should engage the services of a qualified, licensed professional and Buyer should take necessary precautions in designing and installing such improvements to avoid damage to Buyer's Home and other improvements which may result from existing soils conditions. Please refer to the Soils Condition and Drainage Addendum for further disclosures and recommendations.

Buyer understands, acknowledges and agrees that in-ground/below-grade water features and/or swimming pools are not permitted as a general matter within the Community. Additionally, swimming pools, inclusive of above-ground pools, are not permitted in front yards, which may prohibit an alley-loaded lot from having a pool. (See "Fencing and Walls," below, for more detail regarding "alley-loaded" lots.) As used herein, the term "water feature" is inclusive of ponds, pools, waterfalls and waterwalls, fountains, courses and streams, and similar improvements containing or intended to contain water and typically used as a decorative or ornamental element. As used herein, the term "swimming pool" is inclusive of outdoor Jacuzzis, whirlpool baths, hot tubs, lap pools, plunge pools, and similar improvements containing or intended to contain sufficient water to partially or fully immerse a person.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Fences and Walls. Various Lots in the Community may be sold with either a wooden, wrought iron, vinyl fencing, masonry walls, retaining walls or other type of fencing and walls in place and constructed on the Lot. Pursuant to the Master Declaration, these fences and walls may not be removed and must be maintained and kept in good repair by the Lot owner. Certain Lots within the Community may also have a decorative planting area and/or masonry wall and sign monument identifying the Community. The Master Association shall be responsible for the maintenance of the referenced decorative planting areas, the wall and the project identification monument located on these Lots. If Buyer wishes to move a fence, Buyer must obtain the Master Association's approval as well as the approval of the adjoining Property owner. New fences will also require the approval of the Master Association and DRC and must comply with the County's rules and regulations.

Buyer understands, acknowledges and agrees that the Ho'opili UDP strictly limits the maximum height of fencing and walls. The UDP requires that side yard fencing shall not exceed a maximum height of six (6) feet along the structure of the Home and shall not exceed a maximum height of three (3) feet beyond the structure of the Home toward any road. Rear yard fencing shall not exceed a maximum height of six (6) feet. Buyer acknowledges that the Ho'opili UDP has strict limitations in respect of fencing and walls along the perimeter/front yards of alley-loaded lots which should not exceed a maximum height of three (3) feet. An "alley-loaded lot" means the lot has road-side frontage on both sides of the lot (or if a corner lot, on three (3) sides of the lot), and that therefore such a lot may have two (2) front yards (or if a corner lot, three (3) front yards), and may not have a "side" or "rear" yard.

Additionally, Buyer further understands, acknowledges and agrees that the Ho'opili UDP does not address all fencing scenarios and the Supplemental Ho'opili Design Review Committee Rules and Guidelines for the Community restrict in particular the fencing as to Sales Lots 11 through 20, inclusive, 22, 23, and 25 through 40, inclusive.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Retaining Walls and Other Improvements. All improvements to the Property must be approved by the Design Review Committee. Due to the expansive soils at the Community, all structural improvement or new construction, such as lanais or room additions, must comply with the Ho'opili Design Guidelines. Those Guidelines require the installation of special foundations or structural fill under such improvements. Any such fence or wall or improvement shall be designed and constructed only in compliance with the Ho'opili Design Guidelines and the Master Declaration and shall in all instances conform in design and color (to the extent practicable) with existing fences and walls constructed by Declarant.

Landscaping.

Trees and Planting Strips. Buyer is responsible for properly maintaining all grass planting areas and trees on Buyer's Lot, excluding those within landscaping easements along roadways that do not provide vehicular access to Buyer's Lot. Buyer should be aware that the automatic sprinkler system serving the Lot may run frequently (perhaps three times a day) during the "grow-in" period, typically 60 to 90 days. As a result, Buyer's expense for the water and electricity for the sprinkler system may be higher than expected during the grow-in period. Buyer should contact Customer Care before reducing irrigation to the grass planting areas. Maintenance of landscaping and trees within easements within Buyer's Lot along roadways that do not provide vehicular access to Buyer's Lot is the responsibility of the Master Association and Buyer may not modify the landscaping within such easements.

To comply with the County's requirements and the Community Documents, Buyer must maintain any ground cover and/or tree planted by Seller in the Planting Strip. As mandated by the County and as set forth in the Master Declaration, homeowner's may not (i) prune, remove and/or replace any tree in the Planting Strip Area, (ii) plant trees in the Planting Strip Area, (iii) injure or destroy trees in the Planting Strip Area, or (iv) alter the existing ground cover or install any alternate ground cover or gravel and/or concrete in the Planting Strip Area without permission from Seller, the Master Association, and the County. The pruning, removal, replacement, injuring, destroying of trees and/or altering of any ground covering in the Planting Strip Area without permission from Seller, the Master Association, and the County, will result in Buyer having to replace or pay for the replacement of the tree with a County approved tree and/or ground cover.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Community Disclosures.

Other Development within the Surrounding Area. Buyer understands that Seller does not control the development of the entire surrounding area and that current and future plans for the development and use of all or any part of the surrounding area are under the control of others, and may change at any time before or after Closing of Buyer's purchase of the Property without notice to Buyer. The surrounding community contains or may contain various commercial, residential, recreational and ancillary uses, industrial, including extensive commercial, retail, industrial, multi-family and single-family detached residential subdivisions and rental communities. To date, Seller has conveyed vacant development parcels within Ho'opili to The Hawaiian Humane Society (5.473 acres; B-1 zoned; contemplated use - new West Oahu campus, which and may include indoor and/or outdoor animal kennels), Fred Lau Properties, LLC (1.806 acres; B-1 zoned; contemplated use - not yet determined), HBP Partners LLC (57.190 acres; IMX-1 zoned; contemplated use - industrial business park;) which parcel was conveyed by HBP Partners LLC subsequently conveyed the parcel to Costco Wholesale Corporation),; The Queen's Medical Center (4.901 acres; BMX-3 zoned; contemplated use - ambulatory medicine center), Alaka'i Apartments I LP (11.311 acres; BMX-3 zoned; contemplated use -- The Element market and affordable rental apartments up to 80% of area median income; Alaka'i Apartments I LP subsequently conveyed the parcel to a third party), and The Mutual Housing Association of Hawai'i, Inc. (7.127 acres; A-2 zoning; contemplated use -- Kulia at Ho'opili affordable rental apartments up to 60% of area median income), and AEP GP LLC (3.349 acres; BMX-3 zoned; contemplated use - hotel), all of which parcels may be in various stages of development. Buyer hereby accepts the risk of any changes pertaining to the development and use of all or any part of the surrounding area, and agrees that Seller shall not have any responsibility to Buyer for such changes. Buyer further understands and acknowledges that any descriptions of planned amenities for the surrounding area, which may have been provided to Buyer by Seller or agents of Seller, are for general information purposes only and are subject to change or deletion at any time and

from time to time. Seller makes no warranties or representations regarding the accuracy or completeness of any descriptions of such planned amenities, which may have been provided to Buyer, and no reliance may be placed thereon. Further, as much as thirty percent (30%) of the residential housing in the surrounding area and within the Ho'opili Community has been or may in the future be developed in cooperation with the County's Department of Planning and Permitting or equivalent State or County agency ("Agency") as affordable housing available only to buyers satisfying special median income limitations established by the Agency. Such homes may be sold and/or rented at prices below the market value of comparable homes as determined by the Agency, and may be subject to additional use, occupancy, and transfer/option restrictions.

Condition of Property. Buyer understands and hereby acknowledges that the land of the Community may have been used previously for agricultural and farming operations and in connection therewith, fertilizer and pesticides, among other things, may have been applied and used on the land of the Community or adjacent lands. Buyer also understands that the Property has been graded, soil removed and added to reach its finished height and form, and contains or may contain fill and/or expansive soils, and, as a result, may be subject to subsidence, settlement or expansion. Please refer to the Soils Condition and Drainage Addendum for further disclosures and recommendations. Buyer understands and acknowledges that, as previously stated, Buyer will be acquiring the land underlying the Lot in "AS IS" condition at the time of Closing. Except as expressly set forth herein, Buyer is relying and will rely solely upon Buyer's own inspection and investigation of the Property and the land of the Community, and is not relying and will not rely in any way upon any representations, statements, warranties, or other information or material furnished by Seller or its representatives, whether oral or written, express or implied. Seller makes or gives no warranty, express or implied, concerning the condition of the land. Without limiting the generality of the foregoing, Buyer assumes all risks associated with the condition of the Property, the nature of the soils making up the Property and of hazardous materials on, about, around, under, over or within the Community, including all risks of (a) any and all enforcement, clean up, or other governmental or regulatory actions instituted or threatened pursuant to any hazardous material laws affecting the Community, (b) all claims made or threatened by any third party against Buyer or the Community relating to damage, contribution, compensation, loss or injury resulting from any hazardous materials and (c) Buyer's discovery of any occurrence or condition on the land of the Community or any land adjoining or in the vicinity of the Community which might result in Buyer or the Property being made subject to restrictions on ownership, occupancy, transferability or use of the Property or the Community pursuant to any applicable hazardous materials laws. Furthermore, Buyer specifically waives and relinquishes any and all claims of whatsoever kind or nature based on the condition of the land or the use or presence of any hazardous materials on, about, around, under, over or within the Property, and from and after the date that Buyer acquires title to the Property, Buyer shall hold harmless and defend Seller and its members, managers, stockholders, successors and assigns, from and against all claims, demands, actions, lawsuits, proceedings, fines, penalties, damages, liabilities, judgments, awards, expenses and costs (including attorneys' fees and costs) which may arise out of or may directly or indirectly be attributable to the condition of the land, the soils thereon and therein, and the use, generation, manufacture, treatment, handling, refining, production, storage, release, discharge, disposal, or presence of any hazardous material on, about, around, over or within the Property. As used herein, the term "hazardous materials" includes, but is not limited to, any and all radioactive materials, asbestos, polychlorinated biphenyls ("**PCB's**"), chemicals which cause cancer or reproductive toxicity, pollutants, contaminants, hazardous wastes, toxic substances, and other hazardous substances or materials listed, described or defined in 40 CFR Para. 302, as amended from time to time. Buyer and Seller agree that the covenants and agreements contained in this paragraph shall survive the Closing of the sale of the Property and shall be binding upon and inure to the benefit of the parties and their respective heirs, personal representatives, successors and assigns.

Uses Within and Around the Community. Buyer understands, acknowledges, approves and agrees, as set forth here, and in certain instances in the Declaration(s) and Deed, that: (a) the land of the Community may have been used previously for commercial agricultural and farming operations and in connection therewith, fertilizer and pesticides, among other things, may have been applied and used upon the land of the Community or lands adjacent thereto; (b) noise levels in the Community may exceed noise level standards for residential-zoned areas promulgated by the State Department of Health, and that these noise levels may not be acceptable to some individuals; (c) the Community is located immediately adjacent to properties that are used for the growing, processing, production and harvesting of diversified agricultural products, including corn and other agricultural genetically modified organisms or "GMO" products or related uses and the development of alternative energy projects ("**Agricultural Properties**") that may have a limited buffer area, if any, between the agricultural use and the Community, as well as a variety of commercial and industrial properties; (d) further development of mixed residential (multi-family, single family and affordable), commercial, industrial, recreational utilities facilities/substations and public projects (including without limitation roads, bus stops, railroad, parks, schools,

preschools and day care centers) may be ongoing and may continue within the Community directly adjacent to Buyer's Home and within the Community in the vicinity of Buyer's Property for a considerable period of time after Buyer has occupied the Property; (e) there are or may be a variety of pets within the Community that may not be acceptable to some individuals or may create a nuisance; (f) aboveground and underground radio transmission wires, high voltage electric lines (including, without limitation, aboveground 46kV sub transmission lines) and microwave telecommunications facilities and civil defense tower(s) are located within and around the Community, which lines purportedly may emit electric and magnetic fields; (g) certain lands within the Community may be irrigated with treated effluent, reclaimed water or other sources of non-potable water, and (h) the Property will be subjected to those other uses and circumstances described in this Disclosure Addendum (collectively, all the foregoing uses and circumstances set forth in this Section (Community Disclosures) are described as "**Community Uses**"). Seller has the right, but not the obligation, to develop, market and sell as many affordable homes in the Community as Seller desires. Each Buyer hereby waives any and all claims arising out of the presence of affordable homes, or lack thereof, in the Community.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Surrounding Community Conditions and Uses. Each Lot in the Community may be periodically affected by certain environmental conditions due to historical, existing and prospective surrounding conditions and uses. The land of the Community was used previously for commercial agricultural and farming operations and in connection therewith, fertilizer and pesticides, among other things, may have been applied to and used upon the land of the Community or lands adjacent thereto. The Community is located immediately adjacent to properties which are or may be used for agricultural, farming, animal husbandry or related uses. The Community will also include lots used for agricultural purposes. Further development, construction and sale of residential, commercial, recreational and public projects by Seller and others, which may include changes in use (due to zoning changes or other governmental authorization or otherwise), construction, grading, improvement and maintenance of adjacent and surrounding properties, including roadways, drainage facilities, sewage treatment facilities and the like is ongoing and may continue within the Community and within the vicinity of the Community for an indefinite period. Certain lands within the surrounding area and within the Community may be irrigated with treated effluent, reclaimed water or other sources of non-potable water. The land of the Community is subject to potential adverse soil conditions. Numerous schools and public parks may be built in Ho'opili, and the West Oahu campus of the University of Hawaii is just west of Ho'opili. All of these factors and uses may affect Buyer as a homeowner.

Commercial and community agricultural uses are planned in and integrated into Ho'opili. These uses will be supported by the Ho'opili Urban-Agriculture initiative. Lands within Ho'opili used for agricultural purposes will include, without limitation, land for commercial farming operations, shared and home gardens, community farms and gardens, civic farms, and urban gardens. The urban gardens are intended to feature edible landscaping throughout certain lots in Ho'opili, including lots within the Community. The Community is located immediately adjacent to civic farms that will be held in perpetuity for agricultural uses for commercial agricultural production. Buyer is strongly encouraged to assess the conditions and impact of agricultural uses within the civic farms and elsewhere within Ho'opili on the Community and the Property. Commercial agricultural uses are protected under the Hawai'i Right to Farm Act, Hawaii Revised Statutes, Chapter 165. Homes in the Community may be subject to occasional dust from field operations, pollutants, smoke and debris from agricultural activities in the civic farms and/or other portions of Ho'opili.or feral lands in proximity to the Community, such as fires, odor, noise, and other agricultural cultivation. Buyer shall provide subsequent notice to Buyer's lessees, tenants or assignees of these aforementioned farming operations and practices on adjacent or contiguous land and the protections of such uses afforded under the Hawaii Right to Farm Act.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

The Community may also be affected by traffic, aircraft noise, and adverse effects from the Kalaeloa Community Development District and an expansion of military uses and associated adverse impacts may occur within Kalaeloa and Pearl Harbor. The Community may be affected by airport noise overflight from the Honolulu International Airport and is near an active airstrip in Kalaeloa. Roads adjacent to the Community, which are not under Seller's control may be widened or modified. Significant widening and highway improvements are planned for Farrington Highway which is adjacent to Ho'opili and the construction of intersections within Ho'opili near or around the Community, including Kulanihako'i Street, Ho'omohala Avenue and Kualaka'i Parkway, may also impact the Community as a result of noise, nuisances, annoyances, and other impacts associated with the construction, operation, and maintenance of such improvements. A central hub of the planned Honolulu rapid transit rail system including, but not limited to, a rail station within the Ho'opili Community, one rail station west of the Ho'opili

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Community, portions of the guideway, and possibly park-and-ride and/or bus transfer facilities, will be located in or adjacent to Ho'opili, and the operation of the rail system may result in noise and other impacts associated with the operation of trains and mass transit related uses. Parts of the Ho'opili Community will be subject to Transit Oriented Development regulations and neighborhood plans. An "Energy Corridor" is adjacent to Farrington Highway which may contain jet and other petroleum based fuel underground transport lines as well as aboveground and underground utility lines and electrical lines. The Community may be affected by surrounding operations effects created by or attributable to historical, existing, and prospective surrounding construction, including but not limited to construction of roads/intersections and walls/fences, development, agricultural, pasture, commercial and other non-residential uses and activities, which include, but are not limited to: (a) cane milling, burning, harvesting, tending, as well as fertilization and pest and weed control; or (b) cattle and other livestock grazing and pets that may be objectionable to residents; or (c) transporting of munitions to property owned by the U.S. Navy; or (d) commute and off-hours (non-peak) traffic and parking. Areas surrounding and mauka of the Community may include 24-hour quarrying operations, which operations may include noise from drilling, blasting, and vehicles carrying processed materials.

During the planning of Hoʻopili, HECO determined that three distribution substations would be needed within Hoʻopili to serve the ultimate load for the development. The Kulanihakoi Substation is the first of the three distribution substations planned for Hoʻopili, each including aboveground 46kV sub-transmission line extensions. The two other substations are planned in locations closer to Farrington Highway. HECO is completing/has completed the Kulanihakoi Substation at the corner of Kauluakoko Street and Kulanihako'i Street, together with two aboveground 46kV sub-transmission line extensions through Hoʻopili for the Kulanihakoi Substation. HECO contemplates a future third aboveground 46kV sub-transmission line extension from the Kulanihakoi Substation along Kulanihako'i Street to Kualakai Parkway. Buyer may obtain additional information regarding the Kulanihakoi Substation at: https://www.hawaiianelectric.com/about-us/our-vision-and-commitment/investing-in-the-future/kulanihakoi-substation. HECO has not commenced the planning for the two other substations. Buyers may contact HECO's Call Center at (808) 548-7311 with any questions.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

The Ho'opili Community is a mixed-use development and includes within it and/or in the vicinity, homes, schools, pre-schools, churches, parks, walkways, bicycle paths, government offices, library(ies), day care centers, hospital, urgent care, medical and medical emergency facilities, homeless shelters or transitional shelters, cellular towers, commercial, retail and industrial areas and operations, recreational and related facilities and other features common to urban environments, including without limitation to, a community wide system of bicycle and walking paths, aboveground and underground radio transmission wires and high voltage electric lines, which lines purportedly may emit electric and magnetic fields. Easements shall be retained over the Hoʻopili Community and Community for some or all of the foregoing described uses, including, specifically, easements permitting the commencement, continuation and resulting effects of the foregoing uses, and all activities incidental to such uses.

Further, Buyer is aware that there are numerous materials and components required to construct and used in and around Buyer's Home to which certain individuals may be allergic or especially sensitive. Some of these materials such as paint, wood preservative treatments, insulation materials, glues, mastic, caulk, carpet or the like may cause lingering odors to which people are sensitive. Also, due to the nature of community living, various noises or odors due to elevators, trash areas, storage sheds, plumbing, impact, including, without limitation, traffic, noises from adjacent neighbors, parks and park facilities (such as basketball, tennis and pickle ball courts) and other circumstances may result to which a Buyer may be especially sensitive. Mold and mold spores are also present in the Community and may be present in Buyer's Home. Certain strains of mold may cause adverse health effects in susceptible persons.

The Home is sold subject to these conditions, hazards and risks. Buyer is aware of and understands these risks, accepts them and has decided that the benefits of home ownership in the Community outweigh the detriments of such ownership.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Other Environmental Issues. Mold and mold spores are present throughout our environment and residential home construction is not, and cannot be, designed to exclude mold spores. If the growing conditions are right, mold can grow in your Home. You may be familiar with mold growth in the form of bread mold, and mold that may grow on bathroom tile. All mold is not necessarily harmful, but certain strains of mold have been shown to have adverse

health effects in susceptible persons. The most common effects are allergic reactions, including skin irritation, watery eyes, runny nose, coughing, sneezing, congestion, sore throat and headache. Individuals with suppressed immune systems may risk infections. Some experts contend that mold causes serious symptoms and diseases which may even be life threatening. However, experts disagree about the level of mold exposure that may cause health problems, and about the exact nature and extent of the health problems that may be caused by mold. The Center for Disease Control states that a causal link between the presence of toxic mold and serious health conditions has not been proven. Moisture is the only mold growth factor that can be controlled in a residential setting. The Homeowner's Manual contains recommendations for positive steps and action a Buyer may take following possession of the Home to reduce mold. Buyer agrees to assume responsibility for the recommendations contained in the Homeowner's Manual to act in accordance with the best practice guidelines contained on the Governmental Internet Sites described in the Manual. Buyer further acknowledges that if there is any water damage or water intrusion to Buyer's Home, Buyer will take immediate action to prevent conditions which cause mold or mildew to develop. Also, since energy conservation has become a concern, the State of Hawaii uniform building code, specifically the energy standards, has created the need to build Homes that are more airtight. As a result, these Homes trap unwanted gases in different degrees depending on how each person lives within their Home. To date, measurements of such unwanted gases (such as the radon gas described below) are reported as parts of the air they occupy. Since the quality of air we breathe can affect our health, Seller recommends frequent airing of Buyer's Home by simply opening your windows to introduce fresh air uncontaminated with such gases. The United States Environmental Protection Agency ("**EPA**") has indicated that a number of homes in the United States experience elevated levels of radon gas. Radon is a naturally occurring gas that is caused by radioactive decay of the element radium. Since radium is contained in the earth's crust and dissolves readily in water, radon can be found virtually everywhere and can enter the home through a variety of sources. Buyers seeking information about radon can contact the EPA or a state environmental office. Seller has no expertise in the measurement or reduction of radon in homes or regarding acceptable levels or possible health hazards associated with radon. Seller makes no warranty or representation of any kind, express or implied, regarding the presence or absence of radon gas, or regarding the effectiveness of any architectural activities for reducing the presence of radon.

Non-Potable Water. BWS has required Seller to install separate irrigation water lines intended for non-potable water ("**R1 Water Lines**") in connection with the irrigation of landscaping in Ho'opili. At some point in the future, the R1 Water Lines will carry treated effluent, reclaimed water or other sources of non-potable water. Until then, the R1 Water Lines will carry potable water. The R1 Water Lines will be required to be switched over to non-potable water when directed by BWS in its sole discretion. BWS has not advised Seller of BWS's contemplated timing for the use of the R1 Water Lines for non-potable water. Once BWS determines to implement use of the R1 Water Lines for non-potable water BWS will coordinate the conversion of use with the Master Association. The conversion will require, among other things, installation of a new water meter(s) and signage, all at the expense of the Master Association. Buyer may obtain information regarding the requirements of the Recycled Water Program at http://health.hawaii.gov/wastewater/home/reuse/.

Community Features. In addition to the adjacent agricultural and other uses described in this Addendum, a future elementary school and future middle school are planned west of the Community. Planned commercial and mixed use residential and commercial sites are planned throughout Ho′opili and may be improved with one or more of a medical clinic, school, day care facility or other commercial or retail uses. Private community parks (including the park along Ho'oluana Drive near the Community with exercise equipment and the community park along Kulanihako'i Street, Lonomeha Street and Maunakapu Street), County parks and community gardens, opened to all Ho'opili residents are situate in various locations in Ho′opili. A community park may contain, among other things, a community center, swimming pool, manager's office and unit, pavilion and playground area, a portion or portions of which may be available for use for Community functions. Dogs may be permitted in the park. The Community also contains a mail/utility lot between Sales Lots 41 and 42 (which may include utilities such as drain and sewer lines) landscaping, pathways, mailboxes. Ho′opili contains a temporary detention basin and stockpile areas (including a stockpile area approximately 25 feet high adjacent to Ho'oluana Drive) that will be used for those purposes for an extended period before it is developed. Roadways serving the Community may contain temporary cul de sacs located within the Community that will be removed and the roadways extended when that area is developed in the future. Affordable rental developments are planned within Ho'opili. All of these factors and uses as well as other matters described in the Community Documents may affect Buyer's use and enjoyment of Buyer's Home. The Home is sold subject to these conditions, hazards and risks. Buyer is aware of and understands these risks, accepts them and has decided that the benefits of home ownership in the Community outweigh the detriments of such ownership.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Nuisances Related to Community Uses. Without in any manner limiting the foregoing, Buyer, in purchasing or otherwise taking title to any Property, does so with the express understanding and acknowledgment that the Community and the Property may be periodically affected by various hazards and by noise, dust, smoke, earthshock, soot, ash, odor, mold or mold spores, noxious vapors, the presence and/or transmission of pollutants or other hazardous materials, surface water runoff, or other adverse environmental conditions, including but not limited to those resulting from wind drift and other weather factors (collectively "**Community Use Effects**") created or exacerbated by or attributable to the Community Uses and the historical, existing, and prospective surrounding construction, development, agricultural, pasture, residential, industrial and commercial and other non-residential uses and activities. Buyer specifically approves all of the foregoing uses, circumstances and activities, including changes in use due to zoning changes, other governmental authorization or otherwise (collectively "**Community Operations**"). Buyer is strongly encouraged to inspect the Community and the various Community Operations to assess the impact of these operations, uses and circumstances on the Community and the Property. Buyer covenants and agrees, on behalf of Buyer and the tenants, lessees, family, servants, guests, invitees, licensees and employees of Buyer: (a) to assume and does hereby assume any and all risks associated with the Community Operations including specifically the presence of mold in the Home and the annoyances, inconveniences, impacts on property value or loss of the sale value, Community Use Effects and other nuisances thereby created; (b) to waive and does hereby expressly waive all rights to make any claim against and specifically releases Seller, the owners of the Agricultural Properties and any of their related entities, affiliates, successors-in-title, members, managers, stockholders, or assigns, arising out of or in connection with such activities, annoyances, inconveniences and nuisances, the clean-up or remediation of the same, including but not limited to (i) any claim for damages attributable thereto or for the design or the placement of improvements to the Community, the Property or the surrounding property, or any part thereof, or related or adjacent facilities, or to the orientation of the Home as it relates to exposure to sun or wind, or (ii) claims for the abatement or elimination thereof; and (c) to hold harmless and defend Seller and its affiliates, successors, members, managers, stockholders and assigns, from and against all claims, demands, actions, lawsuits, proceedings, fines, penalties, damages, liabilities, judgments, awards, expenses and costs (including attorneys' fees and costs) which may arise out of or may directly or indirectly be attributable to any and all of the foregoing.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Non-Disclosure of Neighbor's Plans. During the course of the purchase of a home, some buyers disclose information to Seller regarding the potential plans for homes, (e.g., landscape, hardscape, add-ons, repainting plans, etc.) and/or information about personal lifestyles (e.g., pets, interests, hobbies, etc.). Seller will not disclose such information to prospective neighbors. Should Buyer wish to obtain any information about Buyer's prospective neighbors, Seller will, upon Buyer's written request, attempt to place Buyer in contact with Buyer's prospective neighbors, but makes no warranty that Seller will be able to do so or that the information which Buyer may obtain will be accurate.

Adjoining Land Uses. Buyer may have received written disclosures which depict the current and proposed land uses for the properties which adjoin the Community. Land uses are subject to change, and consequently, Seller cannot guarantee whether any information so disclosed is current. Also, land planning and zoning matters are complex and therefore the information which may have been supplied by Seller is not complete. If Buyer is concerned about the type of development that may occur on the adjoining properties, Buyer should discuss nearby land uses with the County Planning Department or the State of Hawaii departments or agencies involved, as may be the case, and otherwise conduct Buyer's own investigation of those matters. THE MARKET VALUE OF BUYER'S LOT IS NOT GUARANTEED BY SELLER AND MAY CHANGE DUE TO ADJOINING LAND USES BY OTHERS, INCLUDING WITHOUT LIMITATION THOSE USES BY THE STATE OF HAWAII AND/OR THE CITY AND COUNTY OF HONOLULU, ALL OF WHICH USES ARE NOT UNDER THE CONTROL OF SELLER.

Grading, Landscaping, and Building Materials. Development of the areas around the Community will cause dust in the Community during grading and landscaping work until adequate landscaping has been installed to minimize blowing dust. Seller will try to minimize the dust from its construction activities. Buyers understand, however, that Seller does not control all construction in the area and that dust is an inevitable result of the ongoing and surrounding construction. The grading of the soil and other elements created by nature, as well as building materials, many times create unwanted and undesired gases and other contaminates in residential and commercial buildings, both new and used.

Disposal of Toxic and Other Substances. Water that enters a storm drain flows directly to natural sources of water, including waterways, creeks, drains, rivers, lakes and that erosion has an impact on the environment. Unlike the water in the sewer system in the Lot which is being purchased by Buyer, which flows to wastewater treatment plants, water that enters a storm drain flows directly, without any treatment, to waterways, creeks, streams, rivers, lakes and/or oceans. Accordingly, the National Pollution Discharge Elimination System, the Regional Water Quality Control Board Orders

covering the Community, and the policies and ordinances of the County prohibit discharging anything other than natural rain water into storm drainage systems, including gutters and streets which drain into storm drains. Toxic chemicals or hydrocarbon compounds such as gasoline, motor oil, antifreeze, solvents, paints, paint thinners, wood preservatives, fertilizers, lawn clippings, yard waste, detergents, pet waste, and other such materials and pollutants shall not be discharged into any street, public or private, gutters, or into storm drains or storm water conveyance systems. Buyer further acknowledges that the disposal of such pollutants and materials into a storm drain system may result in significant penalties and fines and that Buyer may be responsible for any activities by Buyer's contractors (e.g., painters, landscapers, etc.) who dispose of such pollutants from Buyer's Home or Lot into a storm drain system. Use and disposal of pesticides, fungicides, herbicides, insecticides, fertilizers, and other such chemicals shall meet all federal, state, and County requirements and requirements of any other governmental agencies having jurisdiction over the Property. All buyers within the Community are required to comply with such restrictions. Buyers are encouraged to consult with the County, other governmental authorities, and the refuse hauler in the area of the Community concerning the proper disposal of any toxic or hazardous materials. Dumping any such materials into sewers, gutters or storm drains is against the law.

Continued Construction. The construction of homes at the Community and other communities on nearby land will continue for some time. The roadways in and around the Community may be used for ingress and egress to the construction sites. The ongoing construction will cause dust, noise and increased traffic in and around the Community for a period of time. Due to these continuing activities, and notwithstanding dust and noise control measures employed by contractors, you may have to close windward facing windows in your Home during certain times of the day and may have to clean your Home more often. Certain persons may be more sensitive to these activities than others. Also, care must be taken around the construction sites, as hazardous conditions may exist temporarily due to the construction. You have decided to buy your Home knowing these facts and agree, as provided in your Sales Contract, that you will not hold Seller responsible for any damage, annoyance, inconvenience or nuisance you may experience as a result of the ongoing construction activity within the Community and surrounding areas.

Marketing Activity. Seller may continue to market homes in the Community for sale after you move into your Home. Seller may also use the Model Homes to market homes in other Communities. Seller's marketing activities may include operating a model home complex, displaying signs, balloons, flags, banners and conducting on-site events and other promotional activities. The ongoing marketing of homes may cause you some inconvenience and may disrupt your enjoyment of your Home.

Roads. Buyer is aware that the roads shown on the Subdivision Map may currently be private roadways that are proposed to be dedicated to the County as public roadways in the future. They are used at Buyer's risk. Roads surrounding the Community will be extended in the future to serve other developments within the Ho'opili community. Seller makes no representation or warranty regarding the availability of parking along the public streets which may change once the streets are dedicated to the County.

Flooding. Buyer acknowledges that Buyer's Home is not warranted against damage due to floods. Buyer is responsible to conduct Buyer's own investigation regarding the potential for floods.

Pest Control. It is in Buyer's best interest, as a new homeowner, to contact a local pest control company to arrange for a preventive maintenance program. Please refer to the limited warranty for termites. The specifics of the program that must be established in order to maintain the termite warranty coverage described in the limited warranty as set out in the Customer Care Program. In many locations, especially where there are adjacent open spaces or agricultural uses, rodent control is essential. Uncontrolled, rodents can damage water and electrical systems in the Home. Buyer fully understands that it is Buyer's responsibility, not Seller's responsibility, to control pests (insects, rodents and the like) in and around Buyer's Lot and/or Home.

Setbacks. The building setbacks required by the Master Association may be more restrictive in certain circumstances than County building setbacks. Buyers should carefully read the Master Declaration and the Ho'opili Design Guidelines for information about these matters and building restrictions within the Community.

Mediation and Arbitration. Buyer understands that by purchasing a Home in the Community, Buyer agrees to resolve any disputes with Seller, the administrator and insurer under the Limited Warranty, the builder, the contractor or others concerning the Home or the Community by way of mediation and arbitration without resort to the courts.

Buyer Obligation to Investigate. Nothing contained herein is intended to be a complete disclosure of all facts, which Buyer may wish to consider in buying a Home in the Community. Buyer is still obligated to conduct Buyer's own full investigation of all facts relevant to deciding where and when to buy. Buyer is hereby advised to seek the advice of

independent tax, legal, and financial consultants.

Disclosure to Subsequent Purchasers. When Buyer sells Buyer's Home, Buyer is required to provide to the subsequent purchaser(s) any documents provided in conjunction with the original sale of the house, including, but not limited to, information that Buyer has regarding the Home, the Community, and overall Community, the information set forth in this and any other disclosures provided by Seller to Buyer and any other information that may be of value to the subsequent purchaser(s), including, but not limited to, the Master Declaration.

Preferred Provider Agreements. Seller has entered into a Preferred Provider Agreement with Hawaiian Telcom Services Company, Inc. ("**Hawaiian Telcom**"), which provides Buyer with a discount on a variety of Hawaiian Telcom services, including set top boxes, wifi, TV, and high-speed internet for which Hawaiian Telcom will be afforded special marketing rights at Ho`opili. Seller also plans to have Hawaiian Telcom provide wifi for the community parks and community centers.

Membership in Master Association. By purchasing a Lot and Home in the Community Buyer automatically becomes a member of the Master Association. Generally, without limitation, the Master Association is responsible for, among other matters, the administration of the Community, design review and the general and routine maintenance and upkeep of the Community Common Areas, the entry monuments and any other common areas. As a member of the Master Association, Buyer is required to pay an initial assessment and pay regular and special assessments levied by the Master Association. The Master Association has the right to lien Buyer's Property for non-payment. The initial dues and budget for the Master Association have been compiled by Hawaiiana Management Company, a licensed property manager. These assessments are subject to change without notice to Buyer and are expected to increase annually at minimum in an amount equal to or greater than the increase in the consumer price index. Although the property manager makes every effort to estimate the actual cost of operation, certain budget items, especially insurance in today's insurance market, may change. Seller advises that costs and expenses of maintenance and operation of a residential community are difficult to estimate initially, and even if such charges have been accurately estimated, such charges will tend to increase in an inflationary economy and as the improvements age. Assessment charges can vary depending on the service desired by the owners. Buyer should examine the budget to see what services are included. Buyer should be aware that the estimates provided are of the date of the managing agent's certification and not reflect the actual charges that may be incurred upon the formation of the Master Association and the actual contracting for such services as maintenance, insurance, etc. In addition to the foregoing, each Owner must provide the Master Association with advance written notice of proposed title transfer of the Home, identifying the escrow established to handling the sale. The Master Association may levy a transfer fee to maintain a record of the new owners of the Home. The transfer fee constitutes a special assessment in respect of such Lot being transferred and shall be deposited into the purchase and sales escrow and disbursed therefrom to the Master Association.

Ho'opili Electronic Participation Program. If established by Seller, Buyer will have the opportunity to participate in the Ho'opili Electronic Participation Program by entering into the Ho'opili Electronic Participation Agreement at Closing and committing to maintain that participation for at least four (4) years so long as Buyer is living at the Community. The program requires Buyer to accept electronic communications from the Master Association and to establish automatic payment of Master Association assessments while owning a Home within the Community. Buyer may participate in the Ho'opili Electronic Participation Program by signing the Ho'opili Electronic Participation Agreement at Closing. If such program is established, a copy of the Agreement will be available from Buyer's sales representative.

Subdistrict Assessment. There is a Subdistrict Assessment for the Slope Buffer Area as more specifically described in the Sales Contract, Slope Buffer Area Addendum and Subdistrict Declaration. No additional subdistrict association dues for the Community are currently planned. Owner may also be assessed by the Master Association in respect of special features in the Community (such as cluster mailbox systems, pedestrian access lots, mail/utility lot and roadway landscape features) for which the Master Association has maintenance responsibility.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

The term "Buyer" as and when used herein, or any pronouns used in place thereof, shall mean and include the singular or plural number, individuals, partnerships, trustees and corporations, and each respective heir, personal representative, successor and assign.

This Disclosure Addendum modifies Buyer's Sales Contract and is binding upon Buyer. Buyer agrees to the foregoing and acknowledges receipt of this addendum on: «SALE-DATE-MONTH-NAME-FORMAT» (date).

NANAINA AT HO'OPILI
WARRANTY DEED AND RESERVATION OF RIGHTS

This Nanaina at Ho'opili Warranty Deed and Reservation of Rights (this "**Deed**") is made this 20th day of November, 2023, by and between **D.R. HORTON HAWAII LLC**, a Delaware limited liability company, the address of which is 130 Merchant Street, Suite 112, Honolulu, Hawaii 96813 (hereinafter "**Grantor**"), and **ESTEBAN MARTIN FAVELA and BOBBIE AMURO FAVELA, a married couple**, whose address is **91-1023 Kauoha Street, Ewa Beach, Hawaii 96706** (hereinafter "**Grantee**");

WITNESSETH THAT

Grantor, in consideration of the sum of TEN DOLLARS ($10.00) and other good and valuable consideration paid by Grantee to Grantor, receipt of which is acknowledged, and of the promises and covenants of Grantee set forth in this Deed, which Grantee agrees to faithfully observe and perform, does hereby grant, bargain, sell and convey unto Grantee, as **tenants by the entirety**, all that certain real property in the residential subdivision known as "**Nanaina at Ho'opili**" (sometimes referred to herein as "**Community**") situate at Honouliuli, District of Ewa, City and County of Honolulu, State of Hawaii, more particularly described as **Lot 25,** area **9,365** square feet, more or less, as shown on File Plan 2553, recorded in the Bureau of Conveyances of the State of Hawaii ("**Bureau**"), which real property is more particularly described in Exhibit A ("**Lot**"), and the reversions, remainders, rents, issues and profits therein (such interest, together with the Lot and improvements constructed on the Lot are described as "**Property**") and all of the estate, title and interest of Grantor, both at law and in equity, in and to the Property.

TOGETHER with all buildings, improvements, rights, easements, privileges and appurtenances on, to and running with the Property, including those with respect to use of private roadway facilities, if any, as may be set forth in Exhibit A, and the right of access from the Property to a public roadway, subject to the terms, conditions and reservations contained in this Deed and in Exhibit A.

SUBJECT, HOWEVER, TO the easements, restrictions, liens and other encumbrances on or affecting the Property as set forth in Exhibit A, and EXCEPTING AND RESERVING to Grantor, its successors and assigns, each of those easements, restrictions, reservations, covenants, liens, acknowledgments, and other encumbrances set forth in the Master Declaration of Covenants, Conditions, Restrictions and Easements for Ho'opili recorded in the Office of the Assistant Registrar of the Land Court of the State of Hawaii ("**Land Court**") as Document No. T-9864231, as amended by that certain Supplemental Declaration of Annexation (Ho'opili), recorded in the Land Court as Document No. T-10145148 and in the Bureau as Document No. A-64930547, (as may be further amended, modified and/or supplemented, "**Master Declaration**", which Master Declaration shall in all respect control over this instrument), the exhibits attached to the Master Declaration, this Deed, and the limited warranty ("**Limited Warranty**") delivered to Grantee by Grantor, all of which burden the Property and benefit Grantor.

FURTHER EXCEPTING AND RESERVING to Grantor, its successors and assigns, all easements of record described in Exhibit A and perpetual easements and rights of way over, across, under and through the Property conveyed by this Deed for all utilities (whether public or private or for the benefit it offers homeowners in the Community) including, but not limited to, water, drainage (including drainage channels, swales and ditches), sewer, gas, telephone, electricity, cable (including, without limitation, television cable), security systems, landscaping, irrigation, communication lines and systems and electromagnetic and optical transmission facilities and other similar service or public facilities purposes as Grantor in its discretion may designate, create, cancel or grant, whether or not the easements or rights of way are for the purpose of serving the Property hereby conveyed, including, without limitation, the right to enter upon the Property (even after recordation of this Deed), to construct, install, operate, maintain, repair, reconstruct, and relocate such lines, wires, circuits, conduits, cables, channels, pipes, swales, ditches, facilities and appurtenances for the indicated purposes and the right to grant such easements or rights of way to governmental agencies, public, quasi-public or private utility or service companies, other private entities, the association of homeowners, if any, or any other homeowner or group of homeowners in the Community or any adjacent community, without joinder or consent of, and without notice to, Grantee or Grantee's mortgagee. These reserved rights are to be exercised in a manner that will cause the least practicable interference with Grantee's occupancy of the Property.

GRANTOR FURTHER EXCEPTS AND RESERVES the benefits and burdens of the reciprocal appurtenant easements, for encroachment and maintenance purposes as between the Property and adjacent lots within the Community as set forth in the Master Declaration.

ALSO EXCEPTING AND RESERVING unto Grantor, its successors and assigns, as specified below without notice to or the consent or joinder of Grantee or Grantee's mortgagee, to create and record in the Bureau a File Plan covering the Community land which includes the Property, and to assign to the Lot a File Plan lot number, or to record an affidavit of a surveyor containing the metes and bounds for the Lot.

TO HAVE AND TO HOLD the same, together with all rights, easements, privileges and appurtenances thereunto belonging or appertaining or held and enjoyed therewith unto Grantee, absolutely and forever and in fee simple, according to the tenancy and estate set forth herein.

Grantor hereby covenants with Grantee that Grantor is lawfully seized in fee simple of the Property conveyed by this Deed; that the Property is free and clear of and from all encumbrances except as described in this Deed and in Exhibit A and except for the lien of real property taxes not yet by law required to be paid; that Grantor has good right and title to sell and convey the Property in the manner herein set forth; and Grantor will WARRANT AND DEFEND the same unto Grantee forever against the lawful claims and demands of all persons, except as mentioned in this Deed.

By acquiring ownership of the Property, Grantee acknowledges that Grantee has received, read and understood the Master Declaration and the Rules and Guidelines of the Design Review Committee ("**Design Guidelines**") described in the Master Declaration and further acknowledges, agrees with and accepts the disclosures, conditions, covenants, easements and reservations of rights contained therein; and Grantee agrees to observe and perform all of the terms, covenants, conditions and provisions required to be observed and performed by an Owner under this Deed, the Master Declaration and the Design Guidelines, and any existing or future amendments, supplements and/or modifications thereto; and Grantee further covenants and agrees that Grantee, for itself and Grantee's family, lessees, tenants, servants, guests, invitees, licensees, employees, or other persons who may occupy or otherwise use the Property will abide by all of the applicable terms, covenants, conditions and provisions set forth in the Master Declaration, the Articles of Incorporation (defined in the Master Declaration), the Bylaws (defined in the Master Declaration), the Design Guidelines (including, but not limited to, the Supplemental Ho'opili Design Review Committee Rules and Guidelines Nanaina at Ho'opili Subdistrict), the Limited Warranty, and any other duly adopted rules and regulations of the Master Association, hereinafter defined (collectively, "**Community Documents**"). Grantee covenants to indemnify, hold harmless and defend Grantor for any failure to so comply with, observe and perform any such covenant, condition, restriction or other provision contained in the Community Documents.

Grantee acknowledges and agrees that the Community is within and a part of an area intended to be developed as a master planned community known as Ho'opili as described in the Master Declaration ("**Ho'opili**" or "**Ho'opili Community**") and that the premises hereby conveyed and the Community are subject and subordinate to the terms and provisions of the Master Declaration, as it exists or may hereafter be amended, modified and/or supplemented. Without limitation of the matters set forth in the Master Declaration, the contents of which shall control over this Deed, the Master Declaration provides, among other things, for the establishment of the Ho'opili Community Association (hereinafter "**Master Association**"), of which Grantee is a member, by virtue of the ownership of the Property. Among other provisions, the Master Declaration further provides for the levy against the Property and the payment by Grantee of various regular and special assessments, and the right to lien the Lot for non-payment of assessments made by or on behalf of the Master Association; for the proper maintenance and care by Grantee of trees planted on Grantee's Lot, if any; and that it shall be unlawful for Grantee to impair, interfere or prevent the care of trees planted in planting strip areas adjacent to Grantee's Lot, if any.

Without limitation of the matters set forth in the Master Declaration, the contents of which shall control over this Deed, the Master Declaration and Limited Warranty, among other matters, provide that Grantee, for Grantee and for Grantee's family, lessees, tenants, servants, guests, invitees, licensees, employees, or other persons who may occupy or otherwise use the

Community, the Property or improvements to the Community, acknowledges and agrees that the Master Declaration and Limited Warranty contain various reservations in favor of Grantor, "Declarant" under the Master Declaration, as well as disclosures, covenants, undertakings, waivers of rights, disclaimers, limitations, requirements and restrictions, all of which are binding upon Grantee and all owners of property within the Community (and in the Ho'opili Community) and which include, but are not limited to: (a) specific limitations, restrictions, and requirements pertaining to the construction, installation, repair, modification, maintenance and/or appearance of improvements, access driveways, landscaping (which must be installed within a limited time period at Grantee's cost), private roadways and common driveways, if any, sewer, drain and electrical improvements and facilities, and boundary fences and walls, among others; (b) specific disclosures and disclaimers concerning the plans for the development and use of all or any part of the Community and/or Ho'opili, which may change at any time without notice to Grantee, and which may include but are not limited to the construction of residential and rental housing being developed in cooperation with the City and County of Honolulu's Department of Planning and Permitting or equivalent State agency as affordable housing available only for purchase or rental by home buyers or home renters satisfying specific median income limitations established by such agency or satisfying specific State or Federal income limitations; (c) specific provisions disclosing and authorizing continued extensive construction and sales activities within and around the Community, which may result in noise, dust, mold, vibration and other nuisances, disturbances, annoyances, hazards and effects, and providing for the acceptance by Grantee of any and all nuisance, irritation, annoyance, inconvenience and risk of damage attributable thereto, and further providing for the agreement by Grantee to suffer and permit all actions and consequences incidental to such ongoing construction and sales activities; (d) specific provisions detailing and disclosing various adverse environmental hazards, conditions or circumstances, including, without limitation, noise, dust, smoke, soot, ash, odor, noxious vapors, mold, surface water runoff, or other adverse environmental conditions described in the Master Declaration, which may affect the Community, the Property, and Grantee's use and enjoyment of the Property, and providing for Grantee's acceptance of the possibility of the occurrence of the same, assumption of the risk of such occurrence and damage attributable thereto, and the express waiver of all claims against Grantor and others arising out of or in connection with such adverse conditions or circumstances, including the right to seek damages or the abatement or elimination thereof; (e) specific provisions detailing and disclosing the potential impacts, including but not limited to traffic, aircraft noise, and the adverse effects from residential, commercial, agricultural, industrial and recreational uses within and surrounding the Community; (f) specific provisions detailing and disclosing the mixed residential and commercial uses within Ho'opili and the anticipated presence of schools, universities, churches, library(ies), day care centers, animal kennels and refuges, homeless shelters or transitional shelters, commercial and retail uses, possible future bus stop locations and facilities and bus routes (which are not in the control of Grantor), rail transit facilities, parks, walkways, bicycle paths, government offices, cellular towers, recreational and related facilities and other features common to urban environments, including, without limitation, a Community wide system of bicycle and walking paths and aboveground and underground radio transmission wires and high voltage electric lines, which lines purportedly may emit electric and magnetic fields; (g) specific provisions detailing and disclosing the potential impacts, including but not limited to traffic, noise and the adverse effects, resulting from the location of the Community near the West Oahu campus of the University of Hawaii, an electric substation adjacent to the Community along Kauluakoko Street and Kulanihako'i Street, which is anticipated to include, among other things and without limitation, 46kV and 12kV lines and related equipment, transformers, switchgear, switches and associated structures, bus conductors and connectors, lightning arresters and other associated pad mounted equipment, fencing with barbed wire, drive gates and main gates for security control, signage, lights and cameras, portions of the planned Honolulu rapid transit rail system and guideway, rail station(s), and park-and-ride and/or bus transfer facilities, an "Energy

Easement Corridor" adjacent to Farrington Highway, which may contain jet and other petroleum based fuel underground transport lines, the potential widening of roads adjacent to the Community and the extension of roads within the Community to serve future development; (h) specific provisions detailing and disclosing that the Property may have been previously used for commercial agricultural and farming operation, and in connection therewith, fertilizer and pesticides, among other things, may have been or will be applied and used upon the Property, or lands adjacent thereto and may have a long term effect on the Property, the water, and/or the environment; and (i) specific provisions reserving by or on behalf of Grantor, and/or others various rights and easements affecting the Community and the Property, and Grantor the right to make specific grants thereof without joinder by Grantee or Grantee's mortgagee.

Without limitation of the foregoing, Grantee acknowledges and agrees that commercial and community agricultural uses are planned in Ho'opili and will be supported by the Ho'opili "Urban-Agriculture" initiative, which will include without limitation, land for commercial farming operations, shared and home gardens, community farms and gardens, civic farms, and urban gardens. The urban gardens are intended to feature edible landscaping throughout certain lots in Ho'opili. Commercial agricultural uses are protected under the Hawai'i Right to Farm Act, Hawaii Revised Statutes, Chapter 165. Grantee further acknowledges and agrees that Grantee shall provide subsequent notice to Grantee's lessees, tenants or assignees of these aforementioned farming operations and practices on adjacent or contiguous land and the protections of such uses afforded under the Hawaii Right to Farm Act.

In furtherance of and without diminution of the foregoing, Grantee hereby further acknowledges and approves the obligations imposed on Grantee pursuant to the terms of this Deed, the Master Declaration, and the Community Documents and reservation by Grantor of each and all of the following rights and easements:

(a) Grantor, and its agents, employees, contractors, licensees, successors, mortgagees and assigns (collectively, "**Grantor Parties**"), shall have an easement to conduct extensive sales activities on and at the Community, including the use of any improvements within the Community owned by Grantor (and any other home, with the express permission of the owner of such home) for model homes, sales and management offices, parking and extensive sales displays and activities, and the posting and maintenance of signs and other advertisements relating to such sales activities.

(b) Grantor and the Grantor Parties shall have an easement over, under and upon the Community, including the Property, as may be reasonably necessary for the completion of improvements to and correction of defects, as the term is defined in the Limited Warranty and any applicable termite warranty, and other warranty or "punchlist" items in the Community or the Property.

(c) Grantor and the Grantor Parties shall have an easement over, under and upon the Community and each and any portion of the Community including the Property and the individual homes to create and cause noise, dust, vibration and other nuisances or annoyances created by and resulting from any work connected with or incidental to the development, construction and sale of any home or other improvement to the Community, any additional phase to the Community, or any other community which Grantor, its successors or assigns, may develop on property adjacent to or in the vicinity of the Community. Grantee and any other person acquiring any interest in the Community waives any and all rights, claims or actions that might otherwise be asserted against Grantor or the Grantor Parties and their respective members and managers based on any such noise, dust, vibration and other nuisances or annoyances.

(d) Grantor and the Grantor Parties shall have an easement to enter upon, across, over, in and under any portion of the Community, including the Lot, for the purpose of changing, correcting, or otherwise modifying the grade or drainage channels of any portion of the Community so as to improve the drainage of water on the Community. Reasonable efforts shall be made to use this easement so as to disturb as little as possible the uses of Grantee, to undertake such drainage work promptly and expeditiously, and to restore any areas affected by such work to a sightly and usable condition as soon as reasonably possible following such work.

(e) There shall be reciprocal appurtenant easements of encroachment as between adjacent lots due to the unintentional placement or settling of shifting of the improvements constructed, reconstructed, or altered thereon (either initially by Grantor or subsequently by Grantee if in accordance with the terms of the Master Declaration) to a distance of not more than one (1) foot, as measured from any point on the common boundary between said adjacent lots, along a line perpendicular to such boundary at such point; provided, however, in no event shall an easement for encroachment exist if such encroachment occurred due to willful and knowing conduct on the part of Grantee. These easements shall be for the encroaching improvements and their maintenance (including access to and from the encroachment).

(f) Grantor reserves the right either to record an affidavit of a surveyor containing the metes and bounds description of the Lot or to file and to record a File Plan covering the residential subdivision lots above described, either of which actions are specifically authorized by Grantee and Grantee's mortgagee(s) without the joinder or consent of Grantee and/or Grantee's mortgagee(s). Grantee expressly acknowledges and agrees that Grantor may submit and record with the Bureau such affidavit describing the Lot or File Plan depicting the legal description of the Subdivision and all of the lots and easements therein, wherein references to lots and easements shall be consistent with such references in the Subdivision and that upon the approval and filing of the File Plan at the Bureau, the descriptions of, and references to, the Subdivision, and all lots (including the Property) and easements therein, as set forth in the File Plan shall replace and supersede the description of the Subdivision, and the lots (including the Property) and easements therein, set forth herein and in Exhibit A attached hereto.

(g) Pursuant to the Master Declaration, the Property may not be improved with an accessory dwelling unit, which is a second dwelling unit, including separate kitchen, bedroom and bathroom facilities, attached or detached from the primary dwelling unit on the Lot, except with the express consent of the Grantor evidenced by recordation of a Supplemental Declaration (defined in the Master Declaration) permitting such use. Grantee specifically acknowledges and agrees that, absent advance written consent from Grantor pursuant to an appropriate Recorded Supplemental Declaration, Grantee may not construct an accessory dwelling unit on the Lot, which accessory dwelling unit includes a separate kitchen, bedroom and bathroom facilities, attached to or detached from the primary dwelling unit on the Lot, even if permitted by law or the County's Department of Planning and Permitting. Grantee shall indemnify, defend and hold Grantor harmless from any liability, claims or expenses, including attorneys' fees, arising from or relating to Grantee's failure to abide by the terms contained herein and in the noted declarations.

(h) All Lots within the Community shall not be improved with in-ground/below-grade water features and/or swimming pools. As defined in the Supplemental Declaration Designating Land Use Classification, Subdistrict for Phase 13 Parcel 102 of Ho'opili (Nanaina at Ho'opili) (as the same may be further amended, restated, or supplemented, "**Subdistrict Declaration**"), the term "water feature" is inclusive of ponds, pools, waterfalls and waterwalls, fountains, courses and streams, and similar improvements containing or intended to contain water and typically used as a decorative or ornamental element. As defined in the Subdistrict

Declaration, the term "swimming pool" is inclusive of outdoor Jacuzzis, whirlpool baths, hot tubs, lap pools, plunge pools, and similar improvements containing or intended to contain sufficient water to partially or fully immerse a person.

(i) Grantee shall maintain landscaping within the Planting Strip Area(s), defined below, if any, abutting the Lot, including without limitation, by (i) properly and regularly watering and trimming grass (and replanting as necessary); and (ii) properly and regularly watering Street Tree(s), if any; provided, however, Grantee shall not trim, prune, treat, replant, replace, injure, damage or harm any Street Tree. If pruning, trimming, treatment, replanting or replacement is required in respect of any Street Tree that Grantee is required to maintain, or if a Street Tree has been injured, damaged, or harmed, Grantee shall inform the Master Association. If, for any Street Tree that Grantee is required to maintain, replanting or replacement of such Street Tree is required in order to satisfy City and County of Honolulu requirements, the cost of such replanting and replacement shall be assessed to Grantee, either as a Special Assessment or as a fine under the Master Association Rules. As defined in the Subdistrict Declaration, "Planting Strip Area" is a landscaped strip on the side of certain Lots in the Community where vehicular access is not restricted, located between a sidewalk, if any, abutting said Lots and the curb fronting a roadway, including without limitation, the following roadways: 'Ala'apapa Street and Hikupau Street.

(j) Fencing installed by Grantee on the Lot must comply with the Design Guidelines and the Ho'opili Urban Design Plan therein described, except as specifically provided herein.

(k) The Community is adjacent to civic farm land immediately abutting the eastern boundary of the Community ("**Slope Buffer Area**"). The Slope Buffer Area is designated as Easement L-1 for landscaping purposes as defined in the Supplemental Declaration Designating Land Use Classification and Subdistrict for Phase 13 Parcel 102 of Ho'opili (Nanaina at Ho'opili) and shown on the File Plan. Grantee understands and agrees that the Slope Buffer Area is designated as an "Exclusive Common Area" as defined in the Master Declaration, and is reserved for the exclusive benefit and responsibility of all Owners within the Community. Grantee understands that all costs associated with the operation, maintenance, repair, replacement, taxes and insurance of the Slope Buffer Area will be charged equally as a Subdistrict Expense (as defined in the Master Declaration) to each Owner of a lot within the Community and collected through a Subdistrict Assessment (as defined in the Master Declaration) for the Community. The Subdistrict Assessment is subject to change at such times as the Master Association determines. The level of service of maintenance of the Slope Buffer Area shall be determined by the Master Association. Persons authorized by the Master Association may access the Slope Buffer Area from time to time for such purposes as the Master Association deems necessary or convenient, including, without limitation, for providing such maintenance.

(l) The Lot abuts a portion of the Slope Buffer Area. Grantor intends to construct a 54-inch aluminum open picket fence installed by Grantor along the boundary of the Lot abutting the Slope Buffer Area ("**Slope Buffer Fence**"). Grantee acknowledges and agrees that due to delays in obtaining the materials necessary to install and construct the Slope Buffer Fence, (i) Grantor may be required to install the Slope Buffer Fence following the Closing Date, and (ii) the date of installation and construction of the Slope Buffer Fence may be several months after the Closing Date. Grantee acknowledges and agrees that, in the event Grantor installs the Slope Buffer Fence following the Closing Date, Grantor will install a temporary 36-inch aluminum open picket fence along the Slope Buffer Area ("**Temporary Fence**") prior to the Closing Date, which Temporary Fence will be replaced with the Slope Buffer Fence. Grantee hereby authorizes

Grantor and Grantor's contractors to enter the Lot upon at least 48 hours prior written notice to Grantee to remove the Temporary Fence and install and construct the Slope Buffer Fence. Grantee further acknowledges that removal of the Temporary Fence and installation and construction of the Slope Buffer Fence may take several days or more to complete and that such installation and construction will be noisy at times and will cause dust and debris to be present in and around the Lot during the installation and construction period. Grantee acknowledges and agrees that it is the responsibility of Grantee to maintain, upkeep and repair as required the fencing along the boundary of the Lot abutting the Slope Buffer Area, including the side of the fence facing the Slope Buffer Area, and that said fencing may not be changed, altered or removed without prior written approval of the Master Association Design Review Committee. Grantee further acknowledges and agrees that Grantee and Grantee's guests and invitees are strictly prohibited from accessing the Slope Buffer Area, except in connection with maintenance of the fence abutting the Slope Buffer Area. In the event Grantee fails to maintain, keep up, repair or replace as necessary the Slope Buffer Fence, this obligation may be performed by the Master Association at Grantee's expense. These expenses will be assessed to Grantee either as a Special Assessment, as a fine under the Master Association Rules, or otherwise.

(m) Grantee understands and acknowledges that the Lot may be improved with a privacy fence or rock wall along sides of such Lot bordering another lot in the Community, subject to the following limitations: (i) privacy fences or walls or rock walls that align with the sides of the home on the Lot may not extend past the portion of the home closest to the street or past the portion of the home, or the home of the neighboring lot, closest to the rear of the Lot abutting the Slope Buffer Area ("**Rear Boundary of the Home**") and may not exceed six (6) feet in height; and (ii) open picket fences, privacy fences or walls, or rock walls that extend on the side of the Lot from the Rear Boundary of the Home to the boundary of the Lot where it abuts the Slope Buffer Area may not exceed 54 inches in height.

By acquiring ownership of the Lot, Grantee hereby further covenants and agrees, for the benefit of Grantor and its successors and assigns, as follows:

(1) The foundation systems for the buildings have been designed in accordance with the recommendations of geotechnical and structural engineers to meet the requirements of the soil and structural conditions and those of local public agencies. The foundation type employed is generally a post-tensioned waffle-mat style slab and may include perimeter walls. Grantee is aware that any alteration to the foundation system (or cutting into the foundation) made in order to install or modify landscaping or to alter gutters, porches, porch materials, or decks for any reason or purpose may adversely affect the foundation system and/or moisture or vapor barriers, is very hazardous and may result in serious damage to the improvements to the Property, personal injury, or both. Grantee agrees that (a) Grantee shall not cut into or otherwise tamper with the post-tensioned waffle-mat style slab; (b) Grantee shall not permit or allow any other person to cut into or tamper with the foundation system; (c) Grantee shall disclose the existence of the foundation system to any person who rents, leases or purchases the Property; and (d) Grantee shall indemnify, defend and hold Grantor and Grantor's agents, free and harmless from and against any and all claims, damages, losses or other liability (including attorneys' fees and costs of court) arising from any breach of this covenant by Grantee.

(2) Some of the soils within the Community, including the land below the Lot may have expansive characteristics, which will require special consideration and attention. Specifically, Grantee understands that the Lot has been graded in connection with the construction of improvements on the Lot and that excavated or fill material has been overlaid on the Lot in order to create the "pad" or foundation area for the improvements to the Lot. Grantee understands that

it should exercise reasonable care to ensure that the non-expansive fill underlying the foundation is not disturbed and that proper drainage away from the home is maintained. Grantee understands and agrees that Grantor bears no responsibility for the manner in which Grantee irrigates the Property and the effect of such irrigation on the soils condition. Grantee shall not change the existing drainage pattern on the Property, and any modifications made to the grading or drainage pattern on the Property, and any modifications made by Grantee to the grading or drainage contours/swales/flowlines of surfaces or subsurface drainage systems, if any, installed by Grantor are made by Grantee at Grantee's own risk. Because any changes made to the grade or contour of the Property may alter the drainage flow and cause damage to other improvements within the Community and/or Ho'opili, Grantee must be sure to properly landscape so water is directed away from the home. Grantee must (a) ensure that any construction or alteration of patios, walkways, wall or planters or installation of landscaping or other improvements on the Property shall not alter or block the current surface or subsurface drainage systems installed by Grantor and (b) install and maintain appropriate additional drainage and/or gutter systems to accommodate such alterations and improvements. Regular inspection and maintenance must be performed to keep all drainage devices free from dirt, debris and obstructions.

(3) Lands adjacent to the Community have been conveyed to The Hawaiian Humane Society for use as its new West Oahu campus, which may include indoor and/or outdoor animal kennels. Grantee acknowledges and accepts all the nuisances, disturbances, annoyances and inconveniences associated with the foregoing.

Grantee acknowledges and agrees that, except for the express written limited warranty described herein as the Limited Warranty, a copy of which is included in Grantor's homeowner manual ("**Homeowner's Manual**") a copy of which has been provided to Grantee, and any applicable termite warranty, Grantor is not making or offering any warranties, express or implied, with respect to the Property or the Community, including, without limitation, any warranties of merchantability, habitability, quality of construction, or fitness for a particular purpose. Grantor expressly disclaims any warranties other than the Limited Warranty, and any applicable termite warranty, including, without limitation, any express or implied warranties of merchantability, habitability, quality of construction, or fitness for a particular purpose with respect to the Property or the Community. Grantee acknowledges and agrees that: (i) Grantee has received, read and understands the terms of the Limited Warranty, any applicable termite warranty, and the Homeowner's Manual and is familiar with the coverage and exclusions contained therein, (ii) Grantee shall abide by all the applicable terms, covenants, conditions and provisions of the Limited Warranty, any applicable termite warranty, and Homeowner's Manual, and (iii) other than the Limited Warranty, and any applicable termite warranty, Grantor is making no other representations, promises, or warranties of any kind, including, without limitation, any express or implied warranties of merchantability, habitability, quality of construction, or fitness for a particular purpose with respect to the Property, or the Community. Grantor has established a customer care program (which will be administered by Grantor pursuant to the section in the Homeowner Manual commonly referred to as the "Customer Care Program" ("**Customer Care Program**")). The Limited Warranty, any applicable termite warranty, and the Customer Care Program do not cover and Grantee acknowledges and agrees that the Limited Warranty, any applicable termite warranty, and the Customer Care Program do not cover (i) any consequential damages, including, but not limited to, damage to the Property or the Community that is caused by a warranted defect (as defined in the Limited Warranty) but is not itself a warranted defect and/or any claims for emotional distress, lost opportunity, profit or time (from Grantee's employment or otherwise), loss of use of the Property or any other improvements in the Community, the costs of shelter, transportation, food, moving, storage or other incidental expenses related to relocation during repairs of the Property, or (ii) any appliance, equipment, or other items which are "consumer

products" for purposes of the Magnuson-Moss Warranty Act, 15 U.S.C. § 2301, et seq., or which are "consumer goods". The only warranties of such consumer products or goods are those which the manufacturer provides to the purchaser. Information as to such manufacturer's warranties will be provided to Grantee. Grantor does not assume any obligation to service or repair such consumer products or goods. They are included on an "AS IS" basis with Grantee assuming the entire cost of all necessary service, repair, or replacement in the event of defect in quality or performance. With respect to appliances or other consumer products included in Grantee's purchase of the Property hereby conveyed, this Deed operates as an assignment from Grantor to Grantee of all manufacturer's or dealer's warranties, if any, covering any such appliances or consumer products for the unexpired term thereof to the extent that Grantor has the right and power to make such an assignment. Grantee acknowledges and understands that Grantor is not stating that any such warranties exist, or that such an assignment will be effective, nor is Grantor adopting any such manufacturer's or dealer's warranties or acting as a co-warrantor, but Grantor is merely attempting to pass through to Grantee the benefits of such warranties, if any exist. Grantee specifically agrees that during the term of the limited warranty afforded by Grantor to Grantee under the terms of the Limited Warranty, and any applicable termite warranty, Grantee shall in each and all instances permit Grantor or Grantor's designated representative and/or the administrator of or insurer under the Limited Warranty and any applicable termite warranty, or their respective representative to repair any and all items classified by Grantor or the administrator as items covered by the Limited Warranty and any applicable termite warranty or provide such alternate coverage in respect of warranted items available thereunder, and that Grantee shall have no further rights and Grantor no further obligation to Grantee in respect of such matters repaired or administered as provided therein.

Without limitation of any other provision herein contained, Grantor hereby grants Grantee a non-exclusive right of entry for access purposes over, upon and across the roadway lots ("**Roadway Lots**") more specifically described in Exhibit A attached to this Deed owned by Grantor and others; provided, however, that such right of entry shall automatically terminate upon dedication of the Roadway Lots to any governmental authority. Grantee, for Grantee, its successors and assigns, and Grantee's family, lessees, tenants, servants, guests, invitees, licensees, employees, or other persons who may occupy or otherwise use the Property or improvements to the Property, acknowledges, covenants and agrees that (a) Grantor may continue to use the Roadway Lots for construction and sales activities within the Community, which may from time to time result in noise, vibration and other hazards and inconveniences to Grantee; (b) Grantee shall use the Roadway Lots with due care for public and private safety and shall comply with all laws, statutes, ordinances, and all rules and regulations of Grantor while occupying or using the Roadways Lots; (c) Grantee will not interfere with any work being performed, operations being carried out, or use being engaged in on the Roadways Lots by, on behalf of, or authorized by Grantor; (d) Grantor shall have no liability or obligation of any nature to Grantee, Grantee's family or household members, or Grantee's guests as a result of such persons' entry upon or use of the Roadway Lots or other property owned or controlled by Grantor; and (e) Grantee shall indemnify and hold harmless Grantor and its affiliates, members, managers, officers, directors, representatives, employees and agents, from and against any and all loss, damage, costs, expenses, including attorneys' fees, liability, demands, or causes of action resulting from nuisance, injury, harm or death to persons or property arising out of or in any way connected with the right of entry granted by Grantor pending dedication as described above, except any loss or damage caused by the gross negligence or willful misconduct of Grantor; and (d) Grantee fully realizes and assumes all risks of using the Roadway Lots prior to dedication of the Roadway Lots as described above, including, but not limited to, the dangers associated with construction equipment and workers on or near the Roadway Lots, the dangers resulting from the

condition of the Roadway Lots, and the dangers of collision with other vehicles and pedestrians using the Roadway Lots.

Without limiting the generality of the foregoing, Grantee hereby specifically acknowledges and agrees to all of the reservations of rights and easements as set forth and described in the Master Declaration in favor of Grantor and Grantor's successors and assigns as "Declarant". By acceptance of this Deed, Grantee hereby consents and agrees to and with Grantor that in order to effectuate the rights and easements reserved to Grantor as aforesaid, Grantor and/or Grantor's assignee shall also have the right to prepare, execute, file, process and record necessary and appropriate papers and documents to establish and grant easements and to make necessary and appropriate amendments of the Community Documents, all without further notice to Grantee or Grantee's mortgagee. By such acceptance, Grantee also agrees to execute all documents and to do all other things as may be necessary or convenient to effect the same; and such acceptance shall be deemed an appointment of Grantor and/or Grantor's assignee, with full right of substitution, as the attorneys-in-fact of Grantee (and any mortgagee of Grantee) to execute such documents and to do such things on Grantee's (or Grantee's mortgagee's) behalf, which grant of such power, being coupled with an interest, is irrevocable for the term of Grantor's reserved rights and shall not be affected by the disability of Grantee.

Grantee, on behalf of Grantee and Grantee's successors and assigns, agrees that in the event Grantee or any other person with an interest in the Community or the Property shall have any claim or cause of action arising out of or in any way related to this Deed, except as specifically provided above, the Master Declaration (and any and all rules, regulations and supplemental declarations promulgated pursuant to the foregoing, and the enforcement thereof), any aspect of the Property, the Community, Ho'opili, the development, construction, quality, sales, marketing, disclosures concerning, financing, delivery of the Property or Community or improvements thereto, the Limited Warranty, any applicable termite warranty, or each of those items identified in the Limited Warranty, all of which are incorporated herein by this reference, Grantor's Customer Care Program, and/or any other aspect of or activity with respect to Ho'opili, the Community or the Property (herein collectively "**Covered Matters**"), against Grantor and/or any of the Covered Parties defined in the Master Declaration, such claim or cause of action (a "**Dispute**") whether such dispute is based on contract, tort, or statute, including, without limitation, any dispute described in the Master Declaration, whether such Dispute arises before or after the recording of this Deed, shall be resolved by binding arbitration in accordance with the Federal Arbitration Act (9 U.S.C. §1, et seq.) now in effect and as the same may from time to time be amended, to the exclusion of any different or inconsistent state or local law, ordinance, regulation, or judicial rule, by and pursuant to the rules of Dispute Prevention and Resolution, Inc. ("**DPR**") in effect at the time of the initiation of the arbitration (sometimes "**Arbitration**" or "**arbitration**") after it shall have first been submitted to the process of "Negotiation" and "Mediation" defined in the Master Declaration, and not by a court of law; provided, however, any and all Disputes relating to Unresolved Warranty Issues (as the same is or may be defined in the Limited Warranty) shall be resolved by mediation and arbitration in the manner specified in the Limited Warranty, utilizing the mediator and arbitrator selected under the provisions of the Limited Warranty; provided further that in the event of an arbitration of a Dispute relating to an Unresolved Warranty Issue under the terms of the Limited Warranty, the provisions of the Master Declaration shall apply only to the extent not in conflict with the Limited Warranty. Any such claim or cause of action shall be subject to arbitration regardless of whether the claim is against Grantor or "**Covered Parties**", defined in the Master Declaration, which include, without limitation, Grantor's real estate broker, agent or attorney, the architects, engineers, or other design consultants for the Community, the contractor, subcontractors, sub-subcontractors, material suppliers or other persons involved with the Community, their officers, directors, agents, servants, employees or representatives, the

managing agent, if any, and their respective officers, directors, agents, servants, employees or representatives , provided that such person(s) agrees to or has agreed to arbitrate such disputes; or if such claim or cause of action is filed jointly and severally against other parties, it shall be subject to arbitration whether or not such other parties are willing to submit to arbitration as provided in this Deed. Any arbitration shall be conducted in the County in which the Property is located, and notwithstanding anything to the contrary contained in the Limited Warranty, any such Arbitration shall be conducted at the office of the arbitrator. No punitive damages shall be awarded in any claim against Grantor or any other Covered Parties; provided however in the event such limitation is determined to be invalid or unenforceable then such limitation shall be severed and this Deed shall be construed as if such limitation were omitted and shall not affect the other provisions hereof. The arbitrator may not award attorneys' fees or costs (including expert costs) to the prevailing party. Further, no award for damages attributable to emotional distress or a multiple of actual damages based upon any theory of law may be awarded by the arbitrator in any claim against Grantor or any of the other Covered Parties. The award rendered by the arbitrator shall be final.

Grantor and Grantee mutually agree that this instrument may be executed in counterparts, each of which shall be deemed an original, and said counterparts shall together constitute one and the same agreement, binding all of the parties hereto, notwithstanding all of the parties are not signatory to the original or the same counterparts. For all purposes, including, without limitation, recordation, filing and delivery of this instrument, duplicate unexecuted and unacknowledged pages of the counterparts may be discarded and the remaining pages assembled as one document.

Grantor and Grantee mutually agree that the terms "Grantor" and "Grantee" as used in this Deed, or any pronouns used in place of such terms shall include the masculine, feminine or neuter gender, the singular or plural number, individuals or corporations, and each of their respective heirs, devisees, personal representatives, members, managers, successors, successors in trust and assigns, according to the context of such terms. If this Deed is signed by two (2) or more persons or parties as Grantee, all covenants of Grantee contained in this Deed shall be deemed joint and several. Each and every acknowledgment, acceptance, appointment, agreement and covenant of Grantee contained in this Deed shall run with the Property hereby conveyed and constitute an equitable servitude and lien on the Property, and each person or party hereafter acquiring from Grantee any interest in the Property shall be deemed to make such acknowledgments, acceptances, appointments, agreements and covenants by and upon such acquisition.

EXHIBIT A

All of that certain parcel of land situate, lying and being at Honouliuli, District of Ewa, City and County of Honolulu, State of Hawaii, **Lot 25**, being **9,365 square feet**, more or less, (the "**Lot**"), of the "HO'OPILI PHASE 13 – PARCEL 102" as shown on File Plan 2553, recorded in the Bureau of Conveyances of the State of Hawaii ("**Bureau**").

Together with easements for water purposes in, on, over and under the easement areas granted by and described in GRANT OF EASEMENTS (WATERLINE) dated September 5, 2006, filed in the Office of the Assistant Registrar of the Land Court of the State of Hawaii ("**Land Court**") as Document No. 3485394, recorded as Document No. 2006-173177, subject to the terms and provisions contained therein.

Together also with access over:

1. Lots 20156, 20157 and 20158, as shown on Map 1698, to Lot 20145 and to Lot 20142, as shown on Map 1693, and to Kualakai Parkway, a public road, as set forth by order filed as Land Court Document No. T-10837271, on September 3, 2019.

2. Internal subdivision roadway Lot 59, as shown on File Plan 2553.

3. Lots 8, 9, 10, 11, 12 and 13 as shown on File Plan 2544; to Lot 5, as shown on File Plan 2537; to Lots 19953 and 19954, as shown on Map 1672; and to Lot 20155, as shown on Map 1698.

(collectively the foregoing lots are referred to as the "**Roadway Lots**"); provided however, that in the event that any Roadway Lots are conveyed to the State of Hawaii, the City and County of Honolulu or other governmental authority, said right of access as to said Roadway Lots so conveyed shall immediately terminate.

Being a portion of the premises acquired by that certain TRUSTEES' LIMITED WARRANTY DEED WITH COVENANTS AND RESERVATION OF RIGHTS

SUPPLEMENTAL DECLARATION OF ANNEXATION OF PROJECT AREA (DECLARATION OF RESTRICTIVE COVENANTS (PRIVATE PARK)) (Ho'opili / Phase 6 Parcel 14 and Phase 13 Parcels 96, 97, 101 and 102) dated May 16, 2023, recorded as Document No. A-85430708-09, as the same may be amended, supplemented and/or restated.

VARIOUS SUPPLEMENTAL DECLARATIONS AFFECTING LANDS OTHER THAN THOSE DESCRIBED IN THIS EXHIBIT HAVE BEEN OMITTED HEREFROM.

10. Bylaws of Ho'opili Community Association dated January 31, 2017, as the same may be amended, supplemented and/or restated.

11. The obligation of Grantee, at Grantee's cost, to maintain, repair, clean, and keep free from debris the existing drainage pattern on the Lot, and any drainage facility and/or concrete facility, on the Lot, except for drainage facilities constructed for the benefit of and granted to the City and County of Honolulu, if any, which facilities shall be maintained by the City and County of Honolulu.

12. The obligation of Grantee, at Grantee's cost, to properly maintain the Lot to prevent excess water on the Lot and to avoid the risks of expansion or subsidence of soils, as set forth in the Master Declaration.

13. The obligation of Grantee, prior to obtaining a building permit for all buildings and improvements on the Lot, to comply with the design guidelines and to obtain written approval of the Design Review Committee, as set forth in the Master Declaration.

14. Reservation of right for Grantor to designate, grant and convey within the boundary of the Lot easements, including without limitation easements for landscaping, irrigation, maintenance, sewer, drainage, and electrical and utility purposes, without the joinder or consent of Grantee or Grantee's mortgagee, all as set forth in the Master Declaration.

15. Restriction on water features and swimming pools as provided in the Subdistrict Declaration.

16. The obligation of Grantee to maintain landscaping within Planting Strip Areas, as provided in the Subdistrict Declaration.

17. The Lot will be subject to each and all of those easements shown on the plot plan for the Lot.

18. DESIGNATION OF EASEMENT 18

PURPOSE: electrical
REFERENCED: on File Plan 2553

END OF EXHIBIT A

THE BLUFFS AT 'IKENA
DISCLOSURE ADDENDUM

'Ikena at Ho'opili Community. The Bluffs at 'Ikena is the marketing name being used by Seller in connection with the sale of 20 homes, specifically, Sales Lot Numbers 50 through 69, inclusive ("**Subject Ikena Lots**"), within the residential subdistrict of 'Ikena at Ho'opili ("**Community**"). The Community is a fee simple residential community consisting of approximately 69 single family detached homes. The Community is located at Ho'opili, Oahu, Hawaii. Buyer acknowledges and agrees that certain features being offered in connection with the Subject Ikena Lots differ from those offered in connection with Sales Lot Numbers 1 through 49, inclusive, in the Community.

Sales Contract. This Disclosure Addendum supplements The Bluffs at 'Ikena Fee Simple Home Purchase Agreement (herein, "**Sales Contract**") and is part of that legally binding agreement. Defined terms used in the Sales Contract are sometimes used in this Disclosure Addendum and have the same meanings here.

SCOPE OF DISCLOSURE. THIS DISCLOSURE ADDENDUM IS NOT EXHAUSTIVE IN SCOPE. BY ENTERING INTO A SALES CONTRACT BUYER IS ENTERING INTO A LEGALLY BINDING AGREEMENT. BUYER SHOULD READ AND FULLY UNDERSTAND THE CONTENTS OF EACH AGREEMENT MENTIONED IN THE SALES CONTRACT, INCLUDING, BUT NOT LIMITED TO, THOSE DOCUMENTS CONTAINED IN THE DOCUMENT PACKAGE FOR THE COMMUNITY AND HO'OPILI. THESE DOCUMENTS ARE CALLED THE "**COMMUNITY DOCUMENTS**" AND EACH DOCUMENT WILL AFFECT BUYER'S SUBSTANTIVE RIGHTS AND OBLIGATIONS. THIS DISCLOSURE ADDENDUM ATTEMPTS TO HIGHLIGHT SOME BUT NOT ALL OF THE IMPORTANT PROVISIONS OF THE COMMUNITY DOCUMENTS AND TO PROVIDE BUYER WITH OTHER INFORMATION. IN THE EVENT OF A CONFLICT BETWEEN THE COMMUNITY DOCUMENTS AND THIS DISCLOSURE ADDENDUM, THE COMMUNITY DOCUMENTS SHALL CONTROL. HOWEVER, WHERE THIS DISCLOSURE ADDENDUM PROVIDES FOR ADDITIONAL, DIFFERENT OR EXPANDED COVENANTS OR OBLIGATIONS WHICH ARE NOT CONTAINED IN THE COMMUNITY DOCUMENTS, THIS DISCLOSURE ADDENDUM SHALL CONTROL.

BUYER UNDERSTANDS AND ACKNOWLEDGES THAT THE MATTERS CONTAINED IN THIS DISCLOSURE ADDENDUM AND OTHERWISE IN THE SALES CONTRACT REPRESENT A GOOD FAITH EFFORT BY SELLER TO DISCLOSE CERTAIN INFORMATION THAT MAY AFFECT BUYER'S DECISION TO PURCHASE THE PROPERTY, BUT THAT THESE DISCLOSURES ARE NOT INTENDED TO BE AND SHOULD NOT BE REGARDED BY BUYER AS A COMPLETE DESCRIPTION OF ALL MATTERS THAT ARE OR MIGHT BE RELEVANT TO THE OWNERSHIP AND USE OF THE PROPERTY. BUYER ALSO UNDERSTANDS THAT THIS DISCLOSURE ADDENDUM CONTAINS A RELEASE PROVISION THAT HAS LEGAL CONSEQUENCES. Buyer understands and acknowledges that the activities in and around the Community affect the use and enjoyment of the Property and represents and warrants to Seller that Buyer, in Buyer's sole discretion, based on Buyer's independent investigation, has determined that the benefits of owning and enjoying the Property outweigh such detriments and risks. Buyer hereby covenants and agrees to assume all risks of impairment of the use and enjoyment of the Property, property damage and personal injury arising from activities affecting the Community. The terms of this Disclosure Addendum shall survive occupancy of the Property by Buyer and the recordation of the Deed and shall be binding upon and inure to the benefit of the parties and their respective heirs, personal representatives, successors and assigns.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Community Documents. Buyer is strongly encouraged to carefully read the Community Documents applicable to the property Buyer is purchasing (sometimes "**Property**" and/or "**Home**" and/or "**Lot**"). Without limitation, the Community Documents, as the same may be amended, modified and/or supplemented, include the: (1) Master Declaration; (2) Master Association's Articles and Bylaws; (3) Design Guidelines comprised of the Ho'opili Design Guidelines described in the Master Declaration ("**Ho'opili Design Guidelines**"), Ho'opili Urban Design Plan ("**Ho'opili UDP**") and any supplemental design guidelines; (4) to the extent applicable to the Community, Ho'opili Commercial Use Guidelines and Ho'opili Signage Guidelines defined in and pursuant to the Master Declaration; (5) other related materials adopted by the Master Association, including any Ho'opili Community Rules; (6) Supplemental Declaration Permitting Accessory Dwelling Units on Specified Lots; (7) Declaration of Restrictive Covenants (ADU Unit), if applicable to a lot; (8) Sales Contract; and (9) Deed.

Master Planned Community. The Ho'opili Community is a master planned community encompassing several residential and mixed use communities, condominiums, commercial and other related facilities. Ho'opili is planned to have many subdistrict areas, including some 17 single family residential subdistrict areas, which may contain other uses. 'Ikena is a single family community that is part of the 'Ikena residential subdistrict. Additional homes may be included in the 'Ikena

residential subdistrict in the future. By purchasing a home in the Community, Buyer agrees that Buyer, Buyer's family, lessees, tenants and guests will observe and obey the terms, covenants, conditions and provisions contained in the Master Declaration, the Ho'opili Articles and Bylaws, the Ho'opili Design Guidelines, the Ho'opili Community Rules, if any, as well as those terms, covenants, conditions and provisions set forth in the Community Documents.

Effect of Master Declaration. The Community is or will be developed and operated according to the rules, agreements, conditions, restrictions and other limitations affecting the Community and Buyer's Property set out in the Master Declaration. The Master Declaration also reserves for others certain rights in the Community lands, so that these rights are not part of what Buyer will own when purchasing a Home and Lot. For example, the Property interests above and below the surface of the Community and Buyer's Lot, such as water rights, were, are or will be owned by others and/or used for other purposes. As such, the Master Declaration directly affects Buyer and Buyer's Property. In purchasing a Lot Buyer understands and agrees that the ways in which Buyer may use Buyer's Property is limited and that ways in which others may use other parts of the Community or adjacent lands may affect Buyer and Buyer's Property.

Design Review. Seller and the County retain design review and approval authority over all developments in Ho'opili, pursuant to the Ho'opili UDP and Ho'opili Design Guidelines. In order to assist in the review of projects and interpretation of provisions of the Ho'opili UDP, Seller has established a Design Advisory Board ("**DAB**") comprised of professionals in various fields including but not limited to architecture, planning, landscape architecture and engineering to review project plans. As an accommodation, the authority of the DAB to administer and to enforce the Ho'opili UDP and the Ho'opili Design Guidelines with respect to proposed improvements by Owners and commercial users within the Ho'opili Community has been delegated to the Ho'opili Design Review Committee established pursuant the Master Declaration (herein, "**DRC**" or "**Design Review Committee**"), which may adopt such design guidelines and rules, as determined appropriate by the DRC, specific to any land use classification within Ho'opili and which may otherwise contain specific provisions that vary from one portion of Ho'opili to another depending upon the location, unique characteristics and intended use thereof.

Plot Plans. Buyer may be provided with a "plot plan" prepared by Seller for the Property, which will show certain information specific to the Property, such as the approximate location of utility connection points and building setbacks. The Property may also be subject to landscape, utility, sign monument, mailbox and other easements not shown on the plot plan. Street monuments and other items including, but not limited to, cluster mailbox units, lamp posts, handholds, fire hydrants, electrical transformers and utility boxes, easements, and other facilities may or may not be located as may be shown on the plot plan for the Property. Both before and after the Property is conveyed to Buyer, Seller shall have the right to revise the plot plan for the Property to show new or revised items affecting the Property and/or other portions of the Community.

Date of Disclosure. Information in this Disclosure Addendum is current, to the best of Seller's knowledge, as of the date of publication set forth in the bottom left hand corner of this page. The information contained herein was collected from sources deemed to be reliable. While Seller has made every effort to obtain the most recent and accurate information, Buyer should rely solely on Buyer's own investigation and the investigation of Buyer's agents in making a decision to purchase. As information can change rapidly, Seller also encourages Buyer to contact the agencies and named individuals at the addresses and phone numbers listed for the most up-to-date information.

Closing. Completion dates are ALWAYS and ONLY estimates. Early occupancy is NOT ALLOWED. Early delivery of furniture is NOT ALLOWED.

Loans. Closing of any loan that will finance Buyer's purchase is Buyer's responsibility. Buyer's sales representative will assist, but each Buyer must stay in contact with such Buyer's lender so that loan approval is obtained in accordance with the time frames provided in the Sales Contract and Closing coincides with building completion. Buyer must be in a position to close escrow on the transaction within five (5) days after Buyer's Home is ready for occupancy. Delay interest charges may be charged if these deadlines are not met and/or Seller may cancel the Sales Contract.

Financing. The primary lender will be DHI Mortgage Company, Ltd. ("**DHI Mortgage**"). DHI Mortgage is an affiliate of Seller. Buyer should review the special disclosure regarding DHI Mortgage. Buyer should be aware that DHI Mortgage may offer special rates and incentives and if the loan is approved by DHI Mortgage and closed utilizing the settlement services of DHI Mortgage, Buyer shall be entitled to purchase a package of related settlement services at a discounted price. Also, because of its knowledge of the Community, DHI Mortgage should be able to approve Buyer's loan quickly. Buyer is not required to use the affiliated company as a condition of Buyer's purchase of the Property or Buyer's access to settlement services. Buyer may use any lender Buyer wishes. However, Seller has not reviewed or approved any lender's sales or marketing materials, and does not make any representations or warranties whatsoever regarding any matters set forth therein or Buyer's ability to obtain any financing under any particular terms. Buyer is strongly encouraged to make Buyer's own independent evaluation of the rates and loan programs offered by all lenders. Buyer understands that the

interest rate and loan fees for the loan applied for will be determined at the time of the Close of Escrow and may be higher or lower than on the date Buyer signed the Sales Contract to purchase Buyer's Home. Buyer also acknowledges that the interest rate, loan fees estimates or quotations that may have been provided to Buyer are for illustrative purposes only and do not constitute a binding commitment. If Buyer has chosen to make a loan with a lender with whom Seller has arranged a loan commitment, the interest rate quoted may not be available unless the loan closes by a certain date. Seller is not responsible if, for any reason, including construction delays, Buyer's loan does not close on time to obtain a guaranteed rate.

Lot Numbers. The Lot numbers that are referenced in this Disclosure Addendum are the Lot numbers that appear on the subdivision map for the Community ("**Subdivision Map**"). The legal Lot numbers may differ.

Model Homes.

Decorator Items. One or more but not all Homes to be offered for sale by Seller may be available for viewing by Buyer as a model home (each, "**Model Home**"). These Model Homes show generally the configuration of certain Homes that may be constructed by Seller in the Community, but are not necessarily identical in construction or configuration to homes bearing the same model designation. The Model Homes may reflect typical or different exterior elevations, floor plans, workmanship and methods of construction, but may differ from the Home you purchase. Your Home will not be constructed to the precise specifications or design of any Model Home. The exterior elevations, architectural treatments, floor plans and colors shown on any master plans on display at the office of Seller may be different than those displayed in the models. Room dimensions, square footages, cabinetry and countertops in kitchens, bathrooms and laundry areas, etc., plumbing and electrical fixtures, door types, door hardware, shower walls, closet doors, appliances, tile and floor covering, bathroom accessories (faucets, shower heads, etc.), window types, and electrical and cable outlet placement may also vary from Model Homes, the plans and/or your Home. By way of example, Model Homes may have window coverings which are not included in the purchase price of the Home. Seller's warranty and representation as to the similarity between the Home being purchased and a Model Home constructed by Seller is limited strictly to design and configuration (subject to variance in horizontal measurements permitted by construction tolerances (+/- 2%) and not to similarity of appearance dependent upon particular decorations, furnishings or landscaping, or the location of wall switches, electrical outlets, thermostats, chases, plumbing and similar items (which may vary from the Model Home). You should note that the Model Homes you may have seen have been professionally decorated and landscaped to present an attractive appearance to prospective buyers and will differ from the Home you are purchasing. Certain landscaping features may not be permitted under the Master Declaration. Variations in floor plan, paint schedules and landscaping are to be expected. Buyer should also be aware that model homes in other communities developed by Seller may contain features or have been constructed in a manner different from the Model Homes in this Community.

The Model Homes may show the types of features that could be incorporated into the Homes and may be helpful in providing purchasers with possible decorating ideas. Model Homes may display certain fixtures and furnishings, which MAY be identified as "Decorator Items". These are not available to purchasers even upon payment of an additional charge. In certain instances, decorator items may not be marked. Buyer should further be aware that window coverings are not included in the purchase price of a Home even though they may be installed in the Model Homes. Decorator items (such as furnishings, draperies, built-in shelves and lighting) and landscaping and hardscaping (such as entryways, lanais, and spas) are displayed only to suggest ideas to buyers. All such options and upgrades displayed in Model Homes (including, decorator items, landscaping and hardscaping) are not included in the purchase price for your Home unless expressly agreed to in writing by Seller. If Buyer has any questions regarding which items, such as light fixtures, may be purchased as an option or come with the Home, they should consult a Sales Representative and make sure the item in question is addressed in writing in the Sales Contract.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Materials and Construction. Buyer should be aware that homes in the Community are constructed and fabricated with various materials and may include steel and wood framing components. Wood framing components include such items as stud framing in certain locations, blocking, posts plates, beams and roof trusses, among others. Seller may substitute materials, fixtures, equipment and appliances of substantially equal quality as (a) those specified in the plans and specifications for Buyer's Home or models and/or (b) the standard items displayed in the Model Homes. As a result, Buyer's Home may be constructed completely of wood framing materials. Seller also reserves the right to change the location of electrical switches, gas meter, if applicable, and water meter, plumbing chases and outlets, windows, and the like and the right to make any changes in construction (e.g. plan changes, field

changes or otherwise) which it deems appropriate, such as the substitution of wood and metal framing. Buyer understands that asphalt shingles are subject to cracking if walked on or struck by an object. In addition, Seller has the right to make changes in construction and as may be required from time to time by any lender, government agency, or as may be required by any law or regulation, by labor, material or utility availability, shortages, or stoppages or by any emergencies. Buyer accepts all of these changes. Buyer understands and agrees that any available rebates in connection with the installation by Seller of ENERGY STAR or other energy-efficient appliances or devices, including photo-voltaic, solar and EV devices, in the Home or at the Community shall belong to Seller.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Construction Plans. Copies of construction plans for Buyer's Home are available for inspection prior to Closing. However, Buyer should be aware that the construction plans will not include field changes (changes made during construction, which occur regularly) nor the changes described above. As a result, construction plans will not reflect the as-built condition of the Home.

Dimensions and Square Footages Are Estimates Only. Lot and Home dimensions and square footages are approximate. Buyer should be aware that any statement regarding the dimensions of rooms or square footages of Homes or other areas are approximates only. Buyer may not rely upon any written brochures and other sales documents or oral statements by Seller or Seller's agents regarding the exact square footage of Buyer's Lot and Home.

Homeowner's Manual/Orientation/Keys. At the time that Buyer signs the Sales Contract Buyer will receive Buyer's Homeowner's Manual. Please take time to review this manual completely. This manual should be brought to any meeting regarding option selections, Buyer's home orientation meeting and walk-through inspection of Buyer's new home. If Buyer has any questions please ask Buyer's sales representative. Seller will schedule an appointment with Buyer to conduct a home orientation tour of Buyer's new home prior to Closing. At that time Seller will review with Buyer the Homeowner's Manual and Seller's Limited Warranty. Buyer should advise Seller's warranty service representative of any concerns Buyer may have about Buyer's new home during the course of the home orientation tour. By doing so, delays in Closing may be avoided. Keys to Buyer's new home will be available after recording of the Deed. Buyer acknowledges that the Homeowner's Manual contains certain operating instructions and maintenance requirements and schedules for certain components of Buyer's Home, including, without limitation, information relating to mold and mildew. Buyer must review and comply with any and all operating instructions, maintenance requirements and schedules for Buyer's Home contained in such Homeowner's Manual.

Elevations and House Plans. In order to provide diversity for the street scene, Seller's architect may have produced more than one exterior elevation for the front, side and rear of each floor plan. Due to this and due to certain variations caused by construction techniques and methods, Buyer may notice size, scale and proportional interior and exterior changes from the Model Home or other Homes in the Community from Buyer's particular elevation. These may include such items as ceiling heights, sloped ceilings, veneer treatments, window locations, window types and sizes, gutter and downspouts, interior and exterior wall and roof lines, color schemes and front porch dimensions. It is the responsibility of Buyer to inspect the Property and consider the differences in the elevations and other features of Buyer's Home prior to Close of Escrow. Buyer acknowledges that Buyer has had the opportunity to review the floor plan and elevation and interior details for the Home Buyer is purchasing, all as shown on the building plans located in the sales office. Seller may alter, add or delete any house plans for homes to be constructed in the development.

Accessory Dwelling Units; One Dwelling Per Lot/Park Declaration. Only Certain home plan types at the Community and specific lots may be improved with an accessory dwelling unit, which is a second dwelling unit, including separate kitchen, bedroom and bathroom facilities, attached or detached from the primary dwelling unit on the Lot, as permitted by the County's Department of Planning and Permitting ("**DPP**"). Seller plans to construct or has constructed an accessory dwelling unit ("**ADU unit**") consisting of Sales Lots 3, 8, 12, 22, 29, 37 and 47, which will be evidenced by a Supplemental Declaration Permitting Accessory Dwelling Units on Specified Lots, as required and permitted under the Master Declaration. Seller may construct ADU units on various sales lots within any additional construction increment of 'Ikena at Ho'opili in which event these sales lots will be covered by the foregoing declaration. Only the Lots specified in this Section and authorized by the foregoing Supplemental Declaration may be improved with an ADU unit. No other Lot in the Community may be so improved except with the express consent of the Declarant under the Master Declaration. Any Lot that includes an ADU unit will also be subject a special declaration of restrictive covenants ("**Supplemental Declaration re ADUs**", and described collectively with the Master Declaration as "**Declarations**") that prohibits the creation of a condominium on the Lot, restricts the rental of either of the ADU unit or primary dwelling unit on the Lot to a minimum six (6) month period, requires, except under situations of unforeseen hardship (confirmed by the director of DPP), that the Lot Owner or a person related to the Lot Owner or a person designated by Lot Owner (as approved by DPP) occupy either the ADU unit or the

primary dwelling unit on the Lot if either one or the other dwelling units is rented to an unrelated party, and, among other matters, prohibits the use of the ADU unit as a bed and breakfast or transient vacation unit. A copy of the Supplemental Declaration re ADUs will be provided to buyers of a lot with an ADU unit Each Buyer of a Lot containing an ADU unit agrees to be bound by the Supplemental Declaration re ADUs. Lots with an ADU Unit may be charged a monthly base sewer charge for both dwelling units. Buyer may obtain additional information at https://www.honolulu.gov/rep/site/env/wwm_docs/Announcement_of_Rate_Increase_7-1-2016.pdf. Lots will also be subject to a Declaration of Restrictive Covenants Park Dedication – One Dwelling Per Lot. Seller reserves the right to record a Declaration of Restrictive Covenants Park Dedication – One Dwelling Per Lot on all lots within the Community prior to Closing. This Declaration will provide that the lot shall be used for only one single-family residential purposes unless it is one of lots identified in this Disclosure Addendum on which an ADU unit is to be constructed. The restrictions described in this Section will be noted as encumbrances affecting the Lot.

No Guarantee About Development. Seller does not make any representation that the Community will be developed as proposed. Seller reserves the right, at any time and without notice, to modify its development plan for the Community, including, but not limited to, changing the style, size, square footage, density, exterior elevations, color schemes, construction schedule and/or phasing of the homes in the Community. The Model Homes are displayed for illustrative purposes only and such display does not constitute a commitment to complete the development with the same or similar homes. Seller may also sell all or any of the Property in the development to another builder, who may change the house plans, square footage, elevations, features, materials or designs of the homes.

Buyer Information and As-Built Conditions. In connection with Buyer's purchase of a home in the Community, Seller may provide Buyer with sales literature, which may include such information as elevations, lot dimensions, set-backs, house orientation, driveway locations, utility structures, rear yard dimensions, easements, etc. This information is intended for general informational purposes. There may be discrepancies between this information which is provided to Buyer and the actual as-built conditions. If there are such discrepancies, the as-built conditions will control.

Additional Information About Buyer's Home.

1. **Front Doors**. Front doors will vary by elevation and floor plan. Standard doors included with the purchase of Buyer's Home will vary in style to suit different elevations. Certain door styles, such as distressed or antiqued for decorative accent, may differ in appearance from the doors installed on the Model Homes.

2. **Color Variations**.

Paint - Buyer should confirm with Buyer's sales representative what interior colors will be used in the Home. Regarding white walls, it must be remembered that there are many shades of white. Buyer should not assume that the Home will be painted any shade of white shown in the Model Homes. Model interior paint colors are chosen by the model decorators and are not necessarily what will be used in Buyer's Home. Buyer should also be aware that variations in wall texture and drywall taping may be more obvious where gloss, semi-gloss, and/or luster paint is used and may appear more obvious at different times of the day or night depending upon the lighting in Buyer's Home.

Grout –The elements of nature including, but not limited to, sun, temperature, food, or chemical reactions may, combined with the aging process, change the color of the grout in varying degrees from time to time. In the event of repairs or replacement of tile or grout in the future, the replacement grout and/or tile probably will not match the color of the original tile or tile grout.

Countertops - Samples are small select cuts from a slab; they do not exhibit all the characteristics of a design and therefore are not fully representative of what will be installed in your Home. Variations in the color, pattern, size, shape and shade are inherent and unique characteristics to be expected with this product. This does not affect the product performance in any manner. Certain colors are meant to be used as accents rather than a main work surface. Furthermore, the pattern may not always match at the seams and there may be variations between the deck surface and backsplash. These items are not covered by the warranties of Seller, the countertop fabricator, and the countertop manufacturer. Your countertop will not be replaced due to these variations.

3. **Fire Prevention.** Smoke detectors will be installed in Buyer's Home in accordance with County requirements. Smoke detectors must be maintained by Buyer and backup batteries replaced in accordance with manufacturer's recommendations provided to Buyer at the orientation. Emergency contact is not automatically made when a smoke alarm is sounding, so Buyer is charged with calling the proper emergency number upon the occurrence of an emergency.

4. **Driveways and Garages**. The shape and dimensions of the garages and driveways for the homes in the Community may not be standardized. Driveways may vary in size, shape, length and/or configuration from the model driveways or from what is shown on any depiction of the Community. Any lot within the Community designated as a "Flag Lot" in connection with the subdivision of the Community is subject to Section 21-4.20(a) of the LUO, which requires that the access drive serve only the "Flag Lot" and have a minimum width of 12 feet. Some of the garages may require Buyer to maneuver a lengthy driveway to enter and exit the garages. Parking of vehicles in the garages may also require Buyer to maneuver a vehicle back and forth in order to enter the garage. There may be certain obstacles (i.e. pillars, Buyer's Home, fencing, improvements, etc.) that may make it difficult to maneuver a vehicle into and out of the driveway and garage. Seller is not responsible for any damage to any home, including Buyer's Home, landscaping, pillars, fencing or any other improvement incurred during Buyer's or Buyer's guests or visitors maneuvering of the driveway and/or parking of a vehicle in the garages. It may not be possible to maneuver certain types of vehicles on the driveways and into the garage. Not all garages will accommodate all vehicles (especially full size models and sport utility vehicles) due to the shape, size, configuration and location of the garages, garage doors, driveways and homes. Also, parking of the maximum number of cars for which a garage was designed may block or make it difficult to access any storage area (if any) in the garage or to the Home from the garage. Buyer acknowledges that it is Buyer's responsibility to determine whether the size and location of car spaces in the garage of the floor plan of the Home selected by Buyer are adequate and appropriate to park Buyer's vehicles. Buyer should also confirm where street parking is permitted. Please realize that in many instances the Master Association's Board of Directors may limit parking on private streets and on streets dedicated to the County, the County may restrict parking on public streets.

5. **Drywall**. Some shadowing in Buyer's drywall may occur at different times of the day or night depending upon the lighting in Buyer's Home, especially on curved walls. Also, if gloss, semi-gloss, and/or luster paint is used on walls, the variations in drywall taping and wall textures (sometimes called "flashing" in the painting industry) may be visible and appear more obvious depending upon the time of day and lighting in Buyer's Home. These variations are within industry standard.

6. **Air Conditioning**. Seller will install as a standard item a central ducted air conditioning system(s) to serve the Home. Buyer understands that the air conditioning condenser(s) may be located in a different area than shown in the models or on other plans or exhibits. The specific location of compressors at the Community may result in sound transmission that may affect Buyer's Home. Buyers should be sensitive to excessive noise and possible disturbance to neighbors. Buyers, not Seller, are responsible for the unit's quiet operation. Buyer understands that even with screening, air conditioning units may emit noise levels unacceptable to some people. Buyers agree to assume all risks of such noise emissions.

7. **Satellite Dishes**. Satellite dish antennas may be installed and used within the Community only to the extent permitted by law. Where possible, all components of the system should be concealed from public view and be placed on the side of the home not facing the adjacent road. The system should not be visible from the front yard of the Home. In instances where Buyer can demonstrate that installation on the rear of the Home would cause an unreasonable expense increase in the expense of installation, maintenance or use, or would prevent reception of acceptable signal quality, installation in a location where the satellite dish is visible from the Street may be appropriate. Submission of documents supporting Buyer's position that installation in a location visible from the Street is appropriate shall be made within thirty (30) days of installation. The Design Review Committee may retain its own expert to confirm that installation on the rear of the Home causes an unreasonable expense increase in the expense of installation, maintenance or use, or would prevent reception of acceptable signal quality. Such installation shall only be made in accordance with the Declarations, Ho'opili Design Guidelines, and any other recorded restrictions and governmental requirements. However, if installed Seller has provided no assurances or guarantees that any satellite dish or other antenna installed within the Community will remain unobstructed. Buyer should understand that antennae signals may become obstructed by the installation and maintenance of Improvements within and outside of the Community including homes, walls, fences, trees and other landscaping.

8. **Building Code Changes**. Periodically, governing agencies change building codes and other requirements; therefore, as construction proceeds, future homes may be constructed differently in order to meet these updated or revised regulations. Seller reserves the right to change elevations, designs, or other elements of the construction process at its sole discretion. Seller is not responsible for providing any certification Buyer may request or require concerning compliance of construction of the home with Building Codes or other requirements.

9. **Electrical Outlets in Garage**. The building code requires that electrical outlets in garages be provided with ground fault interrupter circuits. These circuits are not intended for use with any appliances, especially refrigerators, freezers and aquariums or on any service that an interruption of electrical power would cause a problem. Seller strongly recommends that Buyer not use garage circuits for appliances or for any service (such as freezers) that would be harmed by an

interruption of electrical power. Seller cannot be held responsible for the contents of appliances which are damaged because of the ground fault interrupter switches shutting off power, nor can Seller be held responsible for damage to the appliance units themselves. Please check with an electrician for further information.

10. **Fencing**. Buyer should be aware of what fencing or walls may be constructed surrounding Buyer's Home, if any, and the fences Buyer will be required to maintain. The exact size, type and location of Buyer's fence or wall will be determined at the time of fencing installation.

11. **Concrete Products**. Cracks will occur in any stucco, EFS, and plaster exterior. This is normal in all cementitious materials. Certain elevations incorporate a "smooth trowel" plaster finish. Buyer should be aware that this finish is particularly susceptible to cracking. Cracking does not affect the structural integrity of Buyer's Home and is part of the natural look of stucco and plaster. Poured on grade concrete is prone to a certain amount of cracking as it cures over time. Such cracks can be minimized by scoring, but they cannot be completely avoided.

12. **Dryer Vent System**. The dryer vent system in the homes has been installed pursuant to the design instructions of the manufacturer of the dryer being offered by Seller. If Buyer does not select the dryer being offered by Seller at the time of purchase (or installs a new dryer in the future), Buyer understands that the design of the dryer vent system may not conform to the dryer being installed by Buyer as each dryer manufacture has its own dryer vent system requirement. Prior to the installation of a dryer by Buyer, Buyer should review the manufacturer's dryer vent system requirements to verify that the dryer vent system installed in the Home conforms to the manufacturer's requirements.

13. **EV Use**. The Home's garage is "EV Ready" which means the Home's garage is provided with a junction box and 6/3 electrical cable to the breaker panel for the future installation of an electrical car charging station that may be installed by Buyer. The Breaker panel will have reserved slots to accommodate an additional 110V or 220V for future expansion.

14. **PV Ready.** The Home is "PV Ready" which means the Home is "pre-plumbed" for installation of a photovoltaic system ("**PV System**") post-closing by Buyer in that a photovoltaic conduit will be/has been installed from the electric panel into the Home's attic. The PV System pre-plumbed improvements by Seller do not penetrate the insulation in the attic or the roof deck of the Home, but permit future re-routing by Buyer's PV System contractor. Seller provides no assurance that the installation of a PV System will be permitted under practices, regulations or rules adopted by Hawaiian Electric Company ("**HECO**"). Buyer should confirm with HECO whether such a system may be installed at the Home. Buyer acknowledges and agrees that Seller makes no warranty or representation concerning electrical expense savings a Buyer may obtain through the installation of a PV System, the efficiency of any solar energy (hot water and photovoltaic) system, which are dependent on a myriad of factors including, without limitation, system quality, weather, orientation to the sun, the size of the system capable of being installed on the roof of the Home, or the impact such installation may have on the integrity of the roof system. If Buyer elects to have such a system installed and the installation is authorized by HECO, Buyer must utilize a certified licensed photovoltaic system installer and should consult with the installer regarding the size and location of the PV System as the design of the roof or roof orientation may not be optimal for the PV System. Before commencing any installation effort, Buyer must secure any and all necessary permits required to allow such installation and obtain all necessary approvals of such activity in accordance with the Ho'opili Design Guidelines. Buyer should review the Ho'opili Design Guidelines closely and should provide a copy of the Ho'opili Design Guidelines to Buyer's photovoltaic contractor before installation of such a system.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

15. **Plumbing, Electrical and Air Conditioning Lines**. Buyers should use caution and care when hanging items on walls by, among other things, using a stud finder or other device or consulting with a contractor or other professional, to ensure studs are used so as not to puncture plumbing, electrical or air conditioner lines within the walls of the Home.

16. **Safe Room**. The Home will include a "residential safe room" in accordance with applicable codes. The intent of the safe room as provided in such applicable codes is to temporarily provide an enhanced protection area, fully enclosed within a dwelling or within an accessory structure to a residence, which is designed and constructed to withstand the wind pressures, windborne debris impacts, and other requirements of such applicable codes. Buyer should use caution and care when undertaking any alterations or improvements to the safe room, including but not limited to the installation of a closet system and/or shelving, and Buyer shall be responsible to verify with Buyer’s contractor or other professional that any such alterations or improvements do not compromise the safe room’s compliance with applicable codes.

Limited Warranty.

Generally. Seller will provide buyers with Seller's Limited Warranty (herein, sometimes, "**Limited Warranty**") covering Buyer's new Home at Closing. Seller makes no warranty or guarantee, express or implied, except as specifically set forth in the Limited Warranty. A copy of the Limited Warranty is in Buyer's Homeowner's Manual ("Everything You Need to Know About Your New Home") Buyer will receive at the time of Buyer's purchase. The Limited Warranty describes Seller's repair and warranty obligations, the procedures for making a warranty claim and the procedures for the settlement of disputes.

Exclusions. In order for the Limited Warranty to be effective, common sense maintenance of Buyer's Home is required. Buyer should review the Limited Warranty to become familiar with specific exclusions. By way of example, the Limited Warranty does not cover non-structural cracking of the Home's drywall, foundation slab or non-structural variations from level in foundation slabs or upper story sub-floors. Standard construction techniques and the applicable design for the Home's drywall and foundation slab second story sub-floor may result in a degree of non-structural cracking or "spider" cracking in the drywall and slab and may result in modest variations from level in the slab and sub-floor. Although certain foundation slabs will contain contraction joints to minimize cracking, such cracking is inherent in concrete construction. Variations from level on second floor sub-floors are filled and patched with an adhesive floor leveling agent. Further, in the case of concrete slabs, hard surface floor coverings (wood, marble and ceramic tile), where permitted, may also crack or reflect the effect of foundation slab cracking. There is no Limited Warranty coverage for these circumstances. To minimize this risk, Seller recommends that hard surface floors, where permitted, be installed over a "slip sheet" available through Buyer's flooring supplier. In conformance with home construction standards, the rafter tails will not be caulked unless there is a gap between the rafter tails and the fascia in excess of 1/8 of an inch. By signing the Sales Contract and this Disclosure Addendum, Buyer accepts these conditions with respect to the Home. Buyer should review the "Preconstruction Conference Confirmation Form" prior to the home orientation tour to become familiar with Seller's standards and specifications.

Options.

Generally. All option items are subject to adjustment in price and quality if such items become unavailable for reasons beyond Seller's control. Buyer will be required to make a deposit, which is **non-refundable**, on all selected option items. Seller reserves the right not to install any selected options until Buyer receives loan approval. Once option selections are completed, Buyer and Seller agree that the final purchase price is to be amended by execution of the Final Sales Price Addendum to include options.

Insulation. Where insulation is installed, Seller will install Kraft Faced, friction-fit, flexible batt or blanket fiberglass insulation batt insulation with an R-value (or R-value equivalent) of R-19 is installed in the attic of the home during construction. Unfaced, friction fit, thermal batt insulation with an R-value (or R-value equivalent) of R-13 is installed in the exterior walls of living spaces and in any floor system between the garage and living spaces during the course of construction. No representations are or may be made that Buyers of homes in the Community will save on household expenses as a result of any house insulation.

Utilities/Phones/Cable. Buyer needs to contact the electric, phone and cable companies. Seller takes no responsibility for cable or telephone installation. Buyer should notify Hawaiian Telcom, Inc. or Spectrum, as applicable, in advance to schedule installation on or after recordation of Buyer's Deed. No early installation will be permitted. Buyer shall be responsible for initiating the commencement of any service from a utility company such as water, electricity, telephone and cable television (if available) upon or after the Closing Date. If Seller receives any bills for utilities that are attributable to the period after the Close of Escrow, Buyer shall reimburse Seller for such payments within ten (10) days after receipt of a statement from Seller. Seller is not affiliated with a cable company or with any other utility companies (i.e., water, gas electricity, telephone service, etc.), and has no control over the rates or the services furnished. The Board of Water Supply ("**BWS**") water distribution system (specifically, the Honouliuli, Waipahu, Kunia and Hoaeae wells) services Ho'opili. Seller has no control over the water pressure available at Buyer's Home. Seller does not make any representations as to when or if cable services will be available nor as to the quality of television reception or cable services. Seller has no control over timing of meter installation once final inspection has been performed. Seller also has no control over the location and placement of public utility structures and facilities. All locations of the utility structures and facilities are final, and Buyers shall not tamper, move or damage these structures and facilities. Buyer is to check with Buyer's sales representative to determine whether any utility structures or facilities are located within or in the vicinity of the Home Buyer is purchasing.

Real Property Taxes. While the 2022-2023 annual real property tax rate for residential property classified Residential is $3.50 per $1,000.00 net taxable value of the property, the real property tax rate for residential property classified Residential

A is $4.50 per $1,000.00 net taxable value of the property up to $1,000,000 and $10.50 per $1,000.00 net taxable value of the property in excess of $1,000,000. To the extent the City and County assesses the value of the Property in excess of $1,000,000, the Residential A classification and real property tax rate may apply to the Property for the 2023-2024 fiscal year. Payments are due on February 20 and August 20 each year.

Once an individual lot is conveyed by Seller to a third party, an owner-occupant may be eligible for a home exemption that reduces the net taxable assessed value used in determining and/or affects the real property tax classification of and rate applicable to the Property. Please see the City and County of Honolulu Department of Budget and Fiscal Services Real Property Assessment Division of the City and County's website at https://www.realpropertyhonolulu.com/ for general information regarding real property taxes and https://www.realpropertyhonolulu.com/media/1683/residential-a_17.pdf for specific information regarding the Residential A classification. An owner-occupant Buyer may only make a claim for a homeowner exemption on or before September 30th preceding the tax year for which the exemption is claimed. The basic home exemption is currently $100,000.00. For homeowners 65 years and older the home exemption is $140,000. To qualify for this exemption amount, Buyer must be 65 years or older on or before June 30 preceding the tax year for which the exemption is claimed. These tax rates are approximate only. For further information and to confirm the actual rate, Buyer may contact the Real Property Tax Office at (808) 768-3799. If Buyer installs alternate energy improvements for the Home, such as a photovoltaic system, Buyer may be eligible for an alternate energy improvements exemption. The Claim for Exemption Alternate Energy Improvements (ROH Sec. 8-10.15) form is available at www.realpropertyhonolulu.com. The Claim for Exemption Alternate Energy Improvements (ROH Sec. 8-10.15) form is available at www.realpropertyhonolulu.com.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Schools and Related Matters. The Community is located in the Leeward School District. The Leeward District telephone number is (808) 692-8000. The schools for this Community are determined by the Department of Education and are subject to change. Although various elementary schools, a middle school and a high school are planned in Ho'opili, it will be a number of years before construction of those improvements by the Department of Education.

Refuse Collection. Buyer understands that in order to receive postal and trash services, mailboxes and trash containers may need to be located only in those areas designated for these purposes. Trash pickup in certain communities may be by private contractor.

Postal Service/Mailboxes. The United States Postal Service will not deliver mail to the Home (or to any other home in the Community). Mail will only be delivered to the designated cluster mailboxes, which may be limited to a single location within or in the vicinity of the Community. Seller expects that the cluster mailbox system for the Community will be located in the pedestrian path lot located in 'Ikena adjacent to Kamaliehope Street, pending the approval of the U.S. Post Office. The United States Postal Service requires that at least 50% of the homes and roads within the Community be built and may impose additional conditions before mail services will commence. Buyers will need to arrange for temporary mail service via either a general delivery service through the post office in the area or purchase a post office box at any post office until the requirements of the United States Postal Service, which are subject to change, are met by Seller.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Property Maintenance and Condition. All homes and the land within the Community, including the land below Buyer's Home, may have expansive soils, and, as a result, improvements, including the Home and the driveways, walkways and other improvements may be subject to various types of distress including subsidence, settlement or lifting. Further, the land within the Community has been graded. Soil has been removed and added to reach the land's finished height and form, and non-expansive fill has been placed under structural improvements, with underlain expansive soils. Please refer to the Soils Condition and Drainage Addendum for further disclosures and recommendations. The Property is subject to subsidence, settlement or expansion due to the presence of expansive soils and fill material. Except for limited soil borings, Seller has not investigated the soils below the limits of grading and as result soil below the limits of grading may contain items installed during periods of agricultural use, such as, without limitation, drainage, irrigation and sewer lines which have been abandoned in place. Buyer also acknowledges that standard construction techniques and applicable designs for the foundation slab may result in a degree of non-structural cracking or "spider" cracking within the slab and that certain slabs will contain crack control joints. Buyer accepts such slab cracking. Certain non-structural cracking or swelling of drywall joints at windows, doorways and other locations with the Home may also be visible, should subsidence, settlement or expansion occur. Buyers must be especially sensitive to landscape watering, avoid over watering and ponding of water, and must abide by the recommendations for maintenance set out in this Disclosure Addendum in order to minimize the risk of these occurrences. Landscaping is also important and will reduce the incidence of erosion attributable to wind or rain.

Buyer understands and acknowledges that Buyer will be acquiring the Property in "AS IS" condition at the time of closing. Except as expressly set forth herein, Buyer is relying and will rely solely upon Buyer's own inspection and investigation of the Lot and the land of the Community, and is not relying and will not rely in any way upon any representations, statements, warranties, or other information or material furnished by Seller or its representatives, whether oral or written, express or implied. Buyer should also be aware that soils within the Community may be corrosive in nature.

Soil. The suitability of the soil contained within this Community for the planned construction was determined by Geolabs, Inc. A copy of the soils report for this Community is also available for review in the Sales Office.

Easements. Buyer is aware that there may be easements which affect the Community and Buyer's Property. These easements are noted in the Master Declaration, the exhibit to the Deed, the title report, the Subdivision Map, File Plan, if any, and/or the plot plan for the Lot. Specifically, Lots on Ho'oluana Drive, Kamaliehope Street and Hono'uli'uli Street will be subject to landscape easements benefiting the Master Association. Seller is installing fencing and landscaping within or adjacent to the landscape easement area in these Lots. Due to the topography and site conditions of the Lot, the fence and landscaping installed by Seller on the Lot may differ from the location shown on the plot plan for the Lot provided to Grantee and the fence may be located outside of the landscape easement area located on the Lot. Buyer acknowledges and agrees that Seller and the Master Association shall have the right to maintain and access the landscape easement area and any area outside between the landscaping easement and the fence installed by Seller. Buyer shall be responsible for the maintenance of the landscaping inside of the fencing located on the Lot and the maintenance, repair and, when required, replacement of the fencing in accordance with the Community Documents. The obligations and rights contained in this Addendum will be contained in the Deed for the Lot and shall be covenants running with the land. A subdivision monument or monuments and/or cluster mailbox system may be included within this landscape easement area and may affect certain lots. There may also be landscape easement areas within the Community roads.

Drainage Facilities and Easements. Surface water drainage in the Community is directed to the streets servicing the Community utilizing certain surface drainage facilities, which may include lined and unlined ditches and swales, affecting various Lots in the Community. Buyer may not alter and must maintain the existing drainage pattern on any Lot, nor shall any Buyer modify any existing drainage facility located on Buyer's Property. Failure to maintain the existing drainage pattern or altering the scope of the drainage pattern on Buyer's Property may adversely affect Buyer's Home. Saturation of the ground or ponding around foundation slabs may result in expansion or lifting of soils beneath the slab and settlement when the ground dries. Gutters, downspouts (directing water), splash guards, lined swales and pipe conduits should be considered if not included in the purchase of the Home or purchased as an option by Buyer, if available. Buyer shall maintain the existing drainage pattern on Buyer's Property. Buyer of a Property on which any drainage ditch facility, concrete swale, or portion thereof is located shall be responsible, at Buyer's cost, for the maintenance, repair and cleaning, as required, of the drainage ditch facilities located on Buyer's Property. The scope and extent of swale facilities within drainage and flowage easements is reflected on the approved grading plans for the Community. Buyer understands and agrees that should a swale facility or any drainage or flowage easement be disturbed during construction of a Home, Seller may restore the swale in accordance with approved grading plans even after closing of the purchase or sale. This right is reserved to Seller in the Deed and Master Declaration. If Buyer removes, modifies or otherwise alters the established drainage patterns or devices on Buyer's Lot, Buyer may cause significant and permanent damage to Buyer's Home and/or other homes, including but not limited to, damage to the foundation of Buyer's Home or adjacent slopes. Buyer should take precautions by using licensed professionals (e.g., landscape architects, civil engineers, geotechnical engineers, general contractors, etc.) to assure that Improvements such as walkways, landscaping, lanais, decks, planters, etc. are constructed so as not to alter the established drainage of Buyer's Home. Seller shall not be responsible for any modifications or changes to the established drainage for the Lot.

Sewer and Drain Easement. Certain portions of the Community may be affected by an underground sewer and/or drain easement benefiting the Community and/or the County. The County shall be responsible for the maintenance of any underground drainage facilities located on a Property, which are constructed for the benefit of the County. Such easements may not be reflected in the plot plans for the Community. The facilities may be located within the Property and may not be shown on the plot plans.

Sidewalk and Gutter Areas; Street Trees. Buyers shall maintain and keep clean, passable and free from weeds, debris and overgrowth the sidewalk, planting strip, and gutter area adjacent to Buyer's Property. Prior to or following the conveyance of the Home, the Master Association and/or Seller may landscape and/or plant trees in the planting strip in the sidewalk along the roadway in the Community ("**Planting Strip Area**"). Seller may plant trees in Buyer's yard when appropriate to satisfy City and County design standards. Under no circumstances may Buyer alter the Planting Strip Area without prior written consent of the Board of Directors of the Master Association, Seller, and the County. Without limitation of the foregoing, no landscaping or trees planted by Seller in the Planting Strip Area or trees planted in front yards shall be

removed, changed or relocated without the prior written consent of the Board of Directors of the Master Association, Seller, and the County. Other than lawn grass that may be planted by Seller, installation of impervious surface material in the Planting Strip Area is strictly prohibited. Even though Buyer is prohibited from altering the Planting Strip Area, each Buyer shall be responsible for the proper maintenance and care (including irrigation) of the Planting Strip Area and the landscaping and trees located within the Planting Strip Area and in front yards. If Seller installs an irrigation system in the Planting Strip Area the irrigation system will be connected to the Home. Buyer should be aware that the County ordinance may have additional restrictions regarding the Planting Strip Area and the trees Seller planted in front yards to satisfy City and County design standards.

Planting Strip Watering Easement. The Master Association shall have the right, but not the obligation, to own and maintain a sprinkler system installed within each Planting Strip of each property along certain Community roads (and in any Roadway Landscape Easement Area defined in the Master Declaration) as provided in the Master Declaration together with an electrical timer installed within the Home or yard. If installed, Buyer shall be responsible for paying for the water and electricity used for the sprinkler system and must ensure that water and electricity are available at all times for maintenance and irrigation of Buyer's Planting Strip adjacent to the property.

Sight Distance/View Triangles. A "sight view triangle" may be required by the County on certain corner Lots in order to maintain clear views of traffic at certain intersections. The County limits the height of structures and landscaping within the sight view triangle. If not reflected on the plot plan for the Lot, Buyer will need to confirm with the County Planning Department whether a sight distance/view triangle affects the Lot and limits the landscaping or improvements Buyer may wish to make to the Lot.

Setback Area Easement. Buyer understands and agrees that Seller shall retain an easement over the setback areas of the Lot for the construction and placement of fences, walls and entry signs together with all attendant rights to construct, reconstruct, install, maintain, repair and replace, as appropriate, such structures (including walls, fences, entry signs and the like), facilities and appurtenances as Seller determines necessary, appropriate or expedient.

Electrical and Utility Easements. Utility boxes, transformers, utility lines (above ground and underground), manholes and other utility features, such as structural transformers, transformer and switching vaults are placed throughout the Community and may be located near Buyer's Lot and Home. Certain Lots are affected by landscape and above ground or underground electrical, telephone, gas (if any), and cable utility easements shown on the Subdivision Map for the Community. Buyer should inspect the Lot to confirm the location of these easements and facilities. The location of these facilities depicted on the Subdivision Map is preliminary in nature and these facilities may be sited as required without further notice to Buyers. Electrical and utilities easements run in favor of and will be granted to the electric company, telephone company, gas company, and/or the local cable television provider. Seller has the right to grant these easement areas even after Buyer occupies Buyer's Home.

Use of Easement Areas. Buyer may landscape an easement area(s) as long as Buyer does not interfere with the use of the easement area(s) affecting Buyer's Lot. The grantee of the easement area, whether it is the electric company, the telephone, gas and/or local cable companies, the Master Association, or an agency of the County, will have the right to trim and keep trimmed any plants within the easement area that may be in the way. Also, Buyer may not be permitted to construct other structures in the area depending on the nature of the easement. Such structures may require the grantee's approval. Additionally, should the grantee determine that it must remove any plants or foliage within the easement area, the grantee may NOT be obligated to replace them, but rather will only be obligated to restore the surface of the ground within the easement area as much as the grantee determines is reasonably possible.

Lots Affected by Easements. Buyer's sales agent will have a schedule of Lots affected by easements. Further, a special Easement Addendum to the Sales Contract will identify easements affecting a Buyer's Lot. Such easements will also be reflected in the plot plan for the Home and/or the Subdivision Map.

Digging Generally. Buyer should call 811 before digging anywhere on Buyer's Property to avoid damage to underground utilities. If any digging is contemplated, call the Hawaii One Call Center at 811 at least five (5) working days beforehand. Be sure to give the address and location of the cross street(s) nearest where digging is planned. The Hawaii One Call Center will, at no cost to Buyer, contact all local public utilities to tone, mark or identify the location of underground public utilities. Homeowners are asked to mark the area where excavating is planned in WHITE as the utilities are designated other colors to mark their facilities (yellow for gas, oil, steam, petroleum, or other hazardous liquid or gaseous materials; red for electric; orange for communications, cable TV, alarm or signal lines, cables or conduits; blue for water, irrigation, and slurry lines; purple for slurry and reclaimed water; green for sewers, drainage facilities or other drain lines; pink for temporary survey markings). Buyers are encouraged to visit http://callbeforeyoudig.org/hawaii/index.asp for additional details

regarding the Hawaii One Call Center.

Natural Gas. Hawai'i Gas has installed a gas pipeline to a point of connection near the boundary of the Property. The gas pipeline is terminated (i.e., capped) and may not extend beyond this point of connection into the Property, and Buyer must contact Hawai'i Gas as to whether the gas pipeline can be extended to the Home, which work, if possible, shall be at Buyer's sole election, responsibility and expense. Seller provides no assurance that the installation of additional natural gas pipeline(s) to the Home or interior of the Home will be permitted under practices, regulations or rules governing Hawai'i Gas or other natural gas service provider. Regardless, Buyer should always make sure there are no gas pipelines underground where any digging is planned. Digging or running heavy equipment can damage gas lines and striking a gas line may cause an explosion resulting in personal injury, property damage and/or death. Always have underground gas lines located before beginning any excavation activity, even when conducting minor excavation (e.g., to install a fence or sprinkler system). As discussed above, call 811 before digging and the Hawaii One Call Center will contact all local utilities to tone, mark or identify the location of underground utilities.

If a gas leak is suspected, immediately evacuate the area and contact Hawai`i Gas' emergency department at 808-526-0066 or, if the situation warrants, call 911. Common signs of a gas leak include: odor of rotten eggs; an unusual hissing or blowing noise from the ground or exposed gas; flames near exposed piping or coming from the ground; constant and localized blowing of dirt, dust or debris; rapid bubbling at the surface of a body of water such as a puddle; unusual brown, dying or dead vegetation in otherwise moist areas over or near pipeline areas as well as unusual soil movement.

Buyers are encouraged to visit http://hawaiigas.com/safety/ for additional information regarding gas safety.

Community Common Areas

Collective Maintenance Responsibility. Each Owner in the Community must share in the cost to maintain, repair and replace the Community common areas as described in the Master Declaration ("**Community Common Areas**"). The Master Association may specifically assess the Community owners for the maintenance and repair of these areas.

Community Common Areas. The Community Common Areas include all of those items noted in the Master Declaration and may include, without limitation, the following:

Entrance Landscape and Sign Monument Easement which means and describes the sign monument and landscape features, if any, constructed in the landscape and/or signage easement shown on the Subdivision Map for the Community.

Landscaping Areas along and within the Community Roads and the landscaped areas within the Community as shown on the Subdivision Map.

Common Drainage Facilities which means and describes those facilities, if any, serving to control and direct the drainage of surface water within and the inlets into such facilities, as may be shown on the Subdivision Map.

Mailbox System(s) which means and includes any mail system serving the Community.

Pedestrian Access Lot(s) which means and describes the pedestrian access lot(s) shown on the Subdivision Map, if any, including any improvements, landscaping and irrigation system.

Access, Utility, and Drainage Easements which include those certain access and utility easements within the Community as shown on the Subdivision Map.

Road(s) which means and describes the roadways within and serving the Community. Road(s) will be included in the Community Common Areas if not dedicated to the County. These areas include the planting strip adjacent to the curb abutting the road travel surface, as well as the street trees located in the planting strips.

Ownership, Administration and Assessment. The Master Association shall own the Community Common Areas, once deeded to it and must accept the conveyance of the Common Areas from Seller. The Master Association shall be responsible for the management and administration of the Community Common Areas, and may charge

the Community owners for the cost to maintain, repair and replace these common areas. The level of service of maintenance of Community Common Areas shall be determined by the Master Association's Board of Directors.

Improvements/Ho'opili Design Guidelines. As specified in the Master Declaration, and the Ho'opili Design Guidelines, ANY exterior improvements to a Home or landscaping of a Lot, painting of Buyer's Home and the construction of fences/walls must comply with the Master Declaration and/or Ho'opili Design Guidelines, if any. The Ho'opili Design Guidelines require that all exterior metal, including gutters, flashing, sheet metal, and vents shall be finished to match or compliment the house/roof color. All vertical and hardscape improvements will need to be approved in writing by the Design Review Committee before the improvement is made. Buyers are responsible to review submittal requirements before design of improvements. Please note that DRC submittals must reflect mechanical screening material color and exterior metal finishes. Before constructing any improvements at the Property like walls or other structures, Buyers and Buyer's contractor must review the Property pins and the plot plan to make sure there are no discrepancies. If there is a discrepancy, please notify Warranty Service before any work is started so they can verify the placement for Buyer. The Property pins may have been moved during the course of surrounding or adjacent construction activities. Seller will not be responsible for any work done on the Property if they are not notified in writing of the discrepancy. Buyers are encouraged to read and review the Ho'opili Design Guidelines, as they will substantially affect Buyer's ability to improve Buyer's Lot. Buyers should note that the Ho'opili Design Guidelines are subject to further revision by the DRC. Before Buyer begins any grading, excavating, filling or constructing any improvements to Buyer's Home (e.g., planters, sidewalks, decks, lanais, lanai covers, landscaping, etc.), Buyer should engage the services of a qualified, licensed professional and Buyer should take necessary precautions in designing and installing such improvements to avoid damage to Buyer's Home and other improvements which may result from existing soils conditions. Please refer to the Soils Condition and Drainage Addendum for further disclosures and recommendations.

Buyer understands, acknowledges and agrees that in-ground/below-grade water features and/or swimming pools are not permitted as a general matter within the Subject Ikena Lots and in certain other portions of the 'Ikena residential subdistrict. Additionally, swimming pools, inclusive of above-ground pools, are not permitted in front yards, which may prohibit the Subject Ikena Lots, including Buyer's Lot, from having a pool. (See "Fencing and Walls," below, for more detail regarding "alley-loaded" lots.) As used herein, the term "water feature" is inclusive of ponds, pools, waterfalls and waterwalls, fountains, courses and streams, and similar improvements containing or intended to contain water and typically used as a decorative or ornamental element. As used herein, the term "swimming pool" is inclusive of outdoor Jacuzzis, whirlpool baths, hot tubs, lap pools, plunge pools, and similar improvements containing or intended to contain sufficient water to partially or fully immerse a person.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Fences and Walls. Various Lots in the Community may be sold with either a wooden, wrought iron, vinyl fencing, masonry walls or other type of fencing in place and constructed on the Lot. Pursuant to the Master Declaration, these fences and walls may not be removed and must be maintained and kept in good repair by the Lot owner. Certain Lots within the Community may also have a decorative planting area and/or masonry wall and sign monument identifying the Community. The Master Association shall be responsible for the maintenance of the referenced decorative planting areas, the wall and the project identification monument located on these Lots. If Buyer wishes to move a fence, Buyer must obtain the Master Association's approval as well as the approval of the adjoining Property owner. New fences will also require the approval of the Master Association and DRC and must comply with the County's rules and regulations.

Buyer understands, acknowledges and agrees that the Ho'opili UDP strictly limits the maximum height of fencing and walls. The UDP requires that side yard fencing shall not exceed a maximum height of six (6) feet along the structure of the Home and shall not exceed a maximum height of three (3) feet beyond the structure of the Home toward any road. Rear yard fencing shall not exceed a maximum height of six (6) feet. Buyer acknowledges that the Ho'opili UDP has strict limitations in respect of fencing and walls along the perimeter/front yards of alley-loaded lots which should not exceed a maximum height of three (3) feet. An "alley-loaded lot" means the lot has road-side frontage on both sides of the lot (or if a corner lot, on three (3) sides of the lot), and that therefore such a lot may have two (2) front yards (or if a corner lot, three (3) front yards), and may not have a "side" or "rear" yard. Buyer acknowledges that each of the Subject Ikena Lots, including Buyer's Lot, is an alley-loaded lot.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Retaining Walls and Other Improvements. All improvements to the Property must be approved by the Design Review

Committee. Due to the expansive soils at the Community, all structural improvement or new construction, such as lanais or room additions, must comply with the Ho'opili Design Guidelines. Those Guidelines require the installation of special foundations or structural fill under such improvements. Any such fence or wall or improvement shall be designed and constructed only in compliance with the Ho'opili Design Guidelines and the Master Declaration and shall in all instances conform in design and color (to the extent practicable) with existing fences and walls constructed by Declarant.

Landscaping.

Trees and Planting Strips. Trees may be planted in the front yards of various Lots and where they exist within the landscape easement fronting a Lot if they exist. Seller may also plant trees within the front yard of any Lot as may be required by the County. Each Buyer shall be responsible for the proper maintenance and care of any and all trees planted on Buyer's Lot. The County or Seller may also plant trees in the planting area bordering the roadways in the Community, as required by the County and Seller may install an irrigation system in the Planting Strip Area or landscape easement area, which will be connected to the home. Buyers may not remove, replace, alter or relocate these trees or plantings. Buyer must maintain the grass planting areas and may not gravel or concrete over the planting strip area. Buyer should be aware that the automatic sprinkler system serving grass planting areas may run more often (perhaps three times a day) until the landscaping has been established which typically takes 60 to 90 days and, as a result, Buyer's expense for the water and electricity used for the sprinkler system may be higher during the grow in period. Customer Care should be contacted before reducing irrigation to the grass planting areas.

To comply with the County's requirements and the Community Documents, Buyer must maintain any ground cover and/or tree planted by Seller in the Planting Strip. As mandated by the County and as set forth in the Master Declaration, homeowner's may not (i) prune, remove and/or replace any tree in the Planting Strip, (ii) plant trees in the Planting Strip, (iii) injure or destroy trees in the Planting Strip, or (iv) alter the existing ground cover or install any alternate ground cover or gravel and/or concrete in the Planting Strip without permission from Seller, the Master Association, and the County. The pruning, removal, replacement, injuring, destroying of trees and/or altering of any ground covering in the Planting Strip without permission from Seller, the Master Association, and the County, will result in Buyer having to replace or pay for the replacement of the tree with a County approved tree and/or ground cover. These requirements and restrictions shall also apply to trees required by the County to be planted by Seller within the front yard of any Lot.

Community Disclosures.

Other Development within the Surrounding Area. Buyer understands that Seller does not control the development of the entire surrounding area and that current and future plans for the development and use of all or any part of the surrounding area are under the control of others, and may change at any time before or after Closing of Buyer's purchase of the Property without notice to Buyer. The surrounding community contains or may contain various commercial, residential, recreational and ancillary uses, industrial, including extensive commercial, retail, industrial, multi-family and single-family detached residential subdivisions and rental communities. To date, Seller has conveyed vacant development parcels within Ho'opili to The Hawaiian Humane Society (5.473 acres; B-1 zoned; contemplated use - new West Oahu campus, which may include indoor and/or outdoor animal kennels), Fred Lau Properties, LLC (1.806 acres; B-1 zoned; contemplated use - not yet determined), HBP Partners LLC (57.190 acres; IMX-1 zoned; contemplated use - industrial business park; HBP Partners LLC subsequently conveyed the parcel to Costco Wholesale Corporation), The Queen's Medical Center (4.901 acres; BMX-3 zoned; contemplated use - ambulatory medicine center), Alaka'i Apartments I LP (11.311 acres; BMX-3 zoned; contemplated use - The Element market and affordable rental apartments up to 80% of area median income; Alaka'i Apartments I LP subsequently conveyed the parcel to a third party), The Mutual Housing Association of Hawai'i, Inc. (7.127 acres; A-2 zoning; contemplated use - Kulia at Ho'opili affordable rental apartments up to 60% of area median income), and AEP GP LLC (3.349 acres; BMX-3 zoned; contemplated use - hotel), all of which parcels may be in various stages of development. Buyer hereby accepts the risk of any changes pertaining to the development and use of all or any part of the surrounding area, and agrees that Seller shall not have any responsibility to Buyer for such changes. Buyer further understands and acknowledges that any descriptions of planned amenities for the surrounding area, which may have been provided to Buyer by Seller or agents of Seller, are for general information purposes only and are subject to change or deletion at any time and from time to time. Seller makes no warranties or representations regarding the accuracy or completeness of any descriptions of such planned amenities, which may have been provided to Buyer, and no reliance may be placed thereon. Further, as much as thirty percent

(30%) of the residential housing in the surrounding area and within the Ho'opili Community has been or may in the future be developed in cooperation with the County's Department of Planning and Permitting or equivalent State or County agency ("**Agency**") as affordable housing available only to buyers satisfying special median income limitations established by the Agency. Such homes may be sold and/or rented at prices below the market value of comparable homes as determined by the Agency, and may be subject to additional use, occupancy, and transfer/option restrictions.

Condition of Property. Buyer understands and hereby acknowledges that the land of the Community may have been used previously for agricultural and farming operations and in connection therewith, fertilizer and pesticides, among other things, may have been applied and used on the land of the Community or adjacent lands. Buyer also understands that the Property has been graded, soil removed and added to reach its finished height and form, and contains or may contain fill and/or expansive soils, and, as a result, may be subject to subsidence, settlement or expansion. Please refer to the Soils Condition and Drainage Addendum for further disclosures and recommendations. Buyer understands and acknowledges that, as previously stated, Buyer will be acquiring the land underlying the Lot in "AS IS" condition at the time of Closing. Except as expressly set forth herein, Buyer is relying and will rely solely upon Buyer's own inspection and investigation of the Property and the land of the Community, and is not relying and will not rely in any way upon any representations, statements, warranties, or other information or material furnished by Seller or its representatives, whether oral or written, express or implied. Seller makes or gives no warranty, express or implied, concerning the condition of the land. Without limiting the generality of the foregoing, Buyer assumes all risks associated with the condition of the Property, the nature of the soils making up the Property and of hazardous materials on, about, around, under, over or within the Community, including all risks of (a) any and all enforcement, clean up, or other governmental or regulatory actions instituted or threatened pursuant to any hazardous material laws affecting the Community, (b) all claims made or threatened by any third party against Buyer or the Community relating to damage, contribution, compensation, loss or injury resulting from any hazardous materials and (c) Buyer's discovery of any occurrence or condition on the land of the Community or any land adjoining or in the vicinity of the Community which might result in Buyer or the Property being made subject to restrictions on ownership, occupancy, transferability or use of the Property or the Community pursuant to any applicable hazardous materials laws. Furthermore, Buyer specifically waives and relinquishes any and all claims of whatsoever kind or nature based on the condition of the land or the use or presence of any hazardous materials on, about, around, under, over or within the Property, and from and after the date that Buyer acquires title to the Property, Buyer shall hold harmless and defend Seller and its members, managers, stockholders, successors and assigns, from and against all claims, demands, actions, lawsuits, proceedings, fines, penalties, damages, liabilities, judgments, awards, expenses and costs (including attorneys' fees and costs) which may arise out of or may directly or indirectly be attributable to the condition of the land, the soils thereon and therein, and the use, generation, manufacture, treatment, handling, refining, production, storage, release, discharge, disposal, or presence of any hazardous material on, about, around, over or within the Property. As used herein, the term "hazardous materials" includes, but is not limited to, any and all radioactive materials, asbestos, polychlorinated biphenyls ("**PCB's**"), chemicals which cause cancer or reproductive toxicity, pollutants, contaminants, hazardous wastes, toxic substances, and other hazardous substances or materials listed, described or defined in 40 CFR Para. 302, as amended from time to time. Buyer and Seller agree that the covenants and agreements contained in this paragraph shall survive the Closing of the sale of the Property and shall be binding upon and inure to the benefit of the parties and their respective heirs, personal representatives, successors and assigns.

Uses Within and Around the Community. Buyer understands, acknowledges, approves and agrees, as set forth here, and in certain instances in the Declaration(s) and Deed, that: (a) the land of the Community may have been used previously for commercial agricultural and farming operations and in connection therewith, fertilizer and pesticides, among other things, may have been applied and used upon the land of the Community or lands adjacent thereto; (b) noise levels in the Community may exceed noise level standards for residential-zoned areas promulgated by the State Department of Health, and that these noise levels may not be acceptable to some individuals; (c) the Community may be located near or adjacent to properties that are or were used for the growing, processing, production and harvesting of diversified agricultural products, including corn and other agricultural genetically modified organisms or "GMO" products or related uses and the development of alternative energy projects ("**Agricultural Properties**") that may have a limited buffer area, if any, between the agricultural use and the Community, as well as a variety of commercial and industrial properties; (d) further development of mixed residential (multi-family, single family and affordable), commercial, industrial, recreational utilities facilities/substations and public projects (including without limitation roads, bus stops, railroad, parks, schools, preschools and day care centers) may be ongoing and may continue within the Community directly adjacent to Buyer's Home and within the Community in the vicinity of Buyer's Property for a considerable period of time after

Buyer has occupied the Property; (e) there are or may be a variety of pets within the Community that may not be acceptable to some individuals or may create a nuisance; (f) aboveground and underground radio transmission wires, high voltage electric lines and microwave telecommunications facilities and civil defense tower(s) are located within and around the Community. These lines purportedly may emit electric and magnetic fields; (g) certain lands within the Community may be irrigated with treated effluent, reclaimed water or other sources of non-potable water, and (h) the Property will be subjected to those other uses and circumstances described in this Disclosure Addendum (collectively, all the foregoing uses and circumstances set forth in this Section (Community Disclosures) are described as "**Community Uses**"). Seller has the right, but not the obligation, to develop, market and sell as many affordable homes in the Community as Seller desires. Each Buyer hereby waives any and all claims arising out of the presence of affordable homes, or lack thereof, in the Community.

Surrounding Community Conditions and Uses. Each Lot in the Community may be periodically affected by certain environmental conditions due to historical, existing and prospective surrounding conditions and uses. The land of the Community was used previously for commercial agricultural and farming operations and in connection therewith, fertilizer and pesticides, among other things, may have been applied to and used upon the land of the Community or lands adjacent thereto. The Community is located near or adjacent to properties which are or may be used for agricultural, farming, animal husbandry or related uses. The Community will also include lots used for agricultural purposes. Further development, construction and sale of residential, commercial, recreational and public projects by Seller and others, which may include changes in use (due to zoning changes or other governmental authorization or otherwise), construction, grading, improvement and maintenance of adjacent and surrounding properties, including roadways, drainage facilities, sewage treatment facilities and the like is ongoing and may continue within the Community and within the vicinity of the Community for an indefinite period. Certain lands within the surrounding area and within the Community may be irrigated with treated effluent, reclaimed water or other sources of non-potable water. The land of the Community is subject to potential adverse soil conditions. Numerous schools and public parks may be built in Ho'opili, and the West Oahu campus of the University of Hawaii is just west of Ho'opili. All of these factors and uses may affect Buyer as a homeowner.

Commercial and community agricultural uses are planned in and integrated into Ho'opili. These uses will be supported by the Ho'opili Urban-Agriculture initiative. Lands within Ho'opili used for agricultural purposes will include, without limitation, land for commercial farming operations, shared and home gardens, community farms and gardens, civic farms, and urban gardens. The urban gardens are intended to feature edible landscaping throughout certain lots in Ho'opili, including lots within the 'Ikena Community. Commercial agricultural uses are protected under the Hawai'i Right to Farm Act, Hawaii Revised Statutes, Chapter 165. Homes in the Community may be subject to occasional dust from field operations, pollutants, smoke and debris from agricultural activities or feral lands in proximity to the Community, such as fires, odor, noise, and other agricultural cultivation. Buyer shall provide subsequent notice to Buyer's lessees, tenants or assignees of these aforementioned farming operations and practices on adjacent or contiguous land and the protections of such uses afforded under the Hawaii Right to Farm Act.

The Community may also be affected by traffic, aircraft noise, and adverse effects from the Kalaeloa Community Development District and an expansion of military uses and associated adverse impacts may occur within Kalaeloa and Pearl Harbor. The Community may be affected by airport noise overflight from the Honolulu International Airport and is near an active airstrip in Kalaeloa. Roads adjacent to the Community, which are not under Seller's control may be widened or modified. Significant widening and highway improvements are planned for Farrington Highway which is adjacent to Ho'opili and the construction of intersections within Ho'opili near or around the Community, including Kulanihako'i Street, Ho'omohala Avenue and Kualaka'i Parkway, may also impact the Community as a result of noise, nuisances, annoyances, and other impacts associated with the construction, operation, and maintenance of such improvements. A central hub of the planned Honolulu rapid transit rail system including, but not limited to, a rail station within the Ho'opili Community, one rail station west of the Ho'opili Community, portions of the guideway, and possibly park-and-ride and/or bus transfer facilities, will be located in or adjacent to Ho'opili, and the operation of the rail system may result in noise and other impacts associated with the operation of trains and mass transit related uses. Parts of the Ho'opili Community will be subject to Transit Oriented Development regulations and neighborhood plans. An "Energy Easement Corridor" is adjacent to Farrington Highway which may contain jet and other petroleum based fuel underground transport lines as well as aboveground and underground utility lines and electrical lines. The Community may be affected by surrounding operations effects created by or attributable to historical, existing, and prospective surrounding construction, including but not limited to construction of roads/intersections and walls/fences, development, agricultural, pasture, commercial and other non-residential uses and activities, which include, but are not limited to: (a) cane milling, burning, harvesting, tending, as well as fertilization and pest and weed control; or (b) cattle and other livestock grazing and pets that

may be objectionable to residents; or (c) commute and off-hours (non-peak) traffic and parking. Areas surrounding and mauka of the Community may include 24-hour quarrying operations, which operations may include noise from drilling, blasting, and vehicles carrying processed materials.

The Ho'opili Community is a mixed-use development and includes within it and/or in the vicinity, homes, schools, pre-schools, churches, parks, walkways, bicycle paths, government offices, library(ies), day care centers, hospital, urgent care, medical and medical emergency facilities, homeless shelters or transitional shelters, cellular towers, commercial, retail and industrial areas and operations, recreational and related facilities and other features common to urban environments, including without limitation to, a Community wide system of bicycle and walking paths, aboveground and underground radio transmission wires and high voltage electric lines, which lines purportedly may emit electric and magnetic fields. Easements shall be retained over the Community for some or all of the foregoing described uses, including, specifically, easements permitting the commencement, continuation and resulting effects of the foregoing uses, and all activities incidental to such uses.

Further, Buyer is aware that there are numerous materials and components required to construct and used in and around Buyer's Home to which certain individuals may be allergic or especially sensitive. Some of these materials such as paint, wood preservative treatments, insulation materials, glues, mastic, caulk, carpet or the like may cause lingering odors to which people are sensitive. Also, due to the nature of community living, various noises or odors due to elevators, trash areas, storage sheds, plumbing, impact, including, without limitation, noises from adjacent neighbors and other circumstances may result to which a Buyer may be especially sensitive. Mold and mold spores are also present in the Community and may be present in Buyer's Home. Certain strains of mold may cause adverse health effects in susceptible persons.

The Home is sold subject to these conditions, hazards and risks. Buyer is aware of and understands these risks, accepts them and has decided that the benefits of home ownership in the Community outweigh the detriments of such ownership.

Other Environmental Issues. Mold and mold spores are present throughout our environment and residential home construction is not, and cannot be, designed to exclude mold spores. If the growing conditions are right, mold can grow in your Home. You may be familiar with mold growth in the form of bread mold, and mold that may grow on bathroom tile. All mold is not necessarily harmful, but certain strains of mold have been shown to have adverse health effects in susceptible persons. The most common effects are allergic reactions, including skin irritation, watery eyes, runny nose, coughing, sneezing, congestion, sore throat and headache. Individuals with suppressed immune systems may risk infections. Some experts contend that mold causes serious symptoms and diseases which may even be life threatening. However, experts disagree about the level of mold exposure that may cause health problems, and about the exact nature and extent of the health problems that may be caused by mold. The Center for Disease Control states that a causal link between the presence of toxic mold and serious health conditions has not been proven. Moisture is the only mold growth factor that can be controlled in a residential setting. The Homeowner's Manual contains recommendations for positive steps and action a Buyer may take following possession of the Home to reduce mold. Buyer agrees to assume responsibility for the recommendations contained in the Homeowner's Manual to act in accordance with the best practice guidelines contained on the Governmental Internet Sites described in the Manual. Buyer further acknowledges that if there is any water damage or water intrusion to Buyer's Home, Buyer will take immediate action to prevent conditions which cause mold or mildew to develop. Also, since energy conservation has become a concern, the State of Hawaii uniform building code, specifically the energy standards, has created the need to build Homes that are more airtight. As a result, these Homes trap unwanted gases in different degrees depending on how each person lives within their Home. To date, measurements of such unwanted gases (such as the radon gas described below) are reported as parts of the air they occupy. Since the quality of air we breathe can affect our health, Seller recommends frequent airing of Buyer's Home by simply opening your windows to introduce fresh air uncontaminated with such gases. The United States Environmental Protection Agency ("**EPA**") has indicated that a number of homes in the United States experience elevated levels of radon gas. Radon is a naturally occurring gas that is caused by radioactive decay of the element radium. Since radium is contained in the earth's crust and dissolves readily in water, radon can be found virtually everywhere and can enter the home through a variety of sources. Buyers seeking information about radon can contact the EPA or a state environmental office. Seller has no expertise in the measurement or reduction of radon in homes or regarding acceptable levels or possible health hazards associated with radon. Seller makes no warranty or representation of any kind, express or implied, regarding the presence or absence of radon gas, or regarding the effectiveness of any architectural activities for reducing the presence of radon.

Non-Potable Water. BWS has required Seller to install separate irrigation water lines intended for non-potable

water ("**R1 Water Lines**") in connection with the irrigation of landscaping in Ho'opili. At some point in the future, the R1 Water Lines will carry treated effluent, reclaimed water or other sources of non-potable water. Until then, the R1 Water Lines will carry potable water. The R1 Water Lines will be required to be switched over to non-potable water when directed by BWS in its sole discretion. BWS has not advised Seller of BWS's contemplated timing for the use of the R1 Water Lines for non-potable water. Once BWS determines to implement use of the R1 Water Lines for non-potable water BWS will coordinate the conversion of use with the Master Association. The conversion will require, among other things, installation of a new water meter(s) and signage, all at the expense of the Master Association. Buyer may obtain information regarding the requirements of the Recycled Water Program at http://health.hawaii.gov/wastewater/home/reuse/.

'Ikena Community Features. In addition to the adjacent agricultural and other uses described in this Addendum, a future elementary school and future middle school are planned north of the site. Planned commercial and mixed use residential and commercial sites are planned throughout Ho'opili and may be improved with one or more of a medical clinic, school, day care facility or other commercial or retail uses. Private community parks (including a future park planned adjacent to The Bluffs at 'Ikena with exercise equipment), County parks and community gardens, opened to all Ho'opili residents are situate in various locations in Ho'opili. A community park may contain, among other things, a community center, swimming pool, manager's office and unit, pavilion and playground area, a portion or portions of which may be available for use for Community functions. Dogs may be permitted in the park. This community also contains a pedestrian access lots between sales lots 4 and 5 and sales lots 18 and 19. Ho'opili contains a temporary detention basin and stockpile areas (including a stock pile area approximately 25 feet high adjacent to Ho'oluana Drive across from sales lots 63 to 69, inclusive) that will be used for those purposes for an extended period before it is developed. Roadways serving the Community may contain temporary cul de sacs located within the Community that will be removed and the roadways extended when that area is developed in the future. Affordable rental developments are planned within Ho'opili. All of these factors and uses as well as other matters described in the Community Documents may affect Buyer's use and enjoyment of Buyer's Home. The Home is sold subject to these conditions, hazards and risks. Buyer is aware of and understands these risks, accepts them and has decided that the benefits of home ownership in the Community outweigh the detriments of such ownership.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Nuisances Related to Community Uses. Without in any manner limiting the foregoing, Buyer, in purchasing or otherwise taking title to any Property, does so with the express understanding and acknowledgment that the Community and the Property may be periodically affected by various hazards and by noise, dust, smoke, earthshock, soot, ash, odor, mold or mold spores, noxious vapors, the presence and/or transmission of pollutants or other hazardous materials, surface water runoff, or other adverse environmental conditions, including but not limited to those resulting from wind drift and other weather factors (collectively "**Community Use Effects**") created or exacerbated by or attributable to the Community Uses and the historical, existing, and prospective surrounding construction, development, agricultural, pasture, residential, industrial and commercial and other non-residential uses and activities. Buyer specifically approves all of the foregoing uses, circumstances and activities, including changes in use due to zoning changes, other governmental authorization or otherwise (collectively "**Community Operations**"). Buyer is strongly encouraged to inspect the Community and the various Community Operations to assess the impact of these operations, uses and circumstances on the Community and the Property. Buyer covenants and agrees, on behalf of Buyer and the tenants, lessees, family, servants, guests, invitees, licensees and employees of Buyer: (a) to assume and does hereby assume any and all risks associated with the Community Operations including specifically the presence of mold in the Home and the annoyances, inconveniences, impacts on property value or loss of the sale value, Community Use Effects and other nuisances thereby created; (b) to waive and does hereby expressly waive all rights to make any claim against and specifically releases Seller, the owners of the Agricultural Properties and any of their related entities, affiliates, successors-in-title, members, managers, stockholders, or assigns, arising out of or in connection with such activities, annoyances, inconveniences and nuisances, the clean-up or remediation of the same, including but not limited to (i) any claim for damages attributable thereto or for the design or the placement of improvements to the Community, the Property or the surrounding property, or any part thereof, or related or adjacent facilities, or to the orientation of the Home as it relates to exposure to sun or wind, or (ii) claims for the abatement or elimination thereof; and (c) to hold harmless and defend Seller and its affiliates, successors, members, managers, stockholders and assigns, from and against all claims, demands, actions, lawsuits, proceedings, fines, penalties, damages, liabilities, judgments, awards, expenses and costs (including attorneys' fees and costs) which may arise out of or may directly or indirectly be attributable to any and all of the foregoing.

Non-Disclosure of Neighbor's Plans. During the course of the purchase of a home, some buyers disclose information to Seller regarding the potential plans for homes, (e.g., landscape, hardscape, add-ons, repainting plans, etc.) and/or

information about personal lifestyles (e.g., pets, interests, hobbies, etc.). Seller will not disclose such information to prospective neighbors. Should Buyer wish to obtain any information about Buyer's prospective neighbors, Seller will, upon Buyer's written request, attempt to place Buyer in contact with Buyer's prospective neighbors, but makes no warranty that Seller will be able to do so or that the information which Buyer may obtain will be accurate.

Adjoining Land Uses. Buyer may have received written disclosures which depict the current and proposed land uses for the properties which adjoin the Community. Land uses are subject to change, and consequently, Seller cannot guarantee whether any information so disclosed is current. Also, land planning and zoning matters are complex and therefore the information which may have been supplied by Seller is not complete. If Buyer is concerned about the type of development that may occur on the adjoining properties, Buyer should discuss nearby land uses with the County Planning Department or the State of Hawaii departments or agencies involved, as may be the case, and otherwise conduct Buyer's own investigation of those matters. THE MARKET VALUE OF BUYER'S LOT IS NOT GUARANTEED BY SELLER AND MAY CHANGE DUE TO ADJOINING LAND USES BY OTHERS, INCLUDING WITHOUT LIMITATION THOSE USES BY THE STATE OF HAWAII AND/OR THE CITY AND COUNTY OF HONOLULU, ALL OF WHICH USES ARE NOT UNDER THE CONTROL OF SELLER.

Grading, Landscaping, and Building Materials. Development of the areas around the Community will cause dust in the Community during grading and landscaping work until adequate landscaping has been installed to minimize blowing dust. Seller will try to minimize the dust from its construction activities. Buyers understand, however, that Seller does not control all construction in the area and that dust is an inevitable result of the ongoing and surrounding construction. The grading of the soil and other elements created by nature, as well as building materials, many times create unwanted and undesired gases and other contaminates in residential and commercial buildings, both new and used.

Disposal of Toxic and Other Substances. Water that enters a storm drain flows directly to natural sources of water, including waterways, creeks, drains, rivers, lakes and that erosion has an impact on the environment. Unlike the water in the sewer system in the Lot which is being purchased by Buyer, which flows to wastewater treatment plants, water that enters a storm drain flows directly, without any treatment, to waterways, creeks, streams, rivers, lakes and/or oceans. Accordingly, the National Pollution Discharge Elimination System, the Regional Water Quality Control Board Orders covering the Community, and the policies and ordinances of the County prohibit discharging anything other than natural rain water into storm drainage systems, including gutters and streets which drain into storm drains. Toxic chemicals or hydrocarbon compounds such as gasoline, motor oil, antifreeze, solvents, paints, paint thinners, wood preservatives, fertilizers, lawn clippings, yard waste, detergents, pet waste, and other such materials and pollutants shall not be discharged into any street, public or private, gutters, or into storm drains or storm water conveyance systems. Buyer further acknowledges that the disposal of such pollutants and materials into a storm drain system may result in significant penalties and fines and that Buyer may be responsible for any activities by Buyer's contractors (e.g., painters, landscapers, etc.) who dispose of such pollutants from Buyer's Home or Lot into a storm drain system. Use and disposal of pesticides, fungicides, herbicides, insecticides, fertilizers, and other such chemicals shall meet all federal, state, and County requirements and requirements of any other governmental agencies having jurisdiction over the Property. All buyers within the Community are required to comply with such restrictions. Buyers are encouraged to consult with the County, other governmental authorities, and the refuse hauler in the area of the Community concerning the proper disposal of any toxic or hazardous materials. Dumping any such materials into sewers, gutters or storm drains is against the law.

Continued Construction. The construction of homes at the Community and other communities on nearby land will continue for some time. The roadways in and around the Community may be used for ingress and egress to the construction sites. The ongoing construction will cause dust, noise and increased traffic in and around the Community for a period of time. Due to these continuing activities, and notwithstanding dust and noise control measures employed by contractors, you may have to close windward facing windows in your Home during certain times of the day and may have to clean your Home more often. Certain persons may be more sensitive to these activities than others. Also, care must be taken around the construction sites, as hazardous conditions may exist temporarily due to the construction. You have decided to buy your Home knowing these facts and agree, as provided in your Sales Contract, that you will not hold Seller responsible for any damage, annoyance, inconvenience or nuisance you may experience as a result of the ongoing construction activity within the Community and surrounding areas.

Marketing Activity. Seller may continue to market homes in the Community for sale after you move into your Home. Seller may also use the Model Homes to market homes in other Communities. Seller's marketing activities may include operating a model home complex, displaying signs, balloons, flags, banners and conducting on-site events and other promotional activities. The ongoing marketing of homes may cause you some inconvenience and may disrupt your enjoyment of your Home.

Roads. Buyer is aware that the roads shown on the Subdivision Map may currently be private roadways that are proposed to be dedicated to the County as public roadways in the future. They are used at Buyer's risk. Roads surrounding the Community will be extended in the future to serve other developments within the Ho'opili community. Seller makes no representation or warranty regarding the availability of parking along the public streets which may change once the streets are dedicated to the County.

Flooding. Buyer acknowledges that Buyer's Home is not warranted against damage due to floods. Buyer is responsible to conduct Buyer's own investigation regarding the potential for floods.

Pest Control. It is in Buyer's best interest, as a new homeowner, to contact a local pest control company to arrange for a preventive maintenance program. Please refer to the limited warranty for termites. The specifics of the program that must be established in order to maintain the termite warranty coverage described in the limited warranty as set out in the Customer Care Program. In many locations, especially where there are adjacent open spaces or agricultural uses, rodent control is essential. Uncontrolled, rodents can damage water and electrical systems in the Home. Buyer fully understands that it is Buyer's responsibility, not Seller's responsibility, to control pests (insects, rodents and the like) in and around Buyer's Lot and Home.

Setbacks. The building setbacks required by the Master Association may be more restrictive in certain circumstances than County building setbacks. Buyers should carefully read the Master Declaration and the Ho'opili Design Guidelines for information about these matters and building restrictions within the Community.

Mediation and Arbitration. Buyer understands that by purchasing a Home in the Community, Buyer agrees to resolve any disputes with Seller, the administrator and insurer under the Limited Warranty, the builder, the contractor or others concerning the Home or the Community by way of mediation and arbitration without resort to the courts.

Buyer Obligation to Investigate. Nothing contained herein is intended to be a complete disclosure of all facts, which Buyer may wish to consider in buying a Home in the Community. Buyer is still obligated to conduct Buyer's own full investigation of all facts relevant to deciding where and when to buy. Buyer is hereby advised to seek the advice of independent tax, legal, and financial consultants.

Disclosure to Subsequent Purchasers. When Buyer sells Buyer's Home, Buyer is required to provide to the subsequent purchaser(s) any documents provided in conjunction with the original sale of the house, including, but not limited to, information that Buyer has regarding the Home, the Community, and overall Community, the information set forth in this and any other disclosures provided by Seller to Buyer and any other information that may be of value to the subsequent purchaser(s), including, but not limited to, the Master Declaration.

Preferred Provider Agreements. Seller has entered into a Preferred Provider Agreement with Hawaiian Telcom Services Company, Inc. ("**Hawaiian Telcom**"), which provides Buyer with a discount on a variety of Hawaiian Telcom services, including set top boxes, wifi, TV, and high-speed internet for which Hawaiian Telcom will be afforded special marketing rights at Ho`opili. Seller also plans to have Hawaiian Telcom provide wifi for the community parks and community centers.

Membership in Master Association. By purchasing a Lot and Home in the Community Buyer automatically becomes a member of the Master Association. Generally, without limitation, the Master Association is responsible for, among other matters, the administration of the Community, design review and the general and routine maintenance and upkeep of the Community Common Areas, the entry monuments and any other common areas. As a member of the Master Association, Buyer is required to pay an initial assessment and pay regular and special assessments levied by the Master Association. The Master Association has the right to lien Buyer's Property for non-payment. The initial dues and budget for the Master Association have been compiled by Hawaiiana Management Company, a licensed property manager. These assessments are subject to change without notice to Buyer and are expected to increase annually at minimum in an amount equal to or greater than the increase in the consumer price index. Although the property manager makes every effort to estimate the actual cost of operation, certain budget items, especially insurance in today's insurance market, may change. Seller advises that costs and expenses of maintenance and operation of a residential community are difficult to estimate initially, and even if such charges have been accurately estimated, such charges will tend to increase in an inflationary economy and as the improvements age. Assessment charges can vary depending on the service desired by the owners. Buyer should examine the budget to see what services are included. Buyer should be aware that the estimates provided are of the date of the managing agent's certification and not reflect the actual charges that may be incurred upon the formation of the Master Association and the actual contracting for such services as maintenance, insurance, etc. In addition to the foregoing, each Owner must provide the Master Association with advance written notice of proposed title transfer of the Home, identifying the escrow established to handling the sale. The Master Association may levy a transfer fee to maintain a record of the

new owners of the Home. The transfer fee constitutes a special assessment in respect of such Lot being transferred and shall be deposited into the purchase and sales escrow and disbursed therefrom to the Master Association.

Ho'opili Electronic Participation Program. If established by Seller, Buyer will have the opportunity to participate in the Ho'opili Electronic Participation Program by entering into the Ho'opili Electronic Participation Agreement at Closing and committing to maintain that participation for at least four (4) years so long as Buyer is living at 'Ikena. The program requires Buyer to accept electronic communications from the Master Association and to establish automatic payment of Master Association assessments while owning a Home at 'Ikena. Buyer may participate in the Ho'opili Electronic Participation Program by signing the Ho'opili Electronic Participation Agreement at Closing. If such program is established, a copy of the Agreement will be available from Buyer's sales representative.

'Ikena Subdistrict Assessment. No subdistrict association dues for 'Ikena are currently planned, but may be assessed by the Master Association in respect of special features in the 'Ikena community (such as cluster mailbox systems, pedestrian access lots and roadway landscape features) for which the Master Association has maintenance responsibility.

The term "Buyer" as and when used herein, or any pronouns used in place thereof, shall mean and include the singular or plural number, individuals, partnerships, trustees and corporations, and each respective heir, personal representative, successor and assign.

This Disclosure Addendum modifies Buyer's Sales Contract and is binding upon Buyer. Buyer agrees to the foregoing and acknowledges receipt of this addendum on: «SALE-DATE-MONTH-NAME-FORMAT» (date).

'IKENA AT HO'OPILI
DISCLOSURE ADDENDUM

'Ikena at Ho'opili Community. The Community is a fee simple residential community consisting of approximately 69 single family detached homes. The Community is located at Ho'opili, Oahu, Hawaii.

Sales Contract. This Disclosure Addendum supplements Buyer's 'Ikena at Ho'opili Fee Simple Home Purchase Agreement (herein, "**Sales Contract**") and is part of that legally binding agreement. Defined terms used in the Sales Contract are sometimes used in this Disclosure Addendum and have the same meanings here.

SCOPE OF DISCLOSURE. THIS DISCLOSURE ADDENDUM IS NOT EXHAUSTIVE IN SCOPE. BY ENTERING INTO A SALES CONTRACT BUYER IS ENTERING INTO A LEGALLY BINDING AGREEMENT. BUYER SHOULD READ AND FULLY UNDERSTAND THE CONTENTS OF EACH AGREEMENT MENTIONED IN THE SALES CONTRACT, INCLUDING, BUT NOT LIMITED TO, THOSE DOCUMENTS CONTAINED IN THE DOCUMENT PACKAGE FOR THE COMMUNITY AND HO'OPILI. THESE DOCUMENTS ARE CALLED THE "**COMMUNITY DOCUMENTS**" AND EACH DOCUMENT WILL AFFECT BUYER'S SUBSTANTIVE RIGHTS AND OBLIGATIONS. THIS DISCLOSURE ADDENDUM ATTEMPTS TO HIGHLIGHT SOME BUT NOT ALL OF THE IMPORTANT PROVISIONS OF THE COMMUNITY DOCUMENTS AND TO PROVIDE BUYER WITH OTHER INFORMATION. IN THE EVENT OF A CONFLICT BETWEEN THE COMMUNITY DOCUMENTS AND THIS DISCLOSURE ADDENDUM, THE COMMUNITY DOCUMENTS SHALL CONTROL. HOWEVER, WHERE THIS DISCLOSURE ADDENDUM PROVIDES FOR ADDITIONAL, DIFFERENT OR EXPANDED COVENANTS OR OBLIGATIONS WHICH ARE NOT CONTAINED IN THE COMMUNITY DOCUMENTS, THIS DISCLOSURE ADDENDUM SHALL CONTROL.

BUYER UNDERSTANDS AND ACKNOWLEDGES THAT THE MATTERS CONTAINED IN THIS DISCLOSURE ADDENDUM AND OTHERWISE IN THE SALES CONTRACT REPRESENT A GOOD FAITH EFFORT BY SELLER TO DISCLOSE CERTAIN INFORMATION THAT MAY AFFECT BUYER'S DECISION TO PURCHASE THE PROPERTY, BUT THAT THESE DISCLOSURES ARE NOT INTENDED TO BE AND SHOULD NOT BE REGARDED BY BUYER AS A COMPLETE DESCRIPTION OF ALL MATTERS THAT ARE OR MIGHT BE RELEVANT TO THE OWNERSHIP AND USE OF THE PROPERTY. BUYER ALSO UNDERSTANDS THAT THIS DISCLOSURE ADDENDUM CONTAINS A RELEASE PROVISION THAT HAS LEGAL CONSEQUENCES. Buyer understands and acknowledges that the activities in and around the Community affect the use and enjoyment of the Property and represents and warrants to Seller that Buyer, in Buyer's sole discretion, based on Buyer's independent investigation, has determined that the benefits of owning and enjoying the Property outweigh such detriments and risks. Buyer hereby covenants and agrees to assume all risks of impairment of the use and enjoyment of the Property, property damage and personal injury arising from activities affecting the Community. The terms of this Disclosure Addendum shall survive occupancy of the Property by Buyer and the recordation of the Deed and shall be binding upon and inure to the benefit of the parties and their respective heirs, personal representatives, successors and assigns.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Community Documents. Buyer is strongly encouraged to carefully read the Community Documents applicable to the property Buyer is purchasing (sometimes "**Property**" and/or "**Home**" and/or "**Lot**"). Without limitation, the Community Documents, as the same may be amended, modified and/or supplemented, include the: (1) Master Declaration; (2) Master Association's Articles and Bylaws; (3) Design Guidelines comprised of the Ho'opili Design Guidelines described in the Master Declaration ("**Ho'opili Design Guidelines**"), Ho'opili Urban Design Plan ("**Ho'opili UDP**") and any supplemental design guidelines; (4) to the extent applicable to the Community, Ho'opili Commercial Use Guidelines and Ho'opili Signage Guidelines defined in and pursuant to the Master Declaration; (5) other related materials adopted by the Master Association, including any Ho'opili Community Rules; (6) Supplemental Declaration Permitting Accessory Dwelling Units on Specified Lots; (7) Declaration of Restrictive Covenants (ADU Unit), if applicable to a lot; (8) Sales Contract; and (9) Deed.

Master Planned Community. The Ho'opili Community is a master planned community encompassing several residential and mixed use communities, condominiums, commercial and other related facilities. Ho'opili is planned to have many subdistrict areas, including some 17 single family residential subdistrict areas, which may contain other uses. 'Ikena is a single family community that is part of the 'Ikena residential subdistrict. Additional homes may be included in the 'Ikena residential subdistrict in the future. By purchasing a home in the Community, Buyer agrees that Buyer, Buyer's family, lessees, tenants and guests will observe and obey the terms, covenants, conditions and provisions contained in the Master Declaration, the Ho'opili Articles and Bylaws, the Ho'opili Design Guidelines, the Ho'opili Community Rules, if any, as well as those terms, covenants, conditions and provisions set forth in the Community Documents.

Effect of Master Declaration. The Community is or will be developed and operated according to the rules, agreements, conditions, restrictions and other limitations affecting the Community and Buyer's Property set out in the Master Declaration. The Master Declaration also reserves for others certain rights in the Community lands, so that these rights are not part of what Buyer will own when purchasing a Home and Lot. For example, the Property interests above and below the surface of the Community and Buyer's Lot, such as water rights, were, are or will be owned by others and/or used for other purposes. As such, the Master Declaration directly affects Buyer and Buyer's Property. In purchasing a Lot Buyer understands and agrees that the ways in which Buyer may use Buyer's Property is limited and that ways in which others may use other parts of the Community or adjacent lands may affect Buyer and Buyer's Property.

Design Review. Seller and the County retain design review and approval authority over all developments in Ho'opili, pursuant to the Ho'opili UDP and Ho'opili Design Guidelines. In order to assist in the review of projects and interpretation of provisions of the Ho'opili UDP, Seller has established a Design Advisory Board ("**DAB**") comprised of professionals in various fields including but not limited to architecture, planning, landscape architecture and engineering to review project plans. As an accommodation, the authority of the DAB to administer and to enforce the Ho'opili UDP and the Ho'opili Design Guidelines with respect to proposed improvements by Owners and commercial users within the Ho'opili Community has been delegated to the Ho'opili Design Review Committee established pursuant the Master Declaration (herein, "**DRC**" or "**Design Review Committee**"), which may adopt such design guidelines and rules, as determined appropriate by the DRC, specific to any land use classification within Ho'opili and which may otherwise contain specific provisions that vary from one portion of Ho'opili to another depending upon the location, unique characteristics and intended use thereof.

Plot Plans. Buyer may be provided with a "plot plan" prepared by Seller for the Property, which will show certain information specific to the Property, such as the approximate location of utility connection points and building setbacks. The Property may also be subject to landscape, utility, sign monument, mailbox and other easements not shown on the plot plan. Street monuments and other items including, but not limited to, cluster mailbox units, lamp posts, handholds, fire hydrants, electrical transformers and utility boxes, easements, and other facilities may or may not be located as may be shown on the plot plan for the Property. Both before and after the Property is conveyed to Buyer, Seller shall have the right to revise the plot plan for the Property to show new or revised items affecting the Property and/or other portions of the Community.

Date of Disclosure. Information in this Disclosure Addendum is current, to the best of Seller's knowledge, as of the date of publication set forth in the bottom left hand corner of this page. The information contained herein was collected from sources deemed to be reliable. While Seller has made every effort to obtain the most recent and accurate information, Buyer should rely solely on Buyer's own investigation and the investigation of Buyer's agents in making a decision to purchase. As information can change rapidly, Seller also encourages Buyer to contact the agencies and named individuals at the addresses and phone numbers listed for the most up-to-date information.

Closing. Completion dates are ALWAYS and ONLY estimates. Early occupancy is NOT ALLOWED. Early delivery of furniture is NOT ALLOWED.

Loans. Closing of any loan that will finance Buyer's purchase is Buyer's responsibility. Buyer's sales representative will assist, but each Buyer must stay in contact with such Buyer's lender so that loan approval is obtained in accordance with the time frames provided in the Sales Contract and Closing coincides with building completion. Buyer must be in a position to close escrow on the transaction within five (5) days after Buyer's Home is ready for occupancy. Delay interest charges may be charged if these deadlines are not met and/or Seller may cancel the Sales Contract.

Financing. The primary lender will be DHI Mortgage Company, Ltd. ("**DHI Mortgage**"). DHI Mortgage is an affiliate of Seller. Buyer should review the special disclosure regarding DHI Mortgage. Buyer should be aware that DHI Mortgage may offer special rates and incentives and if the loan is approved by DHI Mortgage and closed utilizing the settlement services of DHI Mortgage, Buyer shall be entitled to purchase a package of related settlement services at a discounted price. Also, because of its knowledge of the Community, DHI Mortgage should be able to approve Buyer's loan quickly. Buyer is not required to use the affiliated company as a condition of Buyer's purchase of the Property or Buyer's access to settlement services. Buyer may use any lender Buyer wishes. However, Seller has not reviewed or approved any lender's sales or marketing materials, and does not make any representations or warranties whatsoever regarding any matters set forth therein or Buyer's ability to obtain any financing under any particular terms. Buyer is strongly encouraged to make Buyer's own independent evaluation of the rates and loan programs offered by all lenders. Buyer understands that the interest rate and loan fees for the loan applied for will be determined at the time of the Close of Escrow and may be higher or lower than on the date Buyer signed the Sales Contract to purchase Buyer's Home. Buyer also acknowledges that the interest rate, loan fees estimates or quotations that may have been provided to Buyer are for illustrative purposes only and do not constitute a binding commitment. If Buyer has chosen to make a loan with a lender with whom Seller has arranged

a loan commitment, the interest rate quoted may not be available unless the loan closes by a certain date. Seller is not responsible if, for any reason, including construction delays, Buyer's loan does not close on time to obtain a guaranteed rate.

Lot Numbers. The Lot numbers that are referenced in this Disclosure Addendum are the Lot numbers that appear on the subdivision map for the Community ("**Subdivision Map**"). The legal Lot numbers may differ.

Model Homes.

Decorator Items. One or more but not all Homes to be offered for sale by Seller may be available for viewing by Buyer as a model home (each, "**Model Home**"). These Model Homes show generally the configuration of certain Homes that may be constructed by Seller in the Community, but are not necessarily identical in construction or configuration to homes bearing the same model designation. The Model Homes may reflect typical or different exterior elevations, floor plans, workmanship and methods of construction, but may differ from the Home you purchase. Your Home will not be constructed to the precise specifications or design of any Model Home. The exterior elevations, architectural treatments, floor plans and colors shown on any master plans on display at the office of Seller may be different than those displayed in the models. Room dimensions, square footages, cabinetry and countertops in kitchens, bathrooms and laundry areas, etc., plumbing and electrical fixtures, door types, door hardware, shower walls, closet doors, appliances, tile and floor covering, bathroom accessories (faucets, shower heads, etc.), window types, and electrical and cable outlet placement may also vary from Model Homes, the plans and/or your Home. By way of example, Model Homes may have window coverings which are not included in the purchase price of the Home. Seller's warranty and representation as to the similarity between the Home being purchased and a Model Home constructed by Seller is limited strictly to design and configuration (subject to variance in horizontal measurements permitted by construction tolerances (+/- 2%) and not to similarity of appearance dependent upon particular decorations, furnishings or landscaping, or the location of wall switches, electrical outlets, thermostats, chases, plumbing and similar items (which may vary from the Model Home). You should note that the Model Homes you may have seen have been professionally decorated and landscaped to present an attractive appearance to prospective buyers and will differ from the Home you are purchasing. Certain landscaping features may not be permitted under the Master Declaration. Variations in floor plan, paint schedules and landscaping are to be expected. Buyer should also be aware that model homes in other communities developed by Seller may contain features or have been constructed in a manner different from the Model Homes in this Community.

The Model Homes may show the types of features that could be incorporated into the Homes and may be helpful in providing purchasers with possible decorating ideas. Model Homes may display certain fixtures and furnishings, which MAY be identified as "Decorator Items". These are not available to purchasers even upon payment of an additional charge. In certain instances, decorator items may not be marked. Buyer should further be aware that window coverings are not included in the purchase price of a Home even though they may be installed in the Model Homes. Decorator items (such as furnishings, draperies, built-in shelves and lighting) and landscaping and hardscaping (such as entryways, lanais, and spas) are displayed only to suggest ideas to buyers. All such options and upgrades displayed in Model Homes (including, decorator items, landscaping and hardscaping) are not included in the purchase price for your Home unless expressly agreed to in writing by Seller. If Buyer has any questions regarding which items, such as light fixtures, may be purchased as an option or come with the Home, they should consult a Sales Representative and make sure the item in question is addressed in writing in the Sales Contract.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Materials and Construction. Buyer should be aware that homes in the Community are constructed and fabricated with various materials and may include steel and wood framing components. Wood framing components include such items as stud framing in certain locations, blocking, posts plates, beams and roof trusses, among others. Seller may substitute materials, fixtures, equipment and appliances of substantially equal quality as (a) those specified in the plans and specifications for Buyer's Home or models and/or (b) the standard items displayed in the Model Homes. As a result, Buyer's Home may be constructed completely of wood framing materials. Seller also reserves the right to change the location of electrical switches, gas meter, if applicable, and water meter, plumbing chases and outlets, windows, and the like and the right to make any changes in construction (e.g. plan changes, field changes or otherwise) which it deems appropriate, such as the substitution of wood and metal framing. Buyer understands that asphalt shingles are subject to cracking if walked on or struck by an object. In addition, Seller has the right to make changes in construction and as may be required from time to time by any lender, government agency, or as may be required by any law or regulation, by labor, material or utility availability, shortages, or

stoppages or by any emergencies. Buyer accepts all of these changes. Buyer understands and agrees that any available rebates in connection with the installation by Seller of ENERGY STAR or other energy-efficient appliances or devices, including photo-voltaic, solar and EV devices, in the Home or at the Community shall belong to Seller.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Construction Plans. Copies of construction plans for Buyer's Home are available for inspection prior to Closing. However, Buyer should be aware that the construction plans will not include field changes (changes made during construction, which occur regularly) nor the changes described above. As a result, construction plans will not reflect the as-built condition of the Home.

Dimensions and Square Footages Are Estimates Only. Lot and Home dimensions and square footages are approximate. Buyer should be aware that any statement regarding the dimensions of rooms or square footages of Homes or other areas are approximates only. Buyer may not rely upon any written brochures and other sales documents or oral statements by Seller or Seller's agents regarding the exact square footage of Buyer's Lot and Home.

Homeowner's Manual/Orientation/Keys. At the time that Buyer signs the Sales Contract Buyer will receive Buyer's Homeowner's Manual. Please take time to review this manual completely. This manual should be brought to any meeting regarding option selections, Buyer's home orientation meeting and walk-through inspection of Buyer's new home. If Buyer has any questions please ask Buyer's sales representative. Seller will schedule an appointment with Buyer to conduct a home orientation tour of Buyer's new home prior to Closing. At that time Seller will review with Buyer the Homeowner's Manual and Seller's Limited Warranty. Buyer should advise Seller's warranty service representative of any concerns Buyer may have about Buyer's new home during the course of the home orientation tour. By doing so, delays in Closing may be avoided. Keys to Buyer's new home will be available after recording of the Deed. Buyer acknowledges that the Homeowner's Manual contains certain operating instructions and maintenance requirements and schedules for certain components of Buyer's Home, including, without limitation, information relating to mold and mildew. Buyer must review and comply with any and all operating instructions, maintenance requirements and schedules for Buyer's Home contained in such Homeowner's Manual.

Elevations and House Plans. In order to provide diversity for the street scene, Seller's architect may have produced more than one exterior elevation for the front, side and rear of each floor plan. Due to this and due to certain variations caused by construction techniques and methods, Buyer may notice size, scale and proportional interior and exterior changes from the Model Home or other Homes in the Community from Buyer's particular elevation. These may include such items as ceiling heights, sloped ceilings, veneer treatments, window locations, window types and sizes, gutter and downspouts, interior and exterior wall and roof lines, color schemes and front porch dimensions. It is the responsibility of Buyer to inspect the Property and consider the differences in the elevations and other features of Buyer's Home prior to Close of Escrow. Buyer acknowledges that Buyer has had the opportunity to review the floor plan and elevation and interior details for the Home Buyer is purchasing, all as shown on the building plans located in the sales office. Seller may alter, add or delete any house plans for homes to be constructed in the development.

Accessory Dwelling Units; One Dwelling Per Lot/Park Declaration. Only Certain home plan types at the Community and specific lots may be improved with an accessory dwelling unit, which is a second dwelling unit, including separate kitchen, bedroom and bathroom facilities, attached or detached from the primary dwelling unit on the Lot, as permitted by the County's Department of Planning and Permitting ("**DPP**"). Seller plans to construct or has constructed an accessory dwelling unit ("**ADU unit**") consisting of Sales Lots 3, 8, 12, 22, 29, 37 and 47, which will be evidenced by a Supplemental Declaration Permitting Accessory Dwelling Units on Specified Lots, as required and permitted under the Master Declaration. Seller may construct ADU units on various sales lots within any additional construction increment of 'Ikena at Ho'opili in which event these sales lots will be covered by the foregoing declaration. Only the Lots specified in this Section and authorized by the foregoing Supplemental Declaration may be improved with an ADU unit. No other Lot in the Community may be so improved except with the express consent of the Declarant under the Master Declaration. Any Lot that includes an ADU unit will also be subject a special declaration of restrictive covenants ("**Supplemental Declaration re ADUs**", and described collectively with the Master Declaration as "**Declarations**") that prohibits the creation of a condominium on the Lot, restricts the rental of either of the ADU unit or primary dwelling unit on the Lot to a minimum six (6) month period, requires, except under situations of unforeseen hardship (confirmed by the director of DPP), that the Lot Owner or a person related to the Lot Owner or a person designated by Lot Owner (as approved by DPP) occupy either the ADU unit or the primary dwelling unit on the Lot if either one or the other dwelling units is rented to an unrelated party, and, among other matters, prohibits the use of the ADU unit as a bed and breakfast or transient vacation unit. A copy of the Supplemental Declaration re ADUs will be provided to buyers of a lot with an ADU unit Each Buyer of a Lot containing an ADU unit agrees to be bound by the Supplemental Declaration re ADUs. Lots with an ADU Unit may be charged a monthly base sewer

charge for both dwelling units. Buyer may obtain additional information at https://www.honolulu.gov/rep/site/env/wwm_docs/Announcement_of_Rate_Increase_7-1-2016.pdf. Lots will also be subject to a Declaration of Restrictive Covenants Park Dedication – One Dwelling Per Lot. Seller reserves the right to record a Declaration of Restrictive Covenants Park Dedication – One Dwelling Per Lot on all lots within the Community prior to Closing. This Declaration will provide that the lot shall be used for only one single-family residential purposes unless it is one of lots identified in this Disclosure Addendum on which an ADU unit is to be constructed. The restrictions described in this Section will be noted as encumbrances affecting the Lot.

No Guarantee About Development. Seller does not make any representation that the Community will be developed as proposed. Seller reserves the right, at any time and without notice, to modify its development plan for the Community, including, but not limited to, changing the style, size, square footage, density, exterior elevations, color schemes, construction schedule and/or phasing of the homes in the Community. The Model Homes are displayed for illustrative purposes only and such display does not constitute a commitment to complete the development with the same or similar homes. Seller may also sell all or any of the Property in the development to another builder, who may change the house plans, square footage, elevations, features, materials or designs of the homes.

Buyer Information and As-Built Conditions. In connection with Buyer's purchase of a home in the Community, Seller may provide Buyer with sales literature, which may include such information as elevations, lot dimensions, set-backs, house orientation, driveway locations, utility structures, rear yard dimensions, easements, etc. This information is intended for general informational purposes. There may be discrepancies between this information which is provided to Buyer and the actual as-built conditions. If there are such discrepancies, the as-built conditions will control.

Additional Information About Buyer's Home.

1. **Front Doors**. Front doors will vary by elevation and floor plan. Standard doors included with the purchase of Buyer's Home will vary in style to suit different elevations. Certain door styles, such as distressed or antiqued for decorative accent, may differ in appearance from the doors installed on the Model Homes.

2. **Color Variations**.

Paint - Buyer should confirm with Buyer's sales representative what interior colors will be used in the Home. Regarding white walls, it must be remembered that there are many shades of white. Buyer should not assume that the Home will be painted any shade of white shown in the Model Homes. Model interior paint colors are chosen by the model decorators and are not necessarily what will be used in Buyer's Home. Buyer should also be aware that variations in wall texture and drywall taping may be more obvious where gloss, semi-gloss, and/or luster paint is used and may appear more obvious at different times of the day or night depending upon the lighting in Buyer's Home.

Grout –The elements of nature including, but not limited to, sun, temperature, food, or chemical reactions may, combined with the aging process, change the color of the grout in varying degrees from time to time. In the event of repairs or replacement of tile or grout in the future, the replacement grout and/or tile probably will not match the color of the original tile or tile grout.

Countertops - Samples are small select cuts from a slab; they do not exhibit all the characteristics of a design and therefore are not fully representative of what will be installed in your Home. Variations in the color, pattern, size, shape and shade are inherent and unique characteristics to be expected with this product. This does not affect the product performance in any manner. Certain colors are meant to be used as accents rather than a main work surface. Furthermore, the pattern may not always match at the seams and there may be variations between the deck surface and backsplash. These items are not covered by the warranties of Seller, the countertop fabricator, and the countertop manufacturer. Your countertop will not be replaced due to these variations.

3. **Fire Prevention.** Smoke detectors will be installed in Buyer's Home in accordance with County requirements. Smoke detectors must be maintained by Buyer and backup batteries replaced in accordance with manufacturer's recommendations provided to Buyer at the orientation. Emergency contact is not automatically made when a smoke alarm is sounding, so Buyer is charged with calling the proper emergency number upon the occurrence of an emergency.

4. **Driveways and Garages**. The shape and dimensions of the garages and driveways for the homes in the Community may not be standardized. Driveways may vary in size, shape, length and/or configuration from the model driveways or from what is shown on any depiction of the Community. Any lot within the Community designated as a "Flag

Lot" in connection with the subdivision of the Community is subject to Section 21-4.20(a) of the LUO, which requires that the access drive serve only the "Flag Lot" and have a minimum width of 12 feet. Some of the garages may require Buyer to maneuver a lengthy driveway to enter and exit the garages. Parking of vehicles in the garages may also require Buyer to maneuver a vehicle back and forth in order to enter the garage. There may be certain obstacles (i.e. pillars, Buyer's Home, fencing, improvements, etc.) that may make it difficult to maneuver a vehicle into and out of the driveway and garage. Seller is not responsible for any damage to any home, including Buyer's Home, landscaping, pillars, fencing or any other improvement incurred during Buyer's or Buyer's guests or visitors maneuvering of the driveway and/or parking of a vehicle in the garages. It may not be possible to maneuver certain types of vehicles on the driveways and into the garage. Not all garages will accommodate all vehicles (especially full size models and sport utility vehicles) due to the shape, size, configuration and location of the garages, garage doors, driveways and homes. Also, parking of the maximum number of cars for which a garage was designed may block or make it difficult to access any storage area (if any) in the garage or to the Home from the garage. Buyer acknowledges that it is Buyer's responsibility to determine whether the size and location of car spaces in the garage of the floor plan of the Home selected by Buyer are adequate and appropriate to park Buyer's vehicles. Buyer should also confirm where street parking is permitted. Please realize that in many instances the Master Association's Board of Directors may limit parking on private streets and on streets dedicated to the County, the County may restrict parking on public streets.

5. **Drywall**. Some shadowing in Buyer's drywall may occur at different times of the day or night depending upon the lighting in Buyer's Home, especially on curved walls. Also, if gloss, semi-gloss, and/or luster paint is used on walls, the variations in drywall taping and wall textures (sometimes called "flashing" in the painting industry) may be visible and appear more obvious depending upon the time of day and lighting in Buyer's Home. These variations are within industry standard.

6. **Air Conditioning**. Seller will install as a standard item a ductless split air conditioning system(s) to serve the home. Buyer understands that the air conditioning condenser(s) may be located in a different area than shown in the models or on other plans or exhibits. The specific location of compressors at the Community may result in sound transmission that may affect Buyer's Home. Buyers should be sensitive to excessive noise and possible disturbance to neighbors. Buyers, not Seller, are responsible for the unit's quiet operation. Buyer understands that even with screening, air conditioning units may emit noise levels unacceptable to some people. Buyers agree to assume all risks of such noise emissions.

7. **Satellite Dishes**. Satellite dish antennas may be installed and used within the Community only to the extent permitted by law. Where possible, all components of the system should be concealed from public view and be placed on the side of the home not facing the adjacent road. The system should not be visible from the front yard of the Home. In instances where Buyer can demonstrate that installation on the rear of the Home would cause an unreasonable expense increase in the expense of installation, maintenance or use, or would prevent reception of acceptable signal quality, installation in a location where the satellite dish is visible from the Street may be appropriate. Submission of documents supporting Buyer's position that installation in a location visible from the Street is appropriate shall be made within thirty (30) days of installation. The Design Review Committee may retain its own expert to confirm that installation on the rear of the Home causes an unreasonable expense increase in the expense of installation, maintenance or use, or would prevent reception of acceptable signal quality. Such installation shall only be made in accordance with the Declarations, Ho'opili Design Guidelines, and any other recorded restrictions and governmental requirements. However, if installed Seller has provided no assurances or guarantees that any satellite dish or other antenna installed within the Community will remain unobstructed. Buyer should understand that antennae signals may become obstructed by the installation and maintenance of Improvements within and outside of the Community including homes, walls, fences, trees and other landscaping.

8. **Building Code Changes**. Periodically, governing agencies change building codes and other requirements; therefore, as construction proceeds, future homes may be constructed differently in order to meet these updated or revised regulations. Seller reserves the right to change elevations, designs, or other elements of the construction process at its sole discretion. Seller is not responsible for providing any certification Buyer may request or require concerning compliance of construction of the home with Building Codes or other requirements.

9. **Electrical Outlets in Garage**. The building code requires that electrical outlets in garages be provided with ground fault interrupter circuits. These circuits are not intended for use with any appliances, especially refrigerators, freezers and aquariums or on any service that an interruption of electrical power would cause a problem. Seller strongly recommends that Buyer not use garage circuits for appliances or for any service (such as freezers) that would be harmed by an interruption of electrical power. Seller cannot be held responsible for the contents of appliances which are damaged because of the ground fault interrupter switches shutting off power, nor can Seller be held responsible for damage to the appliance units themselves. Please check with an electrician for further information.

10. **Fencing**. Buyer should be aware of what fencing or walls may be constructed surrounding Buyer's Home, if any, and the fences Buyer will be required to maintain. The exact size, type and location of Buyer's fence or wall will be determined at the time of fencing installation.

11. **Concrete Products**. Cracks will occur in any stucco, EFS, and plaster exterior. This is normal in all cementitious materials. Certain elevations incorporate a "smooth trowel" plaster finish. Buyer should be aware that this finish is particularly susceptible to cracking. Cracking does not affect the structural integrity of Buyer's Home and is part of the natural look of stucco and plaster. Poured on grade concrete is prone to a certain amount of cracking as it cures over time. Such cracks can be minimized by scoring, but they cannot be completely avoided.

12. **Dryer Vent System**. The dryer vent system in the homes has been installed pursuant to the design instructions of the manufacturer of the dryer being offered by Seller. If Buyer does not select the dryer being offered by Seller at the time of purchase (or installs a new dryer in the future), Buyer understands that the design of the dryer vent system may not conform to the dryer being installed by Buyer as each dryer manufacture has its own dryer vent system requirement. Prior to the installation of a dryer by Buyer, Buyer should review the manufacturer's dryer vent system requirements to verify that the dryer vent system installed in the Home conforms to the manufacturer's requirements.

13. **EV Use**. The Home's garage is "EV Ready" which means the Home's garage is provided with a junction box and 6/3 electrical cable to the breaker panel for the future installation of an electrical car charging station that may be installed by Buyer. The Breaker panel will have reserved slots to accommodate an additional 110V or 220V for future expansion.

14. **PV Ready.** The Home is "PV Ready" which means the Home is "pre-plumbed" for installation of a photovoltaic system ("**PV System**") post-closing by Buyer in that photovoltaic conduit that has been installed from the electric panel into the Home's attic. The PV System pre-plumbed improvements by Seller do not penetrate the insulation in the attic or the roof deck of the Home, but permit future re-routing by Buyer's PV System contractor. Seller provides no assurance that the installation of a PV System will be permitted under practices, regulations or rules adopted by Hawaiian Electric Company ("**HECO**"). Buyer should confirm with HECO whether such a system may be installed at the Home. Buyer acknowledges and agrees that Seller makes no warranty or representation concerning electrical expense savings a Buyer may obtain through the installation of a PV System, the efficiency of any solar energy (hot water and photovoltaic) system, which are dependent on a myriad of factors including, without limitation, system quality, weather, orientation to the sun, the size of the system capable of being installed on the roof of the Home, or the impact such installation may have on the integrity of the roof system. If Buyer elects to have such a system installed and the installation is authorized by HECO, Buyer must utilize a certified licensed photovoltaic system installer and should consult with the installer regarding the size and location of the PV System as the design of the roof or roof orientation may not be optimal for the PV System. Before commencing any installation effort, Buyer must secure any and all necessary permits required to allow such installation and obtain all necessary approvals of such activity in accordance with the Ho'opili Design Guidelines. Buyer should review the Ho'opili Design Guidelines closely and should provide a copy of the Ho'opili Design Guidelines to Buyer's photovoltaic contractor before installation of such a system.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

15. **Plumbing, Electrical and Air Conditioning Lines**. Buyers should use caution and care when hanging items on walls by, among other things, using a stud finder or other device or consulting with a contractor or other professional, to ensure studs are used so as not to puncture plumbing, electrical or air conditioner lines within the walls of the Home.

Limited Warranty.

Generally. Seller will provide buyers with Seller's Limited Warranty (herein, sometimes, "**Limited Warranty**") covering Buyer's new Home at Closing. Seller makes no warranty or guarantee, express or implied, except as specifically set forth in the Limited Warranty. A copy of the Limited Warranty is in Buyer's Homeowner's Manual ("Everything You Need to Know About Your New Home") Buyer will receive at the time of Buyer's purchase. The Limited Warranty describes Seller's repair and warranty obligations, the procedures for making a warranty claim and the procedures for the settlement of disputes.

Exclusions. In order for the Limited Warranty to be effective, common sense maintenance of Buyer's Home is required. Buyer should review the Limited Warranty to become familiar with specific exclusions. By way of example, the Limited Warranty does not cover non-structural cracking of the Home's drywall, foundation slab or non-structural

variations from level in foundation slabs or upper story sub-floors. Standard construction techniques and the applicable design for the Home's drywall and foundation slab second story sub-floor may result in a degree of non-structural cracking or "spider" cracking in the drywall and slab and may result in modest variations from level in the slab and sub-floor. Although certain foundation slabs will contain contraction joints to minimize cracking, such cracking is inherent in concrete construction. Variations from level on second floor sub-floors are filled and patched with an adhesive floor leveling agent. Further, in the case of concrete slabs, hard surface floor coverings (wood, marble and ceramic tile), where permitted, may also crack or reflect the effect of foundation slab cracking. There is no Limited Warranty coverage for these circumstances. To minimize this risk, Seller recommends that hard surface floors, where permitted, be installed over a "slip sheet" available through Buyer's flooring supplier. In conformance with home construction standards, the rafter tails will not be caulked unless there is a gap between the rafter tails and the fascia in excess of 1/8 of an inch. By signing the Sales Contract and this Disclosure Addendum, Buyer accepts these conditions with respect to the Home. Buyer should review the "Preconstruction Conference Confirmation Form" prior to the home orientation tour to become familiar with Seller's standards and specifications.

Options.

Generally. All option items are subject to adjustment in price and quality if such items become unavailable for reasons beyond Seller's control. Buyer will be required to make a deposit, which is **non-refundable**, on all selected option items. Seller reserves the right not to install any selected options until Buyer receives loan approval. Once option selections are completed, Buyer and Seller agree that the final purchase price is to be amended by execution of the Final Sales Price Addendum to include options.

Insulation. Where insulation is installed, Seller will install Kraft Faced, friction-fit, flexible batt or blanket fiberglass insulation batt insulation with an R-value (or R-value equivalent) of R-19 is installed in the attic of the home during construction. Unfaced, friction fit, thermal batt insulation with an R-value (or R-value equivalent) of R-13 is installed in the exterior walls of living spaces and in any floor system between the garage and living spaces during the course of construction. No representations are or may be made that Buyers of homes in the 'Ikena Community will save on household expenses as a result of any house insulation.

Utilities/Phones/Cable. Buyer needs to contact the electric, phone and cable companies. Seller takes no responsibility for cable or telephone installation. Buyer should notify Hawaiian Telcom, Inc. or Spectrum, as applicable, in advance to schedule installation on or after recordation of Buyer's Deed. No early installation will be permitted. Buyer shall be responsible for initiating the commencement of any service from a utility company such as water, electricity, telephone and cable television (if available) upon or after the Closing Date. If Seller receives any bills for utilities that are attributable to the period after the Close of Escrow, Buyer shall reimburse Seller for such payments within ten (10) days after receipt of a statement from Seller. Seller is not affiliated with a cable company or with any other utility companies (i.e., water, gas electricity, telephone service, etc.), and has no control over the rates or the services furnished. The Board of Water Supply ("**BWS**") water distribution system (specifically, the Honouliuli, Waipahu, Kunia and Hoaeae wells) services Ho'opili. Seller has no control over the water pressure available at Buyer's Home. Seller does not make any representations as to when or if cable services will be available nor as to the quality of television reception or cable services. Seller has no control over timing of meter installation once final inspection has been performed. Seller also has no control over the location and placement of public utility structures and facilities. All locations of the utility structures and facilities are final, and Buyers shall not tamper, move or damage these structures and facilities. Buyer is to check with Buyer's sales representative to determine whether any utility structures or facilities are located within or in the vicinity of the Home Buyer is purchasing.

Real Property Taxes. As of October 1, 2020, the date of valuation used by the City and County for the 2021-2022 fiscal year (July 1, 2021 to June 30, 2022), the land comprising the Community was a portion of the land covered by TMK No. (1) 9-1-186-052, 42.77 acres. The R-3.5 zoned portion of TMK No. (1) 9-1-186-052 was classified Residential A for the 2021-2022 tax year as such land was vacant at the time of valuation and valued by the City and County at more than $1,000,000. While the 2021-2022 annual real property tax rate for residential property classified Residential is $3.50 per $1,000.00 net taxable value of the property, the real property tax rate for residential property classified Residential A is $4.50 per $1,000.00 net taxable value of the property up to $1,000,000 and $10.50 per $1,000.00 net taxable value of the property in excess of $1,000,000. Please see the City and County of Honolulu Department of Budget and Fiscal Services Real Property Assessment Division of the City and County's website at https://www.realpropertyhonolulu.com/ for general information regarding real property taxes and https://www.realpropertyhonolulu.com/media/1683/residential-a_17.pdf for specific information regarding the Residential A classification. Payments are due on February 20 and August 20 each year. At Closing, Buyer will be required to pay real property taxes for the full City and County fiscal year (July 1, 2021 - June 30, 2022) in which Closing occurs, prorated as between Buyer and Seller as of the Closing Date, given the Property was not separately assessed by the County for the 2021-2022 fiscal year. Buyer may also be required to prepay real property taxes

for future tax periods at Closing as may be required by Buyer's mortgage lender or otherwise, among other fees.

In October 2021, the City and County issued Tax Map Key numbers for the individual lots within the Community, and the lots are being individually assessed for the 2022-2023 fiscal year (July 1, 2022 to June 30, 2023) forward. To the extent the City and County assesses the value of any lot within the Community in excess of $1,000,000, the Residential A classification and real property tax rate will apply to such lot(s) for the 2022-2023 fiscal year.

Once an individual lot is conveyed by Seller to a third party, an owner-occupant may be eligible for a home exemption that reduces the net taxable assessed value used in determining and/or affects the real property tax classification of and rate applicable to the Property. An owner-occupant Buyer may only make a claim for a homeowner exemption on or before September 30th preceding the tax year for which the exemption is claimed. The basic home exemption is currently $100,000.00. Seller understands that for homeowners 65 years and older the home exemption will increase to $140,000, but Buyer should confirm that this increase exemption will be available following the date of Buyer's purchase. Currently, to qualify for the "senior" exemption, Buyer must be 65 years or older on or before June 30 preceding the tax year for which the exemption is claimed. These tax rates are approximate only.

For further information and to confirm the actual rate, Buyer may contact the Real Property Tax Office at (808) 768-3799. If Buyer installs alternate energy improvements for the Home, such as a photovoltaic system, Buyer may be eligible for an alternate energy improvements exemption. The Claim for Exemption Alternate Energy Improvements (ROH Sec. 8-10.15) form is available at www.realpropertyhonolulu.com.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Schools and Related Matters. The Community is located in the Leeward School District. The Leeward District telephone number is (808) 692-8000. The schools for this Community are determined by the Department of Education and are subject to change. Although various elementary schools, a middle school and a high school are planned in Ho'opili, it will be a number of years before construction of those improvements by the Department of Education.

Refuse Collection. Buyer understands that in order to receive postal and trash services, mailboxes and trash containers may need to be located only in those areas designated for these purposes. Trash pickup in certain communities may be by private contractor.

Postal Service/Mailboxes. The United States Postal Service will not deliver mail to the Home (or to any other home in the Community). Mail will only be delivered to the designated cluster mailboxes, which may be limited to a single location within or in the vicinity of the Community. Seller expects that the cluster mailbox system for the Community will be located in the pedestrian path lot located in 'Ikena adjacent to Kamaliehope Street, pending the approval of the U.S. Post Office. The United States Postal Service requires that at least 50% of the homes and roads within the Community be built and may impose additional conditions before mail services will commence. Buyers will need to arrange for temporary mail service via either a general delivery service through the post office in the area or purchase a post office box at any post office until the requirements of the United States Postal Service, which are subject to change, are met by Seller.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Property Maintenance and Condition. All homes and the land within the Community, including the land below Buyer's Home, may have expansive soils, and, as a result, improvements, including the Home and the driveways, walkways and other improvements may be subject to various types of distress including subsidence, settlement or lifting. Further, the land within the Community has been graded. Soil has been removed and added to reach the land's finished height and form, and non-expansive fill has been placed under structural improvements, with underlain expansive soils. Please refer to the Soils Condition and Drainage Addendum for further disclosures and recommendations. The Property is subject to subsidence, settlement or expansion due to the presence of expansive soils and fill material. Except for limited soil borings, Seller has not investigated the soils below the limits of grading and as result soil below the limits of grading may contain items installed during periods of agricultural use, such as, without limitation, drainage, irrigation and sewer lines which have been abandoned in place. Buyer also acknowledges that standard construction techniques and applicable designs for the foundation slab may result in a degree of non-structural cracking or "spider" cracking within the slab and that certain slabs will contain crack control joints. Buyer accepts such slab cracking. Certain non-structural cracking or swelling of drywall joints at windows, doorways and other locations with the Home may also be visible, should subsidence, settlement or expansion occur. Buyers must be especially sensitive to landscape watering, avoid over watering and ponding of water, and must abide by the recommendations for maintenance set out in this Disclosure Addendum in order to minimize the risk of these occurrences. Landscaping is also important and will reduce the incidence of erosion attributable to wind or rain.

Buyer understands and acknowledges that Buyer will be acquiring the Property in "AS IS" condition at the time of closing. Except as expressly set forth herein, Buyer is relying and will rely solely upon Buyer's own inspection and investigation of the Lot and the land of the Community, and is not relying and will not rely in any way upon any representations, statements, warranties, or other information or material furnished by Seller or its representatives, whether oral or written, express or implied. Buyer should also be aware that soils within the Community may be corrosive in nature.

Soil. The suitability of the soil contained within this Community for the planned construction was determined by Geolabs, Inc. A copy of the soils report for this Community is also available for review in the Sales Office.

Easements. Buyer is aware that there may be easements which affect the Community and Buyer's Property. These easements are noted in the Master Declaration, the exhibit to the Deed, the title report, the Subdivision Map, File Plan, if any, and/or the plot plan for the Lot. Specifically, Lots on Maunakapu Street, Kamaliehope Street, Hono'uli'uli Street and Ho'oluana Drive will be subject to landscape easements benefiting the Master Association. A subdivision monument or monuments and/or cluster mailbox system may be included within this landscape easement area and may affect certain lots. There may also be landscape easement areas within the Community roads.

Drainage Facilities and Easements. Surface water drainage in the Community is directed to the streets servicing the Community utilizing certain surface drainage facilities, which may include lined and unlined ditches and swales, affecting various Lots in the Community. Buyer may not alter and must maintain the existing drainage pattern on any Lot, nor shall any Buyer modify any existing drainage facility located on Buyer's Property. Failure to maintain the existing drainage pattern or altering the scope of the drainage pattern on Buyer's Property may adversely affect Buyer's Home. Saturation of the ground or ponding around foundation slabs may result in expansion or lifting of soils beneath the slab and settlement when the ground dries. Gutters, downspouts (directing water), splash guards, lined swales and pipe conduits should be considered if not included in the purchase of the Home or purchased as an option by Buyer, if available. Buyer shall maintain the existing drainage pattern on Buyer's Property. Buyer of a Property on which any drainage ditch facility, concrete swale, or portion thereof is located shall be responsible, at Buyer's cost, for the maintenance, repair and cleaning, as required, of the drainage ditch facilities located on Buyer's Property. The scope and extent of swale facilities within drainage and flowage easements is reflected on the approved grading plans for the Community. Buyer understands and agrees that should a swale facility or any drainage or flowage easement be disturbed during construction of a Home, Seller may restore the swale in accordance with approved grading plans even after closing of the purchase or sale. This right is reserved to Seller in the Deed and Master Declaration. If Buyer removes, modifies or otherwise alters the established drainage patterns or devices on Buyer's Lot, Buyer may cause significant and permanent damage to Buyer's Home and/or other homes, including but not limited to, damage to the foundation of Buyer's Home or adjacent slopes. Buyer should take precautions by using licensed professionals (e.g., landscape architects, civil engineers, geotechnical engineers, general contractors, etc.) to assure that Improvements such as walkways, landscaping, lanais, decks, planters, etc. are constructed so as not to alter the established drainage of Buyer's Home. Seller shall not be responsible for any modifications or changes to the established drainage for the Lot.

Sewer and Drain Easement. Certain portions of the Community may be affected by an underground sewer and/or drain easement benefiting the Community and/or the County. The County shall be responsible for the maintenance of any underground drainage facilities located on a Property, which are constructed for the benefit of the County. Such easements may not be reflected in the plot plans for the Community. The facilities may be located within the Property and may not be shown on the plot plans.

Sidewalk and Gutter Areas; Street Trees. Buyers shall maintain and keep clean, passable and free from weeds, debris and overgrowth the sidewalk, planting strip, and gutter area adjacent to Buyer's Property. Prior to or following the conveyance of the Home, the Master Association and/or Seller may landscape and/or plant trees in the planting strip in the sidewalk along the roadway in the Community ("**Planting Strip Area**"). Seller may plant trees in Buyer's yard when appropriate to satisfy City and County design standards. Under no circumstances may Buyer alter the Planting Strip Area without prior written consent of the Board of Directors of the Master Association, Seller, and the County. Without limitation of the foregoing, no landscaping or trees planted by Seller in the Planting Strip Area or trees planted in front yards shall be removed, changed or relocated without the prior written consent of the Board of Directors of the Master Association, Seller, and the County. Other than lawn grass that may be planted by Seller, installation of impervious surface material in the Planting Strip Area is strictly prohibited. Even though Buyer is prohibited from altering the Planting Strip Area, each Buyer shall be responsible for the proper maintenance and care (including irrigation) of the Planting Strip Area and the landscaping and trees located within the Planting Strip Area and in front yards. If Seller installs an irrigation system in the Planting Strip Area the irrigation system will be connected to the Home. Buyer should be aware that the County ordinance may have additional restrictions regarding the Planting Strip Area and the trees Seller planted in front yards to satisfy City and County design standards.

Planting Strip Watering Easement. The Master Association shall have the right, but not the obligation, to own and maintain a sprinkler system installed within each Planting Strip of each property along certain Community roads (and in any Roadway Landscape Easement Area defined in the Master Declaration) as provided in the Master Declaration together with an electrical timer installed within the Home or yard. If installed, Buyer shall be responsible for paying for the water and electricity used for the sprinkler system and must ensure that water and electricity are available at all times for maintenance and irrigation of Buyer's Planting Strip adjacent to the property.

Sight Distance/View Triangles. A "sight view triangle" may be required by the County on certain corner Lots in order to maintain clear views of traffic at certain intersections. The County limits the height of structures and landscaping within the sight view triangle. If not reflected on the plot plan for the Lot, Buyer will need to confirm with the County Planning Department whether a sight distance/view triangle affects the Lot and limits the landscaping or improvements Buyer may wish to make to the Lot.

Setback Area Easement. Buyer understands and agrees that Seller shall retain an easement over the setback areas of the Lot for the construction and placement of fences, walls and entry signs together with all attendant rights to construct, reconstruct, install, maintain, repair and replace, as appropriate, such structures (including walls, fences, entry signs and the like), facilities and appurtenances as Seller determines necessary, appropriate or expedient.

Electrical and Utility Easements. Utility boxes, transformers, utility lines (above ground and underground), manholes and other utility features, such as structural transformers, transformer and switching vaults are placed throughout the Community and may be located near Buyer's Lot and Home. Certain Lots are affected by landscape and above ground or underground electrical, telephone, gas (if any), and cable utility easements shown on the Subdivision Map for the Community. Buyer should inspect the Lot to confirm the location of these easements and facilities. The location of these facilities depicted on the Subdivision Map is preliminary in nature and these facilities may be sited as required without further notice to Buyers. Electrical and utilities easements run in favor of and will be granted to the electric company, telephone company, gas company, and/or the local cable television provider. Seller has the right to grant these easement areas even after Buyer occupies Buyer's Home.

Use of Easement Areas. Buyer may landscape an easement area(s) as long as Buyer does not interfere with the use of the easement area(s) affecting Buyer's Lot. The grantee of the easement area, whether it is the electric company, the telephone, gas and/or local cable companies, the Master Association, or an agency of the County, will have the right to trim and keep trimmed any plants within the easement area that may be in the way. Also, Buyer may not be permitted to construct other structures in the area depending on the nature of the easement. Such structures may require the grantee's approval. Additionally, should the grantee determine that it must remove any plants or foliage within the easement area, the grantee may NOT be obligated to replace them, but rather will only be obligated to restore the surface of the ground within the easement area as much as the grantee determines is reasonably possible.

Lots Affected by Easements. Buyer's sales agent will have a schedule of Lots affected by easements. Further, a special Easement Addendum to the Sales Contract will identify easements affecting a Buyer's Lot. Such easements will also be reflected in the plot plan for the Home and/or the Subdivision Map.

Digging Generally. Buyer should call 811 before digging anywhere on Buyer's Property to avoid damage to underground utilities. If any digging is contemplated, call the Hawaii One Call Center at 811 at least five (5) working days beforehand. Be sure to give the address and location of the cross street(s) nearest where digging is planned. The Hawaii One Call Center will, at no cost to Buyer, contact all local public utilities to tone, mark or identify the location of underground public utilities. Homeowners are asked to mark the area where excavating is planned in WHITE as the utilities are designated other colors to mark their facilities (yellow for gas, oil, steam, petroleum, or other hazardous liquid or gaseous materials; red for electric; orange for communications, cable TV, alarm or signal lines, cables or conduits; blue for water, irrigation, and slurry lines; purple for slurry and reclaimed water; green for sewers, drainage facilities or other drain lines; pink for temporary survey markings). Buyers are encouraged to visit http://callbeforeyoudig.org/hawaii/index.asp for additional details regarding the Hawaii One Call Center.

Natural Gas. Hawai'i Gas has installed a gas pipeline to a point of connection just within the boundary of the Property. The gas pipeline is terminated (i.e., capped) and does not extend beyond this point of connection into the Property, and Buyer must contact Hawai'i Gas as to whether the gas pipeline can be extended to the Home, which work, if possible, shall be at Buyer's sole election, responsibility and expense. Seller provides no assurance that the installation of additional natural gas pipeline(s) to the Home or interior of the Home will be permitted under practices, regulations or rules governing Hawai'i Gas or other natural gas service provider. Regardless, Buyer should always make sure there are no gas pipelines underground

where any digging is planned. Digging or running heavy equipment can damage gas lines and striking a gas line may cause an explosion resulting in personal injury, property damage and/or death. Always have underground gas lines located before beginning any excavation activity, even when conducting minor excavation (e.g., to install a fence or sprinkler system). As discussed above, call 811 before digging and the Hawaii One Call Center will contact all local utilities to tone, mark or identify the location of underground utilities.

If a gas leak is suspected, immediately evacuate the area and contact Hawai`i Gas' emergency department at 808-526-0066 or, if the situation warrants, call 911. Common signs of a gas leak include: odor of rotten eggs; an unusual hissing or blowing noise from the ground or exposed gas; flames near exposed piping or coming from the ground; constant and localized blowing of dirt, dust or debris; rapid bubbling at the surface of a body of water such as a puddle; unusual brown, dying or dead vegetation in otherwise moist areas over or near pipeline areas as well as unusual soil movement.

Buyers are encouraged to visit http://hawaiigas.com/safety/ for additional information regarding gas safety.

Community Common Areas

Collective Maintenance Responsibility. Each Owner in the Community must share in the cost to maintain, repair and replace the Community common areas as described in the Master Declaration ("**Community Common Areas**"). The Master Association may specifically assess the Community owners for the maintenance and repair of these areas.

Community Common Areas. The Community Common Areas include all of those items noted in the Master Declaration and may include, without limitation, the following:

Entrance Landscape and Sign Monument Easement which means and describes the sign monument and landscape features, if any, constructed in the landscape and/or signage easement shown on the Subdivision Map for the Community.

Landscaping Areas along and within the Community Roads and the landscaped areas within the Community as shown on the Subdivision Map.

Common Drainage Facilities which means and describes those facilities, if any, serving to control and direct the drainage of surface water within and the inlets into such facilities, as may be shown on the Subdivision Map.

Mailbox System(s) which means and includes any mail system serving the Community.

Pedestrian Access Lot(s) which means and describes the pedestrian access lot(s) shown on the Subdivision Map, if any, including any improvements, landscaping and irrigation system.

Access, Utility, and Drainage Easements which include those certain access and utility easements within the Community as shown on the Subdivision Map.

Road(s) which means and describes the roadways within and serving the Community. Road(s) will be included in the Community Common Areas if not dedicated to the County. These areas include the planting strip adjacent to the curb abutting the road travel surface, as well as the street trees located in the planting strips.

Ownership, Administration and Assessment. The Master Association shall own the Community Common Areas, once deeded to it and must accept the conveyance of the Common Areas from Seller. The Master Association shall be responsible for the management and administration of the Community Common Areas, and may charge the Community owners for the cost to maintain, repair and replace these common areas. The level of service of maintenance of Community Common Areas shall be determined by the Master Association's Board of Directors.

Improvements/Ho'opili Design Guidelines. As specified in the Master Declaration, and the Ho'opili Design Guidelines, ANY exterior improvements to a Home or landscaping of a Lot, painting of Buyer's Home and the construction of fences/walls must comply with the Master Declaration and/or Ho'opili Design Guidelines, if any. The Ho'opili Design Guidelines require that all exterior metal, including gutters, flashing, sheet metal, and vents shall be finished to match or compliment the house/roof color. All vertical and hardscape improvements will need to be approved in writing by the Design

Review Committee before the improvement is made. Buyers are responsible to review submittal requirements before design of improvements. Please note that DRC submittals must reflect mechanical screening material color and exterior metal finishes. Before constructing any improvements at the Property like walls or other structures, Buyers and Buyer's contractor must review the Property pins and the plot plan to make sure there are no discrepancies. If there is a discrepancy, please notify Warranty Service before any work is started so they can verify the placement for Buyer. The Property pins may have been moved during the course of surrounding or adjacent construction activities. Seller will not be responsible for any work done on the Property if they are not notified in writing of the discrepancy. Buyers are encouraged to read and review the Ho'opili Design Guidelines, as they will substantially affect Buyer's ability to improve Buyer's Lot. Buyers should note that the Ho'opili Design Guidelines are subject to further revision by the DRC. Before Buyer begins any grading, excavating, filling or constructing any improvements to Buyer's Home (e.g., pools, spas, planters, sidewalks, decks, lanais, lanai covers, landscaping, etc.), Buyer should engage the services of a qualified, licensed professional and Buyer should take necessary precautions in designing and installing such improvements to avoid damage to Buyer's Home and other improvements which may result from existing soils conditions. Buyer should also obtain a geology report prior to constructing a swimming pool or spa. Too often a homeowner's contractor will utilize a standardized set of calculations and construction plans that are not specifically designed for pools and spas that are to be built at the top or toe of a slope or on expansive soils. These conditions require special design considerations. Please refer to the Soils Condition and Drainage Addendum for further disclosures and recommendations.

Fences and Walls. Various Lots in the Community may be sold with either a wooden, wrought iron, vinyl fencing, masonry walls or other type of fencing in place and constructed on the Lot. Pursuant to the Master Declaration, these fences and walls may not be removed and must be maintained and kept in good repair by the Lot owner. Certain Lots within the Community may also have a decorative planting area and/or masonry wall and sign monument identifying the Community. The Master Association shall be responsible for the maintenance of the referenced decorative planting areas, the wall and the project identification monument located on these Lots. If Buyer wishes to move a fence, Buyer must obtain the Master Association's approval as well as the approval of the adjoining Property owner. New fences will also require the approval of the Master Association and DRC and must comply with the County's rules and regulations.

Retaining Walls and Other Improvements. All improvements to the Property must be approved by the Design Review Committee. Due to the expansive soils at the Community, all structural improvement or new construction, such as lanais or room additions, must comply with the Ho'opili Design Guidelines. Those Guidelines require the installation of special foundations or structural fill under such improvements. Any such fence or wall or improvement shall be designed and constructed only in compliance with the Ho'opili Design Guidelines and the Master Declaration and shall in all instances conform in design and color (to the extent practicable) with existing fences and walls constructed by Declarant.

Landscaping.

Trees and Planting Strips. Trees may be planted in the front yards of various Lots and where they exist within the landscape easement fronting a Lot if they exist. Seller may also plant trees within the front yard of any Lot as may be required by the County. Each Buyer shall be responsible for the proper maintenance and care of any and all trees planted on Buyer's Lot. The County or Seller may also plant trees in the planting area bordering the roadways in the Community, as required by the County and Seller may install an irrigation system in the Planting Strip Area or landscape easement area, which will be connected to the home. Buyers may not remove, replace, alter or relocate these trees or plantings. Buyer must maintain the grass planting areas and may not gravel or concrete over the planting strip area. Buyer should be aware that the automatic sprinkler system serving grass planting areas may run more often (perhaps three times a day) until the landscaping has been established which typically takes 60 to 90 days and, as a result, Buyer's expense for the water and electricity used for the sprinkler system may be higher during the grow in period. Customer Care should be contacted before reducing irrigation to the grass planting areas.

To comply with the County's requirements and the Community Documents, Buyer must maintain any ground cover and/or tree planted by Seller in the Planting Strip. As mandated by the County and as set forth in the Master Declaration, homeowner's may not (i) prune, remove and/or replace any tree in the Planting Strip, (ii) plant trees in the Planting Strip, (iii) injure or destroy trees in the Planting Strip, or (iv) alter the existing ground cover or install any alternate ground cover or gravel and/or concrete in the Planting Strip without permission from Seller, the Master Association, and the County. The pruning, removal, replacement, injuring, destroying of trees and/or altering of any ground covering in the Planting Strip without permission from Seller, the Master Association, and the County, will result in Buyer having to replace or pay for the replacement of the tree with a County approved tree and/or ground cover. These requirements and restrictions shall also apply to trees required by the County to be planted by Seller within the front yard of any Lot.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Community Disclosures.

Other Development within the Surrounding Area. Buyer understands that Seller does not control the development of the entire surrounding area and that current and future plans for the development and use of all or any part of the surrounding area are under the control of others, and may change at any time before or after Closing of Buyer's purchase of the Property without notice to Buyer. The surrounding community contains or may contain various commercial, residential, recreational and ancillary uses, industrial, including extensive commercial, retail, industrial, multi-family and single-family detached residential subdivisions and rental communities. To date, Seller has conveyed vacant development parcels within Ho'opili to The Hawaiian Humane Society (5.473 acres; B-1 zoned; contemplated use - new West Oahu campus), Fred Lau Properties, LLC (1.806 acres; B-1 zoned; contemplated use - not yet determined), HBP Partners LLC (57.190 acres; IMX-1 zoned; contemplated use - industrial business park); The Queen's Medical Center (4.901 acres; BMX-3 zoned; contemplated use - ambulatory medicine center), Alaka'i Apartments I LP (11.311 acres; BMX-3 zoned; contemplated use - market and affordable rental apartments up to 80% of area median income), and The Mutual Housing Association of Hawai'i, Inc. (7.127 acres; A-2 zoning; contemplated use - affordable rental apartments up to 60% of area median income). Buyer hereby accepts the risk of any changes pertaining to the development and use of all or any part of the surrounding area, and agrees that Seller shall not have any responsibility to Buyer for such changes. Buyer further understands and acknowledges that any descriptions of planned amenities for the surrounding area, which may have been provided to Buyer by Seller or agents of Seller, are for general information purposes only and are subject to change or deletion at any time and from time to time. Seller makes no warranties or representations regarding the accuracy or completeness of any descriptions of such planned amenities, which may have been provided to Buyer, and no reliance may be placed thereon. Further, as much as thirty percent (30%) of the residential housing in the surrounding area and within the Ho'opili Community has been or may in the future be developed in cooperation with the County's Department of Planning and Permitting or equivalent State or County agency ("**Agency**") as affordable housing available only to buyers satisfying special median income limitations established by the Agency. Such homes may be sold and/or rented at prices below the market value of comparable homes as determined by the Agency, and may be subject to additional use, occupancy, and transfer/option restrictions.

Condition of Property. Buyer understands and hereby acknowledges that the land of the Community may have been used previously for agricultural and farming operations and in connection therewith, fertilizer and pesticides, among other things, may have been applied and used on the land of the Community or adjacent lands. Buyer also understands that the Property has been graded, soil removed and added to reach its finished height and form, and contains or may contain fill and/or expansive soils, and, as a result, may be subject to subsidence, settlement or expansion. Please refer to the Soils Condition and Drainage Addendum for further disclosures and recommendations. Buyer understands and acknowledges that, as previously stated, Buyer will be acquiring the land underlying the Lot in "AS IS" condition at the time of Closing. Except as expressly set forth herein, Buyer is relying and will rely solely upon Buyer's own inspection and investigation of the Property and the land of the Community, and is not relying and will not rely in any way upon any representations, statements, warranties, or other information or material furnished by Seller or its representatives, whether oral or written, express or implied. Seller makes or gives no warranty, express or implied, concerning the condition of the land. Without limiting the generality of the foregoing, Buyer assumes all risks associated with the condition of the Property, the nature of the soils making up the Property and of hazardous materials on, about, around, under, over or within the Community, including all risks of (a) any and all enforcement, clean up, or other governmental or regulatory actions instituted or threatened pursuant to any hazardous material laws affecting the Community, (b) all claims made or threatened by any third party against Buyer or the Community relating to damage, contribution, compensation, loss or injury resulting from any hazardous materials and (c) Buyer's discovery of any occurrence or condition on the land of the Community or any land adjoining or in the vicinity of the Community which might result in Buyer or the Property being made subject to restrictions on ownership, occupancy, transferability or use of the Property or the Community pursuant to any applicable hazardous materials laws. Furthermore, Buyer specifically waives and relinquishes any and all claims of whatsoever kind or nature based on the condition of the land or the use or presence of any hazardous materials on, about, around, under, over or within the Property, and from and after the date that Buyer acquires title to the Property, Buyer shall hold harmless and defend Seller and its members, managers, stockholders, successors and assigns, from and against all claims, demands, actions, lawsuits, proceedings, fines, penalties, damages, liabilities, judgments, awards, expenses and costs (including attorneys' fees and costs) which may arise out of or may directly or indirectly be attributable to the condition of the land, the soils thereon and therein, and the use, generation, manufacture, treatment, handling, refining, production, storage, release, discharge,

disposal, or presence of any hazardous material on, about, around, over or within the Property. As used herein, the term "hazardous materials" includes, but is not limited to, any and all radioactive materials, asbestos, polychlorinated biphenyls ("**PCB's**"), chemicals which cause cancer or reproductive toxicity, pollutants, contaminants, hazardous wastes, toxic substances, and other hazardous substances or materials listed, described or defined in 40 CFR Para. 302, as amended from time to time. Buyer and Seller agree that the covenants and agreements contained in this paragraph shall survive the Closing of the sale of the Property and shall be binding upon and inure to the benefit of the parties and their respective heirs, personal representatives, successors and assigns.

Uses Within and Around the Community. Buyer understands, acknowledges, approves and agrees, as set forth here, and in certain instances in the Declaration(s) and Deed, that: (a) the land of the Community may have been used previously for commercial agricultural and farming operations and in connection therewith, fertilizer and pesticides, among other things, may have been applied and used upon the land of the Community or lands adjacent thereto; (b) noise levels in the Community may exceed noise level standards for residential-zoned areas promulgated by the State Department of Health, and that these noise levels may not be acceptable to some individuals; (c) the Community may be located near or adjacent to properties that are or were used for the growing, processing, production and harvesting of diversified agricultural products, including corn and other agricultural genetically modified organisms or "GMO" products or related uses and the development of alternative energy projects ("**Agricultural Properties**") that may have a limited buffer area, if any, between the agricultural use and the Community, as well as a variety of commercial and industrial properties; (d) further development of mixed residential (multi-family, single family and affordable), commercial, industrial, recreational utilities facilities/substations and public projects (including without limitation roads, bus stops, railroad, parks, schools, preschools and day care centers) may be ongoing and may continue within the Community directly adjacent to Buyer's Home and within the Community in the vicinity of Buyer's Property for a considerable period of time after Buyer has occupied the Property; (e) there are or may be a variety of pets within the Community that may not be acceptable to some individuals or may create a nuisance; (f) aboveground and underground radio transmission wires, high voltage electric lines and microwave telecommunications facilities and civil defense tower(s) are located within and around the Community. These lines purportedly may emit electric and magnetic fields; (g) certain lands within the Community may be irrigated with treated effluent, reclaimed water or other sources of non-potable water, and (h) the Property will be subjected to those other uses and circumstances described in this Disclosure Addendum (collectively, all the foregoing uses and circumstances set forth in this Section (Community Disclosures) are described as "**Community Uses**"). Seller has the right, but not the obligation, to develop, market and sell as many affordable homes in the Community as Seller desires. Each Buyer hereby waives any and all claims arising out of the presence of affordable homes, or lack thereof, in the Community.

Surrounding Community Conditions and Uses. Each Lot in the Community may be periodically affected by certain environmental conditions due to historical, existing and prospective surrounding conditions and uses. The land of the Community was used previously for commercial agricultural and farming operations and in connection therewith, fertilizer and pesticides, among other things, may have been applied to and used upon the land of the Community or lands adjacent thereto. The Community is located near or adjacent to properties which are or may be used for agricultural, farming, animal husbandry or related uses. The Community will also include lots used for agricultural purposes. Further development, construction and sale of residential, commercial, recreational and public projects by Seller and others, which may include changes in use (due to zoning changes or other governmental authorization or otherwise), construction, grading, improvement and maintenance of adjacent and surrounding properties, including roadways, drainage facilities, sewage treatment facilities and the like is ongoing and may continue within the Community and within the vicinity of the Community for an indefinite period. Certain lands within the surrounding area and within the Community may be irrigated with treated effluent, reclaimed water or other sources of non-potable water. The land of the Community is subject to potential adverse soil conditions. Numerous schools and public parks may be built in Ho'opili, and the West Oahu campus of the University of Hawaii is just west of Ho'opili. All of these factors and uses may affect Buyer as a homeowner.

Commercial and community agricultural uses are planned in and integrated into Ho'opili. These uses will be supported by the Ho'opili Urban-Agriculture initiative. Lands within Ho'opili used for agricultural purposes will include, without limitation, land for commercial farming operations, shared and home gardens, community farms and gardens, civic farms, and urban gardens. The urban gardens are intended to feature edible landscaping throughout certain lots in Ho'opili, including lots within the 'Ikena Community. Commercial agricultural uses are protected under the Hawai'i Right to Farm Act, Hawaii Revised Statutes, Chapter 165. Homes in the Community may be subject to occasional dust from field operations, pollutants, smoke and debris from agricultural activities or feral lands in proximity to the Community, such as fires, odor, noise, and other agricultural cultivation. Buyer shall

provide subsequent notice to Buyer's lessees, tenants or assignees of these aforementioned farming operations and practices on adjacent or contiguous land and the protections of such uses afforded under the Hawaii Right to Farm Act.

The Community may also be affected by traffic, aircraft noise, and adverse effects from the Kalaeloa Community Development District and an expansion of military uses and associated adverse impacts may occur within Kalaeloa and Pearl Harbor. The Community may be affected by airport noise overflight from the Honolulu International Airport and is near an active airstrip in Kalaeloa. Roads adjacent to the Community, which are not under Seller's control may be widened or modified. Significant widening and highway improvements are planned for Farrington Highway which is adjacent to Ho'opili and the construction of intersections within Ho'opili near or around the Community, including Kulanihako'i Street, Ho'omohala Avenue and Kualaka'i Parkway, may also impact the Community as a result of noise, nuisances, annoyances, and other impacts associated with the construction, operation, and maintenance of such improvements. A central hub of the planned Honolulu rapid transit rail system including, but not limited to, a rail station within the Ho'opili Community, one rail station west of the Ho'opili Community, portions of the guideway, and possibly park-and-ride and/or bus transfer facilities, will be located in or adjacent to Ho'opili, and the operation of the rail system may result in noise and other impacts associated with the operation of trains and mass transit related uses. Parts of the Ho'opili Community will be subject to Transit Oriented Development regulations and neighborhood plans. An "Energy Easement Corridor" is adjacent to Farrington Highway which may contain jet and other petroleum based fuel underground transport lines as well as aboveground and underground utility lines and electrical lines. The Community may be affected by surrounding operations effects created by or attributable to historical, existing, and prospective surrounding construction, including but not limited to construction of roads/intersections and walls/fences, development, agricultural, pasture, commercial and other non-residential uses and activities, which include, but are not limited to: (a) cane milling, burning, harvesting, tending, as well as fertilization and pest and weed control; or (b) cattle and other livestock grazing and pets that may be objectionable to residents; or (c) commute and off-hours (non-peak) traffic and parking. Areas surrounding and mauka of the Community may include quarrying operations.

The Ho'opili Community is a mixed-use development and includes within it, homes, schools, pre-schools, churches, parks, walkways, bicycle paths, government offices, library(ies), day care centers, hospital, urgent care, medical and medical emergency facilities, homeless shelters or transitional shelters, cellular towers, commercial, retail and industrial areas and operations, recreational and related facilities and other features common to urban environments, including without limitation to, a Community wide system of bicycle and walking paths, aboveground and underground radio transmission wires and high voltage electric lines, which lines purportedly may emit electric and magnetic fields. Buyers are encouraged to call Hawaiian Electric's Call Center at (808) 548-7311 and visit Hawaiian Electric's website, including at https://www.hawaiianelectric.com/about-us/our-vision-and-commitment/investing-in-the-future/kulanihakoi-substation, for additional details regarding substation(s) and electrical lines in the Ho'opili Community. Easements shall be retained over the Community for some or all of the foregoing described uses, including, specifically, easements permitting the commencement, continuation and resulting effects of the foregoing uses, and all activities incidental to such uses.

Further, Buyer is aware that there are numerous materials and components required to construct and used in and around Buyer's Home to which certain individuals may be allergic or especially sensitive. Some of these materials such as paint, wood preservative treatments, insulation materials, glues, mastic, caulk, carpet or the like may cause lingering odors to which people are sensitive. Also, due to the nature of community living, various noises or odors due to elevators, trash areas, storage sheds, plumbing, impact, including, without limitation, noises from adjacent neighbors and other circumstances may result to which a Buyer may be especially sensitive. Mold and mold spores are also present in the Community and may be present in Buyer's Home. Certain strains of mold may cause adverse health effects in susceptible persons.

The Home is sold subject to these conditions, hazards and risks. Buyer is aware of and understands these risks, accepts them and has decided that the benefits of home ownership in the Community outweigh the detriments of such ownership.

Other Environmental Issues. Mold and mold spores are present throughout our environment and residential home construction is not, and cannot be, designed to exclude mold spores. If the growing conditions are right, mold can grow in your Home. You may be familiar with mold growth in the form of bread mold, and mold that may grow on bathroom tile. All mold is not necessarily harmful, but certain strains of mold have been shown to have adverse health effects in susceptible persons. The most common effects are allergic reactions, including skin irritation, watery eyes, runny nose, coughing, sneezing, congestion, sore throat and headache. Individuals with suppressed

immune systems may risk infections. Some experts contend that mold causes serious symptoms and diseases which may even be life threatening. However, experts disagree about the level of mold exposure that may cause health problems, and about the exact nature and extent of the health problems that may be caused by mold. The Center for Disease Control states that a causal link between the presence of toxic mold and serious health conditions has not been proven. Moisture is the only mold growth factor that can be controlled in a residential setting. The Homeowner's Manual contains recommendations for positive steps and action a Buyer may take following possession of the Home to reduce mold. Buyer agrees to assume responsibility for the recommendations contained in the Homeowner's Manual to act in accordance with the best practice guidelines contained on the Governmental Internet Sites described in the Manual. Buyer further acknowledges that if there is any water damage or water intrusion to Buyer's Home, Buyer will take immediate action to prevent conditions which cause mold or mildew to develop. Also, since energy conservation has become a concern, the State of Hawaii uniform building code, specifically the energy standards, has created the need to build Homes that are more airtight. As a result, these Homes trap unwanted gases in different degrees depending on how each person lives within their Home. To date, measurements of such unwanted gases (such as the radon gas described below) are reported as parts of the air they occupy. Since the quality of air we breathe can affect our health, Seller recommends frequent airing of Buyer's Home by simply opening your windows to introduce fresh air uncontaminated with such gases. The United States Environmental Protection Agency ("**EPA**") has indicated that a number of homes in the United States experience elevated levels of radon gas. Radon is a naturally occurring gas that is caused by radioactive decay of the element radium. Since radium is contained in the earth's crust and dissolves readily in water, radon can be found virtually everywhere and can enter the home through a variety of sources. Buyers seeking information about radon can contact the EPA or a state environmental office. Seller has no expertise in the measurement or reduction of radon in homes or regarding acceptable levels or possible health hazards associated with radon. Seller makes no warranty or representation of any kind, express or implied, regarding the presence or absence of radon gas, or regarding the effectiveness of any architectural activities for reducing the presence of radon.

Non-Potable Water. BWS has required Seller to install separate irrigation water lines intended for non-potable water ("**R1 Water Lines**") in connection with the irrigation of landscaping in Ho'opili. At some point in the future, the R1 Water Lines will carry treated effluent, reclaimed water or other sources of non-potable water. Until then, the R1 Water Lines will carry potable water. The R1 Water Lines will be required to be switched over to non-potable water when directed by BWS in its sole discretion. BWS has not advised Seller of BWS's contemplated timing for the use of the R1 Water Lines for non-potable water. Once BWS determines to implement use of the R1 Water Lines for non-potable water BWS will coordinate the conversion of use with the Master Association. The conversion will require, among other things, installation of a new water meter(s) and signage, all at the expense of the Master Association. Buyer may obtain information regarding the requirements of the Recycled Water Program at http://health.hawaii.gov/wastewater/home/reuse/.

'Ikena Community Features. In addition to the adjacent agricultural and other uses described in this Addendum, a future elementary school and future middle school are planned north of the site. Planned commercial and mixed use residential and commercial sites are planned throughout Ho'opili and may be improved with one or more of a medical clinic, school, day care facility or other commercial or retail uses. Private community parks, County parks and community gardens, opened to all Ho'opili residents are situate in various locations in Ho'opili. A community park may contain, among other things, a community center, swimming pool, manager's office and unit, pavilion and playground area, a portion or portions of which may be available for use for Community functions. Dogs may be permitted in the park. This community also contains a pedestrian access lots between sales lots 4 and 5 and sales lots 18 and 19. Ho'opili contains a temporary detention basin and stockpile area that will be used for those purposes for an extended period before it is developed. Roadways serving 'Ikena may contain temporary cul de sacs located within the Community that will be removed and the roadways extended when that area is developed in the future. Affordable rental developments are planned within Ho'opili. All of these factors and uses as well as other matters described in the Community Documents may affect Buyer's use and enjoyment of Buyer's Home. The Home is sold subject to these conditions, hazards and risks. Buyer is aware of and understands these risks, accepts them and has decided that the benefits of home ownership in the Community outweigh the detriments of such ownership.

Nuisances Related to Community Uses. Without in any manner limiting the foregoing, Buyer, in purchasing or otherwise taking title to any Property, does so with the express understanding and acknowledgment that the Community and the Property may be periodically affected by various hazards and by noise, dust, smoke, earthshock, soot, ash, odor, mold or mold spores, noxious vapors, the presence and/or transmission of pollutants or other hazardous materials, surface water runoff, or other adverse environmental conditions, including but not limited to those resulting from wind drift and other weather factors (collectively "**Community Use Effects**") created or exacerbated by or attributable to the Community Uses

and the historical, existing, and prospective surrounding construction, development, agricultural, pasture, residential, industrial and commercial and other non-residential uses and activities. Buyer specifically approves all of the foregoing uses, circumstances and activities, including changes in use due to zoning changes, other governmental authorization or otherwise (collectively "**Community Operations**"). Buyer is strongly encouraged to inspect the Community and the various Community Operations to assess the impact of these operations, uses and circumstances on the Community and the Property. Buyer covenants and agrees, on behalf of Buyer and the tenants, lessees, family, servants, guests, invitees, licensees and employees of Buyer: (a) to assume and does hereby assume any and all risks associated with the Community Operations including specifically the presence of mold in the Home and the annoyances, inconveniences, impacts on property value or loss of the sale value, Community Use Effects and other nuisances thereby created; (b) to waive and does hereby expressly waive all rights to make any claim against and specifically releases Seller, the owners of the Agricultural Properties and any of their related entities, affiliates, successors-in-title, members, managers, stockholders, or assigns, arising out of or in connection with such activities, annoyances, inconveniences and nuisances, the clean-up or remediation of the same, including but not limited to (i) any claim for damages attributable thereto or for the design or the placement of improvements to the Community, the Property or the surrounding property, or any part thereof, or related or adjacent facilities, or to the orientation of the Home as it relates to exposure to sun or wind, or (ii) claims for the abatement or elimination thereof; and (c) to hold harmless and defend Seller and its affiliates, successors, members, managers, stockholders and assigns, from and against all claims, demands, actions, lawsuits, proceedings, fines, penalties, damages, liabilities, judgments, awards, expenses and costs (including attorneys' fees and costs) which may arise out of or may directly or indirectly be attributable to any and all of the foregoing.

Non-Disclosure of Neighbor's Plans. During the course of the purchase of a home, some buyers disclose information to Seller regarding the potential plans for homes, (e.g., landscape, hardscape, add-ons, repainting plans, etc.) and/or information about personal lifestyles (e.g., pets, interests, hobbies, etc.). Seller will not disclose such information to prospective neighbors. Should Buyer wish to obtain any information about Buyer's prospective neighbors, Seller will, upon Buyer's written request, attempt to place Buyer in contact with Buyer's prospective neighbors, but makes no warranty that Seller will be able to do so or that the information which Buyer may obtain will be accurate.

Adjoining Land Uses. Buyer may have received written disclosures which depict the current and proposed land uses for the properties which adjoin the Community. Land uses are subject to change, and consequently, Seller cannot guarantee whether any information so disclosed is current. Also, land planning and zoning matters are complex and therefore the information which may have been supplied by Seller is not complete. If Buyer is concerned about the type of development that may occur on the adjoining properties, Buyer should discuss nearby land uses with the County Planning Department or the State of Hawaii departments or agencies involved, as may be the case, and otherwise conduct Buyer's own investigation of those matters. THE MARKET VALUE OF BUYER'S LOT IS NOT GUARANTEED BY SELLER AND MAY CHANGE DUE TO ADJOINING LAND USES BY OTHERS, INCLUDING WITHOUT LIMITATION THOSE USES BY THE STATE OF HAWAII AND/OR THE CITY AND COUNTY OF HONOLULU, ALL OF WHICH USES ARE NOT UNDER THE CONTROL OF SELLER.

Grading, Landscaping, and Building Materials. Development of the areas around the Community will cause dust in the Community during grading and landscaping work until adequate landscaping has been installed to minimize blowing dust. Seller will try to minimize the dust from its construction activities. Buyers understand, however, that Seller does not control all construction in the area and that dust is an inevitable result of the ongoing and surrounding construction. The grading of the soil and other elements created by nature, as well as building materials, many times create unwanted and undesired gases and other contaminates in residential and commercial buildings, both new and used.

Disposal of Toxic and Other Substances. Water that enters a storm drain flows directly to natural sources of water, including waterways, creeks, drains, rivers, lakes and that erosion has an impact on the environment. Unlike the water in the sewer system in the Lot which is being purchased by Buyer, which flows to wastewater treatment plants, water that enters a storm drain flows directly, without any treatment, to waterways, creeks, streams, rivers, lakes and/or oceans. Accordingly, the National Pollution Discharge Elimination System, the Regional Water Quality Control Board Orders covering the Community, and the policies and ordinances of the County prohibit discharging anything other than natural rain water into storm drainage systems, including gutters and streets which drain into storm drains. Toxic chemicals or hydrocarbon compounds such as gasoline, motor oil, antifreeze, solvents, paints, paint thinners, wood preservatives, fertilizers, lawn clippings, yard waste, detergents, pet waste, and other such materials and pollutants shall not be discharged into any street, public or private, gutters, or into storm drains or storm water conveyance systems. Buyer further acknowledges that the disposal of such pollutants and materials into a storm drain system may result in significant penalties and fines and that Buyer may be responsible for any activities by Buyer's contractors (e.g., painters, landscapers, etc.) who dispose of such pollutants from Buyer's Home or Lot into a storm drain system. Use and disposal of pesticides, fungicides, herbicides, insecticides, fertilizers, and other such chemicals shall meet all federal, state, and County requirements and

requirements of any other governmental agencies having jurisdiction over the Property. All buyers within the Community are required to comply with such restrictions. Buyers are encouraged to consult with the County, other governmental authorities, and the refuse hauler in the area of the Community concerning the proper disposal of any toxic or hazardous materials. Dumping any such materials into sewers, gutters or storm drains is against the law.

Continued Construction. The construction of homes at the Community and other communities on nearby land will continue for some time. The roadways in and around the Community may be used for ingress and egress to the construction sites. The ongoing construction will cause dust, noise and increased traffic in and around the Community for a period of time. Due to these continuing activities, and notwithstanding dust and noise control measures employed by contractors, you may have to close windward facing windows in your Home during certain times of the day and may have to clean your Home more often. Certain persons may be more sensitive to these activities than others. Also, care must be taken around the construction sites, as hazardous conditions may exist temporarily due to the construction. You have decided to buy your Home knowing these facts and agree, as provided in your Sales Contract, that you will not hold Seller responsible for any damage, annoyance, inconvenience or nuisance you may experience as a result of the ongoing construction activity within the Community and surrounding areas.

Marketing Activity. Seller may continue to market homes in the Community for sale after you move into your Home. Seller may also use the Model Homes to market homes in other Communities. Seller's marketing activities may include operating a model home complex, displaying signs, balloons, flags, banners and conducting on-site events and other promotional activities. The ongoing marketing of homes may cause you some inconvenience and may disrupt your enjoyment of your Home.

Roads. Buyer is aware that the roads shown on the Subdivision Map may currently be private roadways that are proposed to be dedicated to the County as public roadways in the future. They are used at Buyer's risk. Roads surrounding the Community will be extended in the future to serve other developments within the Ho'opili community. Seller makes no representation or warranty regarding the availability of parking along the public streets which may change once the streets are dedicated to the County.

Flooding. Buyer acknowledges that Buyer's Home is not warranted against damage due to floods. Buyer is responsible to conduct Buyer's own investigation regarding the potential for floods.

Pest Control. It is in Buyer's best interest, as a new homeowner, to contact a local pest control company to arrange for a preventive maintenance program. Please refer to the limited warranty for termites. The specifics of the program that must be established in order to maintain the termite warranty coverage described in the limited warranty as set out in the Customer Care Program. In many locations, especially where there are adjacent open spaces or agricultural uses, rodent control is essential. Uncontrolled, rodents can damage water and electrical systems in the Home. Buyer fully understands that it is Buyer's responsibility, not Seller's responsibility, to control pests (insects, rodents and the like) in and around Buyer's Lot and Home.

Setbacks. The building setbacks required by the Master Association may be more restrictive in certain circumstances than County building setbacks. Buyers should carefully read the Master Declaration and the Ho'opili Design Guidelines for information about these matters and building restrictions within the Community.

Construction Claims. State statute limits how a Buyer may make a claim against a contractor. Before making an arbitration claim for defective construction against the contractor who designed, repaired or constructed Buyer's Home, Buyer must serve on the contractor a written notice of any alleged construction defect ninety days before filing an arbitration claim. The contractor has the opportunity to make an offer to repair and/or pay for the alleged defects. Buyer is not obligated to accept any offer made by the contractor. There are strict deadlines and procedures under the law and failure to follow them may negatively affect Buyer's ability to file an arbitration claim.

Mediation and Arbitration. Buyer understands that by purchasing a Home in the Community, Buyer agrees to resolve any disputes with Seller, the administrator and insurer under the Limited Warranty, the builder, the contractor or others concerning the Home or the Community by way of mediation and arbitration without resort to the courts.

Buyer Obligation to Investigate. Nothing contained herein is intended to be a complete disclosure of all facts, which Buyer may wish to consider in buying a Home in the Community. Buyer is still obligated to conduct Buyer's own full investigation of all facts relevant to deciding where and when to buy. Buyer is hereby advised to seek the advice of independent tax, legal, and financial consultants.

Disclosure to Subsequent Purchasers. When Buyer sells Buyer's Home, Buyer is required to provide to the subsequent purchaser(s) any documents provided in conjunction with the original sale of the house, including, but not limited to, information that Buyer has regarding the Home, the Community, and overall Community, the information set forth in this and any other disclosures provided by Seller to Buyer and any other information that may be of value to the subsequent purchaser(s), including, but not limited to, the Master Declaration.

Preferred Provider Agreements. Seller has entered into a Preferred Provider Agreement with Hawaiian Telcom Services Company, Inc. ("**Hawaiian Telcom**"), which provides Buyer with a discount on a variety of Hawaiian Telcom services, including set top boxes, wifi, TV, and high-speed internet for which Hawaiian Telcom will be afforded special marketing rights at Ho`opili. Seller also plans to have Hawaiian Telcom provide wifi for the community parks and community centers.

Membership in Master Association. By purchasing a Lot and Home in the Community Buyer automatically becomes a member of the Master Association. Generally, without limitation, the Master Association is responsible for, among other matters, the administration of the Community, design review and the general and routine maintenance and upkeep of the Community Common Areas, the entry monuments and any other common areas. As a member of the Master Association, Buyer is required to pay an initial assessment and pay regular and special assessments levied by the Master Association. The Master Association has the right to lien Buyer's Property for non-payment. The initial dues and budget for the Master Association have been compiled by Hawaiiana Management Company, a licensed property manager. These assessments are subject to change without notice to Buyer and are expected to increase annually at minimum in an amount equal to or greater than the increase in the consumer price index. Although the property manager makes every effort to estimate the actual cost of operation, certain budget items, especially insurance in today's insurance market, may change. Seller advises that costs and expenses of maintenance and operation of a residential community are difficult to estimate initially, and even if such charges have been accurately estimated, such charges will tend to increase in an inflationary economy and as the improvements age. Assessment charges can vary depending on the service desired by the owners. Buyer should examine the budget to see what services are included. Buyer should be aware that the estimates provided are of the date of the managing agent's certification and not reflect the actual charges that may be incurred upon the formation of the Master Association and the actual contracting for such services as maintenance, insurance, etc. In addition to the foregoing, each Owner must provide the Master Association with advance written notice of proposed title transfer of the Home, identifying the escrow established to handling the sale. The Master Association may levy a transfer fee to maintain a record of the new owners of the Home. The transfer fee constitutes a special assessment in respect of such Lot being transferred and shall be deposited into the purchase and sales escrow and disbursed therefrom to the Master Association.

Ho'opili Electronic Participation Program. If established by Seller, Buyer will have the opportunity to participate in the Ho'opili Electronic Participation Program by entering into the Ho'opili Electronic Participation Agreement at Closing and committing to maintain that participation for at least four (4) years so long as Buyer is living at 'Ikena. The program requires Buyer to accept electronic communications from the Master Association and to establish automatic payment of Master Association assessments while owning a Home at 'Ikena. Buyer may participate in the Ho'opili Electronic Participation Program by signing the Ho'opili Electronic Participation Agreement at Closing. If such program is established, a copy of the Agreement will be available from Buyer's sales representative.

'Ikena Subdistrict Assessment. No subdistrict association dues for 'Ikena are currently planned, but may be assessed by the Master Association in respect of special features in the 'Ikena community (such as cluster mailbox systems, pedestrian access lots and roadway landscape features) for which the Master Association has maintenance responsibility.

The term "Buyer" as and when used herein, or any pronouns used in place thereof, shall mean and include the singular or plural number, individuals, partnerships, trustees and corporations, and each respective heir, personal representative, successor and assign.

This Disclosure Addendum modifies Buyer's Sales Contract and is binding upon Buyer. Buyer agrees to the foregoing and acknowledges receipt of this addendum on: «SALE-DATE-MONTH-NAME-FORMAT» (date).

'IKENA AT HO'OPILI
WARRANTY DEED AND RESERVATION OF RIGHTS

This 'Ikena at Ho'opili Warranty Deed and Reservation of Rights (this "**Deed**") is made this 18th day of May, 20 22, by and between **D.R. HORTON HAWAII LLC**, a Delaware limited liability company, the address of which is 130 Merchant Street, Suite 112, Honolulu, Hawaii 96813 (hereinafter "**Grantor**"), and **RUSSELL AGCAOILI TUPINIO**, **single**, whose address is **91-1220 Likolehua Loop, Ewa Beach, Hawaii 96706** (hereinafter called "**Grantee**");

WITNESSETH THAT

Grantor, in consideration of the sum of TEN DOLLARS ($10.00) and other good and valuable consideration paid by Grantee to Grantor, receipt of which is acknowledged, and of the promises and covenants of Grantee set forth in this Deed, which Grantee agrees to faithfully observe and perform, does hereby grant, bargain, sell and convey unto Grantee, as **tenant in severalty**, all that certain real property in the residential subdivision known as "**'Ikena at Ho'opili**" (sometimes referred to herein as the "**Community**") situate at Honouliuli, District of Ewa, City and County of Honolulu, State of Hawaii, more particularly described as **Lot 11,** area **4,826** square feet, more or less, as shown on the subdivision map approved by the Department of Planning and Permitting of the City and County of Honolulu, on May 28, 2021 (2020/SUB-67), attached to that certain Declaration of Subdivision recorded in the Bureau of Conveyances of the State of Hawaii ("**Bureau**"), as Document No. A-78380309, which real property is more particularly described in Exhibit A (the "**Lot**"), and the reversions, remainders,

rents, issues and profits therein (such interest, together with the Lot and improvements constructed on the Land are described as the "**Property**") and all of the estate, title and interest of Grantor, both at law and in equity, in and to the Property.

TOGETHER with all buildings, improvements, rights, easements, privileges and appurtenances on, to and running with the Property, including those with respect to use of private roadway facilities, if any, as may be set forth in Exhibit A, and the right of access from the Property to a public roadway, subject to the terms, conditions and reservations contained in this Deed and in Exhibit A.

SUBJECT, HOWEVER, TO the easements, restrictions, liens and other encumbrances on or affecting the Property as set forth in Exhibit A, and EXCEPTING AND RESERVING to Grantor, its successors and assigns, each of those easements, restrictions, reservations, covenants, liens, acknowledgments, and other encumbrances set forth in the Master Declaration of Covenants, Conditions, Restrictions and Easements for Ho'opili recorded in the Office of the Assistant Registrar of the Land Court of the State of Hawaii as Document No. T-9864231 (as amended, modified and/or supplemented, the "**Master Declaration**", which Master Declaration shall in all respect control over this instrument), the exhibits attached to the Master Declaration, the Supplemental Declaration Permitting Accessory Dwelling Units on Specified Lots ('Ikena at Ho'opili / Phase 10A Parcel 103) recorded in the Bureau as Document No. A-79620185, this Deed, and the limited warranty (the "**Limited Warranty**") delivered to Grantee by Grantor, all of which burden the Property and benefit Grantor.

FURTHER EXCEPTING AND RESERVING to Grantor, its successors and assigns, all easements of record described in Exhibit A and perpetual easements and rights of way over, across, under and through the Property conveyed by this Deed for all utilities (whether public or private or for the benefit it offers homeowners in the Community) including, but not limited to, water, drainage (including drainage channels, swales and ditches), sewer, gas, telephone, electricity, cable (including, without limitation, television cable), security systems, landscaping, irrigation, communication lines and systems and electromagnetic and optical transmission facilities and other similar service or public facilities purposes as Grantor in its discretion may designate, create, cancel or grant, whether or not the easements or rights of way are for the purpose of serving the Property hereby conveyed, including, without limitation, the right to enter upon the Property (even after recordation of this Deed), to construct, install, operate, maintain, repair, reconstruct, and relocate such lines, wires, circuits, conduits, cables, channels, pipes, swales, ditches, facilities and appurtenances for the indicated purposes and the right to grant such easements or rights of way to governmental agencies, public, quasi-public or private utility or service companies, other private entities, the association of homeowners, if any, or any other homeowner or group of homeowners in the Community or any adjacent community, without joinder or consent of, and without notice to, Grantee or Grantee's mortgagee. These reserved rights are to be exercised in a manner that will cause the least practicable interference with Grantee's occupancy of the Property.

GRANTOR FURTHER EXCEPTS AND RESERVES the benefits and burdens of the reciprocal appurtenant easements, for encroachment and maintenance purposes as between the Property and adjacent lots within the Community as set forth in the Master Declaration.

ALSO EXCEPTING AND RESERVING unto Grantor, its successors and assigns, as specified below without notice to or the consent or joinder of Grantee or Grantee's mortgagee, to create and record in the Bureau a File Plan covering the Community land which includes the Property, and to assign to the Lot a File Plan lot number, or to record an affidavit of a surveyor

containing the metes and bounds for the Lot.

TO HAVE AND TO HOLD the same, together with all rights, easements, privileges and appurtenances thereunto belonging or appertaining or held and enjoyed therewith unto Grantee, absolutely and forever and in fee simple, according to the tenancy and estate set forth herein.

Grantor hereby covenants with Grantee that Grantor is lawfully seized in fee simple of the Property conveyed by this Deed; that the Property is free and clear of and from all encumbrances except as described in this Deed and in Exhibit A and except for the lien of real property taxes not yet by law required to be paid; that Grantor has good right and title to sell and convey the Property in the manner herein set forth; and Grantor will WARRANT AND DEFEND the same unto Grantee forever against the lawful claims and demands of all persons, except as mentioned in this Deed.

By acquiring ownership of the Property, Grantee acknowledges that Grantee has received, read and understood the Master Declaration and the Rules and Guidelines of the Design Review Committee ("**Design Guidelines**") described in the Master Declaration and further acknowledges, agrees with and accepts the disclosures, conditions, covenants, easements and reservations of rights contained therein; and Grantee agrees to observe and perform all of the terms, covenants, conditions and provisions required to be observed and performed by an Owner under this Deed, the Master Declaration and the Design Guidelines, and any existing or future amendments, supplements and/or modifications thereto; and Grantee further covenants and agrees that Grantee, for itself and Grantee's family, lessees, tenants, servants, guests, invitees, licensees, employees, or other persons who may occupy or otherwise use the Property will abide by all of the applicable terms, covenants, conditions and provisions set forth in the Master Declaration, the Articles of Incorporation (defined in the Master Declaration), the Bylaws (defined in the Master Declaration), the Design Guidelines, the Limited Warranty, and any other duly adopted rules and regulations of the Master Association, hereinafter defined (collectively, the "**Community Documents**"). Grantee covenants to indemnify, hold harmless and defend Grantor for any failure to so comply with, observe and perform any such covenant, condition, restriction or other provision contained in the Community Documents.

Grantee acknowledges and agrees that the Community is within and a part of an area intended to be developed as a master planned community known as Ho'opili as described in the Master Declaration ("**Ho'opili**" or "**Ho'opili Community**") and that the premises hereby conveyed and the Community are subject and subordinate to the terms and provisions of the Master Declaration, as it exists or may hereafter be amended, modified and/or supplemented. Without limitation of the matters set forth in the Master Declaration, the contents of which shall control over this Deed, the Master Declaration provides, among other things, for the establishment of the Ho'opili Community Association (hereinafter the "**Master Association**"), of which Grantee is a member, by virtue of the ownership of the Property. The Master Declaration further provides for the levy against the Property and the payment by Grantee of various regular and special assessments, and the right to lien the Lot for non-payment of assessments made by or on behalf of the Master Association.

Without limitation of the matters set forth in the Master Declaration, the contents of which shall control over this Deed, the Master Declaration and Limited Warranty, among other matters, provide that Grantee, for Grantee and for Grantee's family, lessees, tenants, servants, guests, invitees, licensees, employees, or other persons who may occupy or otherwise use the Community, the Property or improvements to the Community, acknowledges and agrees that the Master Declaration and Limited Warranty contain various reservations in favor of Grantor,

"Declarant" under the Master Declaration, as well as disclosures, covenants, undertakings, waivers of rights, disclaimers, limitations, requirements and restrictions, all of which are binding upon Grantee and all owners of property within the Community (and in the Ho'opili Community) and which include, but are not limited to: (a) specific limitations, restrictions, and requirements pertaining to the construction, installation, repair, modification, maintenance and/or appearance of improvements, access driveways, landscaping (which must be installed within a limited time period at Grantee's cost), private roadways and common driveways, if any, sewer, drain and electrical improvements and facilities, and boundary fences and walls, among others; (b) specific disclosures and disclaimers concerning the plans for the development and use of all or any part of the Community and/or Ho'opili, which may change at any time without notice to Grantee, and which may include but are not limited to the construction of residential and rental housing being developed in cooperation with the City and County of Honolulu's Department of Planning and Permitting or equivalent State agency as affordable housing available only for purchase or rental by home buyers or home renters satisfying specific median income limitations established by such agency or satisfying specific State or Federal income limitations; (c) specific provisions disclosing and authorizing continued extensive construction and sales activities within and around the Community, which may result in noise, dust, mold, vibration and other nuisances, disturbances, annoyances, hazards and effects, and providing for the acceptance by Grantee of any and all nuisance, irritation, annoyance, inconvenience and risk of damage attributable thereto, and further providing for the agreement by Grantee to suffer and permit all actions and consequences incidental to such ongoing construction and sales activities; (d) specific provisions detailing and disclosing various adverse environmental hazards, conditions or circumstances, including, without limitation, noise, dust, smoke, soot, ash, odor, noxious vapors, mold, surface water runoff, or other adverse environmental conditions described in the Master Declaration, which may affect the Community, the Property, and Grantee's use and enjoyment of the Property, and providing for Grantee's acceptance of the possibility of the occurrence of the same, assumption of the risk of such occurrence and damage attributable thereto, and the express waiver of all claims against Grantor and others arising out of or in connection with such adverse conditions or circumstances, including the right to seek damages or the abatement or elimination thereof; (e) specific provisions detailing and disclosing the potential impacts, including but not limited to traffic, aircraft noise, and the adverse effects from residential, commercial, agricultural, industrial and recreational uses within and surrounding the Community; (f) specific provisions detailing and disclosing the mixed residential and commercial uses within Ho'opili and the anticipated presence of schools, universities, churches, library(ies), day care centers, animal kennels and refuges, homeless shelters or transitional shelters, commercial and retail uses, possible future bus stop locations and facilities and bus routes (which are not in the control of Grantor), rail transit facilities, parks, walkways, bicycle paths, government offices, cellular towers, recreational and related facilities and other features common to urban environments, including, without limitation, a Community wide system of bicycle and walking paths and aboveground and underground radio transmission wires and high voltage electric lines, which lines purportedly may emit electric and magnetic fields; specific provisions detailing and disclosing the potential impacts, including but not limited to traffic, noise and the adverse effects, resulting from the location of the Community near the West Oahu campus of the University of Hawaii, an electric substation adjacent to the Community along Kauluakoko Street and Kulanihako'i Street, which is anticipated to include, among other things and without limitation, 48kV and 12kV lines and related equipment, transformers, switchgear, switches and associated structures, bus conductors and connectors, lightning arresters and other associated pad mounted equipment, fencing with barbed wire, drive gates and main gates for security control, signage, lights and cameras, portions of the planned Honolulu rapid transit rail system and guideway, rail station(s), and park-and-ride and/or bus transfer facilities, an "Energy Easement Corridor" adjacent to Farrington Highway, which may contain jet and other petroleum based fuel underground transport lines, the potential widening of roads adjacent to the Community

and the extension of roads within the Community to serve future development; (h) specific provisions detailing and disclosing that the Property may have been previously used for commercial agricultural and farming operation, and in connection therewith, fertilizer and pesticides, among other things, may have been or will be applied and used upon the Property, or lands adjacent thereto and may have a long term effect on the Property, the water, and/or the environment; and (i) specific provisions reserving by or on behalf of Grantor, and/or others various rights and easements affecting the Community and the Property, and Grantor the right to make specific grants thereof without joinder by Grantee or Grantee's mortgagee.

Without limitation of the foregoing, Grantee acknowledges and agrees that commercial and community agricultural uses are planned in Ho'opili and will be supported by the Ho'opili "Urban-Agriculture" initiative, which will include without limitation, land for commercial farming operations, shared and home gardens, community farms and gardens, civic farms, and urban gardens. The urban gardens are intended to feature edible landscaping throughout certain lots in Ho'opili and specifically within lots within the 'Ikena Community. Commercial agricultural uses are protected under the Hawai'i Right to Farm Act, Hawaii Revised Statutes, Chapter 165. Grantee further acknowledges and agrees that Grantee shall provide subsequent notice to Grantee's lessees, tenants or assignees of these aforementioned farming operations and practices on adjacent or contiguous land and the protections of such uses afforded under the Hawaii Right to Farm Act.

In furtherance of and without diminution of the foregoing, Grantee hereby further acknowledges and approves the obligations imposed on Grantee pursuant to the terms of this Deed, the Master Declaration, and the Community Documents and reservation by Grantor of each and all of the following rights and easements:

(a) Grantor, and its agents, employees, contractors, licensees, successors, mortgagees and assigns (collectively, the "**Grantor Parties**"), shall have an easement to conduct extensive sales activities on and at the Community, including the use of any improvements within the Community owned by Grantor (and any other home, with the express permission of the owner of such home) for model homes, sales and management offices, parking and extensive sales displays and activities, and the posting and maintenance of signs and other advertisements relating to such sales activities.

(b) Grantor and the Grantor Parties shall have an easement over, under and upon the Community, including the Property, as may be reasonably necessary for the completion of improvements to and correction of defects, as the term is defined in the Limited Warranty and any applicable termite warranty, and other warranty or "punchlist" items in the Community or the Property.

(c) Grantor and the Grantor Parties shall have an easement over, under and upon the Community and each and any portion of the Community including the Property and the individual homes to create and cause noise, dust, vibration and other nuisances or annoyances created by and resulting from any work connected with or incidental to the development, construction and sale of any home or other improvement to the Community, any additional phase to the Community, or any other community which Grantor, its successors or assigns, may develop on property adjacent to or in the vicinity of the Community. Grantee and any other person acquiring any interest in the Community waives any and all rights, claims or actions that might otherwise be asserted against Grantor or the Grantor Parties and their respective members and managers based on any such noise, dust, vibration and other nuisances or annoyances.

(d) Grantor and the Grantor Parties shall have an easement to enter upon, across, over, in and under any portion of the Community, including the Lot, for the purpose of changing, correcting, or otherwise modifying the grade or drainage channels of any portion of the Community so as to improve the drainage of water on the Community. Reasonable efforts shall be made to use this easement so as to disturb as little as possible the uses of Grantee, to undertake such drainage work promptly and expeditiously, and to restore any areas affected by such work to a sightly and usable condition as soon as reasonably possible following such work.

(e) There shall be reciprocal appurtenant easements of encroachment as between adjacent lots due to the unintentional placement or settling of shifting of the improvements constructed, reconstructed, or altered thereon (either initially by Grantor or subsequently by Grantee if in accordance with the terms of the Master Declaration) to a distance of not more than one (1) foot, as measured from any point on the common boundary between said adjacent lots, along a line perpendicular to such boundary at such point; provided, however, in no event shall an easement for encroachment exist if such encroachment occurred due to willful and knowing conduct on the part of Grantee. These easements shall be for the encroaching improvements and their maintenance (including access to and from the encroachment).

(f) Grantor reserves the right either to record an affidavit of a surveyor containing the metes and bounds description of the Lot or to file and to record a File Plan covering the residential subdivision lots above described, either of which actions are specifically authorized by Grantee and Grantee's mortgagee(s) without the joinder or consent of Grantee and/or Grantee's mortgagee(s). Grantee expressly acknowledges and agrees that Grantor may submit and record with the Bureau such affidavit describing the Lot or File Plan depicting the legal description of the Subdivision and all of the lots and easements therein, wherein references to lots and easements shall be consistent with such references in the Subdivision and that upon the approval and filing of the File Plan at the Bureau, the descriptions of, and references to, the Subdivision, and all lots (including the Property) and easements therein, as set forth in the File Plan shall replace and supersede the description of the Subdivision, and the lots (including the Property) and easements therein, set forth herein and in Exhibit A attached hereto.

(g) Pursuant to the Master Declaration and the Supplemental Declaration Permitting Accessory Dwelling Units on Specified Lots ('Ikena at Ho'opili / Phase 10A Parcel 103), the Property may not be improved with an accessory dwelling unit, which is a second dwelling unit, including separate kitchen, bedroom and bathroom facilities, attached or detached from the primary dwelling unit on the Lot, except with the express consent of the Grantor evidenced by recordation of a Supplemental Declaration (defined in the Master Declaration) permitting such use.

By acquiring ownership of the Lot, Grantee hereby further covenants and agrees, for the benefit of Grantor and its successors and assigns, as follows:

(1) The foundation systems for the buildings have been designed in accordance with the recommendations of geotechnical and structural engineers to meet the requirements of the soil and structural conditions and those of local public agencies. The foundation type employed is generally a post-tensioned waffle-mat style slab and may include perimeter walls. Grantee is aware that any alteration to the foundation system (or cutting into the foundation) made in order to install or modify landscaping or to alter gutters, porches, porch materials, or decks for any reason or purpose may adversely affect the foundation system and/or moisture or vapor barriers, is very hazardous and may result in serious damage to the improvements to the Property, personal injury, or both. Grantee agrees that (a) Grantee shall not cut into or otherwise tamper

with the post-tensioned waffle-mat style slab; (b) Grantee shall not permit or allow any other person to cut into or tamper with the foundation system; (c) Grantee shall disclose the existence of the foundation system to any person who rents, leases or purchases the Property; and (d) Grantee shall indemnify, defend and hold Grantor and Grantor's agents, free and harmless from and against any and all claims, damages, losses or other liability (including attorneys' fees and costs of court) arising from any breach of this covenant by Grantee.

(2) Some of the soils within the Community, including the land below the Lot may have expansive characteristics, which will require special consideration and attention. Specifically, Grantee understands that the Lot has been graded in connection with the construction of improvements on the Lot and that excavated or fill material has been overlaid on the Lot in order to create the "pad" or foundation area for the improvements to the Lot. Grantee understands that it should exercise reasonable care to ensure that the non-expansive fill underlying the foundation is not disturbed and that proper drainage away from the home is maintained. Grantee understands and agrees that Grantor bears no responsibility for the manner in which Grantee irrigates the Property and the effect of such irrigation on the soils condition. Grantee shall not change the existing drainage pattern on the Property, and any modifications made to the grading or drainage pattern on the Property, and any modifications made by Grantee to the grading or drainage contours/swales/flowlines of surfaces or subsurface drainage systems, if any, installed by Grantor are made by Grantee at Grantee's own risk. Because any changes made to the grade or contour of the Property may alter the drainage flow and cause damage to other improvements within the Community and/or Ho'opili, Grantee must be sure to properly landscape so water is directed away from the home. Grantee must (a) ensure that any construction or alteration of patios, walkways, wall or planters or installation of landscaping or other improvements on the Property shall not alter or block the current surface or subsurface drainage systems installed by Grantor and (b) install and maintain appropriate additional drainage and/or gutter systems to accommodate such alterations and improvements. Regular inspection and maintenance must be performed to keep all drainage devices free from dirt, debris and obstructions.

Grantee acknowledges and agrees that, except for the express written limited warranty described herein as the Limited Warranty, a copy of which is included in Grantor's homeowner manual (the "**Homeowner's Manual**") a copy of which has been provided to Grantee, and any applicable termite warranty, Grantor is not making or offering any warranties, express or implied, with respect to the Property or the Community, including, without limitation, any warranties of merchantability, habitability, quality of construction, or fitness for a particular purpose. Grantor expressly disclaims any warranties other than the Limited Warranty, and any applicable termite warranty, including, without limitation, any express or implied warranties of merchantability, habitability, quality of construction, or fitness for a particular purpose with respect to the Property or the Community. Grantee acknowledges and agrees that: (i) Grantee has received, read and understands the terms of the Limited Warranty, any applicable termite warranty, and the Homeowner's Manual and is familiar with the coverage and exclusions contained therein, (ii) Grantee shall abide by all the applicable terms, covenants, conditions and provisions of the Limited Warranty, any applicable termite warranty, and Homeowner's Manual, and (iii) other than the Limited Warranty, and any applicable termite warranty, Grantor is making no other representations, promises, or warranties of any kind, including, without limitation, any express or implied warranties of merchantability, habitability, quality of construction, or fitness for a particular purpose with respect to the Property, or the Community. Grantor has established a customer care program (which will be administered by Grantor pursuant to the section in the Homeowner Manual commonly referred to as the "Customer Care Program" (the "**Customer Care Program**")). The Limited Warranty, any applicable termite warranty, and the Customer Care Program do not cover and Grantee acknowledges and agrees that the Limited Warranty, any applicable termite

warranty, and the Customer Care Program do not cover (i) any consequential damages, including, but not limited to, damage to the Property or the Community that is caused by a warranted defect (as defined in the Limited Warranty) but is not itself a warranted defect and/or any claims for emotional distress, lost opportunity, profit or time (from Grantee's employment or otherwise), loss of use of the Property or any other improvements in the Community, the costs of shelter, transportation, food, moving, storage or other incidental expenses related to relocation during repairs of the Property, or (ii) any appliance, equipment, or other items which are "consumer products" for purposes of the Magnuson-Moss Warranty Act, 15 U.S.C. § 2301, et seq., or which are "consumer goods". The only warranties of such consumer products or goods are those which the manufacturer provides to the purchaser. Information as to such manufacturer's warranties will be provided to Grantee. Grantor does not assume any obligation to service or repair such consumer products or goods. They are included on an "AS IS" basis with Grantee assuming the entire cost of all necessary service, repair, or replacement in the event of defect in quality or performance. With respect to appliances or other consumer products included in Grantee's purchase of the Property hereby conveyed, this Deed operates as an assignment from Grantor to Grantee of all manufacturer's or dealer's warranties, if any, covering any such appliances or consumer products for the unexpired term thereof to the extent that Grantor has the right and power to make such an assignment. Grantee acknowledges and understands that Grantor is not stating that any such warranties exist, or that such an assignment will be effective, nor is Grantor adopting any such manufacturer's or dealer's warranties or acting as a co-warrantor, but Grantor is merely attempting to pass through to Grantee the benefits of such warranties, if any exist. Grantee specifically agrees that during the term of the limited warranty afforded by Grantor to Grantee under the terms of the Limited Warranty, and any applicable termite warranty, Grantee shall in each and all instances permit Grantor or Grantor's designated representative and/or the administrator of or insurer under the Limited Warranty and any applicable termite warranty, or their respective representative to repair any and all items classified by Grantor or the administrator as items covered by the Limited Warranty and any applicable termite warranty or provide such alternate coverage in respect of warranted items available thereunder, and that Grantee shall have no further rights and Grantor no further obligation to Grantee in respect of such matters repaired or administered as provided therein.

Without limitation of any other provision herein contained, Grantor hereby grants Grantee a non-exclusive right of entry for access purposes over, upon and across the roadway lots (the "**Roadway Lots**") more specifically described in Exhibit A attached to this Deed owned by Grantor and others; provided, however, that such right of entry shall automatically terminate upon dedication of the Roadway Lots to any governmental authority. Grantee, for Grantee, its successors and assigns, and Grantee's family, lessees, tenants, servants, guests, invitees, licensees, employees, or other persons who may occupy or otherwise use the Property or improvements to the Property, acknowledges, covenants and agrees that (a) Grantor may continue to use the Roadway Lots for construction and sales activities within the Community, which may from time to time result in noise, vibration and other hazards and inconveniences to Grantee; (b) Grantee shall use the Roadway Lots with due care for public and private safety and shall comply with all laws, statutes, ordinances, and all rules and regulations of Grantor while occupying or using the Roadways Lots; (c) Grantee will not interfere with any work being performed, operations being carried out, or use being engaged in on the Roadways Lots by, on behalf of, or authorized by Grantor; (d) Grantor shall have no liability or obligation of any nature to Grantee, Grantee's family or household members, or Grantee's guests as a result of such persons' entry upon or use of the Roadway Lots or other property owned or controlled by Grantor; and (e) Grantee shall indemnify and hold harmless Grantor and its affiliates, members, managers, officers, directors, representatives, employees and agents, from and against any and all loss, damage, costs, expenses, including attorneys' fees, liability, demands, or causes of action

resulting from nuisance, injury, harm or death to persons or property arising out of or in any way connected with the right of entry granted by Grantor pending dedication as described above, except any loss or damage caused by the gross negligence or willful misconduct of Grantor; and (f) Grantee fully realizes and assumes all risks of using the Roadway Lots prior to dedication of the Roadway Lots as described above, including, but not limited to, the dangers associated with construction equipment and workers on or near the Roadway Lots, the dangers resulting from the condition of the Roadway Lots, and the dangers of collision with other vehicles and pedestrians using the Roadway Lots.

Without limiting the generality of the foregoing, Grantee hereby specifically acknowledges and agrees to all of the reservations of rights and easements as set forth and described in the Master Declaration in favor of Grantor and Grantor's successors and assigns as "Declarant". By acceptance of this Deed, Grantee hereby consents and agrees to and with Grantor that in order to effectuate the rights and easements reserved to Grantor as aforesaid, Grantor and/or Grantor's assignee shall also have the right to prepare, execute, file, process and record necessary and appropriate papers and documents to establish and grant easements and to make necessary and appropriate amendments of the Community Documents, all without further notice to Grantee or Grantee's mortgagee. By such acceptance, Grantee also agrees to execute all documents and to do all other things as may be necessary or convenient to effect the same; and such acceptance shall be deemed an appointment of Grantor and/or Grantor's assignee, with full right of substitution, as the attorneys-in-fact of Grantee (and any mortgagee of Grantee) to execute such documents and to do such things on Grantee's (or Grantee's mortgagee's) behalf, which grant of such power, being coupled with an interest, is irrevocable for the term of Grantor's reserved rights and shall not be affected by the disability of Grantee.

Grantee, on behalf of Grantee and Grantee's successors and assigns, agrees that in the event Grantee or any other person with an interest in the Community or the Property shall have any claim or cause of action arising out of or in any way related to this Deed, except as specifically provided above, the Master Declaration (and any and all rules, regulations and supplemental declarations promulgated pursuant to the foregoing, and the enforcement thereof), any aspect of the Property, the Community, Ho'opili, the development, construction, quality, sales, marketing, disclosures concerning, financing, delivery of the Property or Community or improvements thereto, the Limited Warranty, any applicable termite warranty, or each of those items identified in the Limited Warranty, all of which are incorporated herein by this reference, Grantor's Customer Care Program, and/or any other aspect of or activity with respect to Ho'opili, the Community or the Property (herein collectively the "**Covered Matters**"), against Grantor and/or any of the Covered Parties defined in the Master Declaration, such claim or cause of action (a "**Dispute**") whether such dispute is based on contract, tort, or statute, including, without limitation, any dispute described in the Master Declaration, whether such Dispute arises before or after the recording of this Deed, shall be resolved by binding arbitration in accordance with the Federal Arbitration Act (9 U.S.C. §1, et seq.) now in effect and as the same may from time to time be amended, to the exclusion of any different or inconsistent state or local law, ordinance, regulation, or judicial rule, by and pursuant to the rules of Dispute Prevention and Resolution, Inc. ("**DPR**") in effect at the time of the initiation of the arbitration (sometimes the "**Arbitration**" or "**arbitration**") after it shall have first been submitted to the process of "Negotiation" and "Mediation" defined in the Master Declaration, and not by a court of law; provided, however, any and all Disputes relating to Unresolved Warranty Issues (as the same is or may be defined in the Limited Warranty) shall be resolved by mediation and arbitration in the manner specified in the Limited Warranty, utilizing the mediator and arbitrator selected under the provisions of the Limited Warranty; provided further that in the event of an arbitration of a Dispute relating to an Unresolved Warranty Issue under the terms of the Limited Warranty, the provisions of the Master Declaration shall apply only to the

extent not in conflict with the Limited Warranty. Any such claim or cause of action shall be subject to arbitration regardless of whether the claim is against Grantor or the "**Covered Parties**", defined in the Master Declaration, which include, without limitation, Grantor's real estate broker, agent or attorney, the architects, engineers, or other design consultants for the Community, the contractor, subcontractors, sub-subcontractors, material suppliers or other persons involved with the Community, their officers, directors, agents, servants, employees or representatives, the managing agent, if any, and their respective officers, directors, agents, servants, employees or representatives , provided that such person(s) agrees to or has agreed to arbitrate such disputes; or if such claim or cause of action is filed jointly and severally against other parties, it shall be subject to arbitration whether or not such other parties are willing to submit to arbitration as provided in this Deed. Any arbitration shall be conducted in the County in which the Property is located, and notwithstanding anything to the contrary contained in the Limited Warranty, any such Arbitration shall be conducted at the office of the arbitrator. No punitive damages shall be awarded in any claim against Grantor or any other Covered Parties; provided however in the event such limitation is determined to be invalid or unenforceable then such limitation shall be severed and this Deed shall be construed as if such limitation were omitted and shall not affect the other provisions hereof. The arbitrator may not award attorneys' fees or costs (including expert costs) to the prevailing party. Further, no award for damages attributable to emotional distress or a multiple of actual damages based upon any theory of law may be awarded by the arbitrator in any claim against Grantor or any of the other Covered Parties. The award rendered by the arbitrator shall be final.

Grantor and Grantee mutually agree that this instrument may be executed in counterparts, each of which shall be deemed an original, and said counterparts shall together constitute one and the same agreement, binding all of the parties hereto, notwithstanding all of the parties are not signatory to the original or the same counterparts. For all purposes, including, without limitation, recordation, filing and delivery of this instrument, duplicate unexecuted and unacknowledged pages of the counterparts may be discarded and the remaining pages assembled as one document.

Grantor and Grantee mutually agree that the terms "Grantor" and "Grantee" as used in this Deed, or any pronouns used in place of such terms shall include the masculine, feminine or neuter gender, the singular or plural number, individuals or corporations, and each of their respective heirs, devisees, personal representatives, members, managers, successors, successors in trust and assigns, according to the context of such terms. If this Deed is signed by two (2) or more persons or parties as Grantee, all covenants of Grantee contained in this Deed shall be deemed joint and several. Each and every acknowledgment, acceptance, appointment, agreement and covenant of Grantee contained in this Deed shall run with the Property hereby conveyed and constitute an equitable servitude and lien on the Property, and each person or party hereafter acquiring from Grantee any interest in the Property shall be deemed to make such acknowledgments, acceptances, appointments, agreements and covenants by and upon such acquisition.

EXHIBIT A

All of that certain parcel of land situate, lying and being at Honoliuli, District of Ewa, city and County of Honolulu, State of Hawaii, **Lot 11**, being **4,826 square feet**, more or less, (the "**Lot**"), of the subdivision of Lot 53002, as shown on map approved by the Department of Planning and Permitting, City and County of Honolulu, Subdivision File No. 2020/SUB-67, on May 28, 2021 ("**Subdivision Map**"), as described in Declaration of Subdivision (Ho'opili Phase 10A, Parcel 103 - 'Ikena at Ho'opili Subdivision) (DPP File No. 2020/SUB-67), dated June 14, 2021, recorded as Document No. A-78380309 ("**Subdivision Declaration**") (the listed lot being a portion of deregistered Lot 20159, as shown on Map 1698 of Land Court Application No. 1069 of the Trustees under the Will and of the Estate of James Campbell, deceased ("**LCA 1069**"), having been deregistered and recorded in the Bureau of Conveyances of the State of Hawaii as Document No. A-72410580).

Together with easements for water purposes in, on, over and under the easement areas granted by and described in GRANT OF EASEMENTS (WATERLINE) dated September 5, 2006, filed as Land Court Document No. 3485394, recorded as Document No. 2006-173177, subject to the terms and provisions contained therein.

Together also with access over Lots 20156, 20157 and 20158, as shown on Map 1698, to Lots 20145 and to Lot 20142, as shown on Map 1693, to Lot 10067-B-1-B, as shown on Map 1523, and then to Kualakai Parkway, a public road, as set forth by order filed as Land Court Document No. T-10837271, on September 3, 2019; provided however, that in the event that any of said lots are conveyed to the State of Hawaii, the City and County of Honolulu or other governmental authority, said right of access as to said lots so conveyed shall immediately terminate.

Together also with access over internal subdivision roadway Lots 72 and 73, as shown on Map approved by the Department of Planning and Permitting, City and County of Honolulu, Subdivision File No. 2020/SUB-67, on May 28, 2021; with access over Lots 53003, 53004, 53005 and 53006 as shown on Subdivision Map 2019/SUB-122; Lots 19776 and 19778, as shown on Map 1665; and Lots 19952, 19953 and 19954, as shown on Map 1672 (collectively the foregoing are referred to as the "**Roadway Lots**"); provided however, that in the event that any Roadway Lots are conveyed to the State of Hawaii, the City and County of Honolulu or other governmental authority, said right of access as to said Roadway Lots so conveyed shall immediately terminate.

Being a portion of the premises acquired by that certain TRUSTEES' LIMITED WARRANTY DEED WITH COVENANTS AND RESERVATION OF RIGHTS

SUPPLEMENTAL DECLARATION OF ANNEXATION OF PROJECT AREA (DECLARATION OF RESTRICTIVE COVENANTS (PRIVATE PARK)) ('Ikena at Ho'opili Phase 10A/Parcel 103) dated June 28, 2021, recorded as Document No. A-78580226.

10. The terms and provisions contained in the following:

INSTRUMENT:		DECLARATION OF RESTRICTIVE COVENANTS Park Dedication - One Dwelling Per Lot ('Ikena at Ho'opili - Phase 10A, Parcel 103)
DATED	:	June 28, 2021
RECORDED	:	Document No. A-78580227

11. Bylaws of Ho'opili Community Association dated January 31, 2017, as the same may be amended, supplemented and/or restated.

12. The obligation of Grantee, at Grantee's cost, to maintain, repair, clean, and keep free from debris the existing drainage pattern on the Lot, and any drainage facility and/or concrete facility, on the Lot, except for drainage facilities constructed for the benefit of and granted to the City and County of Honolulu, if any, which facilities shall be maintained by the City and County of Honolulu.

13. The obligation of Grantee, at Grantee's cost, to properly maintain the Lot to prevent excess water on the Lot and to avoid the risks of expansion or subsidence of soils, as set forth in the Master Declaration.

14. The obligation of Grantee, prior to obtaining a building permit for all buildings and improvements on the Lot, to comply with the design guidelines and to obtain written approval of the Design Review Committee, as set forth in the Master Declaration.

15. Reservation of right for Grantor to designate, grant and convey within the boundary of the Lot easements, including without limitation easements for landscaping, irrigation, maintenance, sewer, drainage, and electrical and utility purposes, without the joinder or consent of Grantee or Grantee's mortgagee, all as set forth in the Master Declaration.

16. The Lot will be subject to each and all of those easements shown on the plot plan for the Lot.

17. EASEMENT M as shown on the Subdivision Map

PURPOSE:	landscaping and irrigation
REFERENCED:	on the Subdivision Map and as described in the Subdivision Declaration, together with the right reserved to Grantor to grant the same as provided in the Master Declaration and this Deed without the joinder or consent of or notice to the Grantee or Grantee's mortgagee.

18. RESTRICTION OF VEHICLE ACCESS RIGHTS

REFERENCED:	on the Subdivision Map and as described in the Subdivision Declaration

END OF EXHIBIT A

'ILIAHI PHASE 2 AT HO'OPILI
DISCLOSURE ADDENDUM

'Iliahi Phase 2 at Ho'opili Community. The Community is a fee simple residential community consisting of approximately 41 single family detached homes. The Community is located at Ho'opili, Oahu, Hawaii.

Sales Contract. This Disclosure Addendum supplements Buyer's 'Iliahi Phase 2 at Ho'opili Fee Simple Home Purchase Agreement (herein, the "**Sales Contract**") and is part of that legally binding agreement. Defined terms used in the Sales Contract are sometimes used in this Disclosure Addendum and have the same meanings here.

SCOPE OF DISCLOSURE. THIS DISCLOSURE ADDENDUM IS NOT EXHAUSTIVE IN SCOPE. BY ENTERING INTO A SALES CONTRACT BUYER IS ENTERING INTO A LEGALLY BINDING AGREEMENT. BUYER SHOULD READ AND FULLY UNDERSTAND THE CONTENTS OF EACH AGREEMENT MENTIONED IN THE SALES CONTRACT, INCLUDING, BUT NOT LIMITED TO, THOSE DOCUMENTS CONTAINED IN THE DOCUMENT PACKAGE FOR THE COMMUNITY AND HO'OPILI. THESE DOCUMENTS ARE CALLED THE "**COMMUNITY DOCUMENTS**" AND EACH DOCUMENT WILL AFFECT BUYER'S SUBSTANTIVE RIGHTS AND OBLIGATIONS. THIS DISCLOSURE ADDENDUM ATTEMPTS TO HIGHLIGHT SOME BUT NOT ALL OF THE IMPORTANT PROVISIONS OF THE COMMUNITY DOCUMENTS AND TO PROVIDE BUYER WITH OTHER INFORMATION. IN THE EVENT OF A CONFLICT BETWEEN THE COMMUNITY DOCUMENTS AND THIS DISCLOSURE ADDENDUM, THE COMMUNITY DOCUMENTS SHALL CONTROL. HOWEVER, WHERE THIS DISCLOSURE ADDENDUM PROVIDES FOR ADDITIONAL, DIFFERENT OR EXPANDED COVENANTS OR OBLIGATIONS WHICH ARE NOT CONTAINED IN THE COMMUNITY DOCUMENTS, THIS DISCLOSURE ADDENDUM SHALL CONTROL.

BUYER UNDERSTANDS AND ACKNOWLEDGES THAT THE MATTERS CONTAINED IN THIS DISCLOSURE ADDENDUM AND OTHERWISE IN THE SALES CONTRACT REPRESENT A GOOD FAITH EFFORT BY SELLER TO DISCLOSE CERTAIN INFORMATION THAT MAY AFFECT BUYER'S DECISION TO PURCHASE THE PROPERTY, BUT THAT THESE DISCLOSURES ARE NOT INTENDED TO BE AND SHOULD NOT BE REGARDED BY BUYER AS A COMPLETE DESCRIPTION OF ALL MATTERS THAT ARE OR MIGHT BE RELEVANT TO THE OWNERSHIP AND USE OF THE PROPERTY. BUYER ALSO UNDERSTANDS THAT THIS DISCLOSURE ADDENDUM CONTAINS A RELEASE PROVISION THAT HAS LEGAL CONSEQUENCES. Buyer understands and acknowledges that the activities in and around the Community affect the use and enjoyment of the Property and represents and warrants to Seller that Buyer, in Buyer's sole discretion, based on Buyer's independent investigation, has determined that the benefits of owning and enjoying the Property outweigh such detriments and risks. Buyer hereby covenants and agrees to assume all risks of impairment of the use and enjoyment of the Property, property damage and personal injury arising from activities affecting the Community. The terms of this Disclosure Addendum shall survive occupancy of the Property by Buyer and the recordation of the Deed and shall be binding upon and inure to the benefit of the parties and their respective heirs, personal representatives, successors and assigns.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE»

«INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Community Documents. Buyer is strongly encouraged to carefully read the Community Documents applicable to the property Buyer is purchasing (sometimes the "**Property**" and/or "**Home**" and/or "**Lot**"). Without limitation, the Community Documents, as the same may be amended, modified and/or supplemented, include: (1) the Master Declaration; (2) the Master Association's Articles and Bylaws; (3) the Design Guidelines comprised of the Ho'opili Design Guidelines described in the Master Declaration (the "**Ho'opili Design Guidelines**"), the Ho'opili Urban Design Plan ("**Ho'opili UDP**") and any supplemental design guidelines; (4) to the extent applicable to the Community, the Ho'opili Commercial Use Guidelines and Ho'opili Signage Guidelines defined in and pursuant to the Master Declaration; (5) other related materials adopted by the Master Association, including any Ho'opili Community Rules; (6) Supplemental Declaration Permitting Accessory Dwelling Units on Specified Lots ('Iliahi Phase 2 at Ho'opili); (7) Declaration of Restrictive Covenants (ADU Unit), if applicable to a lot; (8) the Sales Contract; and (9) the Deed.

Master Planned Community. The Ho'opili Community is a master planned community encompassing several residential and mixed use communities, condominiums, commercial and other related facilities. Ho'opili is planned to have many subdistrict areas, including some 17 single family residential subdistrict areas, which may contain other uses. 'Iliahi Phase 2 is a single family community that is part of the 'Iliahi residential subdistrict. Additional homes may be included in the 'Iliahi residential subdistrict in the future. By purchasing a home in the Community, Buyer agrees that Buyer, Buyer's family, lessees, tenants and guests will observe and obey the terms, covenants, conditions and provisions contained in the Master Declaration, the Ho'opili Articles and Bylaws, the Ho'opili Design Guidelines, the Ho'opili Community Rules, if any, as well

as those terms, covenants, conditions and provisions set forth in the Community Documents.

Effect of Master Declaration. The Community is or will be developed and operated according to the rules, agreements, conditions, restrictions and other limitations affecting the Community and Buyer's Property set out in the Master Declaration. The Master Declaration also reserves for others certain rights in the Community lands, so that these rights are not part of what Buyer will own when purchasing a Home and Lot. For example, the Property interests above and below the surface of the Community and Buyer's Lot, such as water rights, were, are or will be owned by others and/or used for other purposes. As such, the Master Declaration directly affects Buyer and Buyer's Property. In purchasing a Lot Buyer understands and agrees that the ways in which Buyer may use Buyer's Property is limited and that ways in which others may use other parts of the Community or adjacent lands may affect Buyer and Buyer's Property.

Design Review. Seller and the County retain design review and approval authority over all developments in Ho'opili, pursuant to the Ho'opili UDP and Ho'opili Design Guidelines. In order to assist in the review of projects and interpretation of provisions of the Ho'opili UDP, Seller has established a Design Advisory Board ("**DAB**") comprised of professionals in various fields including but not limited to architecture, planning, landscape architecture and engineering to review project plans. As an accommodation, the authority of the DAB to administer and to enforce the Ho'opili UDP and the Ho'opili Design Guidelines with respect to proposed improvements by Owners and commercial users within the Ho'opili Community has been delegated to the Ho'opili Design Review Committee established pursuant the Master Declaration (herein, the "**DRC**" or "**Design Review Committee**"), which may adopt such design guidelines and rules, as determined appropriate by the DRC, specific to any land use classification within Ho'opili and which may otherwise contain specific provisions that vary from one portion of Ho'opili to another depending upon the location, unique characteristics and intended use thereof.

Plot Plans. Buyer may be provided with a "plot plan" prepared by Seller for the Property, which will show certain information specific to the Property, such as the approximate location of utility connection points and building setbacks. The Property may also be subject to landscape, utility, sign monument, mailbox and other easements not shown on the plot plan. Street monuments and other items including, but not limited to, cluster mailbox units, lamp posts, handholds, fire hydrants, electrical transformers and utility boxes, easements, and other facilities may or may not be located as may be shown on the plot plan for the Property. Both before and after the Property is conveyed to Buyer, Seller shall have the right to revise the plot plan for the Property to show new or revised items affecting the Property and/or other portions of the Community.

Date of Disclosure. Information in this Disclosure Addendum is current, to the best of Seller's knowledge, as of the date of publication set forth in the bottom left hand corner of this page. The information contained herein was collected from sources deemed to be reliable. While Seller has made every effort to obtain the most recent and accurate information, Buyer should rely solely on Buyer's own investigation and the investigation of Buyer's agents in making a decision to purchase. As information can change rapidly, Seller also encourages Buyer to contact the agencies and named individuals at the addresses and phone numbers listed for the most up-to-date information.

Closing. Completion dates are ALWAYS and ONLY estimates. Early occupancy is NOT ALLOWED. Early delivery of furniture is NOT ALLOWED.

Loans. Closing of any loan that will finance Buyer's purchase is Buyer's responsibility. Buyer's sales representative will assist, but each Buyer must stay in contact with such Buyer's lender so that loan approval is obtained in accordance with the time frames provided in the Sales Contract and Closing coincides with building completion. Buyer must be in a position to close escrow on the transaction within ten (10) days after Buyer's Home is ready for occupancy. Delay interest charges may be charged if these deadlines are not met and/or Seller may cancel the Sales Contract.

Financing. The primary lender will be DHI Mortgage Company, Ltd. ("**DHI Mortgage**"). DHI Mortgage is an affiliate of Seller. Buyer should review the special disclosure regarding DHI Mortgage. Buyer should be aware that DHI Mortgage may offer special rates and incentives and if the loan is approved by DHI Mortgage and closed utilizing the settlement services of DHI Mortgage, Buyer shall be entitled to purchase a package of related settlement services at a discounted price. Also, because of its knowledge of the Community, DHI Mortgage should be able to approve Buyer's loan quickly. Buyer is not required to use the affiliated company as a condition of Buyer's purchase of the Property or Buyer's access to settlement services. Buyer may use any lender Buyer wishes. However, Seller has not reviewed or approved any lender's sales or marketing materials, and does not make any representations or warranties whatsoever regarding any matters set forth therein or Buyer's ability to obtain any financing under any particular terms. Buyer is strongly encouraged to make Buyer's own independent evaluation of the rates and loan programs offered by all lenders. Buyer understands that the interest rate and loan fees for the loan applied for will be determined at the time of the Close of Escrow and may be higher or lower than on the date Buyer signed the Sales Contract to purchase Buyer's Home. Buyer also acknowledges that the interest rate, loan fees estimates or quotations that may have been provided to Buyer are for illustrative purposes only and

do not constitute a binding commitment. If Buyer has chosen to make a loan with a lender with whom Seller has arranged a loan commitment, the interest rate quoted may not be available unless the loan closes by a certain date. Seller is not responsible if, for any reason, including construction delays, Buyer's loan does not close on time to obtain a guaranteed rate.

Lot Numbers. The Lot numbers that are referenced in this Disclosure Addendum are the Lot numbers that appear on the subdivision map for the Community (the "**Subdivision Map**"). The legal Lot numbers may differ.

Model Homes.

Decorator Items. One or more but not all Homes to be offered for sale by Seller may be available for viewing by Buyer as a model home (each, a "**Model Home**"). These Model Homes show generally the configuration of certain Homes that may be constructed by Seller in the Community, but are not necessarily identical in construction or configuration to homes bearing the same model designation. The Model Homes may reflect typical or different exterior elevations, floor plans, workmanship and methods of construction, but may differ from the Home you purchase. Your Home will not be constructed to the precise specifications or design of any Model Home. The exterior elevations, architectural treatments, floor plans and colors shown on any master plans on display at the office of Seller may be different than those displayed in the models. Room dimensions, square footages, cabinetry and countertops in kitchens, bathrooms and laundry areas, etc., plumbing and electrical fixtures, door types, door hardware, shower walls, appliances, tile and floor covering, bathroom accessories (faucets, shower heads, etc.), window types, and electrical and cable outlet placement may also vary from Model Homes, the plans and/or your Home. By way of example, Model Homes may have window coverings which are not included in the purchase price of the Home. Seller's warranty and representation as to the similarity between the Home being purchased and a Model Home constructed by Seller is limited strictly to design and configuration (subject to variance in horizontal measurements permitted by construction tolerances (+/- 2%) and not to similarity of appearance dependent upon particular decorations, furnishings or landscaping, or the location of wall switches, electrical outlets, thermostats, chases, plumbing and similar items (which may vary from the Model Home). You should note that the Model Homes you may have seen have been professionally decorated and landscaped to present an attractive appearance to prospective buyers and will differ from the Home you are purchasing. Certain landscaping features may not be permitted under the Master Declaration. Variations in floor plan, paint schedules and landscaping are to be expected. Buyer should also be aware that model homes in other communities developed by Seller may contain features or have been constructed in a manner different from the Model Homes in this Community.

The Model Homes may show the types of features that could be incorporated into the Homes and may be helpful in providing purchasers with possible decorating ideas. Model Homes may display certain fixtures and furnishings, which MAY be identified as "Decorator Items". These are not available to purchasers even upon payment of an additional charge. In certain instances, decorator items may not be marked. Buyer should further be aware that window coverings are not included in the purchase price of a Home even though they may be installed in the Model Homes. Decorator items (such as furnishings, draperies, built-in shelves and lighting) and landscaping and hardscaping (such as entryways, lanais, and spas) are displayed only to suggest ideas to buyers. All such options and upgrades displayed in Model Homes (including, decorator items, landscaping and hardscaping) are not included in the purchase price for your Home unless expressly agreed to in writing by Seller. If Buyer has any questions regarding which items, such as light fixtures, may be purchased as an option or come with the Home, they should consult a Sales Representative and make sure the item in question is addressed in writing in the Sales Contract.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Materials and Construction. Buyer should be aware that homes in the Community are constructed and fabricated with various materials and may include steel and wood framing components. Wood framing components include such items as stud framing in certain locations, blocking, posts plates, beams and roof trusses, among others. Seller may substitute materials, fixtures, equipment and appliances of substantially equal quality as (a) those specified in the plans and specifications for Buyer's Home or models and/or (b) the standard items displayed in the Model Homes. As a result, Buyer's Home may be constructed completely of wood framing materials. Seller also reserves the right to change the location of electrical switches, gas meter, if applicable, and water meter, plumbing chases and outlets, windows, and the like and the right to make any changes in construction (e.g. plan changes, field changes or otherwise) which it deems appropriate, such as the substitution of wood and metal framing. Buyer understands that asphalt shingles are subject to cracking if walked on or struck by an object. In addition, Seller has

the right to make changes in construction and as may be required from time to time by any lender, government agency, or as may be required by any law or regulation, by labor, material or utility availability, shortages, or stoppages or by any emergencies. Buyer accepts all of these changes. Buyer understands and agrees that any available rebates in connection with the installation by Seller of ENERGY STAR or other energy-efficient appliances or devices, including photo-voltaic, solar and EV devices, in the Home or at the Community shall belong to Seller.

Construction Plans. Copies of construction plans for Buyer's Home are available for inspection prior to Closing. However, Buyer should be aware that the construction plans will not include field changes (changes made during construction, which occur regularly) nor the changes described above. As a result, construction plans will not reflect the as-built condition of the Home. Further, plans submitted to the County in connection with the building permits for the Community may refer to the name of the Community as "'Iliahi Phase 3 at Ho'opili".

Dimensions and Square Footages Are Estimates Only. Lot and Home dimensions and square footages are approximate. Buyer should be aware that any statement regarding the dimensions of rooms or square footages of Homes or other areas are approximates only. Buyer may not rely upon any written brochures and other sales documents or oral statements by Seller or Seller's agents regarding the exact square footage of Buyer's Lot and Home.

Homeowner's Manual/Orientation/Keys. At the time that Buyer signs the Sales Contract Buyer will receive Buyer's Homeowner's Manual. Please take time to review this manual completely. This manual should be brought to any meeting regarding option selections, Buyer's home orientation meeting and walk-through inspection of Buyer's new home. If Buyer has any questions please ask Buyer's sales representative. Seller will schedule an appointment with Buyer to conduct a home orientation tour of Buyer's new home prior to Closing. At that time Seller will review with Buyer the Homeowner's Manual and Seller's Limited Warranty. Buyer should advise Seller's warranty service representative of any concerns Buyer may have about Buyer's new home during the course of the home orientation tour. By doing so, delays in Closing may be avoided. Keys to Buyer's new home will be available after recording of the Deed. Buyer acknowledges that the Homeowner's Manual contains certain operating instructions and maintenance requirements and schedules for certain components of Buyer's Home, including, without limitation, information relating to mold and mildew. Buyer must review and comply with any and all operating instructions, maintenance requirements and schedules for Buyer's Home contained in such Homeowner's Manual.

Elevations and House Plans. In order to provide diversity for the street scene, Seller's architect may have produced more than one exterior elevation for the front, side and rear of each floor plan. Due to this and due to certain variations caused by construction techniques and methods, Buyer may notice size, scale and proportional interior and exterior changes from the Model Home or other Homes in the Community from Buyer's particular elevation. These may include such items as ceiling heights, sloped ceilings, veneer treatments, window locations, window types and sizes, gutter and downspouts, interior and exterior wall and roof lines, color schemes and front porch dimensions. It is the responsibility of Buyer to inspect the Property and consider the differences in the elevations and other features of Buyer's Home prior to Close of Escrow. Buyer acknowledges that Buyer has had the opportunity to review the floor plan and elevation and interior details for the Home Buyer is purchasing, all as shown on the building plans located in the sales office. Seller may alter, add or delete any house plans for homes to be constructed in the development.

Accessory Dwelling Units; One Dwelling Per Lot/Park Declaration. Only Certain home plan types at the Community and specific lots may be improved with an accessory dwelling unit, which is a second dwelling unit, including separate kitchen, bedroom and bathroom facilities, attached or detached from the primary dwelling unit on the Lot, as permitted by the County's Department of Planning and Permitting ("DPP"). Seller plans to construct or has constructed an accessory dwelling unit ("ADU unit") consisting of Sales Lots 1, 6 and 40, which will be evidenced by a Supplemental Declaration Permitting Accessory Dwelling Units on Specified Lots ('Iliahi Phase 2 at Ho'opili), as required and permitted under the Master Declaration. Seller may construct ADU units on various sales lots within any additional construction increment of 'Iliahi at Ho'opili in which event these sales lots will be covered by the foregoing declaration. Only the Lots specified in this Section and authorized by the foregoing Supplemental Declaration may be improved with an ADU unit. No other Lot in the Community may be so improved except with the express consent of the Declarant under the Master Declaration. Any Lot that includes an ADU unit will also be subject a special declaration of restrictive covenants (the "Supplemental Declaration re ADUs", and described collectively with the Master Declaration as the "Declarations") that prohibits the creation of a condominium on the Lot, restricts the rental of either of the ADU unit or primary dwelling unit on the Lot to a minimum six (6) month period, requires, except under situations of unforeseen hardship (confirmed by the director of DPP), that the Lot Owner or a person related to the Lot Owner or a person designated by Lot Owner (as approved by DPP) occupy either the ADU unit or the primary dwelling unit on the Lot if either one or the other dwelling units is rented to an unrelated party, and, among other matters, prohibits the use of the ADU unit as a bed and breakfast or transient vacation unit. A copy of the Supplemental Declaration re ADUs is available in the Community Documents. Each Buyer of a Lot containing an ADU unit

agrees to be bound by the Supplemental Declaration re ADUs. Lots with an ADU Unit may be charged a monthly base sewer charge for both dwelling units. Buyer may obtain additional information at https://www.honolulu.gov/rep/site/env/wwm_docs/Announcement_of_Rate_Increase_7-1-2016.pdf. Lots will also be subject to a Declaration of Restrictive Covenants Park Dedication – One Dwelling Per Lot. Seller reserves the right to record a Declaration of Restrictive Covenants Park Dedication – One Dwelling Per Lot on all lots within the Community prior to Closing. This Declaration will provide that the lot shall be used for only one single-family residential purposes unless it is one of lots identified in this Disclosure Addendum on which an ADU unit is to be constructed. The restrictions described in this Section will be noted as encumbrances affecting the Lot.

No Guarantee About Development. Seller does not make any representation that the Community will be developed as proposed. Seller reserves the right, at any time and without notice, to modify its development plan for the Community, including, but not limited to, changing the style, size, square footage, density, exterior elevations, color schemes, construction schedule and/or phasing of the homes in the Community. The Model Homes are displayed for illustrative purposes only and such display does not constitute a commitment to complete the development with the same or similar homes. Seller may also sell all or any of the Property in the development to another builder, who may change the house plans, square footage, elevations, features, materials or designs of the homes.

Buyer Information and As-Built Conditions. In connection with Buyer's purchase of a home in the Community, Seller may provide Buyer with sales literature, which may include such information as elevations, lot dimensions, set-backs, house orientation, driveway locations, utility structures, rear yard dimensions, easements, etc. This information is intended for general informational purposes. There may be discrepancies between this information which is provided to Buyer and the actual as-built conditions. If there are such discrepancies, the as-built conditions will control.

Additional Information About Buyer's Home.

1. **Front Doors**. Front doors will vary by elevation and floor plan. Standard doors included with the purchase of Buyer's Home will vary in style to suit different elevations. Certain door styles, such as distressed or antiqued for decorative accent, may differ in appearance from the doors installed on the Model Homes.

2. **Color Variations**.

Paint - Buyer should confirm with Buyer's sales representative what interior colors will be used in the Home. Regarding white walls, it must be remembered that there are many shades of white. Buyer should not assume that the Home will be painted any shade of white shown in the Model Homes. Model interior paint colors are chosen by the model decorators and are not necessarily what will be used in Buyer's Home. Buyer should also be aware that variations in wall texture and drywall taping may be more obvious where gloss, semi-gloss, and/or luster paint is used and may appear more obvious at different times of the day or night depending upon the lighting in Buyer's Home.

Grout –The elements of nature including, but not limited to, sun, temperature, food, or chemical reactions may, combined with the aging process, change the color of the grout in varying degrees from time to time. In the event of repairs or replacement of tile or grout in the future, the replacement grout and/or tile probably will not match the color of the original tile or tile grout.

Countertops - Samples are small select cuts from a slab; they do not exhibit all the characteristics of a design and therefore are not fully representative of what will be installed in your Home. Variations in the color, pattern, size, shape and shade are inherent and unique characteristics to be expected with this product. This does not affect the product performance in any manner. Certain colors are meant to be used as accents rather than a main work surface. Furthermore, the pattern may not always match at the seams and there may be variations between the deck surface and backsplash. These items are not covered by the warranties of Seller, the countertop fabricator, and the countertop manufacturer. Your countertop will not be replaced due to these variations.

3. **Fire Prevention.** Smoke detectors will be installed in Buyer's Home in accordance with County requirements. Smoke detectors must be maintained by Buyer and backup batteries replaced in accordance with manufacturer's recommendations provided to Buyer at the orientation. Emergency contact is not automatically made when a smoke alarm is sounding, so Buyer is charged with calling the proper emergency number upon the occurrence of an emergency.

4. **Driveways and Garages**. The shape and dimensions of the garages and driveways for the homes in the Community may not be standardized. Driveways may vary in size, shape, length and/or configuration from the model

driveways or from what is shown on any depiction of the Community. Any lot within the Community designated as a "Flag Lot" in connection with the subdivision of the Community is subject to Section 21-4.20(a) of the LUO, which requires that the access drive serve only the "Flag Lot" and have a minimum width of 12 feet. Some of the garages may require Buyer to maneuver a lengthy driveway to enter and exit the garages. Parking of vehicles in the garages may also require Buyer to maneuver a vehicle back and forth in order to enter the garage. There may be certain obstacles (i.e. pillars, Buyer's Home, fencing, improvements, etc.) that may make it difficult to maneuver a vehicle into and out of the driveway and garage. Seller is not responsible for any damage to any home, including Buyer's Home, landscaping, pillars, fencing or any other improvement incurred during Buyer's or Buyer's guests or visitors maneuvering of the driveway and/or parking of a vehicle in the garages. It may not be possible to maneuver certain types of vehicles on the driveways and into the garage. Not all garages will accommodate all vehicles (especially full size models and sport utility vehicles) due to the shape, size, configuration and location of the garages, garage doors, driveways and homes. Also, parking of the maximum number of cars for which a garage was designed may block or make it difficult to access any storage area (if any) in the garage or to the Home from the garage. Buyer acknowledges that it is Buyer's responsibility to determine whether the size and location of car spaces in the garage of the floor plan of the Home selected by Buyer are adequate and appropriate to park Buyer's vehicles. Buyer should also confirm where street parking is permitted. Please realize that in many instances the Board of Directors may limit parking on private streets and on streets dedicated to the County, the County may restrict parking on public streets.

5. **Drywall**. Some shadowing in Buyer's drywall may occur at different times of the day or night depending upon the lighting in Buyer's Home, especially on curved walls. Also, if gloss, semi-gloss, and/or luster paint is used on walls, the variations in drywall taping and wall textures (sometimes called "flashing" in the painting industry) may be visible and appear more obvious depending upon the time of day and lighting in Buyer's Home. These variations are within industry standard.

6. **Air Conditioning**. Seller will install as a standard item a ductless split air conditioning system(s) to serve the home. Buyer understands that the air conditioning condenser(s) may be located in a different area than shown in the models or on other plans or exhibits. The specific location of compressors at the Community may result in sound transmission that may affect Buyer's Home. Buyers should be sensitive to excessive noise and possible disturbance to neighbors. Buyers, not Seller, are responsible for the unit's quiet operation. Buyer understands that even with screening, air conditioning units may emit noise levels unacceptable to some people. Buyers agree to assume all risks of such noise emissions.

7. **Satellite Dishes**. Satellite dish antennas may be installed and used within the Community only to the extent permitted by law. Where possible, all components of the system should be concealed from public view and be placed on the side of the home not facing the adjacent road. The system should not be visible from the front yard of the Home. In instances where Buyer can demonstrate that installation on the rear of the Home would cause an unreasonable expense increase in the expense of installation, maintenance or use, or would prevent reception of acceptable signal quality, installation in a location where the satellite dish is visible from the Street may be appropriate. Submission of documents supporting Buyer's position that installation in a location visible from the Street is appropriate shall be made within thirty (30) days of installation. The Design Review Committee may retain its own expert to confirm that installation on the rear of the Home causes an unreasonable expense increase in the expense of installation, maintenance or use, or would prevent reception of acceptable signal quality. Such installation shall only be made in accordance with the Declarations, Ho'opili Design Guidelines, and any other recorded restrictions and governmental requirements. However, if installed Seller has provided no assurances or guarantees that any satellite dish or other antenna installed within the Community will remain unobstructed. Buyer should understand that antennae signals may become obstructed by the installation and maintenance of Improvements within and outside of the Community including homes, walls, fences, trees and other landscaping.

8. **Building Code Changes**. Periodically, governing agencies change building codes and other requirements; therefore, as construction proceeds, future homes may be constructed differently in order to meet these updated or revised regulations. Seller reserves the right to change elevations, designs, or other elements of the construction process at its sole discretion. Seller is not responsible for providing any certification Buyer may request or require concerning compliance of construction of the home with Building Codes or other requirements.

9. **Electrical Outlets in Garage**. The building code requires that electrical outlets in garages be provided with ground fault interrupter circuits. These circuits are not intended for use with any appliances, especially refrigerators, freezers and aquariums or on any service that an interruption of electrical power would cause a problem. Seller strongly recommends that Buyer not use garage circuits for appliances or for any service (such as freezers) that would be harmed by an interruption of electrical power. Seller cannot be held responsible for the contents of appliances which are damaged because of the ground fault interrupter switches shutting off power, nor can Seller be held responsible for damage to the appliance

units themselves. Please check with an electrician for further information.

10. **Fencing**. Buyer should be aware of what fencing or walls may be constructed surrounding Buyer's Home, if any, and the fences Buyer will be required to maintain. The exact size, type and location of Buyer's fence or wall will be determined at the time of fencing installation.

11. **Concrete Products**. Cracks will occur in any stucco, EFS, and plaster exterior. This is normal in all cementitious materials. Certain elevations incorporate a "smooth trowel" plaster finish. Buyer should be aware that this finish is particularly susceptible to cracking. Cracking does not affect the structural integrity of Buyer's Home and is part of the natural look of stucco and plaster. Poured on grade concrete is prone to a certain amount of cracking as it cures over time. Such cracks can be minimized by scoring, but they cannot be completely avoided.

12. **Dryer Vent System**. The dryer vent system in the homes has been installed pursuant to the design instructions of the manufacturer of the dryer being offered by Seller. If Buyer does not select the dryer being offered by Seller at the time of purchase (or installs a new dryer in the future), Buyer understands that the design of the dryer vent system may not conform to the dryer being installed by Buyer as each dryer manufacture has its own dryer vent system requirement. Prior to the installation of a dryer by Buyer, Buyer should review the manufacturer's dryer vent system requirements to verify that the dryer vent system installed in the Home conforms to the manufacturer's requirements.

13. **EV Use**. The Home's garage is "EV Ready" which means the Home's garage is provided with a junction box and 6/3 electrical cable to the breaker panel for the future installation of an electrical car charging station that may be installed by Buyer. The Breaker panel will have reserved slots to accommodate an additional 110V or 220V for future expansion.

14. **PV Ready.** The Home is "PV Ready" which means the Home is "pre-plumbed" for installation of a photovoltaic system ("**PV System**") post-closing by Buyer in that photovoltaic conduit that has been installed from the electric panel into the Home's attic. The PV System pre-plumbed improvements by Seller do not penetrate the insulation in the attic or the roof deck of the Home, but permit future re-routing by Buyer's PV System contractor. Seller provides no assurance that the installation of a PV System will be permitted under practices, regulations or rules adopted by Hawaiian Electric Company ("**HECO**"). Buyer should confirm with HECO whether such a system may be installed at the Home. Buyer acknowledges and agrees that Seller makes no warranty or representation concerning electrical expense savings a Buyer may obtain through the installation of a PV System, the efficiency of any solar energy (hot water and photovoltaic) system, which are dependent on a myriad of factors including, without limitation, system quality, weather, orientation to the sun, the size of the system capable of being installed on the roof of the Home, or the impact such installation may have on the integrity of the roof system. If Buyer elects to have such a system installed and the installation is authorized by HECO, Buyer must utilize a certified licensed photovoltaic system installer and should consult with the installer regarding the size and location of the PV System as the design of the roof or roof orientation may not be optimal for the PV System. Before commencing any installation effort, Buyer must secure any and all necessary permits required to allow such installation and obtain all necessary approvals of such activity in accordance with the Ho'opili Design Guidelines. Buyer should review the Ho'opili Design Guidelines closely and should provide a copy of the Ho'opili Design Guidelines to Buyer's photovoltaic contractor before installation of such a system.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE»

«INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Limited Warranty.

Generally. Seller will provide buyers with Seller's Limited Warranty (herein, sometimes, the "**Limited Warranty**") covering Buyer's new Home at Closing. Seller makes no warranty or guarantee, express or implied, except as specifically set forth in the Limited Warranty. A copy of the Limited Warranty is in Buyer's Homeowner's Manual ("Everything You Need to Know About Your New Home") Buyer will receive at the time of Buyer's purchase. The Limited Warranty describes Seller's repair and warranty obligations, the procedures for making a warranty claim and the procedures for the settlement of disputes.

Exclusions. In order for the Limited Warranty to be effective, common sense maintenance of Buyer's Home is required. Buyer should review the Limited Warranty to become familiar with specific exclusions. By way of example, the Limited Warranty does not cover non-structural cracking of the Home's drywall, foundation slab or non-structural variations from level in foundation slabs or upper story sub-floors. Standard construction techniques and the applicable design for the Home's drywall and foundation slab second story sub-floor may result in a degree of non-structural cracking or "spider" cracking in the drywall and slab and may result in modest variations from level in the

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE»

«INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

slab and sub-floor. Although certain foundation slabs will contain contraction joints to minimize cracking, such cracking is inherent in concrete construction. Variations from level on second floor sub-floors are filled and patched with an adhesive floor leveling agent. Further, in the case of concrete slabs, hard surface floor coverings (wood, marble and ceramic tile), where permitted, may also crack or reflect the effect of foundation slab cracking. There is no Limited Warranty coverage for these circumstances. To minimize this risk, Seller recommends that hard surface floors, where permitted, be installed over a "slip sheet" available through Buyer's flooring supplier. In conformance with home construction standards, the rafter tails will not be caulked unless there is a gap between the rafter tails and the fascia in excess of 1/8 of an inch. By signing the Sales Contract and this Disclosure Addendum, Buyer accepts these conditions with respect to the Home. Buyer should review the "Preconstruction Conference Confirmation Form" prior to the home orientation tour to become familiar with Seller's standards and specifications.

Options.

Generally. All option items are subject to adjustment in price and quality if such items become unavailable for reasons beyond Seller's control. Buyer will be required to make a deposit, which is **non-refundable**, on all selected option items. Seller reserves the right not to install any selected options until Buyer receives loan approval. Once option selections are completed, Buyer and Seller agree that the final purchase price is to be amended by execution of the Final Sales Price Addendum to include options.

Insulation. Where insulation is installed, Seller will install unfaced, friction-fit, flexible batt or blanket fiberglass insulation batt insulation with an R-value (or R-value equivalent) of R-19 is installed in the attic of the home during construction. Unfaced, friction fit, thermal batt insulation with an R-value (or R-value equivalent) of R-13 is installed in the exterior walls of living spaces and in any floor system between the garage and living spaces during the course of construction. No representations are or may be made that Buyers of homes in the 'Iliahi Phase 2 Community will save on household expenses as a result of any house insulation.

Utilities/Phones/Cable. Buyer needs to contact the electric, phone and cable companies. Seller takes no responsibility for cable or telephone installation. Buyer should notify Hawaiian Telcom, Inc. or Spectrum, as applicable, in advance to schedule installation on or after recordation. No early installation will be permitted. Buyer shall be responsible for initiating the commencement of any service from a utility company such as water, electricity, telephone and cable television (if available) upon or after the Closing Date. If Seller receives any bills for utilities that are attributable to the period after the Close of Escrow, Buyer shall reimburse Seller for such payments within ten (10) days after receipt of a statement from Seller. Seller is not affiliated with the cable company or with any other utility companies (i.e., water, gas electricity, telephone service, etc.), and has no control over the rates or the services furnished or the water pressure available at Buyer's Home. Seller does not make any representations as to when or if cable services will be available nor as to the quality of television reception or cable services. Seller has no control over timing of meter installation once final inspection has been performed. Seller also has no control over the location and placement of public utility structures and facilities. All locations of the utility structures and facilities are final, and Buyers shall not tamper, move or damage these structures and facilities. Buyer is to check with Buyer's sales representative to determine whether any utility structures or facilities are located within or in the vicinity of the Home Buyer is purchasing.

Real Property Taxes. The 2021-2022 annual Real Property Tax Rate of the land in the Community is $10.50 per $1,000.00 net taxable value of such land. As of October 1, 2020, the date of valuation used by the City and County for the 2021-2022 fiscal year (July 1, 2021 to June 30, 2022), the land comprising the Community was a portion of the land covered by TMK No. 9-1-186-052, 49.941 acres. The R-3.5 zoned portion of TMK No. 9-1-186-052 was classified Residential A for the 2021-2022 tax year as such land was vacant at the time of valuation and valued by the City and County at more than $1,000,000. The 2021-2022 annual Real Property Tax Rate for improved residential property classified Residential is $3.50 per $1,000.00 net taxable value of the property, and for improved residential property classified Residential A, $4.50 per $1,000.00 net taxable value of the property up to $1,000,000 and $10.50 per $1,000.00 net taxable value of the property in excess of $1,000,000.00. Please see the City and County of Honolulu Department of Budget and Fiscal Services Real Property Assessment Division's website at https://www.realpropertyhonolulu.com/ for general information regarding real property taxes and https://www.realpropertyhonolulu.com/media/1683/residential-a_17.pdf for specific information regarding the Residential A classification. Payments are due on February 20 and August 20 each year. At Closing, Buyer will be required to pay real property taxes for the full County fiscal year (July 1 – June 30) in which Closing occurs, prorated as between Buyer and Seller as of the Closing Date, given the Property has not yet been separately assessed by the County. Buyer may also be required to prepay real property taxes for future tax periods at Closing as may be required by Buyer's mortgage lender or otherwise, among other fees. Owner-occupants may be eligible for a home exemption that reduces the net taxable assessed value of the Property that is used in determining the property tax assessment for the Property. As an owner-occupant Buyer may make a claim for a homeowner exemption on or before September 30th

preceding the tax year for which the exemption is claimed. The basic home exemption is currently $100,000.00. Seller understands that for homeowners 65 years and older the home exemption will increase to $140,000, but Buyer should confirm that this increase exemption will be available following the date of Buyer's purchase. Currently, to qualify for the "senior" exemption, Buyer must be 65 years or older on or before June 30 preceding the tax year for which the exemption is claimed. These tax rates are approximate only. For further information and to confirm the actual rate, Buyer may contact the Real Property Tax Office at (808) 768-3799. If Buyer installs alternate energy improvements for the Home, such as a photovoltaic system, Buyer may be eligible for an alternate energy improvements exemption. The Claim for Exemption Alternate Energy Improvements (ROH Sec. 8-10.15) form is available at www.realpropertyhonolulu.com.

Schools and Related Matters. The Community is located in the Leeward School District. The Leeward District telephone number is (808) 692-8000. The schools for this Community are determined by the Department of Education and are subject to change. Although various elementary schools, a middle school and a high school are planned in Ho'opili, it will be a number of years before construction of those improvements by the Department of Education.

Refuse Collection. Buyer understands that in order to receive postal and trash services, mailboxes and trash containers may need to be located only in those areas designated for these purposes. Trash pickup in certain communities may be by private contractor.

Postal Service/Mailboxes. The United States Postal Service will not deliver mail to the Home (or to any other home in the Community). Mail will only be delivered to the designated cluster mailboxes, which may be limited to a single location within or in the vicinity of the Community. Seller expects that the cluster mailbox system for the Community will be located in the mini park/mail lot located in 'Iliahi Phase 1, pending the approval of the U.S. Post Office. The United States Postal Service requires that at least 50% of the homes and roads within the Community be built and may impose additional conditions before mail services will commence. Buyers will need to arrange for temporary mail service via either a general delivery service through the post office in the area or purchase a post office box at any post office until the requirements of the United States Postal Service, which are subject to change, are met by Seller.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Property Maintenance and Condition. All homes and the land within the Community, including the land below Buyer's Home, may have expansive soils, and, as a result, improvements, including the Home and the driveways, walkways and other improvements may be subject to various types of distress including subsidence, settlement or lifting. Further, the land within the Community has been graded. Soil has been removed and added to reach the land's finished height and form, and non-expansive fill has been placed under structural improvements, with underlain expansive soils. Please refer to the Soils Condition and Drainage Addendum for further disclosures and recommendations. The Property is subject to subsidence, settlement or expansion due to the presence of expansive soils and fill material. Except for limited soil borings, Seller has not investigated the soils below the limits of grading and as result soil below the limits of grading may contain items installed during periods of agricultural use, such as, without limitation, drainage, irrigation and sewer lines which have been abandoned in place. Buyer also acknowledges that standard construction techniques and applicable designs for the foundation slab may result in a degree of non-structural cracking or "spider" cracking within the slab and that certain slabs will contain crack control joints. Buyer accepts such slab cracking. Certain non-structural cracking or swelling of drywall joints at windows, doorways and other locations with the Home may also be visible, should subsidence, settlement or expansion occur. Buyers must be especially sensitive to landscape watering, avoid over watering and ponding of water, and must abide by the recommendations for maintenance set out in this Disclosure Addendum in order to minimize the risk of these occurrences. Landscaping is also important and will reduce the incidence of erosion attributable to wind or rain. Buyer understands and acknowledges that Buyer will be acquiring the Property in "AS IS" condition at the time of closing. Except as expressly set forth herein, Buyer is relying and will rely solely upon Buyer's own inspection and investigation of the Lot and the land of the Community, and is not relying and will not rely in any way upon any representations, statements, warranties, or other information or material furnished by Seller or its representatives, whether oral or written, express or implied. Buyer should also be aware that soils within the Community may be corrosive in nature.

Soil. The suitability of the soil contained within this Community for the planned construction was determined by Geolabs, Inc. A copy of the soils report for this Community is also available for review in the Sales Office.

Easements. Buyer is aware that there may be easements which affect the Community and Buyer's Property. These easements are noted in the Master Declaration, the exhibit to the Deed, the title report, the Subdivision Map and/or the plot plan for the Lot. Specifically, Lots on Maunakapu Street, Kamaliehope Street and Hono'uli'uli Street will be subject to landscape easements benefiting the Master Association. A subdivision monument or monuments and/or cluster mailbox

system may be included within this landscape easement area and may affect certain lots. There may also be landscape easement areas within the Community roads.

Drainage Facilities and Easements. Surface water drainage in the Community is directed to the streets servicing the Community utilizing certain surface drainage facilities, which may include lined and unlined ditches and swales, affecting various Lots in the Community. Buyer may not alter and must maintain the existing drainage pattern on any Lot, nor shall any Buyer modify any existing drainage facility located on Buyer's Property. Failure to maintain the existing drainage pattern or altering the scope of the drainage pattern on Buyer's Property may adversely affect Buyer's Home. Saturation of the ground or ponding around foundation slabs may result in expansion or lifting of soils beneath the slab and settlement when the ground dries. Gutters, downspouts (directing water), splash guards, lined swales and pipe conduits should be considered if not included in the purchase of the Home or purchased as an option by Buyer, if available. Buyer shall maintain the existing drainage pattern on Buyer's Property. Buyer of a Property on which any drainage ditch facility, concrete swale, or portion thereof is located shall be responsible, at Buyer's cost, for the maintenance, repair and cleaning, as required, of the drainage ditch facilities located on Buyer's Property. The scope and extent of swale facilities within drainage and flowage easements is reflected on the approved grading plans for the Community. Buyer understands and agrees that should a swale facility or any drainage or flowage easement be disturbed during construction of a Home, Seller may restore the swale in accordance with approved grading plans even after closing of the purchase or sale. This right is reserved to Seller in the Deed and Master Declaration. If Buyer removes, modifies or otherwise alters the established drainage patterns or devices on Buyer's Lot, Buyer may cause significant and permanent damage to Buyer's Home and/or other homes, including but not limited to, damage to the foundation of Buyer's Home or adjacent slopes. Buyer should take precautions by using licensed professionals (e.g., landscape architects, civil engineers, geotechnical engineers, general contractors, etc.) to assure that Improvements such as walkways, landscaping, lanais, decks, planters, etc. are constructed so as not to alter the established drainage of Buyer's Home. Seller shall not be responsible for any modifications or changes to the established drainage for the Lot.

Sewer and Drain Easement. Certain portions of the Community may be affected by an underground sewer and/or drain easement benefiting the Community and/or the County. The County shall be responsible for the maintenance of any underground drainage facilities located on a Property, which are constructed for the benefit of the County. Such easements may not be reflected in the plot plans for the Community. The facilities may be located within the Property and may not be shown on the plot plans.

Sidewalk and Gutter Areas; Street Trees. Buyers shall maintain and keep clean, passable and free from weeds, debris and overgrowth the sidewalk, planting strip, and gutter area adjacent to Buyer's Property. Prior to or following the conveyance of the Home, the Master Association and/or Seller may landscape and/or plant trees in the planting strip in the sidewalk along the roadway in the Community (the "**Planting Strip Area**"). Seller may plant trees in Buyer's yard when appropriate to satisfy City and County design standards. Under no circumstances may Buyer alter the Planting Strip Area without prior written consent of the Board of Directors of the Master Association, Seller, and the County. Without limitation of the foregoing, no landscaping or trees planted by Seller in the Planting Strip Area or trees planted in front yards shall be removed, changed or relocated without the prior written consent of the Board of Directors of the Master Association, Seller, and the County. Other than lawn grass that may be planted by Seller, installation of impervious surface material in the Planting Strip Area is strictly prohibited. Even though Buyer is prohibited from altering the Planting Strip Area, each Buyer shall be responsible for the proper maintenance and care (including irrigation) of the Planting Strip Area and the landscaping and trees located within the Planting Strip Area and in front yards. If Seller installs an irrigation system in the Planting Strip Area the irrigation system will be connected to the Home. Buyer should be aware that the County ordinance may have additional restrictions regarding the Planting Strip Area and the trees Seller planted in front yards to satisfy City and County design standards.

Planting Strip Watering Easement. The Master Association shall have the right, but not the obligation, to own and maintain a sprinkler system installed within each Planting Strip of each property along certain Community roads (and in any Roadway Landscape Easement Area defined in the Master Declaration) as provided in the Master Declaration together with an electrical timer installed within the Home or yard. If installed, Buyer shall be responsible for paying for the water and electricity used for the sprinkler system and must ensure that water and electricity are available at all times for maintenance and irrigation of Buyer's Planting Strip adjacent to the property.

Sight Distance/View Triangles. A "sight view triangle" may be required by the County on certain corner Lots in order to maintain clear views of traffic at certain intersections. The County limits the height of structures and landscaping within the sight view triangle. If not reflected on the plot plan for the Lot, Buyer will need to confirm with the County Planning Department whether a sight distance/view triangle affects the Lot and limits the landscaping or improvements Buyer may wish to make to the Lot.

Setback Area Easement. Buyer understands and agrees that Seller shall retain an easement over the setback areas of the Lot for the construction and placement of fences, walls and entry signs together with all attendant rights to construct, reconstruct, install, maintain, repair and replace, as appropriate, such structures (including walls, fences, entry signs and the like), facilities and appurtenances as Seller determines necessary, appropriate or expedient.

Electrical and Utility Easements. Utility boxes, transformers, utility lines (above ground and underground), manholes and other utility features, such as structural transformers, transformer and switching vaults are placed throughout the Community and may be located near Buyer's Lot and Home. Certain Lots are affected by landscape and above ground or underground electrical, telephone, gas (if any), and cable utility easements shown on the Subdivision Map for the Community. Buyer should inspect the Lot to confirm the location of these easements and facilities. The location of these facilities depicted on the Subdivision Map is preliminary in nature and these facilities may be sited as required without further notice to Buyers. Electrical and utilities easements run in favor of and will be granted to the electric company, telephone company, gas company, and/or the local cable television provider. Seller has the right to grant these easement areas even after Buyer occupies Buyer's Home.

Use of Easement Areas. Buyer may landscape an easement area(s) as long as Buyer does not interfere with the use of the easement area(s) affecting Buyer's Lot. The grantee of the easement area, whether it is the electric company, the telephone, gas and/or local cable companies, the Master Association, or an agency of the County, will have the right to trim and keep trimmed any plants within the easement area that may be in the way. Also, Buyer may not be permitted to construct other structures in the area depending on the nature of the easement. Such structures may require the grantee's approval. Additionally, should the grantee determine that it must remove any plants or foliage within the easement area, the grantee may NOT be obligated to replace them, but rather will only be obligated to restore the surface of the ground within the easement area as much as the grantee determines is reasonably possible.

Lots Affected by Easements. Buyer's sales agent will have a schedule of Lots affected by easements. Further, a special Easement Addendum to the Sales Contract will identify easements affecting a Buyer's Lot. Such easements will also be reflected in the plot plan for the Home and/or the Subdivision Map.

Digging Generally. Buyer should call 811 before digging anywhere on Buyer's Property to avoid damage to underground utilities. If any digging is contemplated, call the Hawaii One Call Center at 811 at least five (5) working days beforehand. Be sure to give the address and location of the cross street(s) nearest where digging is planned. The Hawaii One Call Center will, at no cost to Buyer, contact all local public utilities to tone, mark or identify the location of underground public utilities. Homeowners are asked to mark the area where excavating is planned in WHITE as the utilities are designated other colors to mark their facilities (yellow for gas, oil, steam, petroleum, or other hazardous liquid or gaseous materials; red for electric; orange for communications, cable TV, alarm or signal lines, cables or conduits; blue for water, irrigation, and slurry lines; purple for slurry and reclaimed water; green for sewers, drainage facilities or other drain lines; pink for temporary survey markings). Buyers are encouraged to visit http://callbeforeyoudig.org/hawaii/index.asp for additional details regarding the Hawaii One Call Center.

Natural Gas. Hawai'i Gas has installed a gas pipeline to a point of connection just within the boundary of the Property. The gas pipeline is terminated (i.e., capped) and does not extend beyond this point of connection into the Property, and Buyer must contact Hawai'i Gas as to whether the gas pipeline can be extended to the Home, which work, if possible, shall be at Buyer's sole election, responsibility and expense. Seller provides no assurance that the installation of additional natural gas pipeline(s) to the Home or interior of the Home will be permitted under practices, regulations or rules governing Hawai'i Gas or other natural gas service provider. Regardless, Buyer should always make sure there are no gas pipelines underground where any digging is planned. Digging or running heavy equipment can damage gas lines and striking a gas line may cause an explosion resulting in personal injury, property damage and/or death. Always have underground gas lines located before beginning any excavation activity, even when conducting minor excavation (e.g., to install a fence or sprinkler system). As discussed above, call 811 before digging and the Hawaii One Call Center will contact all local utilities to tone, mark or identify the location of underground utilities.

If a gas leak is suspected, immediately evacuate the area and contact Hawai`i Gas' emergency department at 808-526-0066 or, if the situation warrants, call 911. Common signs of a gas leak include: odor of rotten eggs; an unusual hissing or blowing noise from the ground or exposed gas; flames near exposed piping or coming from the ground; constant and localized blowing of dirt, dust or debris; rapid bubbling at the surface of a body of water such as a puddle; unusual brown, dying or dead vegetation in otherwise moist areas over or near pipeline areas as well as unusual soil movement.

Buyers are encouraged to visit http://hawaiigas.com/safety/ for additional information regarding gas safety.

Community Common Areas

Collective Maintenance Responsibility. Each Owner in the Community must share in the cost to maintain, repair and replace the Community common areas as described in the Master Declaration (the "**Community Common Areas**"). The Master Association may specifically assess the Community owners for the maintenance and repair of these areas.

Community Common Areas. The Community Common Areas include all of those items noted in the Master Declaration and may include, without limitation, the following:

Entrance Landscape and Sign Monument Easement which means and describes the sign monument and landscape features, if any, constructed in the landscape and/or signage easement shown on the Subdivision Map for the Community.

Landscaping Areas along and within the Community Roads and the landscaped areas within the Community as shown on the Subdivision Map.

Common Drainage Facilities which means and describes those facilities, if any, serving to control and direct the drainage of surface water within and the inlets into such facilities, as may be shown on the Subdivision Map.

Mailbox System(s) which means and includes any mail system serving the Community.

Pedestrian Access Lot(s) which means and describes the pedestrian access lot(s) shown on the Subdivision Map, if any, including any improvements, landscaping and irrigation system.

Access, Utility, and Drainage Easements which include those certain access and utility easements within the Community as shown on the Subdivision Map.

Road(s) which means and describes the roadways within and serving the Community. Road(s) will be included in the Community Common Areas if not dedicated to the County. These areas include the planting strip adjacent to the curb abutting the road travel surface, as well as the street trees located in the planting strips.

Ownership, Administration and Assessment. The Master Association shall own the Community Common Areas, once deeded to it and must accept the conveyance of the Common Areas from Seller. The Master Association shall be responsible for the management and administration of the Community Common Areas, and may charge the Community owners for the cost to maintain, repair and replace these common areas. The level of service of maintenance of Community Common Areas shall be determined by the Master Association's Board of Directors.

Improvements/Ho'opili Design Guidelines. As specified in the Master Declaration, and the Ho'opili Design Guidelines, ANY exterior improvements to a Home or landscaping of a Lot, painting of Buyer's Home and the construction of fences must comply with the Master Declaration and/or Ho'opili Design Guidelines, if any. The Ho'opili Design Guidelines require that all exterior metal, including gutters, flashing, sheet metal, and vents shall be finished to match or compliment the house/roof color. All vertical and hardscape improvements will need to be approved in writing by the Design Review Committee before the improvement is made. Buyers are responsible to review submittal requirements before design of improvements. Please note that DRC submittals must reflect mechanical screening material color and exterior metal finishes. Before constructing any improvements at the Property like walls or other structures, Buyers and Buyer's contractor must review the Property pins and the plot plan to make sure there are no discrepancies. If there is a discrepancy, please notify Warranty Service before any work is started so they can verify the placement for Buyer. The Property pins may have been moved during the course of surrounding or adjacent construction activities. Seller will not be responsible for any work done on the Property if they are not notified in writing of the discrepancy. Buyers are encouraged to read and review the Ho'opili Design Guidelines, as they will substantially affect Buyer's ability to improve Buyer's Lot. Buyers should note that the Ho'opili Design Guidelines are subject to further revision by the DRC. Before Buyer begins any grading, excavating, filling or constructing any improvements to Buyer's Home (e.g., pools, spas, planters, sidewalks, decks, lanais, lanai covers, landscaping, etc.), Buyer should engage the services of a qualified, licensed professional and Buyer should take necessary precautions in designing and installing such improvements to avoid damage to Buyer's Home and other improvements which may result from existing soils conditions. Buyer should also obtain a geology report prior to constructing a swimming

pool or spa. Too often a homeowner's contractor will utilize a standardized set of calculations and construction plans that are not specifically designed for pools and spas that are to be built at the top or toe of a slope or on expansive soils. These conditions require special design considerations. Please refer to the Soils Condition and Drainage Addendum for further disclosures and recommendations.

Fences and Walls. Various Lots in the Community may be sold with either a wooden, wrought iron, vinyl fencing, masonry walls or other type of fencing in place and constructed on the Lot. Pursuant to the Master Declaration, these fences and walls may not be removed and must be maintained and kept in good repair by the Lot owner. Certain Lots within the Community may also have a decorative planting area and/or masonry wall and sign monument identifying the Community. The Master Association shall be responsible for the maintenance of the referenced decorative planting areas, the wall and the project identification monument located on these Lots. If Buyer wishes to move a fence, Buyer must obtain the Master Association's approval as well as the approval of the adjoining Property owner. New fences will also require the approval of the Master Association and DRC and must comply with the County's rules and regulations.

Retaining Walls and Other Improvements. All improvements to the Property must be approved by the Design Review Committee. Due to the expansive soils at the Community, all structural improvement or new construction, such as lanais or room additions, must comply with the Ho'opili Design Guidelines. Those Guidelines require the installation of special foundations or structural fill under such improvements. Any such fence or wall or improvement shall be designed and constructed only in compliance with the Ho'opili Design Guidelines and the Master Declaration and shall in all instances conform in design and color (to the extent practicable) with existing fences and walls constructed by Declarant.

Landscaping.

Trees and Planting Strips. Trees may be planted in the front yards of various Lots and where they exist within the landscape easement fronting a Lot if they exist. Seller may also plant trees within the front yard of any Lot as may be required by the County. These trees may NOT be removed, replaced or relocated without the prior written consent of Seller and the County. Each Buyer shall be responsible for the proper maintenance and care of any and all trees planted on Buyer's Lot. The County or Seller may also plant trees in the planting area bordering the roadways in the Community, as required by the County and Seller may install an irrigation system in the Planting Strip Area or landscape easement area, which will be connected to the home. Buyers may not remove, replace, alter or relocate these trees or plantings. Buyer must maintain the grass planting areas and may not gravel or concrete over the planting strip area. Buyer should be aware that the automatic sprinkler system serving grass planting areas may run more often (perhaps three times a day) until the landscaping has been established which typically takes 60 to 90 days and, as a result, Buyer's expense for the water and electricity used for the sprinkler system may be higher during the grow in period. Customer Care should be contacted before reducing irrigation to the grass planting areas.

Community Disclosures.

Other Development within the Surrounding Area. Buyer understands that Seller does not control the development of the entire surrounding area and that current and future plans for the development and use of all or any part of the surrounding area are under the control of others, and may change at any time before or after Closing of Buyer's purchase of the Property without notice to Buyer. The surrounding community contains or may contain various commercial, residential, recreational and ancillary uses, industrial, including extensive commercial, retail, industrial, multi-family and single-family detached residential subdivision and rental communities. To date, Seller has conveyed vacant development parcels within Ho'opili to The Hawaiian Humane Society (5.473 acres; B-1 zoned; contemplated use - new West Oahu campus), Fred Lau Properties, LLC (1.806 acres; B-1 zoned; contemplated use - not yet determined), HBP Partners LLC (57.190 acres; IMX-1 zoned; contemplated use - industrial business park); The Queen's Medical Center (4.901 acres; BMX-3 zoned; contemplated use - ambulatory medicine center), Alaka'i Apartments I LP (11.311 acres; BMX-3 zoned; contemplated use - market and affordable rental apartments up to 80% of area median income), and The Mutual Housing Association of Hawai'i, Inc. (7.127 acres; A-2 zoning; contemplated use - affordable rental apartments up to 60% of area median income). Buyer hereby accepts the risk of any changes pertaining to the development and use of all or any part of the surrounding area, and agrees that Seller shall not have any responsibility to Buyer for such changes. Buyer further understands and acknowledges that any descriptions of planned amenities for the surrounding area, which may have been provided to Buyer by Seller or agents of Seller, are for general information purposes only and are subject to change or deletion at any time and from time to time. Seller makes no warranties or representations regarding the accuracy or completeness of any descriptions of such planned amenities, which may have been provided to Buyer, and no reliance may be placed thereon. Further, as much as thirty percent (30%) of the residential housing in the

surrounding area and within the Ho'opili Community has been or may in the future be developed in cooperation with the County's Department of Planning and Permitting or equivalent State or County agency (the "**Agency**") as affordable housing available only to buyers satisfying special median income limitations established by the Agency. Such homes may be sold and/or rented at prices below the market value of comparable homes as determined by the Agency, and may be subject to additional use, occupancy, and transfer/option restrictions.

Condition of Property. Buyer understands and hereby acknowledges that the land of the Community may have been used previously for agricultural and farming operations and in connection therewith, fertilizer and pesticides, among other things, may have been applied and used on the land of the Community or adjacent lands. Buyer also understands that the Property has been graded, soil removed and added to reach its finished height and form, and contains or may contain fill and/or expansive soils, and, as a result, may be subject to subsidence, settlement or expansion. Please refer to the Soils Condition and Drainage Addendum for further disclosures and recommendations. Buyer understands and acknowledges that, as previously stated, Buyer will be acquiring the land underlying the Lot in "AS IS" condition at the time of Closing. Except as expressly set forth herein, Buyer is relying and will rely solely upon Buyer's own inspection and investigation of the Property and the land of the Community, and is not relying and will not rely in any way upon any representations, statements, warranties, or other information or material furnished by Seller or its representatives, whether oral or written, express or implied. Seller makes or gives no warranty, express or implied, concerning the condition of the land. Without limiting the generality of the foregoing, Buyer assumes all risks associated with the condition of the Property, the nature of the soils making up the Property and of hazardous materials on, about, around, under, over or within the Community, including all risks of (a) any and all enforcement, clean up, or other governmental or regulatory actions instituted or threatened pursuant to any hazardous material laws affecting the Community, (b) all claims made or threatened by any third party against Buyer or the Community relating to damage, contribution, compensation, loss or injury resulting from any hazardous materials and (c) Buyer's discovery of any occurrence or condition on the land of the Community or any land adjoining or in the vicinity of the Community which might result in Buyer or the Property being made subject to restrictions on ownership, occupancy, transferability or use of the Property or the Community pursuant to any applicable hazardous materials laws. Furthermore, Buyer specifically waives and relinquishes any and all claims of whatsoever kind or nature based on the condition of the land or the use or presence of any hazardous materials on, about, around, under, over or within the Property, and from and after the date that Buyer acquires title to the Property, Buyer shall hold harmless and defend Seller and its members, managers, stockholders, successors and assigns, from and against all claims, demands, actions, lawsuits, proceedings, fines, penalties, damages, liabilities, judgments, awards, expenses and costs (including attorneys' fees and costs) which may arise out of or may directly or indirectly be attributable to the condition of the land, the soils thereon and therein, and the use, generation, manufacture, treatment, handling, refining, production, storage, release, discharge, disposal, or presence of any hazardous material on, about, around, over or within the Property. As used herein, the term "hazardous materials" includes, but is not limited to, any and all radioactive materials, asbestos, polychlorinated biphenyls ("**PCB's**"), chemicals which cause cancer or reproductive toxicity, pollutants, contaminants, hazardous wastes, toxic substances, and other hazardous substances or materials listed, described or defined in 40 CFR Para. 302, as amended from time to time. Buyer and Seller agree that the covenants and agreements contained in this paragraph shall survive the Closing of the sale of the Property and shall be binding upon and inure to the benefit of the parties and their respective heirs, personal representatives, successors and assigns.

Uses Within and Around the Community. Buyer understands, acknowledges, approves and agrees, as set forth here, and in certain instances in the Declaration(s) and Deed, that: (a) the land of the Community may have been used previously for commercial agricultural and farming operations and in connection therewith, fertilizer and pesticides, among other things, may have been applied and used upon the land of the Community or lands adjacent thereto; (b) noise levels in the Community may exceed noise level standards for residential-zoned areas promulgated by the State Department of Health, and that these noise levels may not be acceptable to some individuals; (c) the Community may be located near or adjacent to properties that are or were used for the growing, processing, production and harvesting of diversified agricultural products, including corn and other agricultural genetically modified organisms or "GMO" products or related uses and the development of alternative energy projects (the "**Agricultural Properties**") that may have a limited buffer area, if any, between the agricultural use and the Community, as well as a variety of commercial and industrial properties; (d) further development of mixed residential (multi-family, single family and affordable), commercial, industrial, recreational utilities facilities/substations and public projects (including without limitation roads, bus stops, railroad, parks, schools, preschools and day care centers) may be ongoing and may continue within the Community directly adjacent to Buyer's Home and within the Community in the vicinity of Buyer's Property for a considerable period of time after Buyer has occupied the Property; (e) there are or may be a variety of pets within the Community that may not be

acceptable to some individuals or may create a nuisance; (f) aboveground and underground radio transmission wires, high voltage electric lines and microwave telecommunications facilities and civil defense tower(s) are located within and around the Community, which lines purportedly may emit electric and magnetic fields; (g) certain lands within the Community may be irrigated with treated effluent, reclaimed water or other sources of non-potable water, and (h) the Property will be subjected to those other uses and circumstances described in this Disclosure Addendum (collectively, all the foregoing uses and circumstances set forth in this Section (Community Disclosures) are described as the "**Community Uses**"). Seller has the right, but not the obligation, to develop, market and sell as many affordable homes in the Community as Seller desires. Each Buyer hereby waives any and all claims arising out of the presence of affordable homes, or lack thereof, in the Community.

Surrounding Community Conditions and Uses. Each Lot in the Community may be periodically affected by certain environmental conditions due to historical, existing and prospective surrounding conditions and uses. The land of the Community was used previously for commercial agricultural and farming operations and in connection therewith, fertilizer and pesticides, among other things, may have been applied to and used upon the land of the Community or lands adjacent thereto. The Community is located near or adjacent to properties which are or may be used for agricultural, farming, animal husbandry or related uses. The Community will also include lots used for agricultural purposes. Further development, construction and sale of residential, commercial, recreational and public projects by Seller and others, which may include changes in use (due to zoning changes or other governmental authorization or otherwise), construction, grading, improvement and maintenance of adjacent and surrounding properties, including roadways, drainage facilities, sewage treatment facilities and the like is ongoing and may continue within the Community and within the vicinity of the Community for an indefinite period. Certain lands within the surrounding area and within the Community may be irrigated with treated effluent, reclaimed water or other sources of non-potable water. The land of the Community is subject to potential adverse soil conditions. Numerous schools and public parks may be built in Ho'opili, and the West Oahu campus of the University of Hawaii is just west of Ho'opili. All of these factors and uses may affect Buyer as a homeowner.

Commercial and community agricultural uses are planned in and integrated into Ho'opili. These uses will be supported by the Ho'opili Urban-Agriculture initiative. Lands within Ho'opili used for agricultural purposes will include, without limitation, land for commercial farming operations, shared and home gardens, community farms and gardens, civic farms, and urban gardens. The urban gardens are intended to feature edible landscaping throughout certain lots in Ho'opili, including lots within the 'Iliahi Phase 2 Community. Commercial agricultural uses are protected under the Hawai'i Right to Farm Act, Hawaii Revised Statutes, Chapter 165. Homes in the Community may be subject to occasional dust from field operations, pollutants, smoke and debris from agricultural activities or feral lands in proximity to the Community, such as fires, odor, noise, and other agricultural cultivation. Buyer shall provide subsequent notice to Buyer's lessees, tenants or assignees of these aforementioned farming operations and practices on adjacent or contiguous land and the protections of such uses afforded under the Hawaii Right to Farm Act.

The Community may also be affected by traffic, aircraft noise, and adverse effects from the Kalaeloa Community Development District and an expansion of military uses and associated adverse impacts may occur within Kalaeloa and Pearl Harbor, which is east of the Community. The Community may be affected by airport noise overflight from the Honolulu International Airport and is near an active airstrip in Kalaeloa. Roads adjacent to the Community, which are not under Seller's control may be widened or modified. Significant widening and highway improvements are planned for Farrington Highway which is adjacent to Ho'opili and the construction of intersections within Ho'opili near or around the Community, including Kulanihako'i Street, Ho'omohala Avenue and Kualaka'i Parkway, may also impact the Community as a result of noise, nuisances, annoyances, and other impacts associated with the construction, operation, and maintenance of such improvements. A central hub of the planned Honolulu rapid transit rail system including, but not limited to, a rail station within the Ho'opili Community, one rail station west of the Ho'opili Community, portions of the guideway, and possibly park-and-ride and/or bus transfer facilities, will be located in or adjacent to Ho'opili, and the operation of the rail system may result in noise and other impacts associated with the operation of trains and mass transit related uses. Parts of the Ho'opili Community will be subject to Transit Oriented Development regulations and neighborhood plans. An "Energy Easement Corridor" is adjacent to Farrington Highway which may contain jet and other petroleum based fuel underground transport lines as well as above ground and underground utility lines and electrical lines. The Community may be affected by surrounding operations effects created by or attributable to historical, existing, and prospective surrounding construction, including but not limited to construction of roads/intersections and walls/fences, development, agricultural, pasture, commercial and other non-residential uses and activities, which include, but are not limited to: (a) cane milling, burning, harvesting, tending, as well as fertilization and pest and weed control; or (b) cattle and other livestock grazing and pets that may be objectionable to residents; or (c) commute and off-hours (non-peak) traffic and

parking. Areas surrounding and mauka of the Community may include quarrying operations.

The Ho'opili Community is a mixed-use development and includes within it, homes, schools, pre-schools, churches, parks, walkways, bicycle paths, government offices, library(ies), day care centers, hospital, urgent care, medical and medical emergency facilities, homeless shelters or transitional shelters, cellular towers, commercial, retail and industrial areas and operations, recreational and related facilities and other features common to urban environments, including without limitation to, a Community wide system of bicycle and walking paths, aboveground and underground radio transmission wires and high voltage electric lines, which lines purportedly may emit electric and magnetic fields. Easements shall be retained over the Community for some or all of the foregoing described uses, including, specifically, easements permitting the commencement, continuation and resulting effects of the foregoing uses, and all activities incidental to such uses.

Further, Buyer is aware that there are numerous materials and components required to construct and used in and around Buyer's Home to which certain individuals may be allergic or especially sensitive. Some of these materials such as paint, wood preservative treatments, insulation materials, glues, mastic, caulk, carpet or the like may cause lingering odors to which people are sensitive. Also, due to the nature of community living, various noises or odors due to elevators, trash areas, storage sheds, plumbing, impact, including, without limitation, noises from adjacent neighbors and other circumstances may result to which a Buyer may be especially sensitive. Mold and mold spores are also present in the Community and may be present in Buyer's Home. Certain strains of mold may cause adverse health effects in susceptible persons.

The Home is sold subject to these conditions, hazards and risks. Buyer is aware of and understands these risks, accepts them and has decided that the benefits of home ownership in the Community outweigh the detriments of such ownership.

Other Environmental Issues. Mold and mold spores are present throughout our environment and residential home construction is not, and cannot be, designed to exclude mold spores. If the growing conditions are right, mold can grow in your Home. You may be familiar with mold growth in the form of bread mold, and mold that may grow on bathroom tile. All mold is not necessarily harmful, but certain strains of mold have been shown to have adverse health effects in susceptible persons. The most common effects are allergic reactions, including skin irritation, watery eyes, runny nose, coughing, sneezing, congestion, sore throat and headache. Individuals with suppressed immune systems may risk infections. Some experts contend that mold causes serious symptoms and diseases which may even be life threatening. However, experts disagree about the level of mold exposure that may cause health problems, and about the exact nature and extent of the health problems that may be caused by mold. The Center for Disease Control states that a causal link between the presence of toxic mold and serious health conditions has not been proven. Moisture is the only mold growth factor that can be controlled in a residential setting. The Homeowner's Manual contains recommendations for positive steps and action a Buyer may take following possession of the Home to reduce mold. Buyer agrees to assume responsibility for the recommendations contained in the Homeowner's Manual to act in accordance with the best practice guidelines contained on the Governmental Internet Sites described in the Manual. Buyer further acknowledges that if there is any water damage or water intrusion to Buyer's Home, Buyer will take immediate action to prevent conditions which cause mold or mildew to develop. Also, since energy conservation has become a concern, the State of Hawaii uniform building code, specifically the energy standards, has created the need to build Homes that are more airtight. As a result, these Homes trap unwanted gases in different degrees depending on how each person lives within their Home. To date, measurements of such unwanted gases (such as the radon gas described below) are reported as parts of the air they occupy. Since the quality of air we breathe can affect our health, Seller recommends frequent airing of Buyer's Home by simply opening your windows to introduce fresh air uncontaminated with such gases. The United States Environmental Protection Agency (the "**EPA**") has indicated that a number of homes in the United States experience elevated levels of radon gas. Radon is a naturally occurring gas that is caused by radioactive decay of the element radium. Since radium is contained in the earth's crust and dissolves readily in water, radon can be found virtually everywhere and can enter the home through a variety of sources. Buyers seeking information about radon can contact the EPA or a state environmental office. Seller has no expertise in the measurement or reduction of radon in homes or regarding acceptable levels or possible health hazards associated with radon. Seller makes no warranty or representation of any kind, express or implied, regarding the presence or absence of radon gas, or regarding the effectiveness of any architectural activities for reducing the presence of radon.

Non-Potable Water. The Board of Water Supply ("BWS") has required Seller to install separate irrigation water lines intended for non-potable water (the "R1 Water Lines") in connection with the irrigation of landscaping in Ho'opili. At some point in the future, the R1 Water Lines will carry treated effluent, reclaimed water or other sources

of non-potable water. Until then, the R1 Water Lines will carry potable water. The R1 Water Lines will be required to be switched over to non-potable water when directed by BWS in its sole discretion. BWS has not advised Seller of BWS's contemplated timing for the use of the R1 Water Lines for non-potable water. Once BWS determines to implement use of the R1 Water Lines for non-potable water BWS will coordinate the conversion of use with the Master Association. The conversion will require, among other things, installation of a new water meter(s) and signage, all at the expense of the Master Association. Buyer may obtain information regarding the requirements of the Recycled Water Program at http://health.hawaii.gov/wastewater/home/reuse/.

'Iliahi Phase 2 Community Features. In addition to the adjacent agricultural and other uses described in this Addendum, a future elementary school and future middle school are planned north of the site. Planned commercial and mixed use residential and commercial sites are planned throughout Hoʻopili and may be improved with one or more of a medical clinic, school, day care facility or other commercial or retail uses. Private community parks, County parks and community gardens, opened to all Ho'opili residents are situate in various locations in Hoʻopili. A community park may contain, among other things, a community center, swimming pool, manager's office and unit, pavilion and playground area, a portion or portions of which may be available for use for Community functions. Dogs may be permitted in the park. This community also contains a pedestrian access lot between sales lots 5 and 6. Hoʻopili contains a temporary detention basin and stockpile area that will be used for those purposes for an extended period before it is developed. Roadways serving 'Iliahi Phase 2 may contain temporary cul de sacs located within the Community that will be removed and the roadways extended when that area is developed in the future. Affordable rental developments are planned within Ho'opili. All of these factors and uses as well as other matters described in the Community Documents may affect Buyer's use and enjoyment of Buyer's Home. The Home is sold subject to these conditions, hazards and risks. Buyer is aware of and understands these risks, accepts them and has decided that the benefits of home ownership in the Community outweigh the detriments of such ownership.

Nuisances Related to Community Uses. Without in any manner limiting the foregoing, Buyer, in purchasing or otherwise taking title to any Property, does so with the express understanding and acknowledgment that the Community and the Property may be periodically affected by various hazards and by noise, dust, smoke, earthshock, soot, ash, odor, mold or mold spores, noxious vapors, the presence and/or transmission of pollutants or other hazardous materials, surface water runoff, or other adverse environmental conditions, including but not limited to those resulting from wind drift and other weather factors (collectively the "**Community Use Effects**") created or exacerbated by or attributable to the Community Uses and the historical, existing, and prospective surrounding construction, development, agricultural, pasture, residential, industrial and commercial and other non-residential uses and activities. Buyer specifically approves all of the foregoing uses, circumstances and activities, including changes in use due to zoning changes, other governmental authorization or otherwise (collectively the "**Community Operations**"). Buyer is strongly encouraged to inspect the Community and the various Community Operations to assess the impact of these operations, uses and circumstances on the Community and the Property. Buyer covenants and agrees, on behalf of Buyer and the tenants, lessees, family, servants, guests, invitees, licensees and employees of Buyer: (a) to assume and does hereby assume any and all risks associated with the Community Operations including specifically the presence of mold in the Home and the annoyances, inconveniences, impacts on property value or loss of the sale value, Community Use Effects and other nuisances thereby created; (b) to waive and does hereby expressly waive all rights to make any claim against and specifically releases Seller, the owners of the Agricultural Properties and any of their related entities, affiliates, successors-in-title, members, managers, stockholders, or assigns, arising out of or in connection with such activities, annoyances, inconveniences and nuisances, the clean-up or remediation of the same, including but not limited to (i) any claim for damages attributable thereto or for the design or the placement of improvements to the Community, the Property or the surrounding property, or any part thereof, or related or adjacent facilities, or to the orientation of the Home as it relates to exposure to sun or wind, or (ii) claims for the abatement or elimination thereof; and (c) to hold harmless and defend Seller and its affiliates, successors, members, managers, stockholders and assigns, from and against all claims, demands, actions, lawsuits, proceedings, fines, penalties, damages, liabilities, judgments, awards, expenses and costs (including attorneys' fees and costs) which may arise out of or may directly or indirectly be attributable to any and all of the foregoing.

Non-Disclosure of Neighbor's Plans. During the course of the purchase of a home, some buyers disclose information to Seller regarding the potential plans for homes, (e.g., landscape, hardscape, add-ons, repainting plans, etc.) and/or information about personal lifestyles (e.g., pets, interests, hobbies, etc.) Seller will not disclose such information to prospective neighbors. Should Buyer wish to obtain any information about Buyer's prospective neighbors, Seller will, upon Buyer's written request, attempt to place Buyer in contact with Buyer's prospective neighbors, but makes no warranty that Seller will be able to do so or that the information which Buyer may obtain will be accurate.

Adjoining Land Uses. Buyer may have received written disclosures which depict the current and proposed land uses for

the properties which adjoin the Community. Land uses are subject to change, and consequently, Seller cannot guarantee whether any information so disclosed is current. Also, land planning and zoning matters are complex and therefore the information which may have been supplied by Seller is not complete. If Buyer is concerned about the type of development that may occur on the adjoining properties, Buyer should discuss nearby land uses with the County Planning Department or the State of Hawaii departments or agencies involved, as may be the case, and otherwise conduct Buyer's own investigation of those matters. THE MARKET VALUE OF BUYER'S LOT IS NOT GUARANTEED BY SELLER AND MAY CHANGE DUE TO ADJOINING LAND USES BY OTHERS, INCLUDING WITHOUT LIMITATION THOSE USES BY THE STATE OF HAWAII AND/OR THE CITY AND COUNTY OF HONOLULU, ALL OF WHICH USES ARE NOT UNDER THE CONTROL OF SELLER.

Grading, Landscaping, and Building Materials. Development of the areas around the Community will cause dust in the Community during grading and landscaping work until adequate landscaping has been installed to minimize blowing dust. Seller will try to minimize the dust from its construction activities. Buyers understand, however, that Seller does not control all construction in the area and that dust is an inevitable result of the ongoing and surrounding construction. The grading of the soil and other elements created by nature, as well as building materials, many times create unwanted and undesired gases and other contaminates in residential and commercial buildings, both new and used.

Disposal of Toxic and Other Substances. Water that enters a storm drain flows directly to natural sources of water, including waterways, creeks, drains, rivers, lakes and that erosion has an impact on the environment. Unlike the water in the sewer system in the Lot which is being purchased by Buyer, which flows to wastewater treatment plants, water that enters a storm drain flows directly, without any treatment, to waterways, creeks, streams, rivers, lakes and/or oceans. Accordingly, the National Pollution Discharge Elimination System, the Regional Water Quality Control Board Orders covering the Community, and the policies and ordinances of the County prohibit discharging anything other than natural rain water into storm drainage systems, including gutters and streets which drain into storm drains. Toxic chemicals or hydrocarbon compounds such as gasoline, motor oil, antifreeze, solvents, paints, paint thinners, wood preservatives, fertilizers, lawn clippings, yard waste, detergents, pet waste, and other such materials and pollutants shall not be discharged into any street, public or private, gutters, or into storm drains or storm water conveyance systems. Buyer further acknowledges that the disposal of such pollutants and materials into a storm drain system may result in significant penalties and fines and that Buyer may be responsible for any activities by Buyer's contractors (e.g., painters, landscapers, etc.) who dispose of such pollutants from Buyer's Home or Lot into a storm drain system. Use and disposal of pesticides, fungicides, herbicides, insecticides, fertilizers, and other such chemicals shall meet all federal, state, and County requirements and requirements of any other governmental agencies having jurisdiction over the Property. All buyers within the Community are required to comply with such restrictions. Buyers are encouraged to consult with the County, other governmental authorities, and the refuse hauler in the area of the Community concerning the proper disposal of any toxic or hazardous materials. Dumping any such materials into sewers, gutters or storm drains is against the law.

Continued Construction. The construction of homes at the Community and other communities on nearby land will continue for some time. The roadways in and around the Community may be used for ingress and egress to the construction sites. The ongoing construction will cause dust, noise and increased traffic in and around the Community for a period of time. Due to these continuing activities, and notwithstanding dust and noise control measures employed by contractors, you may have to close windward facing windows in your Home during certain times of the day and may have to clean your Home more often. Certain persons may be more sensitive to these activities than others. Also, care must be taken around the construction sites, as hazardous conditions may exist temporarily due to the construction. You have decided to buy your Home knowing these facts and agree, as provided in your Sales Contract, that you will not hold Seller responsible for any damage, annoyance, inconvenience or nuisance you may experience as a result of the ongoing construction activity within the Community and surrounding areas.

Marketing Activity. Seller may continue to market homes in the Community for sale after you move into your Home. Seller may also use the Model Homes to market homes in other Communities. Seller's marketing activities may include operating a model home complex, displaying signs, balloons, flags, banners and conducting on-site events and other promotional activities. The ongoing marketing of homes may cause you some inconvenience and may disrupt your enjoyment of your Home.

Roads. Buyer is aware that the roads shown on the Subdivision Map may currently be private roadways that are proposed to be dedicated to the County as public roadways in the future. They are used at Buyer's risk. Roads surrounding the Community will be extended in the future to serve other developments within the Ho'opili community. Seller makes no representation or warranty regarding the availability of parking along the public streets which may change once the streets are dedicated to the County.

Flooding. Buyer acknowledges that Buyer's Home is not warranted against damage due to floods. Buyer is responsible to conduct Buyer's own investigation regarding the potential for floods.

Pest Control. It is in Buyer's best interest, as a new homeowner, to contact a local pest control company to arrange for a preventive maintenance program. Please refer to the limited warranty for termites. The specifics of the program that must be established in order to maintain the termite warranty coverage described in the limited warranty as set out in the Customer Care Program. In many locations, especially where there are adjacent open spaces or agricultural uses, rodent control is essential. Uncontrolled, rodents can damage water and electrical systems in the Home. Buyer fully understands that it is Buyer's responsibility, not Seller's responsibility, to control pests (insects, rodents and the like) in and around Buyer's Lot and Home.

Setbacks. The building setbacks required by the Master Association may be more restrictive in certain circumstances than County building setbacks. Buyers should carefully read the Master Declaration and the Ho'opili Design Guidelines for information about these matters and building restrictions within the Community.

Construction Claims. State statute limits how a Buyer may make a claim against a contractor. Before making an arbitration claim for defective construction against the contractor who designed, repaired or constructed Buyer's Home, Buyer must serve on the contractor a written notice of any alleged construction defect ninety days before filing an arbitration claim. The contractor has the opportunity to make an offer to repair and/or pay for the alleged defects. Buyer is not obligated to accept any offer made by the contractor. There are strict deadlines and procedures under the law and failure to follow them may negatively affect Buyer's ability to file an arbitration claim.

Mediation and Arbitration. Buyer understands that by purchasing a Home in the Community, Buyer agrees to resolve any disputes with Seller, the administrator and insurer under the Limited Warranty, the builder, the contractor or others concerning the Home or the Community by way of mediation and arbitration without resort to the courts.

Buyer Obligation to Investigate. Nothing contained herein is intended to be a complete disclosure of all facts, which Buyer may wish to consider in buying a Home in the Community. Buyer is still obligated to conduct Buyer's own full investigation of all facts relevant to deciding where and when to buy. Buyer is hereby advised to seek the advice of independent tax, legal, and financial consultants.

Disclosure to Subsequent Purchasers. When Buyer sells Buyer's Home, Buyer is required to provide to the subsequent purchaser(s) any documents provided in conjunction with the original sale of the house, including, but not limited to, information that Buyer has regarding the Home, the Community, and overall Community, the information set forth in this and any other disclosures provided by Seller to Buyer and any other information that may be of value to the subsequent purchaser(s), including, but not limited to, the Master Declaration.

Preferred Provider Agreements. Seller has entered into a Preferred Provider Agreement with Hawaiian Telcom Services Company, Inc. ("Hawaiian Telcom"), which provides Buyer with a discount on a variety of Hawaiian Telcom services, including set top boxes, wifi, TV, and high-speed internet for which Hawaiian Telcom will be afforded special marketing rights at Ho`opili. Seller also plans to have Hawaiian Telcom provide wifi for the community parks and community centers.

Membership in Master Association. By purchasing a Lot and Home in the Community Buyer automatically becomes a member of the Master Association. Generally, without limitation, the Master Association is responsible for, among other matters, the administration of the Community, design review and the general and routine maintenance and upkeep of the Community Common Areas, the entry monuments and any other common areas. As a member of the Master Association, Buyer is required to pay an initial assessment and pay regular and special assessments levied by the Master Association. The Master Association has the right to lien Buyer's Property for non-payment. The initial dues and budget for the Master Association have been compiled by Hawaiiana Management Company, a licensed property manager. These assessments are subject to change without notice to Buyer and are expected to increase annually at minimum in an amount equal to or greater than the increase in the consumer price index. Although the property manager makes every effort to estimate the actual cost of operation, certain budget items, especially insurance in today's insurance market, may change. Seller advises that costs and expenses of maintenance and operation of a residential community are difficult to estimate initially, and even if such charges have been accurately estimated, such charges will tend to increase in an inflationary economy and as the improvements age. Assessment charges can vary depending on the service desired by the owners. Buyer should examine the budget to see what services are included. Buyer should be aware that the estimates provided are of the date of the managing agent's certification and not reflect the actual charges that may be incurred upon the formation of the Master Association and the actual contracting for such services as maintenance, insurance, etc. In addition to the foregoing, each Owner must provide the Master Association with advance written notice of proposed title transfer of the Home, identifying

the escrow established to handling the sale. The Master Association may levy a transfer fee to maintain a record of the new owners of the Home. The transfer fee constitutes a special assessment in respect of such Lot being transferred and shall be deposited into the purchase and sales escrow and disbursed therefrom to the Master Association.

Ho'opili Electronic Participation Program. If established by Seller, Buyer will have the opportunity to participate in the Ho'opili Electronic Participation Program by entering into the Ho'opili Electronic Participation Agreement at Closing and committing to maintain that participation for at least four (4) years so long as Buyer is living at 'Iliahi Phase 2. The program requires Buyer to accept electronic communications from the Master Association and to establish automatic payment of Master Association assessments while owning a Home at 'Iliahi Phase 2. Buyer may participate in the Ho'opili Electronic Participation Program by signing the Ho'opili Electronic Participation Agreement at Closing. If such program is established, a copy of the Agreement will be available from Buyer's sales representative.

'Iliahi Subdistrict Assessment. No subdistrict association dues for 'Iliahi are currently planned, but may be assessed by the Master Association in respect of special features in the 'Iliahi community (such as cluster mailbox systems, pedestrian access lots and roadway landscape features) for which the Master Association has maintenance responsibility.

The term "Buyer" as and when used herein, or any pronouns used in place thereof, shall mean and include the singular or plural number, individuals, partnerships, trustees and corporations, and each respective heir, personal representative, successor and assign.

'ILIAHI PHASE 2 AT HO'OPILI
WARRANTY DEED AND RESERVATION OF RIGHTS

This 'Iliahi Phase 2 at Ho'opili Warranty Deed and Reservation of Rights (this **"Deed"**) is made this 27th day of September, 2021, by and between **D.R. HORTON HAWAII LLC**, a Delaware limited liability company, the address of which is 130 Merchant Street, Suite 112, Honolulu, Hawaii 96813 (hereinafter called **"Grantor"**), and **KERRIGAN EMILY MORGAN MCDONALD ORTEGA, single**, whose address is **4917 Mokupea Place, Apt. B, Ewa Beach, Hawaii 96706** (hereinafter collectively called **"Grantee"**);

WITNESSETH THAT

Grantor, in consideration of the sum of TEN DOLLARS ($10.00) and other good and valuable consideration paid by Grantee to Grantor, receipt of which is acknowledged, and of the promises and covenants of Grantee set forth in this Deed, which Grantee agrees to faithfully observe and perform, does hereby grant, bargain, sell and convey unto Grantee, as **tenant in severalty**, all that certain real property in the residential subdivision known as **"'Iliahi Phase 2 at Ho'opili"** (sometimes referred to herein as the **"Community"**) situate at Honouliuli, District of Ewa, City and County of Honolulu, State of Hawaii, more particularly described as Lot **6,** area **7,106** square feet, more or less, as shown on the subdivision map approved by the Department of Planning and Permitting of the City and County of Honolulu, on February 12, 2021 (2019/SUB-130), recorded in the Bureau of Conveyances of the State of Hawaii (**"Bureau"**), which real property is more particularly described in Exhibit A (the **"Lot"**), and the reversions, remainders, rents, issues and profits therein (such interest, together with the Lot and improvements

constructed on the Lot are described as the **"Property"**) and all of the estate, title and interest of Grantor, both at law and in equity, in and to the Property.

TOGETHER with all buildings, improvements, rights, easements, privileges and appurtenances on, to and running with the Property, including those with respect to use of private roadway facilities, if any, as may be set forth in Exhibit A, and the right of access from the Property to a public roadway, subject to the terms, conditions and reservations contained in this Deed and in Exhibit A.

SUBJECT, HOWEVER, TO the easements, restrictions, liens and other encumbrances on or affecting the Property as set forth in Exhibit A, and EXCEPTING AND RESERVING to Grantor, its successors and assigns, each of those easements, restrictions, reservations, covenants, liens, acknowledgments, and other encumbrances set forth in the Master Declaration of Covenants, Conditions, Restrictions and Easements for Ho'opili recorded in the Office of the Assistant Registrar of the Land Court of the State of Hawaii as Document No. T-9864231 (as amended, modified and/or supplemented, the **"Master Declaration"**, which Master Declaration shall in all respect control over this instrument), the exhibits attached to the Master Declaration, the Supplemental Declaration Permitting Accessory Dwelling Units on Specified Lots ('Iliahi Phase 2 at Ho'opili) recorded in the Bureau as Document No. A-77960064, this Deed, and the limited warranty (the **"Limited Warranty"**) delivered to Grantee by Grantor, all of which burden the Property and benefit Grantor.

FURTHER EXCEPTING AND RESERVING to Grantor, its successors and assigns, all easements of record described in Exhibit A and perpetual easements and rights of way over, across, under and through the Property conveyed by this Deed for all utilities (whether public or private or for the benefit it offers homeowners in the Community) including, but not limited to, water, drainage (including drainage channels, swales and ditches), sewer, gas, telephone, electricity, cable (including, without limitation, television cable), security systems, landscaping, irrigation, communication lines and systems and electromagnetic and optical transmission facilities and other similar service or public facilities purposes as Grantor in its discretion may designate, create, cancel or grant, whether or not the easements or rights of way are for the purpose of serving the Property hereby conveyed, including, without limitation, the right to enter upon the Property (even after recordation of this Deed), to construct, install, operate, maintain, repair, reconstruct, and relocate such lines, wires, circuits, conduits, cables, channels, pipes, swales, ditches, facilities and appurtenances for the indicated purposes and the right to grant such easements or rights of way to governmental agencies, public, quasi-public or private utility or service companies, other private entities, the association of homeowners, if any, or any other homeowner or group of homeowners in the Community or any adjacent community, without joinder or consent of, and without notice to, Grantee or Grantee's mortgagee. These reserved rights are to be exercised in a manner that will cause the least practicable interference with Grantee's occupancy of the Property.

GRANTOR FURTHER EXCEPTS AND RESERVES the benefits and burdens of the reciprocal appurtenant easements, for encroachment and maintenance purposes as between the Property and adjacent lots within the Community as set forth in the Master Declaration.

ALSO EXCEPTING AND RESERVING unto Grantor, its successors and assigns, as specified below without notice to or the consent or joinder of Grantee or Grantee's mortgagee, to create and record in the Bureau a File Plan covering the Community land which includes the Property, and to assign to the Lot a File Plan lot number, or to record an affidavit of a surveyor containing the metes and bounds for the Lot.

TO HAVE AND TO HOLD the same, together with all rights, easements, privileges and appurtenances thereunto belonging or appertaining or held and enjoyed therewith unto Grantee, absolutely and forever and in fee simple, according to the tenancy and estate set forth herein.

Grantor hereby covenants with Grantee that Grantor is lawfully seized in fee simple of the Property conveyed by this Deed; that the Property is free and clear of and from all encumbrances except as described in this Deed and in Exhibit A and except for the lien of real property taxes not yet by law required to be paid; that Grantor has good right and title to sell and convey the Property in the manner herein set forth; and Grantor will WARRANT AND DEFEND the same unto Grantee forever against the lawful claims and demands of all persons, except as mentioned in this Deed.

By acquiring ownership of the Property, Grantee acknowledges that Grantee has received, read and understood the Master Declaration and the Rules and Guidelines of the Design Review Committee (**"Design Guidelines"**) described in the Master Declaration and further acknowledges, agrees with and accepts the disclosures, conditions, covenants, easements and reservations of rights contained therein; and Grantee agrees to observe and perform all of the terms, covenants, conditions and provisions required to be observed and performed by an Owner under this Deed, the Master Declaration and the Design Guidelines, and any existing or future amendments, supplements and/or modifications thereto; and Grantee further covenants and agrees that Grantee, for itself and Grantee's family, lessees, tenants, servants, guests, invitees, licensees, employees, or other persons who may occupy or otherwise use the Property will abide by all of the applicable terms, covenants, conditions and provisions set forth in the Master Declaration, the Articles of Incorporation (defined in the Master Declaration), the Bylaws (defined in the Master Declaration), the Design Guidelines, the Limited Warranty, and any other duly adopted rules and regulations of the Master Association, hereinafter defined (collectively, the **"Community Documents"**). Grantee covenants to indemnify, hold harmless and defend Grantor for any failure to so comply with, observe and perform any such covenant, condition, restriction or other provision contained in the Community Documents.

Grantee acknowledges and agrees that the Community is within and a part of an area intended to be developed as a master planned community known as Ho'opili as described in the Master Declaration (**"Ho'opili"** or **"Ho'opili Community"**) and that the premises hereby conveyed and the Community are subject and subordinate to the terms and provisions of the Master Declaration, as it exists or may hereafter be amended, modified and/or supplemented. Without limitation of the matters set forth in the Master Declaration, the contents of which shall control over this Deed, the Master Declaration provides, among other things, for the establishment of the Ho'opili Community Association (hereinafter the **"Master Association"**), of which Grantee is a member, by virtue of the ownership of the Property. The Master Declaration further provides for the levy against the Property and the payment by Grantee of various regular and special assessments, and the right to lien the Lot for non-payment of assessments made by or on behalf of the Master Association.

Without limitation of the matters set forth in the Master Declaration, the contents of which shall control over this Deed, the Master Declaration and Limited Warranty, among other matters, provide that Grantee, for Grantee and for Grantee's family, lessees, tenants, servants, guests, invitees, licensees, employees, or other persons who may occupy or otherwise use the Community, the Property or improvements to the Community, acknowledges and agrees that the Master Declaration and Limited Warranty contain various reservations in favor of Grantor, "Declarant" under the Master Declaration, as well as disclosures, covenants, undertakings,

waivers of rights, disclaimers, limitations, requirements and restrictions, all of which are binding upon Grantee and all owners of property within the Community (and in the Ho'opili Community) and which include, but are not limited to: (a) specific limitations, restrictions, and requirements pertaining to the construction, installation, repair, modification, maintenance and/or appearance of improvements, access driveways, landscaping (which must be installed within a limited time period at Grantee's cost), private roadways and common driveways, if any, sewer, drain and electrical improvements and facilities, and boundary fences and walls, among others; (b) specific disclosures and disclaimers concerning the plans for the development and use of all or any part of the Community and/or Ho'opili, which may change at any time without notice to Grantee, and which may include but are not limited to the construction of residential and rental housing being developed in cooperation with the City and County of Honolulu's Department of Planning and Permitting or equivalent State agency as affordable housing available only for purchase or rental by home buyers or home renters satisfying specific median income limitations established by such agency or satisfying specific State or Federal income limitations; (c) specific provisions disclosing and authorizing continued extensive construction and sales activities within and around the Community, which may result in noise, dust, mold, vibration and other nuisances, disturbances, annoyances, hazards and effects, and providing for the acceptance by Grantee of any and all nuisance, irritation, annoyance, inconvenience and risk of damage attributable thereto, and further providing for the agreement by Grantee to suffer and permit all actions and consequences incidental to such ongoing construction and sales activities; (d) specific provisions detailing and disclosing various adverse environmental hazards, conditions or circumstances, including, without limitation, noise, dust, smoke, soot, ash, odor, noxious vapors, mold, surface water runoff, or other adverse environmental conditions described in the Master Declaration, which may affect the Community, the Property, and Grantee's use and enjoyment of the Property, and providing for Grantee's acceptance of the possibility of the occurrence of the same, assumption of the risk of such occurrence and damage attributable thereto, and the express waiver of all claims against Grantor and others arising out of or in connection with such adverse conditions or circumstances, including the right to seek damages or the abatement or elimination thereof; (e) specific provisions detailing and disclosing the potential impacts, including but not limited to traffic, aircraft noise, and the adverse effects from residential, commercial, agricultural, industrial and recreational uses within and surrounding the Community; (f) specific provisions detailing and disclosing the mixed residential and commercial uses within Ho'opili and the anticipated presence of schools, universities, churches, library(ies), day care centers, animal kennels and refuges, homeless shelters or transitional shelters, commercial and retail uses, possible future bus stop locations and facilities and bus routes (which are not in the control of Grantor), rail transit facilities, parks, walkways, bicycle paths, government offices, cellular towers, recreational and related facilities and other features common to urban environments, including, without limitation, a Community wide system of bicycle and walking paths and aboveground and underground radio transmission wires and high voltage electric lines, which lines purportedly may emit electric and magnetic fields; (g) specific provisions detailing and disclosing the potential impacts, including but not limited to traffic, noise and the adverse effects, resulting from the location of the Community near the West Oahu campus of the University of Hawaii, an electric substation adjacent to the Community along Kauluakoko Street and Kulanihako'i Street, which is anticipated to include, among other things and without limitation, 48kV and 12kV lines and related equipment, transformers, switchgear, switches and associated structures, bus conductors and connectors, lightning arresters and other associated pad mounted equipment, fencing with barbed wire, drive gates and main gates for security control, signage, lights and cameras, portions of the planned Honolulu rapid transit rail system and guideway, rail station(s), and park-and-ride and/or bus transfer facilities, an "Energy Easement Corridor" adjacent to Farrington Highway, which may contain jet and other petroleum based fuel underground transport lines, the potential widening of roads adjacent to the Community and the extension of roads within the Community to serve future development; (h) specific

provisions detailing and disclosing that the Property may have been previously used for commercial agricultural and farming operation, and in connection therewith, fertilizer and pesticides, among other things, may have been or will be applied and used upon the Property, or lands adjacent thereto and may have a long term effect on the Property, the water, and/or the environment; and (i) specific provisions reserving by or on behalf of Grantor, and/or others various rights and easements affecting the Community and the Property, and Grantor the right to make specific grants thereof without joinder by Grantee or Grantee's mortgagee.

Without limitation of the foregoing, Grantee acknowledges and agrees that commercial and community agricultural uses are planned in Ho'opili and will be supported by the Ho'opili "Urban-Agriculture" initiative, which will include without limitation, land for commercial farming operations, shared and home gardens, community farms and gardens, civic farms, and urban gardens. The urban gardens are intended to feature edible landscaping throughout certain lots in Ho'opili and specifically within lots within the 'Iliahi Phase 2 Community. Commercial agricultural uses are protected under the Hawai'i Right to Farm Act, Hawaii Revised Statutes, Chapter 165. Grantee further acknowledges and agrees that Grantee shall provide subsequent notice to Grantee's lessees, tenants or assignees of these aforementioned farming operations and practices on adjacent or contiguous land and the protections of such uses afforded under the Hawaii Right to Farm Act.

In furtherance of and without diminution of the foregoing, Grantee hereby further acknowledges and approves the obligations imposed on Grantee pursuant to the terms of this Deed, the Master Declaration, and the Community Documents and reservation by Grantor of each and all of the following rights and easements:

(a) Grantor, and its agents, employees, contractors, licensees, successors, mortgagees and assigns (collectively, the **"Grantor Parties"**), shall have an easement to conduct extensive sales activities on and at the Community, including the use of any improvements within the Community owned by Grantor (and any other home, with the express permission of the owner of such home) for model homes, sales and management offices, parking and extensive sales displays and activities, and the posting and maintenance of signs and other advertisements relating to such sales activities.

(b) Grantor and the Grantor Parties shall have an easement over, under and upon the Community, including the Property, as may be reasonably necessary for the completion of improvements to and correction of defects, as the term is defined in the Limited Warranty and any applicable termite warranty, and other warranty or "punchlist" items in the Community or the Property.

(c) Grantor and the Grantor Parties shall have an easement over, under and upon the Community and each and any portion of the Community including the Property and the individual homes to create and cause noise, dust, vibration and other nuisances or annoyances created by and resulting from any work connected with or incidental to the development, construction and sale of any home or other improvement to the Community, any additional phase to the Community, or any other community which Grantor, its successors or assigns, may develop on property adjacent to or in the vicinity of the Community. Grantee and any other person acquiring any interest in the Community waives any and all rights, claims or actions that might otherwise be asserted against Grantor or the Grantor Parties and their respective members and managers based on any such noise, dust, vibration and other nuisances or annoyances.

(d) Grantor and the Grantor Parties shall have an easement to enter upon, across, over, in and under any portion of the Community, including the Lot, for the purpose of changing, correcting, or otherwise modifying the grade or drainage channels of any portion of the Community so as to improve the drainage of water on the Community. Reasonable efforts shall be made to use this easement so as to disturb as little as possible the uses of Grantee, to undertake such drainage work promptly and expeditiously, and to restore any areas affected by such work to a sightly and usable condition as soon as reasonably possible following such work.

(e) There shall be reciprocal appurtenant easements of encroachment as between adjacent lots due to the unintentional placement or settling of shifting of the improvements constructed, reconstructed, or altered thereon (either initially by Grantor or subsequently by Grantee if in accordance with the terms of the Master Declaration) to a distance of not more than one (1) foot, as measured from any point on the common boundary between said adjacent lots, along a line perpendicular to such boundary at such point; provided, however, in no event shall an easement for encroachment exist if such encroachment occurred due to willful and knowing conduct on the part of Grantee. These easements shall be for the encroaching improvements and their maintenance (including access to and from the encroachment).

(f) Grantor reserves the right either to record an affidavit of a surveyor containing the metes and bounds description of the Lot or to file and to record a File Plan covering the residential subdivision lots above described, either of which actions are specifically authorized by Grantee and Grantee's mortgagee(s) without the joinder or consent of Grantee and/or Grantee's mortgagee(s). Grantee expressly acknowledges and agrees that Grantor may submit and record with the Bureau such affidavit describing the Lot or File Plan depicting the legal description of the Subdivision and all of the lots and easements therein, wherein references to lots and easements shall be consistent with such references in the Subdivision and that upon the approval and filing of the File Plan at the Bureau, the descriptions of, and references to, the Subdivision, and all lots (including the Property) and easements therein, as set forth in the File Plan shall replace and supersede the description of the Subdivision, and the lots (including the Property) and easements therein, set forth herein and in Exhibit A attached hereto.

(g) The Lot is bounded on one or two sides by a pedestrian path reflected on the Plot Plan for the Lot (the **"Pathway"**). Fencing within the Lot consisting of a vinyl privacy fence and aluminum picket fence (the **"Pathway Fence"**) separates the Lot from the Pathway and is reflected on the Plot Plan for the Lot. Grantee is responsible for maintenance, upkeep and repair of all elements of the Pathway Fence, including the side of the Pathway Fence facing the Pathway, as required under the Master Declaration and may not alter the Pathway Fence without approval from the Master Association Design Review Committee. In the event Grantee fails to maintain, keep up, repair or replace as necessary the Pathway Fence, this obligation may be performed by the Master Association at Grantee's expense.

Due to the topography and site conditions of the Lot, the fence and landscaping installed by Grantor on the Lot may differ from the location shown on the plot plan for the Lot provided to Grantee and the fence may be located outside of the landscape easement area located on the Lot. Grantee acknowledges and agrees that Grantor and the Master Association shall have the right to maintain and access the landscape easement area and any area between the landscaping easement and the fence installed by Grantor on the Lot. Grantee acknowledges and agrees that Grantee is responsible for the maintenance of the landscaping inside of the fencing located on the Lot and the maintenance, repair and, when required, replacement of the fencing in accordance with the Community Documents.

By acquiring ownership of the Lot, Grantee hereby further covenants and agrees, for the benefit of Grantor and its successors and assigns, as follows:

(1) The foundation systems for the buildings have been designed in accordance with the recommendations of geotechnical and structural engineers to meet the requirements of the soil and structural conditions and those of local public agencies. The foundation type employed is generally a post-tensioned waffle-mat style slab and may include perimeter walls. Grantee is aware that any alteration to the foundation system (or cutting into the foundation) made in order to install or modify landscaping or to alter gutters, porches, porch materials, or decks for any reason or purpose may adversely affect the foundation system and/or moisture or vapor barriers, is very hazardous and may result in serious damage to the improvements to the Property, personal injury, or both. Grantee agrees that (a) Grantee shall not cut into or otherwise tamper with the post-tensioned waffle-mat style slab; (b) Grantee shall not permit or allow any other person to cut into or tamper with the foundation system; (c) Grantee shall disclose the existence of the foundation system to any person who rents, leases or purchases the Property; and (d) Grantee shall indemnify, defend and hold Grantor and Grantor's agents, free and harmless from and against any and all claims, damages, losses or other liability (including attorneys' fees and costs of court) arising from any breach of this covenant by Grantee.

(2) Some of the soils within the Community, including the land below the Lot may have expansive characteristics, which will require special consideration and attention. Specifically, Grantee understands that the Lot has been graded in connection with the construction of improvements on the Lot and that excavated or fill material has been overlaid on the Lot in order to create the "pad" or foundation area for the improvements to the Lot. Grantee understands that it should exercise reasonable care to ensure that the non-expansive fill underlying the foundation is not disturbed and that proper drainage away from the home is maintained. Grantee understands and agrees that Grantor bears no responsibility for the manner in which Grantee irrigates the Property and the effect of such irrigation on the soils condition. Grantee shall not change the existing drainage pattern on the Property, and any modifications made to the grading or drainage pattern on the Property, and any modifications made by Grantee to the grading or drainage contours/swales/flowlines of surfaces or subsurface drainage systems, if any, installed by Grantor are made by Grantee at Grantee's own risk. Because any changes made to the grade or contour of the Property may alter the drainage flow and cause damage to other improvements within the Community and/or Ho'opili, Grantee must be sure to properly landscape so water is directed away from the home. Grantee must (a) ensure that any construction or alteration of patios, walkways, wall or planters or installation of landscaping or other improvements on the Property shall not alter or block the current surface or subsurface drainage systems installed by Grantor and (b) install and maintain appropriate additional drainage and/or gutter systems to accommodate such alterations and improvements. Regular inspection and maintenance must be performed to keep all drainage devices free from dirt, debris and obstructions.

Grantee acknowledges and agrees that, except for the express written limited warranty described herein as the Limited Warranty, a copy of which is included in Grantor's homeowner manual (the **"Homeowner's Manual"**) a copy of which has been provided to Grantee, and any applicable termite warranty, Grantor is not making or offering any warranties, express or implied, with respect to the Property or the Community, including, without limitation, any warranties of merchantability, habitability, quality of construction, or fitness for a particular purpose. Grantor expressly disclaims any warranties other than the Limited Warranty, and any applicable termite warranty, including, without limitation, any express or implied warranties of merchantability, habitability, quality of construction, or fitness for a particular purpose with respect to the Property or the Community. Grantee acknowledges and agrees that: (i) Grantee has received, read and

understands the terms of the Limited Warranty, any applicable termite warranty, and the Homeowner's Manual and is familiar with the coverage and exclusions contained therein, (ii) Grantee shall abide by all the applicable terms, covenants, conditions and provisions of the Limited Warranty, any applicable termite warranty, and Homeowner's Manual, and (iii) other than the Limited Warranty, and any applicable termite warranty, Grantor is making no other representations, promises, or warranties of any kind, including, without limitation, any express or implied warranties of merchantability, habitability, quality of construction, or fitness for a particular purpose with respect to the Property, or the Community. Grantor has established a customer care program (which will be administered by Grantor pursuant to the section in the Homeowner Manual commonly referred to as the "Customer Care Program" (the **"Customer Care Program"**)). The Limited Warranty, any applicable termite warranty, and the Customer Care Program do not cover and Grantee acknowledges and agrees that the Limited Warranty, any applicable termite warranty, and the Customer Care Program do not cover (i) any consequential damages, including, but not limited to, damage to the Property or the Community that is caused by a warranted defect (as defined in the Limited Warranty) but is not itself a warranted defect and/or any claims for emotional distress, lost opportunity, profit or time (from Grantee's employment or otherwise), loss of use of the Property or any other improvements in the Community, the costs of shelter, transportation, food, moving, storage or other incidental expenses related to relocation during repairs of the Property, or (ii) any appliance, equipment, or other items which are "consumer products" for purposes of the Magnuson-Moss Warranty Act, 15 U.S.C. § 2301, et seq., or which are "consumer goods". The only warranties of such consumer products or goods are those which the manufacturer provides to the purchaser. Information as to such manufacturer's warranties will be provided to Grantee. Grantor does not assume any obligation to service or repair such consumer products or goods. They are included on an "AS IS" basis with Grantee assuming the entire cost of all necessary service, repair, or replacement in the event of defect in quality or performance. With respect to appliances or other consumer products included in Grantee's purchase of the Property hereby conveyed, this Deed operates as an assignment from Grantor to Grantee of all manufacturer's or dealer's warranties, if any, covering any such appliances or consumer products for the unexpired term thereof to the extent that Grantor has the right and power to make such an assignment. Grantee acknowledges and understands that Grantor is not stating that any such warranties exist, or that such an assignment will be effective, nor is Grantor adopting any such manufacturer's or dealer's warranties or acting as a co-warrantor, but Grantor is merely attempting to pass through to Grantee the benefits of such warranties, if any exist. Grantee specifically agrees that during the term of the limited warranty afforded by Grantor to Grantee under the terms of the Limited Warranty, and any applicable termite warranty, Grantee shall in each and all instances permit Grantor or Grantor's designated representative and/or the administrator of or insurer under the Limited Warranty and any applicable termite warranty, or their respective representative to repair any and all items classified by Grantor or the administrator as items covered by the Limited Warranty and any applicable termite warranty or provide such alternate coverage in respect of warranted items available thereunder, and that Grantee shall have no further rights and Grantor no further obligation to Grantee in respect of such matters repaired or administered as provided therein.

Without limitation of any other provision herein contained, Grantor hereby grants Grantee a non-exclusive right of entry for access purposes over, upon and across the roadway lots (the **"Roadway Lots"**) more specifically described in Exhibit A attached to this Deed owned by Grantor and others; provided, however, that such right of entry shall automatically terminate upon dedication of the Roadway Lots to any governmental authority. Grantee, for Grantee, its successors and assigns, and Grantee's family, lessees, tenants, servants, guests, invitees, licensees, employees, or other persons who may occupy or otherwise use the Property or improvements to the Property, acknowledges, covenants and agrees that (a) Grantor may

continue to use the Roadway Lots for construction and sales activities within the Community, which may from time to time result in noise, vibration and other hazards and inconveniences to Grantee; (b) Grantee shall use the Roadway Lots with due care for public and private safety and shall comply with all laws, statutes, ordinances, and all rules and regulations of Grantor while occupying or using the Roadways Lots; (c) Grantee will not interfere with any work being performed, operations being carried out, or use being engaged in on the Roadways Lots by, on behalf of, or authorized by Grantor; (d) Grantor shall have no liability or obligation of any nature to Grantee, Grantee's family or household members, or Grantee's guests as a result of such persons' entry upon or use of the Roadway Lots or other property owned or controlled by Grantor; and (e) Grantee shall indemnify and hold harmless Grantor and its affiliates, members, managers, officers, directors, representatives, employees and agents, from and against any and all loss, damage, costs, expenses, including attorneys' fees, liability, demands, or causes of action resulting from nuisance, injury, harm or death to persons or property arising out of or in any way connected with the right of entry granted by Grantor pending dedication as described above, except any loss or damage caused by the gross negligence or willful misconduct of Grantor; and (d) Grantee fully realizes and assumes all risks of using the Roadway Lots prior to dedication of the Roadway Lots as described above, including, but not limited to, the dangers associated with construction equipment and workers on or near the Roadway Lots, the dangers resulting from the condition of the Roadway Lots, and the dangers of collision with other vehicles and pedestrians using the Roadway Lots.

Without limiting the generality of the foregoing, Grantee hereby specifically acknowledges and agrees to all of the reservations of rights and easements as set forth and described in the Master Declaration in favor of Grantor and Grantor's successors and assigns as "Declarant". By acceptance of this Deed, Grantee hereby consents and agrees to and with Grantor that in order to effectuate the rights and easements reserved to Grantor as aforesaid, Grantor and/or Grantor's assignee shall also have the right to prepare, execute, file, process and record necessary and appropriate papers and documents to establish and grant easements and to make necessary and appropriate amendments of the Community Documents, all without further notice to Grantee or Grantee's mortgagee. By such acceptance, Grantee also agrees to execute all documents and to do all other things as may be necessary or convenient to effect the same; and such acceptance shall be deemed an appointment of Grantor and/or Grantor's assignee, with full right of substitution, as the attorneys-in-fact of Grantee (and any mortgagee of Grantee) to execute such documents and to do such things on Grantee's (or Grantee's mortgagee's) behalf, which grant of such power, being coupled with an interest, is irrevocable for the term of Grantor's reserved rights and shall not be affected by the disability of Grantee.

Grantee, on behalf of Grantee and Grantee's successors and assigns, agrees that in the event Grantee or any other person with an interest in the Community or the Property shall have any claim or cause of action arising out of or in any way related to this Deed, except as specifically provided above, the Master Declaration (and any and all rules, regulations and supplemental declarations promulgated pursuant to the foregoing, and the enforcement thereof), any aspect of the Property, the Community, Ho'opili, the development, construction, quality, sales, marketing, disclosures concerning, financing, delivery of the Property or Community or improvements thereto, the Limited Warranty, any applicable termite warranty, or each of those items identified in the Limited Warranty, all of which are incorporated herein by this reference, Grantor's Customer Care Program, and/or any other aspect of or activity with respect to Ho'opili, the Community or the Property (herein collectively the **"Covered Matters"**), against Grantor and/or any of the Covered Parties defined in the Master Declaration, such claim or cause of action (a **"Dispute"**) whether such dispute is based on contract, tort, or statute, including, without limitation, any dispute described in the Master Declaration, whether such Dispute arises before or after the

recording of this Deed, shall be resolved by binding arbitration in accordance with the Federal Arbitration Act (9 U.S.C. §1, et seq.) now in effect and as the same may from time to time be amended, to the exclusion of any different or inconsistent state or local law, ordinance, regulation, or judicial rule, by and pursuant to the rules of Dispute Prevention and Resolution, Inc. (**"DPR"**) in effect at the time of the initiation of the arbitration (sometimes the **"Arbitration"** or **"arbitration"**) after it shall have first been submitted to the process of "Negotiation" and "Mediation" defined in the Master Declaration, and not by a court of law; provided, however, any and all Disputes relating to Unresolved Warranty Issues (as the same is or may be defined in the Limited Warranty) shall be resolved by mediation and arbitration in the manner specified in the Limited Warranty, utilizing the mediator and arbitrator selected under the provisions of the Limited Warranty; provided further that in the event of an arbitration of a Dispute relating to an Unresolved Warranty Issue under the terms of the Limited Warranty, the provisions of the Master Declaration shall apply only to the extent not in conflict with the Limited Warranty. Any such claim or cause of action shall be subject to arbitration regardless of whether the claim is against Grantor or the **"Covered Parties"**, defined in the Master Declaration, which include, without limitation, Grantor's real estate broker, agent or attorney, the architects, engineers, or other design consultants for the Community, the contractor, subcontractors, sub-subcontractors, material suppliers or other persons involved with the Community, their officers, directors, agents, servants, employees or representatives, the managing agent, if any, and their respective officers, directors, agents, servants, employees or representatives , provided that such person(s) agrees to or has agreed to arbitrate such disputes; or if such claim or cause of action is filed jointly and severally against other parties, it shall be subject to arbitration whether or not such other parties are willing to submit to arbitration as provided in this Deed. Any arbitration shall be conducted in the County in which the Property is located, and notwithstanding anything to the contrary contained in the Limited Warranty, any such Arbitration shall be conducted at the office of the arbitrator. No punitive damages shall be awarded in any claim against Grantor or any other Covered Parties; provided however in the event such limitation is determined to be invalid or unenforceable then such limitation shall be severed and this Deed shall be construed as if such limitation were omitted and shall not affect the other provisions hereof. The arbitrator may not award attorneys' fees or costs (including expert costs) to the prevailing party. Further, no award for damages attributable to emotional distress or a multiple of actual damages based upon any theory of law may be awarded by the arbitrator in any claim against Grantor or any of the other Covered Parties. The award rendered by the arbitrator shall be final.

Grantor and Grantee mutually agree that this instrument may be executed in counterparts, each of which shall be deemed an original, and said counterparts shall together constitute one and the same agreement, binding all of the parties hereto, notwithstanding all of the parties are not signatory to the original or the same counterparts. For all purposes, including, without limitation, recordation, filing and delivery of this instrument, duplicate unexecuted and unacknowledged pages of the counterparts may be discarded and the remaining pages assembled as one document.

Grantor and Grantee mutually agree that the terms "Grantor" and "Grantee" as used in this Deed, or any pronouns used in place of such terms shall include the masculine, feminine or neuter gender, the singular or plural number, individuals or corporations, and each of their respective heirs, devisees, personal representatives, members, managers, successors, successors in trust and assigns, according to the context of such terms. If this Deed is signed by two (2) or more persons or parties as Grantee, all covenants of Grantee contained in this Deed shall be deemed joint and several. Each and every acknowledgment, acceptance, appointment, agreement and covenant of Grantee contained in this Deed shall run with the Property hereby conveyed and constitute an equitable servitude and lien on the Property, and each person or party

hereafter acquiring from Grantee any interest in the Property shall be deemed to make such acknowledgments, acceptances, appointments, agreements and covenants by and upon such acquisition.

[THE REMAINDER OF THIS PAGE IS INTENTIONALLY LEFT BLANK]

IN WITNESS WHEREOF, Grantor and Grantee have executed this Deed as of the day and year first above written.

EXHIBIT A

All of that certain parcel of land situate, lying and being at Honoliuli, District of Ewa, city and County of Honolulu, State of Hawaii, **Lot 6**, being **7,106 square feet**, more or less, (the "**Lot**"), of the subdivision of Lot 53000, as shown on map approved by the Department of Planning and Permitting, City and County of Honolulu, Subdivision File No. 2019/SUB-130, on February 12, 2021, as described in Declaration of Subdivision (Ho'opili Phase 10A, Parcel 105 - 'Iliahi Phase 2 Subdivision) (DPP File No. 2019/SUB-130), dated March 5, 2021, recorded as Document No. A-77410005 (the listed lots being a portion of deregistered Lot 20159, as shown on Map 1698 of Land Court Application No. 1069 of the Trustees under the Will and of the Estate of James Campbell, deceased ("**LCA 1069**"), having been deregistered and recorded in the Bureau of Conveyances of the State of Hawaii as Document No. A-72410580).

Together with easements for water purposes in, on, over and under the easement areas granted by and described in GRANT OF EASEMENTS (WATERLINE) dated September 5, 2006, filed as Land Court Document No. 3485394, recorded as Document No. 2006-173177, subject to the terms and provisions contained therein.

Together also with access over internal subdivision roadway Lot 42, as shown on Map approved by the Department of Planning and Permitting, City and County of Honolulu, Subdivision File No. 2019/SUB-130, on February 12, 2021; with access over Lots 53003, 53004 and 53005 as shown on Subdivision Map 2019/SUB-122; Easement 11126, as shown on Map 1665 of LCA 1069; Lots 20132, 20133 and 20129, as shown on Map 1684 of LCA 1069; Lots 19778, 19952 and 19953, as shown on Map 1665 LCA 1069; Lot 19954, as shown on Map 1672 of LCA 1069; with access over Lots 20156, 20157 and 20158, as shown on Map 1698 of LCA 1069, to Lots 20145 and to Lot 20142, as shown on Map 1693 of LCA 1069, to Lot 10067-B-1-B, as shown on Map 1523 of LCA 1069 (collectively the foregoing are referred to as the ("**Roadway Lots**")), and then to Kualakai Parkway, a public road, as set forth by order filed as Land Court Document No. T-10837271, on September 3, 2019. Provided, however, that in the event that any Roadway Lots are conveyed to the State of Hawaii, the City and County of Honolulu or other governmental authority, said right of access as to said Roadway Lots so conveyed shall immediately terminate.

BEING THE PREMISES ACQUIRED BY TRUSTEES' LIMITED WARRANTY DEED WITH COVENANTS AND RESERVATION OF RIGHTS

GRANTOR:	TRUSTEES UNDER THE WILL AND OF THE ESTATE OF JAMES CAMPBELL, DECEASED
GRANTEE:	D. R. HORTON - SCHULER HOMES, LLC, a Delaware limited liability company
DATED:	March 1, 2006
FILED:	Land Court Document No. 3398322
RECORDED:	Document No. 2006-039948

SUBJECT, HOWEVER, to the following:

1. Mineral and water rights of any nature.

2. Abutter's rights of access, as set forth in Final Order of Condemnation dated July 23, 1987, filed in the Circuit Court of the First Circuit, State of Hawaii, Civil No. 59313, on July 23, 1987, filed as Land Court Document No. 1483355, recorded in Liber 20956 at Page 302, on July 29, 1987.

3. The terms and provisions contained in the following:

INSTRUMENT	:	EXCHANGE DEED
DATED	:	(acknowledged March 13, 1997 and March 14, 1997)
FILED	:	Land Court Document No. 2378009
RECORDED	:	Document No. 97-005315

4. The terms and provisions contained in the following:

INSTRUMENT:		TRUSTEES' LIMITED WARRANTY DEED WITH COVENANTS AND RESERVATION OF RIGHTS
DATED	:	March 1, 2006
FILED	:	Land Court Document No. 3398322
RECORDED	:	Document No. 2006-039948

PARTIAL ASSIGNMENT OF RIGHTS dated effective June 18, 2020, filed as Land Court Document No. T-11140354, recorded as Document No. A-74880655, by and between TRUSTEES UNDER THE WILL AND OF THE ESTATE OF JAMES CAMPBELL, DECEASED, acting in their fiduciary and not in their individual capacities, by JAMES CAMPBELL COMPANY LLC, a Delaware limited liability company, its De-Facto Successor in Interest, "Assignor", and JAMES CAMPBELL COMPANY LLC, a Delaware limited liability company , "Assignee".

5. The terms and provisions contained in the following:

10. The terms and provisions contained in the following:

INSTRUMENT:		DECLARATION OF RESTRICTIVE COVENANTS (PRIVATE PARK)
DATED	:	May 17, 2017
FILED	:	Land Court Document No. T-10027224, as the same may be amended, supplemented, and/or restated

SUPPLEMENTAL DECLARATION OF ANNEXATION OF PROJECT AREA (DECLARATION OF RESTRICTIVE COVENANTS (PRIVATE PARK)) ('Iliahi Phase 2 at Ho'opili Phase 10A/Parcel 105) dated April 29, 2021, recorded as Document No. A-77960063.

VARIOUS SUPPLEMENTAL DECLARATIONS AFFECTING LANDS OTHER THAN THOSE DESCRIBED IN THIS EXHIBIT HAVE BEEN OMITTED HEREFROM

11. Bylaws of Ho'opili Community Association dated January 31, 2017, as the same may be amended, supplemented and/or restated.

12. The obligation of Grantee, at Grantee's cost, to maintain, repair, clean, and keep free from debris the existing drainage pattern on the Lot, and any drainage facility and/or concrete facility, on the Lot, except for drainage facilities constructed for the benefit of and granted to the City and County of Honolulu, if any, which facilities shall be maintained by the City and County of Honolulu.

13. The obligation of Grantee, at Grantee's cost, to properly maintain the Lot to prevent excess water on the Lot and to avoid the risks of expansion or subsidence of soils, as set forth in the Master Declaration.

14. The obligation of Grantee, prior to obtaining a building permit for all buildings and improvements on the Lot, to comply with the design guidelines and to obtain written approval of the Design Review Committee, as set forth in the Master Declaration.

15. Reservation of right for Grantor to designate, grant and convey within the boundary of the Lot easements, including without limitation easements for landscaping, irrigation, maintenance, sewer, drainage, and electrical and utility purposes, without the joinder or consent of Grantee or Grantee's mortgagee, all as set forth in the Master Declaration.

16. The Lot will be subject to each and all of those easements shown on the plot plan for the Lot.

17. DESIGNATION OF EASEMENT L-2

PURPOSE:	landscape and irrigation
REFERENCED:	on subdivision map prepared by Wilfred Y.K. Chin, Land Surveyor with Controlpoint Surveying, Inc., dated September 23, 2020, revised February 11, 2021, approved by the City and County of Honolulu, 2019/SUB-130 on February 12, 2021, together with the right reserved to Grantor to grant the same as provided in the Master Declaration without the joinder or consent of the Grantee or Grantee's mortgagee.

18. RESTRICTION OF VEHICLE ACCESS RIGHTS

REFERENCED:	on subdivision map prepared by Wilfred Y.K. Chin, Land Surveyor with Controlpoint Surveying, Inc., dated September 23, 2020, revised February 11, 2021, approved by the City and County of Honolulu, 2019/SUB-130 on February 12, 2021

19. The terms and provisions contained in the following:

INSTRUMENT:	DECLARATION OF RESTRICTIVE COVENANTS (ADU UNIT - Sales Lot 6) ('Iliahi Phase 2 at Ho'opili / Phase 10A Parcel 105)
DATED:	March 24, 2021
RECORDED:	Document No. A-77590045

END OF EXHIBIT A

LEHUA PHASE 2 AT HO'OPILI
DISCLOSURE ADDENDUM

Lehua Phase 2 at Ho'opili Community. The Community is a fee simple residential community consisting of approximately 47 single family detached homes. The Community is located at Ho'opili, Oahu, Hawaii.

Sales Contract. This Disclosure Addendum supplements Buyer's Lehua Phase 2 at Ho'opili Fee Simple Home Purchase Agreement (herein, the "**Sales Contract**") and is part of that legally binding agreement. Defined terms used in the Sales Contract are sometimes used in this Disclosure Addendum and have the same meanings here.

SCOPE OF DISCLOSURE. THIS DISCLOSURE ADDENDUM IS NOT EXHAUSTIVE IN SCOPE. BY ENTERING INTO A SALES CONTRACT BUYER IS ENTERING INTO A LEGALLY BINDING AGREEMENT. BUYER SHOULD READ AND FULLY UNDERSTAND THE CONTENTS OF EACH AGREEMENT MENTIONED IN THE SALES CONTRACT, INCLUDING, BUT NOT LIMITED TO, THOSE DOCUMENTS CONTAINED IN THE DOCUMENT PACKAGE FOR THE COMMUNITY AND HO'OPILI. THESE DOCUMENTS ARE CALLED THE "COMMUNITY DOCUMENTS" AND EACH DOCUMENT WILL AFFECT BUYER'S SUBSTANTIVE RIGHTS AND OBLIGATIONS. THIS DISCLOSURE ADDENDUM ATTEMPTS TO HIGHLIGHT SOME BUT NOT ALL OF THE IMPORTANT PROVISIONS OF THE COMMUNITY DOCUMENTS AND TO PROVIDE BUYER WITH OTHER INFORMATION. IN THE EVENT OF A CONFLICT BETWEEN THE COMMUNITY DOCUMENTS AND THIS DISCLOSURE ADDENDUM, THE COMMUNITY DOCUMENTS SHALL CONTROL. HOWEVER, WHERE THIS DISCLOSURE ADDENDUM PROVIDES FOR ADDITIONAL, DIFFERENT OR EXPANDED COVENANTS OR OBLIGATIONS WHICH ARE NOT CONTAINED IN THE COMMUNITY DOCUMENTS, THIS DISCLOSURE ADDENDUM SHALL CONTROL.

BUYER UNDERSTANDS AND ACKNOWLEDGES THAT THE MATTERS CONTAINED IN THIS DISCLOSURE ADDENDUM AND OTHERWISE IN THE SALES CONTRACT REPRESENT A GOOD FAITH EFFORT BY SELLER TO DISCLOSE CERTAIN INFORMATION THAT MAY AFFECT BUYER'S DECISION TO PURCHASE THE PROPERTY, BUT THAT THESE DISCLOSURES ARE NOT INTENDED TO BE AND SHOULD NOT BE REGARDED BY BUYER AS A COMPLETE DESCRIPTION OF ALL MATTERS THAT ARE OR MIGHT BE RELEVANT TO THE OWNERSHIP AND USE OF THE PROPERTY. BUYER ALSO UNDERSTANDS THAT THIS DISCLOSURE ADDENDUM CONTAINS A RELEASE PROVISION THAT HAS LEGAL CONSEQUENCES. Buyer understands and acknowledges that the activities in and around the Community affect the use and enjoyment of the Property and represents and warrants to Seller that Buyer, in Buyer's sole discretion, based on Buyer's independent investigation, has determined that the benefits of owning and enjoying the Property outweigh such detriments and risks. Buyer hereby covenants and agrees to assume all risks of impairment of the use and enjoyment of the Property, property damage and personal injury arising from activities affecting the Community. The terms of this Disclosure Addendum shall survive occupancy of the Property by Buyer and the recordation of the Deed and shall be binding upon and inure to the benefit of the parties and their respective heirs, personal representatives, successors and assigns.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Community Documents. Buyer is strongly encouraged to carefully read the Community Documents applicable to the property Buyer is purchasing (sometimes the "**Property**" and/or "**Home**" and/or "**Lot**"). Without limitation, the Community Documents, as the same may be amended, modified and/or supplemented, include: (1) the Master Declaration; (2) the Master Association's Articles and Bylaws; (3) the Design Guidelines comprised of the Ho'opili Design Guidelines described in the Master Declaration (the "**Ho'opili Design Guidelines**"), the Ho'opili Urban Design Plan ("**Ho'opili UDP**") and any supplemental design guidelines; (4) to the extent applicable to the Community, the Ho'opili Commercial Use Guidelines and Ho'opili Signage Guidelines defined in and pursuant to the Master Declaration; (5) other related materials adopted by the Master Association, including any Ho'opili Community Rules; (6) the Sales Contract; and (7) the Deed.

Master Planned Community. The Ho'opili Community is a master planned community encompassing several residential and mixed use communities, condominiums, commercial and other related facilities. Ho'opili is planned to have many subdistrict areas, including some 17 single family residential subdistrict areas, which may contain other uses. Lehua Phase 2 is part of the Lehua residential subdistrict. Additional homes may be included in the Lehua Phase 2 residential subdistrict in the future. By purchasing a home in the Community, Buyer agrees that Buyer, Buyer's family, lessees, tenants and guests will observe and obey the terms, covenants, conditions and provisions contained in the Master Declaration, the Ho'opili Articles and Bylaws, the Ho'opili Design Guidelines, the Ho'opili Community Rules, if any, as well as those terms, covenants, conditions and provisions set forth in the Community Documents.

Effect of Master Declaration. The Community is or will be developed and operated according to the rules, agreements, conditions, restrictions and other limitations affecting the Community and Buyer's Property set out in the Master Declaration.

The Master Declaration also reserves for others certain rights in the Community lands, so that these rights are not part of what Buyer will own when purchasing a Home and Lot. For example, the Property interests above and below the surface of the Community and Buyer's Lot, such as water rights, were, are or will be owned by others and/or used for other purposes. As such, the Master Declaration directly affects Buyer and Buyer's Property. In purchasing a Lot Buyer understands and agrees that the ways in which Buyer may use Buyer's Property is limited and that ways in which others may use other parts of the Community or adjacent lands may affect Buyer and Buyer's Property.

Design Review. Seller and the County retain design review and approval authority over all developments in Ho'opili, pursuant to the Ho'opili UDP and Ho'opili Design Guidelines. In order to assist in the review of projects and interpretation of provisions of the Ho'opili UDP, Seller has established a Design Advisory Board ("**DAB**") comprised of professionals in various fields including but not limited to architecture, planning, landscape architecture and engineering to review project plans. As an accommodation, the authority of the DAB to administer and to enforce the Ho'opili UDP and the Ho'opili Design Guidelines with respect to proposed improvements by Owners and commercial users within the Ho'opili Community has been delegated to the Ho'opili Design Review Committee established pursuant the Master Declaration (herein, the "**DRC**" or "**Design Review Committee**"), which may adopt such design guidelines and rules, as determined appropriate by the DRC, specific to any land use classification within Ho'opili and which may otherwise contain specific provisions that vary from one portion of Ho'opili to another depending upon the location, unique characteristics and intended use thereof.

Plot Plans. Buyer may be provided with a "plot plan" prepared by Seller for the Property, which will show certain information specific to the Property, such as the approximate location of utility connection points and building setbacks. The Property may also be subject to landscape, utility, sign monument, mailbox and other easements not shown on the plot plan. Street monuments and other items including, but not limited to, cluster mailbox units, lamp posts, handholds, fire hydrants, electrical transformers and utility boxes, easements, and other facilities may or may not be located as may be shown on the plot plan for the Property. Both before and after the Property is conveyed to Buyer, Seller shall have the right to revise the plot plan for the Property to show new or revised items affecting the Property and/or other portions of the Community.

Date of Disclosure. Information in this Disclosure Addendum is current, to the best of Seller's knowledge, as of the date of publication set forth in the bottom left hand corner of this page. The information contained herein was collected from sources deemed to be reliable. While Seller has made every effort to obtain the most recent and accurate information, Buyer should rely solely on Buyer's own investigation and the investigation of Buyer's agents in making a decision to purchase. As information can change rapidly, Seller also encourages Buyer to contact the agencies and named individuals at the addresses and phone numbers listed for the most up-to-date information.

Closing. Completion dates are ALWAYS and ONLY estimates. Early occupancy is NOT ALLOWED. Early delivery of furniture is NOT ALLOWED.

Loans. Closing of any loan that will finance Buyer's purchase is Buyer's responsibility. Buyer's sales representative will assist, but each Buyer must stay in contact with such Buyer's lender so that loan approval is obtained in accordance with the time frames provided in the Sales Contract and Closing coincides with building completion. Buyer must be in a position to close escrow on the transaction within ten (10) days after Buyer's Home is ready for occupancy. Delay interest charges may be charged if these deadlines are not met and/or Seller may cancel the Sales Contract.

Financing. The primary lender will be DHI Mortgage Company, Ltd. ("**DHI Mortgage**"). DHI Mortgage is an affiliate of Seller. Buyer should review the special disclosure regarding DHI Mortgage. Buyer should be aware that DHI Mortgage may offer special rates and incentives and if the loan is approved by DHI Mortgage and closed utilizing the settlement services of DHI Mortgage, Buyer shall be entitled to purchase a package of related settlement services at a discounted price. Also, because of its knowledge of the Community, DHI Mortgage should be able to approve Buyer's loan quickly. Buyer is not required to use the affiliated company as a condition of Buyer's purchase of the Property or Buyer's access to settlement services. Buyer may use any lender Buyer wishes. However, Seller has not reviewed or approved any lender's sales or marketing materials, and does not make any representations or warranties whatsoever regarding any matters set forth therein or Buyer's ability to obtain any financing under any particular terms. Buyer is strongly encouraged to make Buyer's own independent evaluation of the rates and loan programs offered by all lenders. Buyer understands that the interest rate and loan fees for the loan applied for will be determined at the time of the Close of Escrow and may be higher or lower than on the date Buyer signed the Sales Contract to purchase Buyer's Home. Buyer also acknowledges that the interest rate, loan fees estimates or quotations that may have been provided to Buyer are for illustrative purposes only and do not constitute a binding commitment. If Buyer has chosen to make a loan with a lender with whom Seller has arranged a loan commitment, the interest rate quoted may not be available unless the loan closes by a certain date. Seller is not responsible if, for any reason, including construction delays, Buyer's loan does not close on time to obtain a guaranteed rate.

Lot Numbers. The Lot numbers that are referenced in this Disclosure Addendum are the Lot numbers that appear on the subdivision map for the Community (the "**Subdivision Map**"). The legal Lot numbers may differ.

Model Homes.

Decorator Items. One or more but not all Homes to be offered for sale by Seller may be available for viewing by Buyer as a model home (each, a "**Model Home**"). These Model Homes show generally the configuration of certain Homes that may be constructed by Seller in the Community, but are not necessarily identical in construction or configuration to homes bearing the same model designation. The Model Homes may reflect typical or different exterior elevations, floor plans, workmanship and methods of construction, but may differ from the Home you purchase. Your Home will not be constructed to the precise specifications or design of any Model Home. The exterior elevations, architectural treatments, floor plans and colors shown on any master plans on display at the office of Seller may be different than those displayed in the models. Room dimensions, square footages, cabinetry and countertops in kitchens, bathrooms and laundry areas, etc., plumbing and electrical fixtures, door types, door hardware, shower walls, appliances, tile and floor covering, bathroom accessories (faucets, shower heads, etc.), window types, and electrical and cable outlet placement may also vary from Model Homes, the plans and/or your Home. By way of example, Model Homes may have window coverings which are not included in the purchase price of the Home. Seller's warranty and representation as to the similarity between the Home being purchased and a Model Home constructed by Seller is limited strictly to design and configuration (subject to variance in horizontal measurements permitted by construction tolerances (+/- 2%) and not to similarity of appearance dependent upon particular decorations, furnishings or landscaping, or the location of wall switches, electrical outlets, thermostats, chases, plumbing and similar items (which may vary from the Model Home). You should note that the Model Homes you may have seen have been professionally decorated and landscaped to present an attractive appearance to prospective buyers and will differ from the Home you are purchasing. Certain landscaping features may not be permitted under the Master Declaration. Variations in floor plan, paint schedules and landscaping are to be expected. Buyer should also be aware that model homes in other communities developed by Seller may contain features or have been constructed in a manner different from the Model Homes in this Community.

The Model Homes may show the types of features that could be incorporated into the Homes and may be helpful in providing purchasers with possible decorating ideas. Model Homes may display certain fixtures and furnishings, which MAY be identified as "Decorator Items". These are not available to purchasers even upon payment of an additional charge. In certain instances decorator items may not be marked. Buyer should further be aware that window coverings are not included in the purchase price of a Home even though they may be installed in the Model Homes. Decorator items (such as furnishings, draperies, built-in shelves and lighting) and landscaping and hardscaping (such as entryways, lanais, and spas) are displayed only to suggest ideas to buyers. All such options and upgrades displayed in Model Homes (including, decorator items, landscaping and hardscaping) are not included in the purchase price for your Home unless expressly agreed to in writing by Seller. If Buyer has any questions regarding which items, such as light fixtures, may be purchased as an option or come with the Home, they should consult a Sales Representative and make sure the item in question is addressed in writing in the Sales Contract.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Materials and Construction. Buyer should be aware that homes in the Community are constructed and fabricated with various materials and may include steel and wood framing components. Wood framing components include such items as stud framing in certain locations, blocking, posts plates, beams and roof trusses, among others. Seller may substitute materials, fixtures, equipment and appliances of substantially equal quality as (a) those specified in the plans and specifications for Buyer's Home or models and/or (b) the standard items displayed in the Model Homes. As a result, Buyer's Home may be constructed completely of wood framing materials. Seller also reserves the right to change the location of electrical switches, gas meter, if applicable, and water meter, plumbing chases and outlets, windows, and the like and the right to make any changes in construction (e.g. plan changes, field changes or otherwise) which it deems appropriate, such as the substitution of wood and metal framing. Buyer understands that asphalt shingles are subject to cracking if walked on or struck by an object. In addition, Seller has the right to make changes in construction and as may be required from time to time by any lender, government agency, or as may be required by any law or regulation, by labor, material or utility availability, shortages, or stoppages or by any emergencies. Buyer accepts all of these changes. Buyer understands and agrees that any available rebates in connection with the installation by Seller of ENERGY STAR or other energy-efficient appliances or devices, including photo-voltaic, solar and EV devices, in the Home or at the Community shall belong to Seller.

Construction Plans. Copies of construction plans for Buyer's Home are available for inspection prior to Closing. However, Buyer should be aware that the construction plans will not include field changes (changes made during construction, which occur regularly) nor the changes described above. As a result, construction plans will not reflect the as-built condition of the Home.

Dimensions and Square Footages Are Estimates Only. Lot and Home dimensions and square footages are approximate. Buyer should be aware that any statement regarding the dimensions of rooms or square footages of Homes or other areas are approximates only. Buyer may not rely upon any written brochures and other sales documents or oral statements by Seller or Seller's agents regarding the exact square footage of Buyer's Lot and Home.

Homeowner's Manual/Orientation/Keys. At the time that Buyer signs the Sales Contract Buyer will receive Buyer's Homeowner's Manual. Please take time to review this manual completely. This manual should be brought to any meeting regarding option selections, Buyer's home orientation meeting and walk-through inspection of Buyer's new home. If Buyer has any questions please ask Buyer's sales representative. Seller will schedule an appointment with Buyer to conduct a home orientation tour of Buyer's new home prior to Closing. At that time Seller will review with Buyer the Homeowner's Manual and Seller's Limited Warranty. Buyer should advise Seller's warranty service representative of any concerns Buyer may have about Buyer's new home during the course of the home orientation tour. By doing so, delays in Closing may be avoided. Keys to Buyer's new home will be available after recording of the Deed. Buyer acknowledges that the Homeowner's Manual contains certain operating instructions and maintenance requirements and schedules for certain components of Buyer's Home, including, without limitation, information relating to mold and mildew. Buyer must review and comply with any and all operating instructions, maintenance requirements and schedules for Buyer's Home contained in such Homeowner's Manual.

Elevations and House Plans. In order to provide diversity for the street scene, Seller's architect may have produced more than one exterior elevation for the front, side and rear of each floor plan. Due to this and due to certain variations caused by construction techniques and methods, Buyer may notice size, scale and proportional interior and exterior changes from the Model Home or other Homes in the Community from Buyer's particular elevation. These may include such items as ceiling heights, sloped ceilings, veneer treatments, window locations, window types and sizes, gutter and downspouts, interior and exterior wall and roof lines, color schemes and front porch dimensions. It is the responsibility of Buyer to inspect the Property and consider the differences in the elevations and other features of Buyer's Home prior to Close of Escrow. Buyer acknowledges that Buyer has had the opportunity to review the floor plan and elevation and interior details for the Home Buyer is purchasing, all as shown on the building plans located in the sales office. Seller may alter, add or delete any house plans for homes to be constructed in the development.

No Guarantee About Development. Seller does not make any representation that the Community will be developed as proposed. Seller reserves the right, at any time and without notice, to modify its development plan for the Community, including, but not limited to, changing the style, size, square footage, density, exterior elevations, color schemes, construction schedule and/or phasing of the homes in the Community. The Model Homes are displayed for illustrative purposes only and such display does not constitute a commitment to complete the development with the same or similar homes. Seller may also sell all or any of the Property in the development to another builder, who may change the house plans, square footage, elevations, features, materials or designs of the homes.

Buyer Information and As-Built Conditions. In connection with Buyer's purchase of a home in the Community, Seller may provide Buyer with sales literature, which may include such information as elevations, lot dimensions, set-backs, house orientation, driveway locations, utility structures, rear yard dimensions, easements, etc. This information is intended for general informational purposes. There may be discrepancies between this information which is provided to Buyer and the actual as-built conditions. If there are such discrepancies, the as-built conditions will control.

Additional Information About Buyer's Home.

1. **Front Doors**. Front doors will vary by elevation and floor plan. Standard doors included with the purchase of Buyer's Home will vary in style to suit different elevations. Certain door styles, such as distressed or antiqued for decorative accent, may differ in appearance from the doors installed on the Model Homes.

2. **Color Variations**.

Paint - Buyer should confirm with Buyer's sales representative what interior colors will be used in the Home. Regarding white walls, it must be remembered that there are many shades of white. Buyer should not assume that the Home will be painted any shade of white shown in the Model Homes. Model interior paint colors are chosen by the model

decorators and are not necessarily what will be used in Buyer's Home. Buyer should also be aware that variations in wall texture and drywall taping may be more obvious where gloss, semi-gloss, and/or luster paint is used and may appear more obvious at different times of the day or night depending upon the lighting in Buyer's Home.

Grout –The elements of nature including, but not limited to, sun, temperature, food, or chemical reactions may, combined with the aging process, change the color of the grout in varying degrees from time to time. In the event of repairs or replacement of tile or grout in the future, the replacement grout and/or tile probably will not match the color of the original tile or tile grout.

Countertops - Samples are small select cuts from a slab; they do not exhibit all the characteristics of a design and therefore are not fully representative of what will be installed in your Home. Variations in the color, pattern, size, shape and shade are inherent and unique characteristics to be expected with this product. This does not affect the product performance in any manner. Certain colors are meant to be used as accents rather than a main work surface. Furthermore, the pattern may not always match at the seams and there may be variations between the deck surface and backsplash. These items are not covered by the warranties of Seller, the countertop fabricator, and the countertop manufacturer. Your countertop will not be replaced due to these variations.

3. **Fire Prevention.** Smoke detectors will be installed in Buyer's Home in accordance with County requirements. Smoke detectors must be maintained by Buyer and backup batteries replaced in accordance with manufacturer's recommendations provided to Buyer at the orientation. Emergency contact is not automatically made when a smoke alarm is sounding, so Buyer is charged with calling the proper emergency number upon the occurrence of an emergency.

4. **Driveways and Garages**. The shape and dimensions of the garages and driveways for the homes in the Community may not be standardized. Driveways may vary in size, shape, length and/or configuration from the model driveways or from what is shown on any depiction of the Community. Any lot within the Community designated as a "Flag Lot" in connection with the subdivision of the Community is subject to Section 21-4.20(a) of the LUO, which requires that the access drive serve only the "Flag Lot" and have a minimum width of 12 feet. Some of the garages may require Buyer to maneuver a lengthy driveway to enter and exit the garages. Parking of vehicles in the garages may also require Buyer to maneuver a vehicle back and forth in order to enter the garage. There may be certain obstacles (i.e. pillars, Buyer's Home, fencing, improvements, etc.) that may make it difficult to maneuver a vehicle into and out of the driveway and garage. Seller is not responsible for any damage to any home, including Buyer's Home, landscaping, pillars, fencing or any other improvement incurred during Buyer's or Buyer's guests or visitors maneuvering of the driveway and/or parking of a vehicle in the garages. It may not be possible to maneuver certain types of vehicles on the driveways and into the garage. Not all garages will accommodate all vehicles (especially full size models and sport utility vehicles) due to the shape, size, configuration and location of the garages, garage doors, driveways and homes. Also, parking of the maximum number of cars for which a garage was designed may block or make it difficult to access any storage area (if any) in the garage or to the Home from the garage. Buyer acknowledges that it is Buyer's responsibility to determine whether the size and location of car spaces in the garage of the floor plan of the Home selected by Buyer are adequate and appropriate to park Buyer's vehicles. Buyer should also confirm where street parking is permitted. Please realize that in many instances the Board of Directors may limit parking on private streets and on streets dedicated to the County, the County may restrict parking on public streets.

5. **Drywall**. Some shadowing in Buyer's drywall may occur at different times of the day or night depending upon the lighting in Buyer's Home, especially on curved walls. Also, if gloss, semi-gloss, and/or luster paint is used on walls, the variations in drywall taping and wall textures (sometimes called "flashing" in the painting industry) may be visible and appear more obvious depending upon the time of day and lighting in Buyer's Home. These variations are within industry standard.

6. **Air Conditioning**. Seller will install as a standard item a ductless split air conditioning system(s) to serve the home. Buyer understands that the air conditioning condenser(s) may be located in a different area than shown in the models or on other plans or exhibits. The specific location of compressors at the Community may result in sound transmission that may affect Buyer's Home. Buyers should be sensitive to excessive noise and possible disturbance to neighbors. Buyers, not Seller, are responsible for the unit's quiet operation. Buyer understands that even with screening, air conditioning units may emit noise levels unacceptable to some people. Buyers agree to assume all risks of such noise emissions.

7. **Satellite Dishes**. Satellite dish antennas may be installed and used within the Community only to the extent permitted by law. Where possible, all components of the system should be concealed from public view and be placed on

the side of the home not facing the adjacent road. The system should not be visible from the front yard of the Home. In instances where Buyer can demonstrate that installation on the rear of the Home would cause an unreasonable expense increase in the expense of installation, maintenance or use, or would prevent reception of acceptable signal quality, installation in a location where the satellite dish is visible from the Street may be appropriate. Submission of documents supporting Buyer's position that installation in a location visible from the Street is appropriate shall be made within thirty (30) days of installation. The Design Review Committee may retain its own expert to confirm that installation on the rear of the Home causes an unreasonable expense increase in the expense of installation, maintenance or use, or would prevent reception of acceptable signal quality. Such installation shall only be made in accordance with the Declarations, Ho'opili Design Guidelines, and any other recorded restrictions and governmental requirements. However, if installed Seller has provided no assurances or guarantees that any satellite dish or other antenna installed within the Community will remain unobstructed. Buyer should understand that antennae signals may become obstructed by the installation and maintenance of Improvements within and outside of the Community including homes, walls, fences, trees and other landscaping.

8. **Building Code Changes**. Periodically, governing agencies change building codes and other requirements; therefore, as construction proceeds, future homes may be constructed differently in order to meet these updated or revised regulations. Seller reserves the right to change elevations, designs, or other elements of the construction process at its sole discretion. Seller is not responsible for providing any certification Buyer may request or require concerning compliance of construction of the home with Building Codes or other requirements.

9. **Electrical Outlets in Garage**. The building code requires that electrical outlets in garages be provided with ground fault interrupter circuits. These circuits are not intended for use with any appliances, especially refrigerators, freezers and aquariums or on any service that an interruption of electrical power would cause a problem. Seller strongly recommends that Buyer not use garage circuits for appliances or for any service (such as freezers) that would be harmed by an interruption of electrical power. Seller cannot be held responsible for the contents of appliances which are damaged because of the ground fault interrupter switches shutting off power, nor can Seller be held responsible for damage to the appliance units themselves. Please check with an electrician for further information.

10. **Fencing**. Buyer should be aware of what fencing or walls may be constructed surrounding Buyer's Home, if any, and the fences Buyer will be required to maintain. The exact size, type and location of Buyer's fence or wall will be determined at the time of fencing installation.

11. **Concrete Products**. Cracks will occur in any stucco, EFS, and plaster exterior. This is normal in all cementitious materials. Certain elevations incorporate a "smooth trowel" plaster finish. Buyer should be aware that this finish is particularly susceptible to cracking. Cracking does not affect the structural integrity of Buyer's Home and is part of the natural look of stucco and plaster. Poured on grade concrete is prone to a certain amount of cracking as it cures over time. Such cracks can be minimized by scoring, but they cannot be completely avoided.

12. **Dryer Vent System**. The dryer vent system in the homes has been installed pursuant to the design instructions of the manufacturer of the dryer being offered by Seller. If Buyer does not select the dryer being offered by Seller at the time of purchase (or installs a new dryer in the future), Buyer understands that the design of the dryer vent system may not conform to the dryer being installed by Buyer as each dryer manufacture has its own dryer vent system requirement. Prior to the installation of a dryer by Buyer, Buyer should review the manufacturer's dryer vent system requirements to verify that the dryer vent system installed in the Home conforms to the manufacturer's requirements.

13. **EV Use**. The Home's garage is "EV Ready" which means the Home's garage is provided with a junction box and 6/3 electrical cable to the breaker panel for the future installation of an electrical car charging station that may be installed by Buyer. The Breaker panel will have reserved slots to accommodate an additional 110V or 220V for future expansion.

14. **PV Ready.** The Home is "PV Ready" which means the Home is "pre-plumbed" for installation of a photovoltaic system ("**PV System**") post-closing by Buyer in that photovoltaic conduit that has been installed from the electric panel into the Home's attic. The PV System pre-plumbed improvements by Seller do not penetrate the insulation in the attic or the roof deck of the Home, but permit future re-routing by Buyer's PV System contractor. Seller provides no assurance that the installation of a PV System will be permitted under practices, regulations or rules adopted by Hawaiian Electric Company ("**HECO**"). Buyer should confirm with HECO whether such a system may be installed at the Home. Buyer acknowledges and agrees that Seller makes no warranty or representation concerning electrical expense savings a Buyer may obtain through the installation of a PV System, the efficiency of any solar energy (hot water and photovoltaic) system, which are dependent on a myriad of factors including, without limitation, system quality, weather, orientation to the sun, the size of the system capable of being installed on the roof of the Home, or the impact such installation may have on the

integrity of the roof system. If Buyer elects to have such a system installed and the installation is authorized by HECO, Buyer must utilize a certified licensed photovoltaic system installer and should consult with the installer regarding the size and location of the PV System as the design of the roof or roof orientation may not be optimal for the PV System. Before commencing any installation effort, Buyer must secure any and all necessary permits required to allow such installation and obtain all necessary approvals of such activity in accordance with the Ho'opili Design Guidelines. Buyer should review the Ho'opili Design Guidelines closely and should provide a copy of the Ho'opili Design Guidelines to Buyer's photovoltaic contractor before installation of such a system.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Limited Warranty.

Generally. Seller will provide buyers with Seller's Limited Warranty (herein, sometimes, the "**Limited Warranty**") covering Buyer's new Home at Closing. Seller makes no warranty or guarantee, express or implied, except as specifically set forth in the Limited Warranty. A copy of the Limited Warranty is in Buyer's Homeowner's Manual ("Everything You Need to Know About Your New Home") Buyer will receive at the time of Buyer's purchase. The Limited Warranty describes Seller's repair and warranty obligations, the procedures for making a warranty claim and the procedures for the settlement of disputes.

Exclusions. In order for the Limited Warranty to be effective, common sense maintenance of Buyer's Home is required. Buyer should review the Limited Warranty to become familiar with specific exclusions. By way of example, the Limited Warranty does not cover non-structural cracking of the Home's drywall, foundation slab or non-structural variations from level in foundation slabs or upper story sub-floors. Standard construction techniques and the applicable design for the Home's drywall and foundation slab second story sub-floor may result in a degree of non-structural cracking or "spider" cracking in the drywall and slab and may result in modest variations from level in the slab and sub-floor. Although certain foundation slabs will contain contraction joints to minimize cracking, such cracking is inherent in concrete construction. Variations from level on second floor sub-floors are filled and patched with an adhesive floor leveling agent. Further, in the case of concrete slabs, hard surface floor coverings (wood, marble and ceramic tile), where permitted, may also crack or reflect the effect of foundation slab cracking. There is no Limited Warranty coverage for these circumstances. To minimize this risk, Seller recommends that hard surface floors, where permitted, be installed over a "slip sheet" available through Buyer's flooring supplier. In conformance with home construction standards, the rafter tails will not be caulked unless there is a gap between the rafter tails and the fascia in excess of 1/8 of an inch. By signing the Sales Contract and this Disclosure Addendum, Buyer accepts these conditions with respect to the Home. Buyer should review the "Preconstruction Conference Confirmation Form" prior to the home orientation tour to become familiar with Seller's standards and specifications.

Options.

Generally. All option items are subject to adjustment in price and quality if such items become unavailable for reasons beyond Seller's control. Buyer will be required to make a deposit, which is **non-refundable**, on all selected option items. Seller reserves the right not to install any selected options until Buyer receives loan approval. Once option selections are completed, Buyer and Seller agree that the final purchase price is to be amended by execution of the Final Sales Price Addendum to include options.

Insulation. Where insulation is installed, Seller will install unfaced, friction-fit, flexible batt or blanket fiberglass insulation batt insulation with an R-value (or R-value equivalent) of R-19 is installed in the attic of the home during construction. Unfaced, friction fit, thermal batt insulation with an R-value (or R-value equivalent) of R-13 is installed in the exterior walls of living spaces and in any floor system between the garage and living spaces during the course of construction. No representations are or may be made that Buyers of homes in the Lehua Phase 2 Community will save on household expenses as a result of any house insulation.

Utilities/Phones/Cable. Buyer needs to contact the electric, phone and cable companies. Seller takes no responsibility for cable or telephone installation. Buyer should notify Hawaiian Telcom, Inc. or Spectrum, as applicable, in advance to schedule installation on or after recordation. No early installation will be permitted. Buyer shall be responsible for initiating the commencement of any service from a utility company such as water, electricity, telephone and cable television (if available) upon or after the Closing Date. If Seller receives any bills for utilities that are attributable to the period after the Close of Escrow, Buyer shall reimburse Seller for such payments within ten (10) days after receipt of a statement from Seller. Seller is not affiliated with the cable company or with any other utility companies (i.e., water, gas electricity, telephone service, etc.), and has no control over the rates or the services furnished or the water pressure available at Buyer's Home. Seller does not make any representations as to when or if cable services will be available nor as to the quality of television

reception or cable services. Seller has no control over timing of meter installation once final inspection has been performed. Seller also has no control over the location and placement of public utility structures and facilities. All locations of the utility structures and facilities are final, and Buyers shall not tamper, move or damage these structures and facilities. Buyer is to check with Buyer's sales representative to determine whether any utility structures or facilities are located within or in the vicinity of the Home Buyer is purchasing.

Real Property Taxes. The 2020-2021 annual Real Property Tax Rate for Homes in the Community is $3.50 per $1,000.00 net taxable value of the Lot and Home if assessed as improved residential property. Payments are due on February 20 and August 20 each year. Owner-occupants may be eligible for a home exemption that reduces the net taxable assessed value of the Property that is used in determining the property tax assessment for the Property. As an owner-occupant Buyer may make a claim for a homeowner exemption on or before September 30th preceding the tax year for which the exemption is claimed. The basic home exemption is currently $100,000.00. Seller understands that for homeowners 65 years and older the home exemption will increase to $140,000, but Buyer should confirm that this increase exemption will available following the date of Buyer's purchase. Currently, to qualify for the "senior" exemption, Buyer must be 65 years or older on or before June 30 preceding the tax year for which the exemption is claimed. These tax rates are approximate only. For further information and to confirm the actual rate, Buyer may contact the Real Property Tax Office at (808) 768-3799. If Buyer installs alternate energy improvements for the Home, such as a photovoltaic system, Buyer may be eligible for an alternate energy improvements exemption. The Claim for Exemption Alternate Energy Improvements (ROH Sec. 8-10.15) form is available at www.realpropertyhonolulu.com.

Schools and Related Matters. The Community is located in the Leeward School District. The Leeward District telephone number is (808) 692-8000. The schools for this Community are determined by the Department of Education and are subject to change. Although various elementary schools, a middle school and a high school are planned in Ho'opili, it will be a number of years before construction of those improvements by the Department of Education.

Refuse Collection. Buyer understands that in order to receive postal and trash services, mailboxes and trash containers may need to be located only in those areas designated for these purposes. Trash pickup in certain communities may be by private contractor.

Postal Service/Mailboxes. The United States Postal Service will not deliver mail to the Home (or to any other home in the Community). Mail will only be delivered to the designated cluster mailboxes, which may be limited to a single location within or in the vicinity of the Community. Seller expects that the cluster mailbox system for the Community will be located in the mini park/mail lot located in Lehua Phase 1, pending the approval of the U.S. Post Office. The United States Postal Service requires that at least 50% of the homes and roads within the Community be built and may impose additional conditions before mail services will commence. Buyers will need to arrange for temporary mail service via either a general delivery service through the post office in the area or purchase a post office box at any post office until the requirements of the United States Postal Service, which are subject to change, are met by Seller.

«INITIAL-LINES-BELOW-BLOCK-DATELESS--BUYE» «INITIAL-LINES-BELOW-BLOCK-DATELESS--COBU»

Property Maintenance and Condition. All homes and the land within the Community, including the land below Buyer's Home, may have expansive soils, and, as a result, improvements, including the Home and the driveways, walkways and other improvements may be subject to various types of distress including subsidence, settlement or lifting. Further, the land within the Community has been graded. Soil has been removed and added to reach the land's finished height and form, and non-expansive fill has been placed under structural improvements, with underlain expansive soils. Please refer to the Soils Condition and Drainage Addendum for further disclosures and recommendations. The Property is subject to subsidence, settlement or expansion due to the presence of expansive soils and fill material. Except for limited soil borings, Seller has not investigated the soils below the limits of grading and as result soil below the limits of grading may contain items installed during periods of agricultural use, such as, without limitation, drainage, irrigation and sewer lines which have been abandoned in place. Buyer also acknowledges that standard construction techniques and applicable designs for the foundation slab may result in a degree of non-structural cracking or "spider" cracking within the slab and that certain slabs will contain crack control joints. Buyer accepts such slab cracking. Certain non-structural cracking or swelling of drywall joints at windows, doorways and other locations with the Home may also be visible, should subsidence, settlement or expansion occur. Buyers must be especially sensitive to landscape watering, avoid over watering and ponding of water, and must abide by the recommendations for maintenance set out in this Disclosure Addendum in order to minimize the risk of these occurrences. Landscaping is also important and will reduce the incidence of erosion attributable to wind or rain. Buyer understands and acknowledges that Buyer will be acquiring the Property in "AS IS" condition at the time of closing. Except as expressly set forth herein, Buyer is relying and will rely solely upon Buyer's own inspection and investigation of the Lot and the land of the Community, and is not relying and will not rely in any way upon any representations, statements, warranties, or other information or material furnished by Seller or its representatives, whether oral or written, express or implied. Buyer should also be aware that soils within the Community may be corrosive in nature.

Soil. The suitability of the soil contained within this Community for the planned construction was determined by Geolabs, Inc. A copy of the soils report for this Community is also available for review in the Sales Office.

Easements. Buyer is aware that there may be easements which affect the Community and Buyer's Property. These easements are noted in the Master Declaration, the exhibit to the Deed, the title report, the Subdivision Map and/or the plot plan for the Lot. Specifically, Lots on ʻOnohiʻula Street, Kamolehonua Street, Kulanihakoʻi Street and Kaulakoko Street will be subject to landscape easements benefiting the Master Association. A subdivision monument or monuments and/or cluster mailbox system may be included within this landscape easement area and may affect certain lots. There may also be landscape easement areas within the Community roads.

Drainage Facilities and Easements. Surface water drainage in the Community is directed to the streets servicing the Community utilizing certain surface drainage facilities, which may include lined and unlined ditches and swales, affecting various Lots in the Community. Buyer may not alter and must maintain the existing drainage pattern on any Lot, nor shall any Buyer modify any existing drainage facility located on Buyer's Property. Failure to maintain the existing drainage pattern or altering the scope of the drainage pattern on Buyer's Property may adversely affect Buyer's Home. Saturation of the ground or ponding around foundation slabs may result in expansion or lifting of soils beneath the slab and settlement when the ground dries. Gutters, downspouts (directing water), splash guards, lined swales and pipe conduits should be considered if not included in the purchase of the Home or purchased as an option by Buyer, if available. Buyer shall maintain the existing drainage pattern on Buyer's Property. Buyer of a Property on which any drainage ditch facility, concrete swale, or portion thereof is located shall be responsible, at Buyer's cost, for the maintenance, repair and cleaning, as required, of the drainage ditch facilities located on Buyer's Property. The scope and extent of swale facilities within drainage and flowage easements is reflected on the approved grading plans for the Community. Buyer understands and agrees that should a swale facility or any drainage or flowage easement be disturbed during construction of a Home, Seller may restore the swale in accordance with approved grading plans even after closing of the purchase or sale. This right is reserved to Seller in the Deed and Master Declaration. If Buyer removes, modifies or otherwise alters the established drainage patterns or devices on Buyer's Lot, Buyer may cause significant and permanent damage to Buyer's Home and/or other homes, including but not limited to, damage to the foundation of Buyer's Home or adjacent slopes. Buyer should take precautions by using licensed professionals (e.g., landscape architects, civil engineers, geotechnical engineers, general contractors, etc.) to assure that Improvements such as walkways, landscaping, lanais, decks, planters, etc. are constructed so as not to alter the established drainage of Buyer's Home. Seller shall not be responsible for any modifications or changes to the established drainage for the Lot.

Sewer and Drain Easement. Certain portions of the Community may be affected by an underground sewer and/or drain easement benefiting the Community and/or the County. The County shall be responsible for the maintenance of any underground drainage facilities located on a Property, which are constructed for the benefit of the County. Such easements may not be reflected in the plot plans for the Community. The facilities may be located within the Property and may not be shown on the plot plans.

Sidewalk and Gutter Areas; Street Trees. Buyers shall maintain and keep clean, passable and free from weeds, debris and overgrowth the sidewalk, planting strip, and gutter area adjacent to Buyer's Property. Prior to or following the conveyance of the Home, the Master Association and/or Seller may landscape and/or plant trees in the planting strip in the sidewalk along the roadway in the Community (the "**Planting Strip Area**"). Seller may plant trees in Buyer's yard when appropriate to satisfy City and County design standards. Under no circumstances may Buyer alter the Planting Strip Area without prior written consent of the Board of Directors of the Master Association, Seller, and the County. Without limitation of the foregoing, no landscaping or trees planted by Seller in the Planting Strip Area or trees planted in front yards shall be removed, changed or relocated without the prior written consent of the Board of Directors of the Master Association, Seller, and the County. Other than lawn grass that may be planted by Seller, installation of impervious surface material in the Planting Strip Area is strictly prohibited. Even though Buyer is prohibited from altering the Planting Strip Area, each Buyer shall be responsible for the proper maintenance and care (including irrigation) of the Planting Strip Area and the landscaping and trees located within the Planting Strip Area and in front yards. If Seller installs an irrigation system in the Planting Strip Area the irrigation system will be connected to the Home. Buyer should be aware that the County ordinance may have additional restrictions regarding the Planting Strip Area and the trees Seller planted in front yards to satisfy City and County design standards.

Planting Strip Watering Easement. The Master Association shall have the right, but not the obligation, to own and maintain a sprinkler system installed within each Planting Strip of each property along certain Community roads (and in any Roadway Landscape Easement Area defined in the Master Declaration) as provided in the Master Declaration together with an electrical timer installed within the Home or yard. If installed, Buyer shall be responsible for paying for the water and

electricity used for the sprinkler system and must ensure that water and electricity are available at all times for maintenance and irrigation of Buyer's Planting Strip adjacent to the property.

Sight Distance/View Triangles. A "sight view triangle" may be required by the County on certain corner Lots in order to maintain clear views of traffic at certain intersections. The County limits the height of structures and landscaping within the sight view triangle. If not reflected on the plot plan for the Lot, Buyer will need to confirm with the County Planning Department whether a sight distance/view triangle affects the Lot and limits the landscaping or improvements Buyer may wish to make to the Lot.

Setback Area Easement. Buyer understands and agrees that Seller shall retain an easement over the setback areas of the Lot for the construction and placement of fences, walls and entry signs together with all attendant rights to construct, reconstruct, install, maintain, repair and replace, as appropriate, such structures (including walls, fences, entry signs and the like), facilities and appurtenances as Seller determines necessary, appropriate or expedient.

Electrical and Utility Easements. Utility boxes, transformers, utility lines (above ground and underground), manholes and other utility features, such as structural transformers, transformer and switching vaults are placed throughout the Community and may be located near Buyer's Lot and Home. Certain Lots are affected by landscape and above ground or underground electrical, telephone, gas (if any), and cable utility easements shown on the Subdivision Map for the Community. Buyer should inspect the Lot to confirm the location of these easements and facilities. The location of these facilities depicted on the Subdivision Map is preliminary in nature and these facilities may be sited as required without further notice to Buyers. Electrical and utilities easements run in favor of and will be granted to the electric company, telephone company, gas company, and/or the local cable television provider. Seller has the right to grant these easement areas even after Buyer occupies Buyer's Home.

Use of Easement Areas. Buyer may landscape an easement area(s) as long as Buyer does not interfere with the use of the easement area(s) affecting Buyer's Lot. The grantee of the easement area, whether it is the electric company, the telephone, gas and/or local cable companies, the Master Association, or an agency of the County, will have the right to trim and keep trimmed any plants within the easement area that may be in the way. Also, Buyer may not be permitted to construct other structures in the area depending on the nature of the easement. Such structures may require the grantee's approval. Additionally, should the grantee determine that it must remove any plants or foliage within the easement area, the grantee may NOT be obligated to replace them, but rather will only be obligated to restore the surface of the ground within the easement area as much as the grantee determines is reasonably possible.

Lots Affected by Easements. Buyer's sales agent will have a schedule of Lots affected by easements. Further, a special Easement Addendum to the Sales Contract will identify easements affecting a Buyer's Lot. Such easements will also be reflected in the plot plan for the Home and/or the Subdivision Map.

Digging Generally. Buyer should call 811 before digging anywhere on Buyer's Property to avoid damage to underground utilities. If any digging is contemplated, call the Hawaii One Call Center at 811 at least five (5) working days beforehand. Be sure to give the address and location of the cross street(s) nearest where digging is planned. The Hawaii One Call Center will, at no cost to Buyer, contact all local public utilities to tone, mark or identify the location of underground public utilities. Homeowners are asked to mark the area where excavating is planned in WHITE as the utilities are designated other colors to mark their facilities (yellow for gas, oil, steam, petroleum, or other hazardous liquid or gaseous materials; red for electric; orange for communications, cable TV, alarm or signal lines, cables or conduits; blue for water, irrigation, and slurry lines; purple for slurry and reclaimed water; green for sewers, drainage facilities or other drain lines; pink for temporary survey markings). Buyers are encouraged to visit http://callbeforeyoudig.org/hawaii/index.asp for additional details regarding the Hawaii One Call Center.

Natural Gas. Hawai'i Gas has installed a gas pipeline to a point of connection just within the boundary of the Property. The gas pipeline is terminated (i.e., capped) and does not extend beyond this point of connection into the Property, and Buyer must contact Hawai'i Gas as to whether the gas pipeline can be extended to the Home, which work, if possible, shall be at Buyer's sole election, responsibility and expense. Seller provides no assurance that the installation of additional natural gas pipeline(s) to the Home or interior of the Home will be permitted under practices, regulations or rules governing Hawai'i Gas or other natural gas service provider. Regardless, Buyer should always make sure there are no gas pipelines underground where any digging is planned. Digging or running heavy equipment can damage gas lines and striking a gas line may cause an explosion resulting in personal injury, property damage and/or death. Always have underground gas lines located before beginning any excavation activity, even when conducting minor excavation (e.g., to install a fence or sprinkler system). As discussed above, call 811 before digging and the Hawaii One Call Center will contact all local utilities to tone, mark or identify the location of underground utilities.

If a gas leak is suspected, immediately evacuate the area and contact Hawai`i Gas' emergency department at 808-526-0066 or, if the situation warrants, call 911. Common signs of a gas leak include: odor of rotten eggs; an unusual hissing or blowing noise from the ground or exposed gas; flames near exposed piping or coming from the ground; constant and localized blowing of dirt, dust or debris; rapid bubbling at the surface of a body of water such as a puddle; unusual brown, dying or dead vegetation in otherwise moist areas over or near pipeline areas as well as unusual soil movement.

Buyers are encouraged to visit http://hawaiigas.com/safety/ for additional information regarding gas safety.

Community Common Areas

Collective Maintenance Responsibility. Each Owner in the Community must share in the cost to maintain, repair and replace the Community common areas as described in the Master Declaration (the "**Community Common Areas**"). The Master Association may specifically assess the Community owners for the maintenance and repair of these areas.

Community Common Areas. The Community Common Areas include all of those items noted in the Master Declaration and may include, without limitation, the following:

Entrance Landscape and Sign Monument Easement which means and describes the sign monument and landscape features, if any, constructed in the landscape and/or signage easement shown on the Subdivision Map for the Community.

Landscaping Areas along and within the Community Roads and the landscaped areas within the Community as shown on the Subdivision Map.

Common Drainage Facilities which means and describes those facilities, if any, serving to control and direct the drainage of surface water within and the inlets into such facilities, as may be shown on the Subdivision Map.

Mailbox System(s) which means and includes any mail system serving the Community.

Pedestrian Access Lot(s) which means and describes the pedestrian access lot(s) shown on the Subdivision Map, if any, including any improvements, landscaping and irrigation system.

Access, Utility, and Drainage Easements which include those certain access and utility easements within the Community as shown on the Subdivision Map.

Road(s) which means and describes the roadways within and serving the Community. Road(s) will be included in the Community Common Areas if not dedicated to the County. These areas include the planting strip adjacent to the curb abutting the road travel surface, as well as the street trees located in the planting strips.

Ownership, Administration and Assessment. The Master Association shall own the Community Common Areas, once deeded to it and must accept the conveyance of the Common Areas from Seller. The Master Association shall be responsible for the management and administration of the Community Common Areas, and may charge the Community owners for the cost to maintain, repair and replace these common areas. The level of service of maintenance of Community Common Areas shall be determined by the Master Association's Board of Directors.

Improvements/Ho'opili Design Guidelines. As specified in the Master Declaration, and the Ho'opili Design Guidelines, ANY exterior improvements to a Home or landscaping of a Lot, painting of Buyer's Home and the construction of fences must comply with the Master Declaration and/or Ho'opili Design Guidelines, if any. The Ho'opili Design Guidelines require that all exterior metal, including gutters, flashing, sheet metal, and vents shall be finished to match or compliment the house/roof color. All vertical and hardscape improvements will need to be approved in writing by the Design Review Committee before the improvement is made. Buyers are responsible to review submittal requirements before design of improvements. Please note that DRC submittals must reflect mechanical screening material color and exterior metal finishes. Before constructing any improvements at the Property like walls or other structures, Buyers and Buyer's contractor must review the Property pins and the plot plan to make sure there are no discrepancies. If there is a discrepancy, please notify Warranty Service before any work is started so they can verify the placement for Buyer. The Property pins may have

been moved during the course of surrounding or adjacent construction activities. Seller will not be responsible for any work done on the Property if they are not notified in writing of the discrepancy. Buyers are encouraged to read and review the Ho'opili Design Guidelines, as they will substantially affect Buyer's ability to improve Buyer's Lot. Buyers should note that the Ho'opili Design Guidelines are subject to further revision by the DRC. Before Buyer begins any grading, excavating, filling or constructing any improvements to Buyer's Home (e.g., pools, spas, planters, sidewalks, decks, lanais, lanai covers, landscaping, etc.), Buyer should engage the services of a qualified, licensed professional and Buyer should take necessary precautions in designing and installing such improvements to avoid damage to Buyer's Home and other improvements which may result from existing soils conditions. Buyer should also obtain a geology report prior to constructing a swimming pool or spa. Too often a homeowner's contractor will utilize a standardized set of calculations and construction plans that are not specifically designed for pools and spas that are to be built at the top or toe of a slope or on expansive soils. These conditions require special design considerations. Please refer to the Soils Condition and Drainage Addendum for further disclosures and recommendations.

Fences and Walls. Various Lots in the Community may be sold with either a wooden, wrought iron, vinyl fencing, masonry walls or other type of fencing in place and constructed on the Lot. Pursuant to the Master Declaration, these fences and walls may not be removed and must be maintained and kept in good repair by the Lot owner. Certain Lots within the Community may also have a decorative planting area and/or masonry wall and sign monument identifying the Community. The Master Association shall be responsible for the maintenance of the referenced decorative planting areas, the wall and the project identification monument located on these Lots. If Buyer wishes to move a fence, Buyer must obtain the Master Association's approval as well as the approval of the adjoining Property owner. New fences will also require the approval of the Master Association and DRC and must comply with the County's rules and regulations.

Retaining Walls and Other Improvements. All improvements to the Property must be approved by the Design Review Committee. Due to the expansive soils at the Community, all structural improvement or new construction, such as lanais or room additions, must comply with the Ho'opili Design Guidelines. Those Guidelines require the installation of special foundations or structural fill under such improvements. Any such fence or wall or improvement shall be designed and constructed only in compliance with the Ho'opili Design Guidelines and the Master Declaration and shall in all instances conform in design and color (to the extent practicable) with existing fences and walls constructed by Declarant.

Landscaping.

Trees and Planting Strips. Trees may be planted in the front yards of various Lots and where they exist within the landscape easement fronting a Lot if they exist. Seller may also plant trees within the front yard of any Lot as may be required by the County. These trees may NOT be removed, replaced or relocated without the prior written consent of Seller and the County. Each Buyer shall be responsible for the proper maintenance and care of any and all trees planted on Buyer's Lot. The County or Seller may also plant trees in the planting area bordering the roadways in the Community, as required by the County and Seller may install an irrigation system in the Planting Strip Area or landscape easement area, which will be connected to the home. Buyers may not remove, replace, alter or relocate these trees or plantings. Buyer must maintain the grass planting areas and may not gravel or concrete over the planting strip area. Buyer should be aware that the automatic sprinkler system serving grass planting areas may run more often (perhaps three times a day) until the landscaping has been established which typically takes 60 to 90 days and, as a result, Buyer's expense for the water and electricity used for the sprinkler system may be higher during the grow in period. Customer Care should be contacted before reducing irrigation to the grass planting areas.

Community Disclosures.

Other Development within the Surrounding Area. Buyer understands that Seller does not control the development of the entire surrounding area and that current and future plans for the development and use of all or any part of the surrounding area are under the control of others, and may change at any time before or after Closing of Buyer's purchase of the Property without notice to Buyer. The surrounding community contains or may contain various commercial, residential, recreational and ancillary uses, industrial, including extensive commercial, retail, industrial, multi-family and single-family detached residential subdivision and rental communities. To date, Seller has conveyed vacant development parcels within Hoopili to The Hawaiian Humane Society (5.473 acres; B-1 zoned; contemplated use - new West Oahu campus), Fred Lau Properties, LLC (1.806 acres; B-1 zoned; contemplated use - not yet determined), HBP Partners LLC (57.190 acres; IMX-1 zoned; contemplated use - industrial business park); The Queen's Medical Center (4.901 acres; BMX-3 zoned; contemplated use - ambulatory medicine center), Alaka'i Apartments I LP (11.311 acres; BMX-3 zoned; contemplated use - market and affordable rental apartments up to 80% of area median income), and The Mutual Housing Association of Hawai'i, Inc. (7.127 acres; A-2 zoning;

contemplated use - affordable rental apartments up to 60% of area median income). Buyer hereby accepts the risk of any changes pertaining to the development and use of all or any part of the surrounding area, and agrees that Seller shall not have any responsibility to Buyer for such changes. Buyer further understands and acknowledges that any descriptions of planned amenities for the surrounding area, which may have been provided to Buyer by Seller or agents of Seller, are for general information purposes only and are subject to change or deletion at any time and from time to time. Seller makes no warranties or representations regarding the accuracy or completeness of any descriptions of such planned amenities, which may have been provided to Buyer, and no reliance may be placed thereon. Further, as much as thirty percent (30%) of the residential housing in the surrounding area and within the Ho'opili Community has been or may in the future be developed in cooperation with the County's Department of Planning and Permitting or equivalent State or County agency (the "**Agency**") as affordable housing available only to buyers satisfying special median income limitations established by the Agency. Such homes may be sold and/or rented at prices below the market value of comparable homes as determined by the Agency, and may be subject to additional use, occupancy, and transfer/option restrictions.

Condition of Property. Buyer understands and hereby acknowledges that the land of the Community may have been used previously for agricultural and farming operations and in connection therewith, fertilizer and pesticides, among other things, may have been applied and used on the land of the Community or adjacent lands. Buyer also understands that the Property has been graded, soil removed and added to reach its finished height and form, and contains or may contain fill and/or expansive soils, and, as a result, may be subject to subsidence, settlement or expansion. Please refer to the Soils Condition and Drainage Addendum for further disclosures and recommendations. Buyer understands and acknowledges that, as previously stated, Buyer will be acquiring the land underlying the Lot in "AS IS" condition at the time of Closing. Except as expressly set forth herein, Buyer is relying and will rely solely upon Buyer's own inspection and investigation of the Property and the land of the Community, and is not relying and will not rely in any way upon any representations, statements, warranties, or other information or material furnished by Seller or its representatives, whether oral or written, express or implied. Seller makes or gives no warranty, express or implied, concerning the condition of the land. Without limiting the generality of the foregoing, Buyer assumes all risks associated with the condition of the Property, the nature of the soils making up the Property and of hazardous materials on, about, around, under, over or within the Community, including all risks of (a) any and all enforcement, clean up, or other governmental or regulatory actions instituted or threatened pursuant to any hazardous material laws affecting the Community, (b) all claims made or threatened by any third party against Buyer or the Community relating to damage, contribution, compensation, loss or injury resulting from any hazardous materials and (c) Buyer's discovery of any occurrence or condition on the land of the Community or any land adjoining or in the vicinity of the Community which might result in Buyer or the Property being made subject to restrictions on ownership, occupancy, transferability or use of the Property or the Community pursuant to any applicable hazardous materials laws. Furthermore, Buyer specifically waives and relinquishes any and all claims of whatsoever kind or nature based on the condition of the land or the use or presence of any hazardous materials on, about, around, under, over or within the Property, and from and after the date that Buyer acquires title to the Property, Buyer shall hold harmless and defend Seller and its members, managers, stockholders, successors and assigns, from and against all claims, demands, actions, lawsuits, proceedings, fines, penalties, damages, liabilities, judgments, awards, expenses and costs (including attorneys' fees and costs) which may arise out of or may directly or indirectly be attributable to the condition of the land, the soils thereon and therein, and the use, generation, manufacture, treatment, handling, refining, production, storage, release, discharge, disposal, or presence of any hazardous material on, about, around, over or within the Property. As used herein, the term "hazardous materials" includes, but is not limited to, any and all radioactive materials, asbestos, polychlorinated biphenyls ("**PCB's**"), chemicals which cause cancer or reproductive toxicity, pollutants, contaminants, hazardous wastes, toxic substances, and other hazardous substances or materials listed, described or defined in 40 CFR Para. 302, as amended from time to time. Buyer and Seller agree that the covenants and agreements contained in this paragraph shall survive the Closing of the sale of the Property and shall be binding upon and inure to the benefit of the parties and their respective heirs, personal representatives, successors and assigns.

Uses Within and Around the Community. Buyer understands, acknowledges, approves and agrees, as set forth here, and in certain instances in the Declaration(s) and Deed, that: (a) the land of the Community may have been used previously for commercial agricultural and farming operations and in connection therewith, fertilizer and pesticides, among other things, may have been applied and used upon the land of the Community or lands adjacent thereto; (b) noise levels in the Community may exceed noise level standards for residential-zoned areas promulgated by the State Department of Health, and that these noise levels may not be acceptable to some individuals; (c) the Community may be located near or adjacent to properties that are or were used for the growing, processing, production and harvesting of diversified agricultural products, including corn and other agricultural

genetically modified organisms or "GMO" products or related uses and the development of alternative energy projects (the "**Agricultural Properties**") that may have a limited buffer area, if any, between the agricultural use and the Community, as well as a variety of commercial and industrial properties; (d) further development of mixed residential (multi-family, single family and affordable), commercial, industrial, recreational utilities facilities/substations and public projects (including without limitation roads, bus stops, railroad, parks, schools, preschools and day care centers) may be ongoing and may continue within the Community directly adjacent to Buyer's Home and within the Community in the vicinity of Buyer's Property for a considerable period of time after Buyer has occupied the Property; (e) there are or may be a variety of pets within the Community that may not be acceptable to some individuals or may create a nuisance; (f) aboveground and underground radio transmission wires, high voltage electric lines and microwave telecommunications facilities and civil defense tower(s) are located within and around the Community, which lines purportedly may emit electric and magnetic fields; (g) certain lands within the Community may be irrigated with treated effluent, reclaimed water or other sources of non-potable water, and (h) the Property will be subjected to those other uses and circumstances described in this Disclosure Addendum (collectively, all the foregoing uses and circumstances set forth in this Section (Community Disclosures) are described as the "**Community Uses**"). Seller has the right, but not the obligation, to develop, market and sell as many affordable homes in the Community as Seller desires. Each Buyer hereby waives any and all claims arising out of the presence of affordable homes, or lack thereof, in the Community.

Surrounding Community Conditions and Uses. Each Lot in the Community may be periodically affected by certain environmental conditions due to historical, existing and prospective surrounding conditions and uses. The land of the Community was used previously for commercial agricultural and farming operations and in connection therewith, fertilizer and pesticides, among other things, may have been applied to and used upon the land of the Community or lands adjacent thereto. The Community is located near or adjacent to properties which are or may be used for agricultural, farming, animal husbandry or related uses. The Community will also include lots used for agricultural purposes. Further development, construction and sale of residential, commercial, recreational and public projects by Seller and others, which may include changes in use (due to zoning changes or other governmental authorization or otherwise), construction, grading, improvement and maintenance of adjacent and surrounding properties, including roadways, drainage facilities, sewage treatment facilities and the like is ongoing and may continue within the Community and within the vicinity of the Community for an indefinite period. Certain lands within the surrounding area and within the Community may be irrigated with treated effluent, reclaimed water or other sources of non-potable water. The land of the Community is subject to potential adverse soil conditions. Numerous schools and public parks may be built in Ho'opili, and the West Oahu campus of the University of Hawaii is just west of Ho'opili. All of these factors and uses may affect Buyer as a homeowner.

Commercial and community agricultural uses are planned in and integrated into Ho'opili. These uses will be supported by the Ho'opili Urban-Agriculture initiative. Lands within Ho'opili used for agricultural purposes will include, without limitation, land for commercial farming operations, shared and home gardens, community farms and gardens, civic farms, and urban gardens. The urban gardens are intended to feature edible landscaping throughout certain lots in Ho'opili, including lots within the Lehua Phase 2 Community. Commercial agricultural uses are protected under the Hawai'i Right to Farm Act, Hawaii Revised Statutes, Chapter 165. Homes in the Community may be subject to occasional dust from field operations, pollutants, smoke and debris from agricultural activities or feral lands in proximity to the Community, such as fires, odor, noise, and other agricultural cultivation. Buyer shall provide subsequent notice to Buyer's lessees, tenants or assignees of these aforementioned farming operations and practices on adjacent or contiguous land and the protections of such uses afforded under the Hawaii Right to Farm Act.

The Community may also be affected by traffic, aircraft noise, and adverse effects from the Kalaeloa Community Development District and an expansion of military uses and associated adverse impacts may occur within Kalaeloa and Pearl Harbor, which is east of the Community. The Community may be affected by airport noise overflight from the Honolulu International Airport and is near an active airstrip in Kalaeloa. Roads adjacent to the Community, which are not under Seller's control may be widened or modified. Significant widening and highway improvements are planned for Farrington Highway which is adjacent to Ho'opili and the construction of intersections within Ho'opili near or around the Community, including Kulanihako'i Street, Ho'omohala Avenue and Kualaka'i Parkway, may also impact the Community as a result of noise, nuisances, annoyances, and other impacts associated with the construction, operation, and maintenance of such improvements. A central hub of the planned Honolulu rapid transit rail system including, but not limited to, a rail station within the Ho'opili Community, one rail station west of the Ho'opili Community, portions of the guideway, and possibly park-and-ride and/or bus transfer facilities, will be located in or adjacent to Ho'opili, and the operation of the rail system may result in noise and other impacts associated with the operation of trains and mass transit related uses. Parts of the Ho'opili Community will be subject

to Transit Oriented Development regulations and neighborhood plans. An "Energy Easement Corridor" is adjacent to Farrington Highway which may contain jet and other petroleum based fuel underground transport lines as well as above ground and underground utility lines and electrical lines. The Community may be affected by surrounding operations effects created by or attributable to historical, existing, and prospective surrounding construction, development, agricultural, pasture, commercial and other non-residential uses and activities, which include, but are not limited to: (a) cane milling, burning, harvesting, tending, as well as fertilization and pest and weed control; or (b) cattle and other livestock grazing and pets that may be objectionable to residents; or (c) commute and off-hours (non-peak) traffic and parking. Areas surrounding and mauka of the Community may include quarrying operations.

The Ho'opili Community is a mixed-use development and includes within it, homes, schools, pre-schools, churches, parks, walkways, bicycle paths, government offices, library(ies), day care centers, hospital, urgent care, medical and medical emergency facilities, homeless shelters or transitional shelters, cellular towers, commercial, retail and industrial areas and operations, recreational and related facilities and other features common to urban environments, including without limitation to, a Community wide system of bicycle and walking paths, aboveground and underground radio transmission wires and high voltage electric lines, which lines purportedly may emit electric and magnetic fields. Easements shall be retained over the Community for some or all of the foregoing described uses, including, specifically, easements permitting the commencement, continuation and resulting effects of the foregoing uses, and all activities incidental to such uses.

Further, Buyer is aware that there are numerous materials and components required to construct and used in and around Buyer's Home to which certain individuals may be allergic or especially sensitive. Some of these materials such as paint, wood preservative treatments, insulation materials, glues, mastic, caulk, carpet or the like may cause lingering odors to which people are sensitive. Also, due to the nature of community living, various noises or odors due to elevators, trash areas, storage sheds, plumbing, impact, including, without limitation, noises from adjacent neighbors and other circumstances may result to which a Buyer may be especially sensitive. Mold and mold spores are also present in the Community and may be present in Buyer's Home. Certain strains of mold may cause adverse health effects in susceptible persons.

The Home is sold subject to these conditions, hazards and risks. Buyer is aware of and understands these risks, accepts them and has decided that the benefits of home ownership in the Community outweigh the detriments of such ownership.

Other Environmental Issues. Mold and mold spores are present throughout our environment and residential home construction is not, and cannot be, designed to exclude mold spores. If the growing conditions are right, mold can grow in your Home. You may be familiar with mold growth in the form of bread mold, and mold that may grow on bathroom tile. All mold is not necessarily harmful, but certain strains of mold have been shown to have adverse health effects in susceptible persons. The most common effects are allergic reactions, including skin irritation, watery eyes, runny nose, coughing, sneezing, congestion, sore throat and headache. Individuals with suppressed immune systems may risk infections. Some experts contend that mold causes serious symptoms and diseases which may even be life threatening. However, experts disagree about the level of mold exposure that may cause health problems, and about the exact nature and extent of the health problems that may be caused by mold. The Center for Disease Control states that a causal link between the presence of toxic mold and serious health conditions has not been proven. Moisture is the only mold growth factor that can be controlled in a residential setting. The Homeowner's Manual contains recommendations for positive steps and action a Buyer may take following possession of the Home to reduce mold. Buyer agrees to assume responsibility for the recommendations contained in the Homeowner's Manual to act in accordance with the best practice guidelines contained on the Governmental Internet Sites described in the Manual. Buyer further acknowledges that if there is any water damage or water intrusion to Buyer's Home, Buyer will take immediate action to prevent conditions which cause mold or mildew to develop. Also, since energy conservation has become a concern, the State of Hawaii uniform building code, specifically the energy standards, has created the need to build Homes that are more airtight. As a result, these Homes trap unwanted gases in different degrees depending on how each person lives within their Home. To date, measurements of such unwanted gases (such as the radon gas described below) are reported as parts of the air they occupy. Since the quality of air we breathe can affect our health, Seller recommends frequent airing of Buyer's Home by simply opening your windows to introduce fresh air uncontaminated with such gases. The United States Environmental Protection Agency (the "**EPA**") has indicated that a number of homes in the United States experience elevated levels of radon gas. Radon is a naturally occurring gas that is caused by radioactive decay of the element radium. Since radium is contained in the earth's crust and dissolves readily in water, radon can be found virtually everywhere and can enter the home through a variety of sources. Buyers seeking information about radon can contact the EPA or a state environmental office. Seller has no expertise in the measurement or reduction

of radon in homes or regarding acceptable levels or possible health hazards associated with radon. Seller makes no warranty or representation of any kind, express or implied, regarding the presence or absence of radon gas, or regarding the effectiveness of any architectural activities for reducing the presence of radon.

Non-Potable Water. The Board of Water Supply ("**BWS**") has required Seller to install separate irrigation water lines intended for non-potable water (the "**R1 Water Lines**") in connection with the irrigation of landscaping in Ho'opili. At some point in the future, the R1 Water Lines will carry treated effluent, reclaimed water or other sources of non-potable water. Until then, the R1 Water Lines will carry potable water. The R1 Water Lines will be required to be switched over to non-potable water when directed by BWS in its sole discretion. BWS has not advised Seller of BWS's contemplated timing for the use of the R1 Water Lines for non-potable water. Once BWS determines to implement use of the R1 Water Lines for non-potable water BWS will coordinate the conversion of use with the Master Association. The conversion will require, among other things, installation of a new water meter(s) and signage, all at the expense of the Master Association. Buyer may obtain information regarding the requirements of the Recycled Water Program at http://health.hawaii.gov/wastewater/home/reuse/.

Lehua Phase 2 Community Features. In addition to the adjacent agricultural and other uses described in this Addendum, a future middle school is planned eastward of the site and a future elementary school southeast of the site. Planned commercial and mixed use residential and commercial sites are planned throughout Ho′opili and may be improved with one or more of a medical clinic, school, day care facility or other commercial or retail uses. Private community parks, County parks and community gardens, opened to all Ho'opili residents are situate in various locations in Ho′opili. A community park may contain, among other things, a community center, swimming pool, manager's office and unit, pavilion and playground area, a portion or portions of which may be available for use for Community functions. Dogs may be permitted in the park. Ho′opili contains a temporary detention basin and stockpile area that will be used for those purposes for an extended period before it is developed. Affordable rental developments are planned adjacent to Lehua Phase 2. All of these factors and uses as well as other matters described in the Community Documents may affect Buyer's use and enjoyment of Buyer's Home. The Home is sold subject to these conditions, hazards and risks. Buyer is aware of and understands these risks, accepts them and has decided that the benefits of home ownership in the Community outweigh the detriments of such ownership.

Nuisances Related to Community Uses. Without in any manner limiting the foregoing, Buyer, in purchasing or otherwise taking title to any Property, does so with the express understanding and acknowledgment that the Community and the Property may be periodically affected by various hazards and by noise, dust, smoke, earthshock, soot, ash, odor, mold or mold spores, noxious vapors, the presence and/or transmission of pollutants or other hazardous materials, surface water runoff, or other adverse environmental conditions, including but not limited to those resulting from wind drift and other weather factors (collectively the "**Community Use Effects**") created or exacerbated by or attributable to the Community Uses and the historical, existing, and prospective surrounding construction, development, agricultural, pasture, residential, industrial and commercial and other non-residential uses and activities. Buyer specifically approves all of the foregoing uses, circumstances and activities, including changes in use due to zoning changes, other governmental authorization or otherwise (collectively the "**Community Operations**"). Buyer is strongly encouraged to inspect the Community and the various Community Operations to assess the impact of these operations, uses and circumstances on the Community and the Property. Buyer covenants and agrees, on behalf of Buyer and the tenants, lessees, family, servants, guests, invitees, licensees and employees of Buyer: (a) to assume and does hereby assume any and all risks associated with the Community Operations including specifically the presence of mold in the Home and the annoyances, inconveniences, impacts on property value or loss of the sale value, Community Use Effects and other nuisances thereby created; (b) to waive and does hereby expressly waive all rights to make any claim against and specifically releases Seller, the owners of the Agricultural Properties and any of their related entities, affiliates, successors-in-title, members, managers, stockholders, or assigns, arising out of or in connection with such activities, annoyances, inconveniences and nuisances, the clean-up or remediation of the same, including but not limited to (i) any claim for damages attributable thereto or for the design or the placement of improvements to the Community, the Property or the surrounding property, or any part thereof, or related or adjacent facilities, or to the orientation of the Home as it relates to exposure to sun or wind, or (ii) claims for the abatement or elimination thereof; and (c) to hold harmless and defend Seller and its affiliates, successors, members, managers, stockholders and assigns, from and against all claims, demands, actions, lawsuits, proceedings, fines, penalties, damages, liabilities, judgments, awards, expenses and costs (including attorneys' fees and costs) which may arise out of or may directly or indirectly be attributable to any and all of the foregoing.

Non-Disclosure of Neighbor's Plans. During the course of the purchase of a home, some buyers disclose information to Seller regarding the potential plans for homes, (e.g., landscape, hardscape, add-ons, repainting plans, etc.) and/or information about personal lifestyles (e.g., pets, interests, hobbies, etc.) Seller will not disclose such information to

prospective neighbors. Should Buyer wish to obtain any information about Buyer's prospective neighbors, Seller will, upon Buyer's written request, attempt to place Buyer in contact with Buyer's prospective neighbors, but makes no warranty that Seller will be able to do so or that the information which Buyer may obtain will be accurate.

Adjoining Land Uses. Buyer may have received written disclosures which depict the current and proposed land uses for the properties which adjoin the Community. Land uses are subject to change, and consequently, Seller cannot guarantee whether any information so disclosed is current. Also, land planning and zoning matters are complex and therefore the information which may have been supplied by Seller is not complete. If Buyer is concerned about the type of development that may occur on the adjoining properties, Buyer should discuss nearby land uses with the County Planning Department or the State of Hawaii departments or agencies involved, as may be the case, and otherwise conduct Buyer's own investigation of those matters. THE MARKET VALUE OF BUYER'S LOT IS NOT GUARANTEED BY SELLER AND MAY CHANGE DUE TO ADJOINING LAND USES BY OTHERS, INCLUDING WITHOUT LIMITATION THOSE USES BY THE STATE OF HAWAII AND/OR THE CITY AND COUNTY OF HONOLULU, ALL OF WHICH USES ARE NOT UNDER THE CONTROL OF SELLER.

Grading, Landscaping, and Building Materials. Development of the areas around the Community will cause dust in the Community during grading and landscaping work until adequate landscaping has been installed to minimize blowing dust. Seller will try to minimize the dust from its construction activities. Buyers understand, however, that Seller does not control all construction in the area and that dust is an inevitable result of the ongoing and surrounding construction. The grading of the soil and other elements created by nature, as well as building materials, many times create unwanted and undesired gases and other contaminates in residential and commercial buildings, both new and used.

Disposal of Toxic and Other Substances. Water that enters a storm drain flows directly to natural sources of water, including waterways, creeks, drains, rivers, lakes and that erosion has an impact on the environment. Unlike the water in the sewer system in the Lot which is being purchased by Buyer, which flows to wastewater treatment plants, water that enters a storm drain flows directly, without any treatment, to waterways, creeks, streams, rivers, lakes and/or oceans. Accordingly, the National Pollution Discharge Elimination System, the Regional Water Quality Control Board Orders covering the Community, and the policies and ordinances of the County prohibit discharging anything other than natural rain water into storm drainage systems, including gutters and streets which drain into storm drains. Toxic chemicals or hydrocarbon compounds such as gasoline, motor oil, antifreeze, solvents, paints, paint thinners, wood preservatives, fertilizers, lawn clippings, yard waste, detergents, pet waste, and other such materials and pollutants shall not be discharged into any street, public or private, gutters, or into storm drains or storm water conveyance systems. Buyer further acknowledges that the disposal of such pollutants and materials into a storm drain system may result in significant penalties and fines and that Buyer may be responsible for any activities by Buyer's contractors (e.g., painters, landscapers, etc.) who dispose of such pollutants from Buyer's Home or Lot into a storm drain system. Use and disposal of pesticides, fungicides, herbicides, insecticides, fertilizers, and other such chemicals shall meet all federal, state, and County requirements and requirements of any other governmental agencies having jurisdiction over the Property. All buyers within the Community are required to comply with such restrictions. Buyers are encouraged to consult with the County, other governmental authorities, and the refuse hauler in the area of the Community concerning the proper disposal of any toxic or hazardous materials. Dumping any such materials into sewers, gutters or storm drains is against the law.

Continued Construction. The construction of homes at the Community and other communities on nearby land will continue for some time. The roadways in and around the Community may be used for ingress and egress to the construction sites. The ongoing construction will cause dust, noise and increased traffic in and around the Community for a period of time. Due to these continuing activities, and notwithstanding dust and noise control measures employed by contractors, you may have to close windward facing windows in your Home during certain times of the day and may have to clean your Home more often. Certain persons may be more sensitive to these activities than others. Also, care must be taken around the construction sites, as hazardous conditions may exist temporarily due to the construction. You have decided to buy your Home knowing these facts and agree, as provided in your Sales Contract, that you will not hold Seller responsible for any damage, annoyance, inconvenience or nuisance you may experience as a result of the ongoing construction activity within the Community and surrounding areas.

Marketing Activity. Seller may continue to market homes in the Community for sale after you move into your Home. Seller may also use the Model Homes to market homes in other Communities. Seller's marketing activities may include operating a model home complex, displaying signs, balloons, flags, banners and conducting on-site events and other promotional activities. The ongoing marketing of homes may cause you some inconvenience and may disrupt your enjoyment of your Home.

Roads. Buyer is aware that the roads shown on the Subdivision Map may currently be private roadways that are proposed

to be dedicated to the County as public roadways in the future. They are used at Buyer's risk. Roads surrounding the Community will be extended in the future to serve other developments within the Ho'opili community. Seller makes no representation or warranty regarding the availability of parking along the public streets which may change once the streets are dedicated to the County.

Flooding. Buyer acknowledges that Buyer's Home is not warranted against damage due to floods. Buyer is responsible to conduct Buyer's own investigation regarding the potential for floods.

Pest Control. It is in Buyer's best interest, as a new homeowner, to contact a local pest control company to arrange for a preventive maintenance program. Please refer to the limited warranty for termites. The specifics of the program that must be established in order to maintain the termite warranty coverage described in the limited warranty as set out in the Customer Care Program. In many locations, especially where there are adjacent open spaces or agricultural uses, rodent control is essential. Uncontrolled, rodents can damage water and electrical systems in the Home. Buyer fully understands that it is Buyer's responsibility, not Seller's responsibility, to control pests (insects, rodents and the like) in and around Buyer's Lot and Home.

Setbacks. The building setbacks required by the Master Association may be more restrictive in certain circumstances than County building setbacks. Buyers should carefully read the Master Declaration and the Ho'opili Design Guidelines for information about these matters and building restrictions within the Community.

Construction Claims. State statute limits how a Buyer may make a claim against a contractor. Before making an arbitration claim for defective construction against the contractor who designed, repaired or constructed Buyer's Home, Buyer must serve on the contractor a written notice of any alleged construction defect ninety days before filing an arbitration claim. The contractor has the opportunity to make an offer to repair and/or pay for the alleged defects. Buyer is not obligated to accept any offer made by the contractor. There are strict deadlines and procedures under the law and failure to follow them may negatively affect Buyer's ability to file an arbitration claim.

Mediation and Arbitration. Buyer understands that by purchasing a Home in the Community, Buyer agrees to resolve any disputes with Seller, the administrator and insurer under the Limited Warranty, the builder, the contractor or others concerning the Home or the Community by way of mediation and arbitration without resort to the courts.

Buyer Obligation to Investigate. Nothing contained herein is intended to be a complete disclosure of all facts, which Buyer may wish to consider in buying a Home in the Community. Buyer is still obligated to conduct Buyer's own full investigation of all facts relevant to deciding where and when to buy. Buyer is hereby advised to seek the advice of independent tax, legal, and financial consultants.

Disclosure to Subsequent Purchasers. When Buyer sells Buyer's Home, Buyer is required to provide to the subsequent purchaser(s) any documents provided in conjunction with the original sale of the house, including, but not limited to, information that Buyer has regarding the Home, the Community, and overall Community, the information set forth in this and any other disclosures provided by Seller to Buyer and any other information that may be of value to the subsequent purchaser(s), including, but not limited to, the Master Declaration.

Preferred Provider Agreements. Seller has entered into a Preferred Provider Agreement with Hawaiian Telcom Services Company, Inc. ("**Hawaiian Telcom**"), which provides Buyer with a discount on a variety of Hawaiian Telcom services, including set top boxes, wifi, TV, and high-speed internet for which Hawaiian Telcom will be afforded special marketing rights at Ho`opili. Seller also plans to have Hawaiian Telcom provide wifi for the community parks and community centers.

Membership in Master Association. By purchasing a Lot and Home in the Community Buyer automatically becomes a member of the Master Association. Generally, without limitation, the Master Association is responsible for, among other matters, the administration of the Community, design review and the general and routine maintenance and upkeep of the Community Common Areas, the entry monuments and any other common areas. As a member of the Master Association, Buyer is required to pay an initial assessment and pay regular and special assessments levied by the Master Association. The Master Association has the right to lien Buyer's Property for non-payment. The initial dues and budget for the Master Association have been compiled by Hawaiiana Management Company, a licensed property manager. These assessments are subject to change without notice to Buyer and are expected to increase annually at minimum in an amount equal to or greater than the increase in the consumer price index. Although the property manager makes every effort to estimate the actual cost of operation, certain budget items, especially insurance in today's insurance market, may change. Seller advises that costs and expenses of maintenance and operation of a residential community are difficult to estimate initially, and even if such charges have been accurately estimated, such charges will tend to increase in an inflationary economy and as the

improvements age. Assessment charges can vary depending on the service desired by the owners. Buyer should examine the budget to see what services are included. Buyer should be aware that the estimates provided are of the date of the managing agent's certification and not reflect the actual charges that may be incurred upon the formation of the Master Association and the actual contracting for such services as maintenance, insurance, etc. In addition to the foregoing, each Owner must provide the Master Association with advance written notice of proposed title transfer of the Home, identifying the escrow established to handling the sale. The Master Association may levy a transfer fee to maintain a record of the new owners of the Home. The transfer fee constitutes a special assessment in respect of such Lot being transferred and shall be deposited into the purchase and sales escrow and disbursed therefrom to the Master Association.

Ho'opili Electronic Participation Program. If established by Seller, Buyer will have the opportunity to participate in the Ho'opili Electronic Participation Program by entering into the Ho'opili Electronic Participation Agreement at Closing and committing to maintain that participation for at least four (4) years so long as Buyer is living at Lehua Phase 2. The program requires Buyer to accept electronic communications from the Master Association and to establish automatic payment of Master Association assessments while owning a Home at Lehua Phase 2. Buyer may participate in the Ho'opili Electronic Participation Program by signing the Ho'opili Electronic Participation Agreement at Closing. If such program is established, a copy of the Agreement will be available from Buyer's sales representative.

Lehua Subdistrict Assessment. No subdistrict association dues for Lehua are currently planned, but may be assessed by the Master Association in respect of special features in the Lehua community (such as the pedestrian access lots and roadway landscape features) for which the Master Association has maintenance responsibility.

The term "Buyer" as and when used herein, or any pronouns used in place thereof, shall mean and include the singular or plural number, individuals, partnerships, trustees and corporations, and each respective heir, personal representative, successor and assign.

This Disclosure Addendum modifies Buyer's Sales Contract and is binding upon Buyer. Buyer agrees to the foregoing and acknowledges receipt of this Disclosure Addendum on: «SALE-DATE-MONTH-NAME-FORMAT» (date).

LEHUA PHASE 2 AT HO'OPILI
WARRANTY DEED AND RESERVATION OF RIGHTS

This Lehua Phase 2 at Ho'opili Warranty Deed and Reservation of Rights (this "**Deed**") is made this 26th day of April, 2021, by and between **D.R. HORTON HAWAII LLC**, a Delaware limited liability company, the address of which is 130 Merchant Street, Suite 112, Honolulu, Hawaii 96813 (hereinafter called "**Grantor**"), and **RUSSEL S. SAKATA, Trustee of that certain The Russel S. Sakata Trust, dated August 29, 2015, as the same may be amended and/or restated and ALLYSON K. KAAI, Trustee of that certain The Allyson K. Kaai Trust, dated August 29, 2015, as the same may be amended and/or restated,** both of whose address is **91-1026 Kahalepouli Street, Kapolei, Hawaii 96707** (hereinafter collectively called "**Grantee**");

WITNESSETH THAT

Grantor, in consideration of the sum of TEN DOLLARS ($10.00) and other good and valuable consideration paid by Grantee to Grantor, receipt of which is acknowledged, and of the promises and covenants of Grantee set forth in this Deed, which Grantee agrees to faithfully observe and perform, does hereby grant, bargain, sell and convey unto Grantee, as **tenants in common in trust, with power to sell, convey, exchange, partition, mortgage, lease, pledge or otherwise deal with and dispose of the lands of the trust estate**, all that certain real property in the residential subdivision known as "**Lehua Phase 2 at Ho'opili**" (sometimes referred to herein as the "**Community**") situate at Honouliuli, District of Ewa, City and County of Honolulu, State of Hawaii, more particularly described as **Lot 12**, area **4,759** square feet, more or less, as

shown on subdivision map approved by the Department of Planning and Permitting of the City and County of Honolulu, on July 31, 2020 (2019/SUB-58), recorded in the Bureau of Conveyances of the State of Hawaii ("**Bureau**"), which real property is more particularly described in Exhibit A (the "**Lot**"), and the reversions, remainders, rents, issues and profits therein (such interest, together with the Lot and improvements constructed on the Land are described as the "**Property**") and all of the estate, title and interest of Grantor, both at law and in equity, in and to the Property.

TOGETHER with all buildings, improvements, rights, easements, privileges and appurtenances on, to and running with the Property, including those with respect to use of private roadway facilities, if any, as may be set forth in Exhibit A, and the right of access from the Property to a public roadway, subject to the terms, conditions and reservations contained in this Deed and in Exhibit A.

SUBJECT, HOWEVER, TO the easements, restrictions, liens and other encumbrances on or affecting the Property as set forth in Exhibit A, and EXCEPTING AND RESERVING to Grantor, its successors and assigns, each of those easements, restrictions, reservations, covenants, liens, acknowledgments, and other encumbrances set forth in the Master Declaration of Covenants, Conditions, Restrictions and Easements for Ho'opili recorded in the Office of the Assistant Registrar of the Land Court of the State of Hawaii as Document No. T-9864231 (as amended, modified and/or supplemented, the "**Master Declaration**", which Master Declaration shall in all respect control over this instrument), the exhibits attached to the Master Declaration, the Supplemental Declaration Permitting Accessory Dwelling Units on Specified Lots (Lehua Phase 2 at Ho'opili) recorded in the Bureau as Document No. A-76470061, this Deed, and the limited warranty (the "**Limited Warranty**") delivered to Grantee by Grantor, all of which burden the Property and benefit Grantor.

FURTHER EXCEPTING AND RESERVING to Grantor, its successors and assigns, all easements of record described in Exhibit A and perpetual easements and rights of way over, across, under and through the Property conveyed by this Deed for all utilities (whether public or private or for the benefit it offers homeowners in the Community) including, but not limited to, water, drainage (including drainage channels, swales and ditches), sewer, gas, telephone, electricity, cable (including, without limitation, television cable), security systems, landscaping, irrigation, communication lines and systems and electromagnetic and optical transmission facilities and other similar service or public facilities purposes as Grantor in its discretion may designate, create, cancel or grant, whether or not the easements or rights of way are for the purpose of serving the Property hereby conveyed, including, without limitation, the right to enter upon the Property (even after recordation of this Deed), to construct, install, operate, maintain, repair, reconstruct, and relocate such lines, wires, circuits, conduits, cables, channels, pipes, swales, ditches, facilities and appurtenances for the indicated purposes and the right to grant such easements or rights of way to governmental agencies, public, quasi-public or private utility or service companies, other private entities, the association of homeowners, if any, or any other homeowner or group of homeowners in the Community or any adjacent community, without joinder or consent of, and without notice to, Grantee or Grantee's mortgagee. These reserved rights are to be exercised in a manner that will cause the least practicable interference with Grantee's occupancy of the Property.

GRANTOR FURTHER EXCEPTS AND RESERVES the benefits and burdens of the reciprocal appurtenant easements, for encroachment and maintenance purposes as between the Property and adjacent lots within the Community as set forth in the Master Declaration.

ALSO EXCEPTING AND RESERVING unto Grantor, its successors and assigns, as specified below without notice to or the consent or joinder of Grantee or Grantee's mortgagee, to create and record in the Bureau a File Plan covering the Community land which includes the Property, and to assign to the Lot a File Plan lot number, or to record an affidavit of a surveyor containing the metes and bounds for the Lot.

TO HAVE AND TO HOLD the same, together with all rights, easements, privileges and appurtenances thereunto belonging or appertaining or held and enjoyed therewith unto Grantee, absolutely and forever and in fee simple, according to the tenancy and estate set forth herein.

Grantor hereby covenants with Grantee that Grantor is lawfully seized in fee simple of the Property conveyed by this Deed; that the Property is free and clear of and from all encumbrances except as described in this Deed and in Exhibit A and except for the lien of real property taxes not yet by law required to be paid; that Grantor has good right and title to sell and convey the Property in the manner herein set forth; and Grantor will WARRANT AND DEFEND the same unto Grantee forever against the lawful claims and demands of all persons, except as mentioned in this Deed.

By acquiring ownership of the Property, Grantee acknowledges that Grantee has received, read and understood the Master Declaration and the Rules and Guidelines of the Design Review Committee ("**Design Guidelines**") described in the Master Declaration and further acknowledges, agrees with and accepts the disclosures, conditions, covenants, easements and reservations of rights contained therein; and Grantee agrees to observe and perform all of the terms, covenants, conditions and provisions required to be observed and performed by an Owner under this Deed, the Master Declaration and the Design Guidelines, and any existing or future amendments, supplements and/or modifications thereto; and Grantee further covenants and agrees that Grantee, for itself and Grantee's family, lessees, tenants, servants, guests, invitees, licensees, employees, or other persons who may occupy or otherwise use the Property will abide by all of the applicable terms, covenants, conditions and provisions set forth in the Master Declaration, the Articles of Incorporation (defined in the Master Declaration), the Bylaws (defined in the Master Declaration), the Design Guidelines, the Limited Warranty, and any other duly adopted rules and regulations of the Master Association, hereinafter defined (collectively, the "**Community Documents**"). Grantee covenants to indemnify, hold harmless and defend Grantor for any failure to so comply with, observe and perform any such covenant, condition, restriction or other provision contained in the Community Documents.

Grantee acknowledges and agrees that the Community is within and a part of an area intended to be developed as a master planned community known as Ho'opili as described in the Master Declaration ("**Ho'opili**" or "**Ho'opili Community**") and that the premises hereby conveyed and the Community are subject and subordinate to the terms and provisions of the Master Declaration, as it exists or may hereafter be amended, modified and/or supplemented. Without limitation of the matters set forth in the Master Declaration, the contents of which shall control over this Deed, the Master Declaration provides, among other things, for the establishment of the Ho'opili Community Association (hereinafter the "**Master Association**"), of which Grantee is a member, by virtue of the ownership of the Property. The Master Declaration further provides for the levy against the Property and the payment by Grantee of various regular and special assessments, and the right to lien the Lot for non-payment of assessments made by or on behalf of the Master Association.

Without limitation of the matters set forth in the Master Declaration, the contents of which shall control over this Deed, the Master Declaration and Limited Warranty, among other matters,

provide that Grantee, for Grantee and for Grantee's family, lessees, tenants, servants, guests, invitees, licensees, employees, or other persons who may occupy or otherwise use the Community, the Property or improvements to the Community, acknowledges and agrees that the Master Declaration and Limited Warranty contain various reservations in favor of Grantor, "Declarant" under the Master Declaration, as well as disclosures, covenants, undertakings, waivers of rights, disclaimers, limitations, requirements and restrictions, all of which are binding upon Grantee and all owners of property within the Community (and in the Ho'opili Community) and which include, but are not limited to: (a) specific limitations, restrictions, and requirements pertaining to the construction, installation, repair, modification, maintenance and/or appearance of improvements, access driveways, landscaping (which must be installed within a limited time period at Grantee's cost), private roadways and common driveways, if any, sewer, drain and electrical improvements and facilities, and boundary fences and walls, among others; (b) specific disclosures and disclaimers concerning the plans for the development and use of all or any part of the Community and/or Ho'opili, which may change at any time without notice to Grantee, and which may include but are not limited to the construction of residential and rental housing being developed in cooperation with the City and County of Honolulu's Department of Planning and Permitting or equivalent State agency as affordable housing available only for purchase or rental by home buyers or home renters satisfying specific median income limitations established by such agency or satisfying specific State or Federal income limitations; (c) specific provisions disclosing and authorizing continued extensive construction and sales activities within and around the Community, which may result in noise, dust, mold, vibration and other nuisances, disturbances, annoyances, hazards and effects, and providing for the acceptance by Grantee of any and all nuisance, irritation, annoyance, inconvenience and risk of damage attributable thereto, and further providing for the agreement by Grantee to suffer and permit all actions and consequences incidental to such ongoing construction and sales activities; (d) specific provisions detailing and disclosing various adverse environmental hazards, conditions or circumstances, including, without limitation, noise, dust, smoke, soot, ash, odor, noxious vapors, mold, surface water runoff, or other adverse environmental conditions described in the Master Declaration, which may affect the Community, the Property, and Grantee's use and enjoyment of the Property, and providing for Grantee's acceptance of the possibility of the occurrence of the same, assumption of the risk of such occurrence and damage attributable thereto, and the express waiver of all claims against Grantor and others arising out of or in connection with such adverse conditions or circumstances, including the right to seek damages or the abatement or elimination thereof; (e) specific provisions detailing and disclosing the potential impacts, including but not limited to traffic, aircraft noise, and the adverse effects from residential, commercial, agricultural, industrial and recreational uses within and surrounding the Community; (f) specific provisions detailing and disclosing the mixed residential and commercial uses within Ho'opili and the anticipated presence of schools, universities, churches, library(ies), day care centers, animal kennels and refuges, homeless shelters or transitional shelters, commercial and retail uses, possible future bus stop locations and facilities and bus routes (which are not in the control of Grantor), rail transit facilities, parks, walkways, bicycle paths, government offices, cellular towers, recreational and related facilities and other features common to urban environments, including, without limitation, a Community wide system of bicycle and walking paths and aboveground and underground radio transmission wires and high voltage electric lines, which lines purportedly may emit electric and magnetic fields; (g) specific provisions detailing and disclosing the potential impacts, including but not limited to traffic, noise and the adverse effects, resulting from the location of the Community near the West Oahu campus of the University of Hawaii, an electric substation adjacent to the Community along Kauluakoko Street and Kulanihako'i Street, which is anticipated to include, among other things and without limitation, 48kV and 12kV lines and related equipment, transformers, switchgear, switches and associated structures, bus conductors and connectors, lightning arresters and other associated pad mounted equipment, fencing with barbed wire, drive gates and main gates for

security control, signage, lights and cameras, portions of the planned Honolulu rapid transit rail system and guideway, rail station(s), and park-and-ride and/or bus transfer facilities, an "Energy Easement Corridor" adjacent to Farrington Highway, which may contain jet and other petroleum based fuel underground transport lines, the potential widening of roads adjacent to the Community and the extension of roads within the Community to serve future development; (h) specific provisions detailing and disclosing that the Property may have been previously used for commercial agricultural and farming operation, and in connection therewith, fertilizer and pesticides, among other things, may have been or will be applied and used upon the Property, or lands adjacent thereto and may have a long term effect on the Property, the water, and/or the environment; and (i) specific provisions reserving by or on behalf of Grantor, and/or others various rights and easements affecting the Community and the Property, and Grantor the right to make specific grants thereof without joinder by Grantee or Grantee's mortgagee.

Without limitation of the foregoing, Grantee acknowledges and agrees that commercial and community agricultural uses are planned in Ho'opili and will be supported by the Ho'opili "Urban-Agriculture" initiative, which will include without limitation, land for commercial farming operations, shared and home gardens, community farms and gardens, civic farms, and urban gardens. The urban gardens are intended to feature edible landscaping throughout certain lots in Ho'opili and specifically within lots within the Lehua Phase 2 Community. Commercial agricultural uses are protected under the Hawai'i Right to Farm Act, Hawaii Revised Statutes, Chapter 165. Grantee further acknowledges and agrees that Grantee shall provide subsequent notice to Grantee's lessees, tenants or assignees of these aforementioned farming operations and practices on adjacent or contiguous land and the protections of such uses afforded under the Hawaii Right to Farm Act.

In furtherance of and without diminution of the foregoing, Grantee hereby further acknowledges and approves the obligations imposed on Grantee pursuant to the terms of this Deed, the Master Declaration, and the Community Documents and reservation by Grantor of each and all of the following rights and easements:

(a) Grantor, and its agents, employees, contractors, licensees, successors, mortgagees and assigns (collectively, the "**Grantor Parties**"), shall have an easement to conduct extensive sales activities on and at the Community, including the use of any improvements within the Community owned by Grantor (and any other home, with the express permission of the owner of such home) for model homes, sales and management offices, parking and extensive sales displays and activities, and the posting and maintenance of signs and other advertisements relating to such sales activities.

(b) Grantor and the Grantor Parties shall have an easement over, under and upon the Community, including the Property, as may be reasonably necessary for the completion of improvements to and correction of defects, as the term is defined in the Limited Warranty and any applicable termite warranty, and other warranty or "punchlist" items in the Community or the Property.

(c) Grantor and the Grantor Parties shall have an easement over, under and upon the Community and each and any portion of the Community including the Property and the individual homes to create and cause noise, dust, vibration and other nuisances or annoyances created by and resulting from any work connected with or incidental to the development, construction and sale of any home or other improvement to the Community, any additional phase to the Community, or any other community which Grantor, its successors or assigns, may develop

on property adjacent to or in the vicinity of the Community. Grantee and any other person acquiring any interest in the Community waives any and all rights, claims or actions that might otherwise be asserted against Grantor or the Grantor Parties and their respective members and managers based on any such noise, dust, vibration and other nuisances or annoyances.

(d) Grantor and the Grantor Parties shall have an easement to enter upon, across, over, in and under any portion of the Community, including the Lot, for the purpose of changing, correcting, or otherwise modifying the grade or drainage channels of any portion of the Community so as to improve the drainage of water on the Community. Reasonable efforts shall be made to use this easement so as to disturb as little as possible the uses of Grantee, to undertake such drainage work promptly and expeditiously, and to restore any areas affected by such work to a sightly and usable condition as soon as reasonably possible following such work.

(e) There shall be reciprocal appurtenant easements of encroachment as between adjacent lots due to the unintentional placement or settling of shifting of the improvements constructed, reconstructed, or altered thereon (either initially by Grantor or subsequently by Grantee if in accordance with the terms of the Master Declaration) to a distance of not more than one (1) foot, as measured from any point on the common boundary between said adjacent lots, along a line perpendicular to such boundary at such point; provided, however, in no event shall an easement for encroachment exist if such encroachment occurred due to willful and knowing conduct on the part of Grantee. These easements shall be for the encroaching improvements and their maintenance (including access to and from the encroachment).

(f) Grantor reserves the right either to record an affidavit of a surveyor containing the metes and bounds description of the Lot or to file and to record a File Plan covering the residential subdivision lots above described, either of which actions are specifically authorized by Grantee and Grantee's mortgagee(s) without the joinder or consent of Grantee and/or Grantee's mortgagee(s). Grantee expressly acknowledges and agrees that Grantor may submit and record with the Bureau such affidavit describing the Lot or File Plan depicting the legal description of the Subdivision and all of the lots and easements therein, wherein references to lots and easements shall be consistent with such references in the Subdivision and that upon the approval and filing of the File Plan at the Bureau, the descriptions of, and references to, the Subdivision, and all lots (including the Property) and easements therein, as set forth in the File Plan shall replace and supersede the description of the Subdivision, and the lots (including the Property) and easements therein, set forth herein and in Exhibit A attached hereto.

(g) Pursuant to the Master Declaration and the Supplemental Declaration Permitting Accessory Dwelling Units on Specified Lots (Lehua Phase 2 at Ho'opili), the Property may not be improved with an accessory dwelling unit, which is a second dwelling unit, including separate kitchen, bedroom and bathroom facilities, attached or detached from the primary dwelling unit on the Lot, except with the express consent of the Grantor evidenced by recordation of a Supplemental Declaration (defined in the Master Declaration) permitting such use.

By acquiring ownership of the Lot, Grantee hereby further covenants and agrees, for the benefit of Grantor and its successors and assigns, as follows:

(1) The foundation systems for the buildings have been designed in accordance with the recommendations of geotechnical and structural engineers to meet the requirements of the soil and structural conditions and those of local public agencies. The foundation type employed is generally a post-tensioned waffle-mat style slab and may include perimeter walls. Grantee is aware that any alteration to the foundation system (or cutting into the foundation) made in order

to install or modify landscaping or to alter gutters, porches, porch materials, or decks for any reason or purpose may adversely affect the foundation system and/or moisture or vapor barriers, is very hazardous and may result in serious damage to the improvements to the Property, personal injury, or both. Grantee agrees that (a) Grantee shall not cut into or otherwise tamper with the post-tensioned waffle-mat style slab; (b) Grantee shall not permit or allow any other person to cut into or tamper with the foundation system; (c) Grantee shall disclose the existence of the foundation system to any person who rents, leases or purchases the Property; and (d) Grantee shall indemnify, defend and hold Grantor and Grantor's agents, free and harmless from and against any and all claims, damages, losses or other liability (including attorneys' fees and costs of court) arising from any breach of this covenant by Grantee.

(2) Some of the soils within the Community, including the land below the Lot may have expansive characteristics, which will require special consideration and attention. Specifically, Grantor understands that the Lot has been graded in connection with the construction of improvements on the Lot and that excavated or fill material has been overlaid on the Lot in order to create the "pad" or foundation area for the improvements to the Lot. Grantee understands that it should exercise reasonable care to ensure that the non-expansive fill underlying the foundation is not disturbed and that proper drainage away from the home is maintained. Grantee understands and agrees that Grantor bears no responsibility for the manner in which Grantee irrigates the Property and the effect of such irrigation on the soils condition. Grantee shall not change the existing drainage pattern on the Property, and any modifications made to the grading or drainage pattern on the Property, and any modifications made by Grantee to the grading or drainage contours/swales/flowlines of surfaces or subsurface drainage systems, if any, installed by Grantor are made by Grantee at Grantee's own risk. Because any changes made to the grade or contour of the Property may alter the drainage flow and cause damage to other improvements within the Community and/or Ho'opili, Grantee must be sure to properly landscape so water is directed away from the home. Grantee must (a) ensure that any construction or alteration of patios, walkways, wall or planters or installation of landscaping or other improvements on the Property shall not alter or block the current surface or subsurface drainage systems installed by Grantor and (b) install and maintain appropriate additional drainage and/or gutter systems to accommodate such alterations and improvements. Regular inspection and maintenance must be performed to keep all drainage devices free from dirt, debris and obstructions.

Grantee acknowledges and agrees that, except for the express written limited warranty described herein as the Limited Warranty, a copy of which is included in Grantor's homeowner manual (the "**Homeowner's Manual**") a copy of which has been provided to Grantee, and any applicable termite warranty, Grantor is not making or offering any warranties, express or implied, with respect to the Property or the Community, including, without limitation, any warranties of merchantability, habitability, quality of construction, or fitness for a particular purpose. Grantor expressly disclaims any warranties other than the Limited Warranty, and any applicable termite warranty, including, without limitation, any express or implied warranties of merchantability, habitability, quality of construction, or fitness for a particular purpose with respect to the Property or the Community. Grantee acknowledges and agrees that: (i) Grantee has received, read and understands the terms of the Limited Warranty, any applicable termite warranty, and the Homeowner's Manual and is familiar with the coverage and exclusions contained therein, (ii) Grantee shall abide by all the applicable terms, covenants, conditions and provisions of the Limited Warranty, any applicable termite warranty, and Homeowner's Manual, and (iii) other than the Limited Warranty, and any applicable termite warranty, Grantor is making no other representations, promises, or warranties of any kind, including, without limitation, any express or implied warranties of merchantability, habitability, quality of construction, or fitness for a particular purpose with respect to the Property, or the Community. Grantor has established a customer care

program (which will be administered by Grantor pursuant to the section in the Homeowner Manual commonly referred to as the "Customer Care Program" (the "**Customer Care Program**")). The Limited Warranty, any applicable termite warranty, and the Customer Care Program do not cover and Grantee acknowledges and agrees that the Limited Warranty, any applicable termite warranty, and the Customer Care Program do not cover (i) any consequential damages, including, but not limited to, damage to the Property or the Community that is caused by a warranted defect (as defined in the Limited Warranty) but is not itself a warranted defect and/or any claims for emotional distress, lost opportunity, profit or time (from Grantee's employment or otherwise), loss of use of the Property or any other improvements in the Community, the costs of shelter, transportation, food, moving, storage or other incidental expenses related to relocation during repairs of the Property, or (ii) any appliance, equipment, or other items which are "consumer products" for purposes of the Magnuson-Moss Warranty Act, 15 U.S.C. § 2301, et seq., or which are "consumer goods". The only warranties of such consumer products or goods are those which the manufacturer provides to the purchaser. Information as to such manufacturer's warranties will be provided to Grantee. Grantor does not assume any obligation to service or repair such consumer products or goods. They are included on an "AS IS" basis with Grantee assuming the entire cost of all necessary service, repair, or replacement in the event of defect in quality or performance. With respect to appliances or other consumer products included in Grantee's purchase of the Property hereby conveyed, this Deed operates as an assignment from Grantor to Grantee of all manufacturer's or dealer's warranties, if any, covering any such appliances or consumer products for the unexpired term thereof to the extent that Grantor has the right and power to make such an assignment. Grantee acknowledges and understands that Grantor is not stating that any such warranties exist, or that such an assignment will be effective, nor is Grantor adopting any such manufacturer's or dealer's warranties or acting as a co-warrantor, but Grantor is merely attempting to pass through to Grantee the benefits of such warranties, if any exist. Grantee specifically agrees that during the term of the limited warranty afforded by Grantor to Grantee under the terms of the Limited Warranty, and any applicable termite warranty, Grantee shall in each and all instances permit Grantor or Grantor's designated representative and/or the administrator of or insurer under the Limited Warranty and any applicable termite warranty, or their respective representative to repair any and all items classified by Grantor or the administrator as items covered by the Limited Warranty and any applicable termite warranty or provide such alternate coverage in respect of warranted items available thereunder, and that Grantee shall have no further rights and Grantor no further obligation to Grantee in respect of such matters repaired or administered as provided therein.

Without limitation of any other provision herein contained, Grantor hereby grants Grantee a non-exclusive right of entry for access purposes over, upon and across the roadway lots (the "**Roadway Lots**") more specifically described in Exhibit A attached to this Deed owned by Grantor and others; provided, however, that such right of entry shall automatically terminate upon dedication of the Roadway Lots to any governmental authority. Grantee, for Grantee, its successors and assigns, and Grantee's family, lessees, tenants, servants, guests, invitees, licensees, employees, or other persons who may occupy or otherwise use the Property or improvements to the Property, acknowledges, covenants and agrees that (a) Grantor may continue to use the Roadway Lots for construction and sales activities within the Community, which may from time to time result in noise, vibration and other hazards and inconveniences to Grantee; (b) Grantee shall use the Roadway Lots with due care for public and private safety and shall comply with all laws, statutes, ordinances, and all rules and regulations of Grantor while occupying or using the Roadways Lots; (c) Grantee will not interfere with any work being performed, operations being carried out, or use being engaged in on the Roadways Lots by, on behalf of, or authorized by Grantor; (d) Grantor shall have no liability or obligation of any nature to Grantee, Grantee's family or household members, or Grantee's guests as a result of such

persons' entry upon or use of the Roadway Lots or other property owned or controlled by Grantor; and (e) Grantee shall indemnify and hold harmless Grantor and its affiliates, members, managers, officers, directors, representatives, employees and agents, from and against any and all loss, damage, costs, expenses, including attorneys' fees, liability, demands, or causes of action resulting from nuisance, injury, harm or death to persons or property arising out of or in any way connected with the right of entry granted by Grantor pending dedication as described above, except any loss or damage caused by the gross negligence or willful misconduct of Grantor; and (d) Grantee fully realizes and assumes all risks of using the Roadway Lots prior to dedication of the Roadway Lots as described above, including, but not limited to, the dangers associated with construction equipment and workers on or near the Roadway Lots, the dangers resulting from the condition of the Roadway Lots, and the dangers of collision with other vehicles and pedestrians using the Roadway Lots.

Without limitation of the foregoing, Grantee acknowledges and agrees that vehicular access to and from the Lot is restricted to ingress and egress to and from Lot 51 (Ulaula Loop) described in Exhibit A and is restricted along the Lot's rear boundary affected by Easement 2.

Without limiting the generality of the foregoing, Grantee hereby specifically acknowledges and agrees to all of the reservations of rights and easements as set forth and described in the Master Declaration in favor of Grantor and Grantor's successors and assigns as "Declarant". By acceptance of this Deed, Grantee hereby consents and agrees to and with Grantor that in order to effectuate the rights and easements reserved to Grantor as aforesaid, Grantor and/or Grantor's assignee shall also have the right to prepare, execute, file, process and record necessary and appropriate papers and documents to establish and grant easements and to make necessary and appropriate amendments of the Community Documents, all without further notice to Grantee or Grantee's mortgagee. By such acceptance, Grantee also agrees to execute all documents and to do all other things as may be necessary or convenient to effect the same; and such acceptance shall be deemed an appointment of Grantor and/or Grantor's assignee, with full right of substitution, as the attorneys-in-fact of Grantee (and any mortgagee of Grantee) to execute such documents and to do such things on Grantee's (or Grantee's mortgagee's) behalf, which grant of such power, being coupled with an interest, is irrevocable for the term of Grantor's reserved rights and shall not be affected by the disability of Grantee.

Grantee, on behalf of Grantee and Grantee's successors and assigns, agrees that in the event Grantee or any other person with an interest in the Community or the Property shall have any claim or cause of action arising out of or in any way related to this Deed, except as specifically provided above, the Master Declaration (and any and all rules, regulations and supplemental declarations promulgated pursuant to the foregoing, and the enforcement thereof), any aspect of the Property, the Community, Ho'opili, the development, construction, quality, sales, marketing, disclosures concerning, financing, delivery of the Property or Community or improvements thereto, the Limited Warranty, any applicable termite warranty, or each of those items identified in the Limited Warranty, all of which are incorporated herein by this reference, Grantor's Customer Care Program, and/or any other aspect of or activity with respect to Ho'opili, the Community or the Property (herein collectively the "**Covered Matters**"), against Grantor and/or any of the Covered Parties defined in the Master Declaration, such claim or cause of action (a "**Dispute**") whether such dispute is based on contract, tort, or statute, including, without limitation, any dispute described in the Master Declaration, whether such Dispute arises before or after the recording of this Deed, shall be resolved by binding arbitration in accordance with the Federal Arbitration Act (9 U.S.C. §1, et seq.) now in effect and as the same may from time to time be amended, to the exclusion of any different or inconsistent state or local law, ordinance, regulation, or judicial rule, by and pursuant to the rules of Dispute Prevention and Resolution, Inc. ("**DPR**") in

effect at the time of the initiation of the arbitration (sometimes the "**Arbitration**" or "**arbitration**") after it shall have first been submitted to the process of "Negotiation" and "Mediation" defined in the Master Declaration, and not by a court of law; provided, however, any and all Disputes relating to Unresolved Warranty Issues (as the same is or may be defined in the Limited Warranty) shall be resolved by mediation and arbitration in the manner specified in the Limited Warranty, utilizing the mediator and arbitrator selected under the provisions of the Limited Warranty; provided further that in the event of an arbitration of a Dispute relating to an Unresolved Warranty Issue under the terms of the Limited Warranty, the provisions of the Master Declaration shall apply only to the extent not in conflict with the Limited Warranty. Any such claim or cause of action shall be subject to arbitration regardless of whether the claim is against Grantor or the "**Covered Parties**", defined in the Master Declaration, which include, without limitation, Grantor's real estate broker, agent or attorney, the architects, engineers, or other design consultants for the Community, the contractor, subcontractors, sub-subcontractors, material suppliers or other persons involved with the Community, their officers, directors, agents, servants, employees or representatives, the managing agent, if any, and their respective officers, directors, agents, servants, employees or representatives , provided that such person(s) agrees to or has agreed to arbitrate such disputes; or if such claim or cause of action is filed jointly and severally against other parties, it shall be subject to arbitration whether or not such other parties are willing to submit to arbitration as provided in this Deed. Any arbitration shall be conducted in the County in which the Property is located, and notwithstanding anything to the contrary contained in the Limited Warranty, any such Arbitration shall be conducted at the office of the arbitrator. No punitive damages shall be awarded in any claim against Grantor or any other Covered Parties; provided however in the event such limitation is determined to be invalid or unenforceable then such limitation shall be severed and this Deed shall be construed as if such limitation were omitted and shall not affect the other provisions hereof. The arbitrator may not award attorneys' fees or costs (including expert costs) to the prevailing party. Further, no award for damages attributable to emotional distress or a multiple of actual damages based upon any theory of law may be awarded by the arbitrator in any claim against Grantor or any of the other Covered Parties. The award rendered by the arbitrator shall be final.

Grantor and Grantee mutually agree that this instrument may be executed in counterparts, each of which shall be deemed an original, and said counterparts shall together constitute one and the same agreement, binding all of the parties hereto, notwithstanding all of the parties are not signatory to the original or the same counterparts. For all purposes, including, without limitation, recordation, filing and delivery of this instrument, duplicate unexecuted and unacknowledged pages of the counterparts may be discarded and the remaining pages assembled as one document.

Grantor and Grantee mutually agree that the terms "Grantor" and "Grantee" as used in this Deed, or any pronouns used in place of such terms shall include the masculine, feminine or neuter gender, the singular or plural number, individuals or corporations, and each of their respective heirs, devisees, personal representatives, members, managers, successors, successors in trust and assigns, according to the context of such terms. If this Deed is signed by two (2) or more persons or parties as Grantee, all covenants of Grantee contained in this Deed shall be deemed joint and several. Each and every acknowledgment, acceptance, appointment, agreement and covenant of Grantee contained in this Deed shall run with the Property hereby conveyed and constitute an equitable servitude and lien on the Property, and each person or party hereafter acquiring from Grantee any interest in the Property shall be deemed to make such acknowledgments, acceptances, appointments, agreements and covenants by and upon such acquisition.

IN WITNESS WHEREOF, Grantor and Grantee have executed this Deed as of the day and year first above written.
