**Subject:** Opposing Sanford's expanding Leilani quarry operations - public comment

Dear Mr. Orodenker:

I am writing this letter to express my great concern and opposition to the expansion of Sanford's quarry in Leilani. I am a resident of Kamaili Rd. in Kaueleau, which closely borders the proposed expansion. The community (of humans, plants and animals) in this area has undergone tremendous hardship over the last year. We are only starting to recover. The environmental impact to this area from the 2018 eruption is tremendous. We have endured high levels of SO2 gases during the eruption, and increased traffic, noise and tourists both on the ground and in the air since. If the quarry expansion is allowed, this area will face further hardships including more noise and traffic due to heavy machinery, along with less habitat for plants and animals which have already suffered greatly. The area is conservation land and should remain that way! I request that areas in this vicinity, untouched by lava, remain untouched by humans as well, for the sake of the residents and environment.

Sincerely,  
Selah Levine
