COUNCIL ON REVENUES

STATE OF HAWAII
P.O. BOX 259
HONOLULU, HAWAII 96809-0259

September 10, 2015

The Honorable David Y. Ige
Governor, State of Hawaii
Executive Chambers
State Capitol, Fifth Floor
Honolulu, HI 96813

Dear Governor Ige:

At its meeting on September 3, 2015, the Council on Revenues raised its forecast for growth in the State's general fund tax revenues in fiscal year (FY) 2016 from 2.7% to 6.0%. (According to the procedure previously adopted by the Council, after the actual collections for FY 2015 became known, the Council's forecast for FY 2016 was automatically adjusted by applying the growth rate from the May meeting (2.7%) to the actual collections for FY 2015.) The Council reduced the forecast for growth in FY 2017 from 6.4% to 5.5%, left unchanged the growth forecasts for FY's 2018 and 2019 at 5.5% and 5.0% respectively, and reduced the growth forecasts for FY's 2020 and 2021 from 5.0% to 4.5%. The forecast for FY 2022 was for growth of 4.5%.

The forecast change for FY 2016 was based partly on information provided by the Department of Taxation on the status of refunds of the individual income tax which were temporarily delayed because of the review of potential fraudulent refunds and also partly based upon the Hawaii Supreme Court's decision resolving the online travel companies' Hawaii tax disputes. At the Council's May meeting, the Department predicted that refund delays in FY 2015, caused by new processing procedures put in place to prevent paying fraudulent refund claims, would cause about \$104 million of refunds that would ordinarily have been paid out in FY 2015 to be paid out instead in FY 2016. The Department also predicted that refund delays would occur in future years, but that the amount of the delayed refunds would be only about half as great as in FY 2015. However, at the Council's meeting of September 3, 2015, the Department reported that it was able to catch up with refund processing by the end of FY 2015. However, the cumulative individual refunds for FY 2015 is roughly one percent (1.0%) less than the prior FY 2014 and is not known if this will impact FY 2016. Because the Department caught up with and paid out the refunds which were expected to be delayed in FY 2015, this contributed to the Council's overestimate for growth in FY 2015. The Department

also estimated that payments in excess of \$39 million from the Hawaii Supreme Court's decision in the online travel companies would be released to the general fund in FY 2016 and that an additional \$19.7 million would come from Act 84, SLH 2015, which increased general fund allocations from the Conveyance Tax.

Council members discussed the effects of the significant drop in oil prices in 2015, of the continued strength of the U.S. dollar in foreign exchange markets, of the recent slowdown in economic growth in China, and of the recent drops in equity prices in the U.S. and elsewhere. The members continued to expect steady but modest growth in visitor arrivals and visitor spending, in total personal income in Hawaii, and, during the next several years, in new construction. However, forecasts for the more distant future were tempered by several factors, including anticipations for an inevitable cyclical downturn, a potential decline in construction in future years, and longer run adverse tendencies, such as retirements in the "baby boom" generation, which will reduce taxable earnings and replace some taxable earnings with untaxed social security and pension income.

Revised forecasts of State General Fund tax revenues for FY 2016 through FY 2021 and the new forecast for FY 2022 are shown in the table below. As in all multi-year forecasts, the estimates for the later years are subject to greater uncertainty.

General Fund Tax Revenues

Fiscal Year	Amount (in Thousands of Dollars)	Growth From Previous Year
2016	6,079,249	6.0%
2017	6,413,608	5.5%
2018	6,766,356	5.5%
2019	7,104,674	5.0%
2020	7,424,384	4.5%
2021	7,758,481	4.5%
2022	8,107,613	4.5%

In producing its forecasts, the Council adopted specific adjustments recommended by the Department of Taxation to reflect effects on General Fund tax revenues of tax law changes enacted by the 2015 Legislature, including the following:

- Act 84, SLH 2015 establishes maximum dollar amounts for the allocations of the Conveyance Tax to the Land Conservation fund and the Rental Housing trust fund, and eliminates allocations to the Natural Area Reserve fund starting in FY 2016. The annual general fund revenue gain is estimated to be \$19.7 million for FY 2016 and later.
- Acts 117 and 121, SLH 2015 changed allocations of the Transient Accommodations Tax (TAT). According to Act 121, TAT allocations for FY 2016 and later are as follows: Tourism special fund \$82 million; Counties \$93 million (except \$103 million in FY 2016); Convention Center special fund \$26.5

million; and Turtle Bay conservation easement \$1.5 million. Act 117 allocated \$3 million annually to the Special Land Development fund starting in FY 2017. The changes in allocations are expected to yield \$5 million in additional general fund tax revenues in FY 2016 and \$2 million annually thereafter.

- Act 120, SLH 2015 provides a tax credit for converting cesspools to a septic system or connecting to a wastewater system. The tax credit expires December 31, 2020 and is estimated to reduce general fund tax revenues by \$5 million annually from FY 2016 through FY 2021.
- Act 223, SLH 2015 modifies the food/excise tax credit (an increase for certain taxpayers) for tax years 2016 and 2017. The Act is estimated to reduce general fund tax revenues by \$6.5 million in FY's 2017 and 2018.
- Act 238, SLH 2015 reduces the allocation of tobacco taxes to the Trauma special fund, caps the amount allocated to the fund, and also caps the allocations to the Emergency Medical Services and Community Health Centers special funds, effective July 1, 2015. The Act is estimated to increase general fund tax revenues by \$4 million in FY's 2016 and later.

The Council also took into account provisions from earlier legislation, including the following:

- Act 107, SLH 2014 reestablished the energy systems development special fund. It also extends the \$1.05 per barrel rate for the environmental response tax, which was set to expire at the end of fiscal year 2015, through fiscal year 2030, as well as the allocations of the tax to the general fund. The annual general fund revenue gain is estimated to be \$15.5 million for fiscal years 2016 through 2030.
- Act 89, SLH 2013 amends the motion picture digital media and film production tax credit. The Act increases the credit rate from 15% to 20% for productions on Oahu and from 20% to 25% for productions on the neighbor islands. The Act also increases the cap on the amount of the credit per production from \$8 million to \$15 million and moves the expiration date for the credit from January 1, 2016 to January 1, 2019. The Act is estimated to raise the annual cost of the tax credit by about \$21 million.
- Act 163, SLH 2013 makes permanent the GET exemption for certain expenses paid by hotel operators and timeshare projects and removes the cap on the aggregate amount of the exemptions that can be claimed. The Act is estimated to reduce GET collections by about \$13 million annually.

The Department of Taxation has prepared a report (attached) detailing line-item forecasts for various components of the General Fund, reconciled to the Council's forecast growth rate for total General Fund tax revenues. The line-item forecasts include components, such as revenues from the General Excise Tax and from the Individual Income Tax that the Council does not forecast separately. Also, the Department of Budget and Finance has prepared the attached report to update its projections for change

The Honorable David Y. Ige
