24. Page 12 deleted “W-2 and W-2C filing requirements will not be met if you send us a file in any other format....”

Requirements

If you are an employer or payroll provider who is required by the federal government to electronically file Form W-2, Wage and Tax Statements, or Form W-2C during the year, you must also electronically transmit these informational returns to the Hawaii Department of Taxation. For Hawaii employees and withholding, use the Social Security Administration's EFW2 and EFW2C format and the Hawaii format specified in this guide.

We do not accept EFW2/EFW2C files for tax years before 2017.

IMPORTANT: A separate, direct file transmission to the Hawaii Department of Taxation may be completed via one of three transmission methods outlined in this guide.

Due Date

The due date for submitting W-2s electronically is **February 28** (February 29 for leap year). If you received an extension from the IRS to file the W-2s electronically, please email the Electronic Processing Section at Tax.Efile.Test.Bulk@hawaii.gov for specific instructions.

Avoid common mistakes:

Make sure that a line feed and carriage return are included after each record (each record is a single line of 512 fields for the W-2 file, 1024 for the W-2C file). **Do not** re-transmit any accepted W-2 record, as this creates duplicate records for your employee. If you need to correct a W-2, you must file a W-2C.

Data Type/ Required character set

The only acceptable character set is the American Standard Code for Information Interchange (ASCII).

File Size

Each file must be zipped and no more than 200MB. If multiple files are transmitted, each file must contain all required fields. Information for multiple employers may be within a file but the zip file may not be more than 200MB and must not break at an employee (a single employee record cannot span files).

Specifications

The file must meet the electronic filing specifications outlined by the Social Security Administration (guide available at <http://www.ssa.gov/employer/EFW2&EFW2C.htm>) and include additional Hawaii record specifications (fields, layouts) which are detailed in this guide. The file must be transmitted via one of the three methods outlined below.

Hawaii Required Fields – Form W-2 (see details on page 6 RA Record)

Header	Header	Field Recommendations
Code RA	Submitter Record	Required
Code RE	Employer Record	Required
Code RW	Fed. Employee Wage Record	Required
Code RO	Employee Wage Record	<i>Optional</i>
Code RS	Hawaii Wage Record	Required
Code RT	Fed. Total Record (RW)	Required
Code RU	Total Record (RO)	<i>Optional</i>
Code RV	Hawaii Total Record (RS)	<i>Optional</i>
Code RF	Final Record	Required

Hawaii Required Fields – Form W-2C

Header	Header	Field Recommendations
Code RCA	Submitter Record	Required
Code RCE	Employer Record	Required
Code RCW	Fed. Employee Wage Record	<i>Optional if no corrections</i>
Code RCO	Employee Wage Record	<i>Optional if no corrections</i>
Code RCS	Hawaii Wage Record	<i>Optional if no corrections</i>
Code RCT	Fed. Total Record (RCW)	Required
Code RCU	Total Record (RCO)	<i>Optional if no corrections</i>
Code RCV	Hawaii Total Record (RCS)	<i>Optional if no corrections</i>
Code RCF	Final Record	Required

Method of Transmission

Transmissions are required through one of three methods:

1. a simple web zip file upload through Hawaii Tax Online (HTO) (recommended for most small business taxpayers)
2. a Simple File Import (SFI) which is a Microsoft Excel file uploaded through HTO (see https://files.hawaii.gov/tax/eservices/ebiz/20pubef12_W2_Simple_File_Import.pdf)
3. the zipped & PGP encrypted file through the SFTP server HBFS method (see <https://tax.hawaii.gov/eServices/bulk>)

Transmission methods 1 & 2 (HTO file uploads) – Simple and free. These methods do **not** require any special software in order to upload the file. A zip file or Microsoft Excel file is submitted through HTO.

Take the following steps:

- a. Create an EFW2 file with a .txt extension, and then zip it with a .zip extension or create a Microsoft Excel file.
- b. Logon to HTO at <https://hitax.hawaii.gov>.
- c. Follow the prompts to upload the EFW2 file you created or import the Microsoft Excel file.
- d. For years 2019 and prior, select form HW-3.
- e. For years 2020 and forward, select form HW-14 last quarter for the filing year.

Note: If you are using a third-party service or program, check if it is able to export an EFW2 file that you could upload.

Transmission method 3 (SFTP file upload via HBFS) – You must already have an existing Bulk Filer Number and PGP encryption keys for HBFS in order to participate in the W-2 program. These credentials will allow the transmitter to access the Hawaii SFTP site to send transmissions and are valid year to year. Use the same encryption key for your zip file.

Transmitting Test Files

1. Transmission methods 1 & 2 (HTO file uploads) – There is no testing required, however, we highly recommend submitters validate their zipped EFW2 and EFW2C files through our validation application which can be found on our HTO landing page at <https://hitax.hawaii.gov>. The file will also be validated upon upload. For Simple File Import (SFI)

your file must adhere to the (SFI) specifications found in the handbook

2. Transmission method 3 (SFTP file upload via HBFS) – Once you have verified your files have proper structure by validating the file on the HTO website, submit your file through a test transmission and wait for approval by a member of the Electronic Processing Unit before being able to transmit production files. Please be sure to use the correct password (test or production) for the file type you are transmitting.

When Form EF-2 is approved, a Hawaii Bulk Filer Number, test login username and production login username will be provided to you. Use the test login username to transmit your test file to HBFS. Any information transmitted using the test login username will be treated as test data and is **not** considered “live” data. **We strongly encourage each transmitter to upload test files until the test file is accepted. This will ensure proper formatting of the file and will reduce errors when transmitting production files.**

File Naming Standard

Files submitted via **method 1** – HTO file upload must use the following naming standard:

[CompanyName]_[FormType]_[YYYYMMDDhhmmss].zip

Example: ABCPayroll_W2C_20200731020345.zip

Files submitted via **method 3** – SFTP file upload thru HBFS **MUST** be named utilizing the following standard:

[CompanyName]_[FormType]_[YYYYMMDDhhmmss].zip.pgp

Example: AcmePayroll_W2_20200831020345.zip.pgp

To prevent and quickly identify any wrong environment issues, test files **MUST** be submitted with a "_T" added after the timestamp and before the .zip.pgp as follows:

Example: AcmePayroll_W2_20200731020345_T.zip.pgp

CompanyName should be the submitter's.

Form Type should be either W2 or W2C.

Acknowledgments (proof of filing)

A transmitted file will either meet the content specifications and be accepted or will have an error and immediately be rejected. In order to receive Acknowledgements (ACKS), testing and certification for both good and bad W-2/W-2C files are required. ACKS will be sent for each W-2/W-2C file submitted and will include a status of whether the file was accepted or rejected. If the W-2 file is rejected, there will be one ACK file with a status of rejected that lists all the records in error for that W-2 file.

If you are not set up to receive ACKS, we will **NOT** notify you by email, letter, or by phone that the file was rejected or accepted.

Error Codes

If you are transmitting the file via method 1, you will automatically be validating the file when you upload. If you are transmitting the file via method 3, please validate your file through the HTO validation process before transmitting the file through our SFTP site.

There are no specific error codes. When a field does not validate correctly, the validation application will display an error message list of the encountered field errors. The list contains the row and position of the field in error, as well as a message stating the error.

Hawaii Field Validations

The file you transmit must meet the electronic filing specifications outlined by the Social Security Administration (guide

available at <http://www.ssa.gov/employer/EFW2&EFW2C.htm>) and include **additional** Hawaii record specifications (fields, layouts) which are detailed in this section.

What rules do you have for the employer Hawaii Withholding Tax Identification Number (WH Tax ID)?

- This is in the RS Record at Position 248-267.
- This is in the RCS Record at Positions 344-363 and 364-383.
- Only alphanumeric characters.
- Omit hyphens.
- The employer WH Tax ID should match the WH Tax ID under which tax payments were submitted to the Hawaii Department of Taxation on Form HW-14.

Rejection Resolution Procedure

If any part of the file was rejected, the entire file will be rejected. Once all errors have been corrected, the entire file must be resubmitted

Magnetic Media or Paper

The Hawaii Department of Taxation will not accept W-2 and W-2C information submitted on CD-ROMs, DVD-ROMs, tapes, and diskettes. These are not acceptable forms of transmission and will not be processed or accepted.

IMPORTANT: You will **not** receive a “Rejected” acknowledgement for files sent to us in other formats or methods. Please refer to the file specifications if you have questions about the correct file format.

Record Retention:

You must keep these documents and its information in your books and records for at least three years and submit them if we request. Only W-2 or W-2Cs electronically transmitted in compliance with the specifications provided in this document (EFW2 and EFW2C) are accepted or unless otherwise directed by us.

Important Reminders:

- A direct file transmission to Hawaii may be completed through either of the file transmission methods outlined in this guide (separate from the filing transmission to the federal government).
- Within the file, make sure that a line feed and carriage return are included after each record (each record is a single line of 512 fields for the W-2 file, 1024 for the W-2C file).
- Do not** re-transmit any accepted W-2 record as this creates duplicate records for your employee. If you need to correct a W-2, you must file a W-2C.
- Files should only contain records for the same tax period (e.g., only 2020 W-2Cs).
